Other rules and regulations—Regulation CC, Regulation E, and NACHA rules—also influence depository institutions' treatment of ACH credit transactions. The Board's Regulation CC requires depository institutions to make funds received via ACH credit transactions available for withdrawal no later than the opening of business on the business day following the settlement date, but does not preempt existing rules that may require earlier availability (12 CFR 229.10(b)). The Board's Regulation E requires depository institutions to credit consumers' accounts as of the settlement day but does not specify a time of day, and it does not require depository institutions to make funds available for use on the day they are credited (12 CFR 205.10(a)(2) and Official Staff Commentary, Q10-13). NACHA rules, which are incorporated in the Reserve Banks' Uniform ACH Operating Letter, are more stringent and require depository institutions to make funds available for both consumer and corporate payments on the settlement day.[3] Further, NACHA guidelines encourage depository institutions to make funds available to consumers at the opening of business on the settlement day.[4]

VOL 54 ISS 40 MR 2 1989 UMI

*Current Practices*—Payroll, pension, and annuity payments are typically processed one or two days before the settlement date, and transaction data are generally provided to receiving institutions before the settlement date. The majority of depository institutions make these payments available to consumers at the opening of business on the settlement day. Larger dollar corporate-to-corporate payments are typically processed at night, with transaction data generally provided to receiving institutions at the opening of business on the settlement date. Funds availability practices vary; funds may be made available to customers on the settlement day, or not until the business day following the settlement day.

*Credit Exposure*—The credit exposure faced by depository institutions and the Federal Reserve varies inversely based on the finality accorded ACH credit transactions. That is, as Federal Reserve risk is reduced, depository institutions' risk tends to rise.

Under the Reserve Banks' current ACH operating circular, receiving depository institutions are generally exposed to some risk of loss on the settlement day as well as the business day following the settlement day. This risk is due to most institutions' practice of making funds available to their customers on the settlement day even though the Reserve Banks reserve the right to reverse transactions until the time all reserve and clearing accounts have been posted. If payments are reversed and customers do not reimburse their depository institution for the funds they have used, the institution would experience a loss. The Reserve Banks' risk is limited to situations in which it is not discovered that an originator is unable to fund its payments until the day following the settlement day.

While receiving institutions are exposed to the risk of financial loss, the Federal Reserve has taken steps to reduce this risk. The Reserve Banks have implemented procedures to monitor ACH credit transactions originated by "problem" institutions, that is institutions in weak financial positions. In addition the Reserve Banks are implementing procedures that permit them to require problem depository institutions to prefund or pledge collateral to cover the value of credit transactions originated at the time they are deposited for processing.

Furthermore, over 90 percent of all ACH credit transactions are payroll, pension, and annuity payments. The median value of these payments is less than $600, and the depository institutions receiving such payments are generally a highly diverse group. As a result, the potential financial loss faced by institutions receiving small-dollar payments is not substantial.

*Changes in the Use of Payment Transactions*—It does not appear that there has been a shift of funds transfers to the ACH. Nevertheless, the Board believes that granting finality for ACH credit transactions at the opening of business on the settlement day could lessen the distinction between the ACH and the funds transfer mechanisms and provide incentives for depository institutions to change their payment practices.

*Proposed Finality Terms*—After review of the current practices, the credit exposure of depository institutions and Reserve Banks, and the potential for shifts in payments transactions, the Board has determined that Federal Reserve policies should provide receivers of ACH credit transactions more certainty regarding the time at which the Reserve Banks grant finality. Accomplishing this objective poses several problems for the Reserve Banks. First, supervisors of depository institutions typically close institutions late in the day. The Reserve Banks, therefore, generally would not be able to begin notifying receiving institutions that an originator is being closed until late in the afternoon. Second, over 20,000 institutions use the ACH mechanism. While all of these institutions ordinarily would not be affected by the closing of one originating institution, a potentially large number of institutions may be affected and a considerable amount of time may be required to notify those institutions that transactions will be reversed.

In order to balance the risks faced by the Reserve Banks and receiving depository institutions, the Board proposes that ACH credit transactions be treated as final payments to the receiver at 6:30 p.m. local time for the receiver on the settlement day. The Reserve Banks will provide receiving institutions the name of the originating institution whose transactions will be reversed by means of a wire notice to institutions with on-line connections to Fedwire before 6:30 p.m. local time. If notice of reversal is not sent to an on-line receiving institution by 6:30 p.m. local time, then the items will be considered to be final. For those institutions that do not have on-line connections to Fedwire, the Reserve Bank will attempt to give notice by telephone by 6:30 p.m. local time. Due to the difficulty of making potentially numerous telephone calls to institutions that have already closed for business for the day, the Board does not believe that it should accept the losses that may accure if notice can not be given by 6:30 p.m. Therefore, the firm 6:30 p.m. finality only applies to on-line institutions. For other institutions, the Reserve Banks will attemp to give notice, but the transactions will not become final if such notice is not given by 6:30 p.m.

The Board requests comments on the proposed 6:30 p.m. finality. The Board also requests comment on whether this notice is useful to the receiving institution without the accompanying transaction data, and how late after 6:30 p.m. this notice may be given and still be useful to the receiving institution. Because timely notice can be best provided through computer connections, the Board requests comments on how the 6:30 p.m. time for notification of reversals should be handled if (1) a Reserve Bank's computer is down; or (2) a receiving institution's computer is down or shut off.

Granting finality at 6:30 p.m. local time exposes the Reserve Banks to some risk of loss. Specifically, losses may be incurred if an originator were closed unexpectedly and had not funded the ACH credit transactions it had originated before it was closed. In addition, losses could be incurred if institutions located in the mid-west and western parts of the country are closed late in the day. For example, if an institution located in California were closed at 5:00 p.m. Pacific Time, the Reserve Banks may be able to notify receiving institutions located in the Mountain and Pacific time zones that transactions originated by the institution would be reversed before 6:30 p.m. local time. Because the time set for finality in the Central and Eastern time zones would have passed before the California institution was closed, the Reserve Banks would not be able to reverse transactions in those regions of the country and would absorb any losses incurred. The Board requests comments on whether it is appropriate for the Federal Reserve to accept such risk of loss and whether commenters believe that a private ACH processor would accept this type of risk.

It is proposed that, after giving a receiving institution notice of the closing of an originator, the Reserve Banks will make available to receiving depository institutions data on the individual transactions that are being reversed. This transaction data will be provided before the opening of business on the business day following the settlement day. In the case of institutions with electronic connections to the Reserve Banks or that pick up their ACH transactions at a Federal Reserve office, reversed transactions would be made available no later than the close of the night cycle. For institutions whose transactions are delivered via courier or mail, the data would be included with transactions delivered on the next delivery to the institution. In addition to comments on this proposal, the Board also requests that commenters give the latest time that a depository institution could receive reversal transactions and still update its accounts before opening for business on the day following the scheduled settlement date.

As an added protection against potential losses, the Board proposes that the Reserve Banks reserve the right to charge the accounts of originating institutions any time during the settlement day for all ACH credit transactions settling on that day. The Reserve Banks would use this right in situations where there were concerns about an originator's ability to fund ACH credit transactions on the settlement day. This change would reduce the probability that the Reserve Banks would need to reverse transactions that had been delivered to receiving institutions. As a result, it would reduce the risk faced by receivers of ACH credit transactions.

*ACH Debit Transactions*—The Reserve Banks' ACH operating circular currently indicates that credits given for ACH debit items will not be reversed after the opening of business on the business day following the settlement day. It also indicates that a Reserve Bank may refuse to permit the use of credit given for a debit item if it judges that there may not be sufficient funds in the originator's account to cover chargeback or return of the item.[5] This finality granted by the Reserve Banks does not change the receiver's right of return.[6]

*Credit Exposure*—The risk faced by institutions originating ACH debit transactions is not affected substantially by the finality granted by the Federal Reserve. In most cases, some portion of debit transactions are returned by receiving institutions, and the return items may not be received by the originating institution until as many as five days following the settlement day. Most depository institutions have agreements with their customers to charge back such items. Alternatively, they place holds on funds collected through the ACH if they are concerned about the financial stability of their corporate customer.

[5] Uniform ACH Operating Letter, paragraph 23.
[6] *Ibid*, paragraph 23.

Because institutions receiving ACH debit transactions are obligated to settle for them by the close of business on the settlement day, the Reserve Banks are able to determine whether debit items have been paid when all transactions have been posted to reserve or clearing accounts. As a result, a Reserve Bank would be able to determine whether payments needed to be reversed in the morning on the business day following the settlement day. To provide greater certainty for depository institutions, the Board proposes to treat credits given to originators of ACH debit transactions as final at 10:00 a.m. local time on the business day following the settlement day. If a receiver of debit transactions fails and the ACH transactions are to be reversed, the Board proposes to advise originators of ACH debit transactions of the name of the receiving institutions whose payments are being reversed by 10:00 a.m. on the business day following the settlement day. Transaction data on these reversals would be made available to institutions with electronic connections to the Reserve Banks or to those that pick up their transactions at a Federal Reserve office no later than the close of the day cycle on the business day following the original settlement date. Reversal transactions would be included on the next delivery to institutions served by couriers or the Postal Service.

*Debit Item Adjustments*—The NACHA rules permit receiving institutions to return consumer debit transactions up to about 45 days after the settlement date, if a consumer provides notice that such debit entry was, in whole or in part, not authorized by the consumer.[7] Such returns are called debit item adjustments and the Reserve Banks process and settle for them. If the originator of the debit item has failed before the item is submitted for processing, the Reserve Banks currently would be obligated to credit the returning institution and would only have a claim against the failed bank or possibly the failed bank's customer. Processing debit item adjustments, therefore, exposes the Reserve Banks to some risk of loss.

This right of a consumer to obtain credit on the basis that an ACH debit transaction was not authorized differs from a customer's right to obtain credit in the case of a forged or altered check. In the case of a forged check, the payor (receiving) bank bears the risk. In the case of a forged indorsement or an altered check, the customer must prove the alteration of forgery, and the receiving bank must claim against prior banks on the basis of breach of warranty.

[7] *Operating Rules of the National Automated Clearing House Association*, page OR 17.

The Board does not believe it is reasonable for an intermediary, such as a Reserve Bank, without any knowledge of the transaction to assume the risk of loss. Rather, this risk should be borne by the parties involved. Therefore, the Board proposes that the Reserve Banks grant credit for debit item adjustments only when they can recover credit from the originating depository institution.

*Proposals*—Based on the preceding discussion, the Board of Governors requests public comment on the following proposals concerning the finality of ACH transactions:

- Granting finality to receivers of ACH credit transactions at 6:30 p.m. local time on the settlement day;
- Treating credits given to originators of ACH debit transactions as final payments at 10:00 a.m. local time on the business day following the settlement date;
- Advising receiving depository institutions with on-line connections to Fedwire that payments are being reversed by the time set for finality of ACH payments;
- Endeavoring to advise off-line institutions by telephone that payments are being reversed;
- Reserving the right to debit the reserve/clearing accounts of institutions originating ACH credit transactions at any time during the settlement day; and
- Granting credit for debit item adjustments only when the Reserve Banks can recover credit from the originating depository institution.

By order of the Board of Governors of the Federal Reserve System, February 23, 1989.
William W. Wiles,
*Secretary of the Board.*

## Union Colony Bancorp; Formation of, Acquisition by, or Merger of Bank Holding Companies

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.24) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

VOL 54 ISS 40 MR 2 1989 UMI

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than March 11, 1989.

A. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

*1. Union Colony Bancorp,* Greeley, Colorado; to become a bank holding company by acquiring 100 percent of the voting shares of Northern Investment Company, Fort Collins, Colorado, parent of Northern Bank and Trust, Fort Collins, Colorado.

Board of Governors of the Federal Reserve System, February 23, 1989.

Jennifer J. Johnson,

*Associate Secretary of the Board.*

## FEDERAL TRADE COMMISSION

### Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the Federal Register.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

BILLING CODE 6750-01-M

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Office of the Secretary

### Privacy Act of 1974; Matching Program—Medicare Part A Beneficiary Records/VA Patient Records

**AGENCY:** Department of Health and Human Services.

**ACTION:** Notification of matching program—Medicare Part A beneficiary records/VA patient records.

**SUMMARY:** The Department of Health and Human Services (HHS) is providing notice that the Office of Inspector General (OIG) intends to conduct a match of HHS Medicare Part A Beneficiary records against Veterans Administration (VA) patient treatment records. A matching report is set forth below:

**DATE:** The match will begin in March 1989.

**ADDRESS:** Send all Comments to the Financial and Administrative Management Staff, Administrative Office, OIG, HHS, Room 5246 Cohen Building, 330 Independence Avenue SW., Washington, DC 20201.

FOR FURTHER INFORMATION CONTACT: Diane Datcher, Financial and Administrative Management Staff, Administrative Office, OIG, HHS, Room 5246 Cohen Building, 330 Independence Avenue SW., Washington, DC 20201.

SUPPLEMENTARY INFORMATION: The HHS OIG, in cooperation with the VA Office of Inspector General, is initiating a computer matching program to identify improper duplicate payments made by Medicare intermediaries where VA was responsible for the payment. The services to be reviewed are services authorized by the VA to be performed in non-VA hospitals to veterans who are also eligible under Part A of Medicare. A duplicate payment could result if a hospital were to bill both the VA and the Medicare program for the same services. The existence of duplicate payments has been detected in past VA audits, but the full extent of such duplicate payments has not been determined. The purpose of this computer matching program is to identify all such duplicate payments. Set forth below is the information required by paragraph 5.f.1. of the Revised Supplemental Guidance for Conducting Computerized Matching Programs issued by the Office of Management and Budget, 47 FR 21656 (May 19, 1982). A copy of this notice has been furnished to both Houses of Congress and the Office of Management and Budget.

Date: February 17, 1989.

Richard P. Kusserow,

*Inspector General.*

**Report of Matching Program: Medicare Part A Beneficary Records/VA Patient Records**

a. *Authority:* Pub. L. 94-505.

b. *Program Description:* The Department of Health and Human Services Office of Inspector General plans to conduct a match of Medicare payment files of Part A beneficiaries, furnished by the Health Care Financing Administration (HCFA), against files of the Veterans Administration (VA) setting out payments for authorized services to veterans in non-VA hospitals. The match will identify duplicate payments for the same services. A sample of duplicate payments will be verified with the appropriate Medicare intermediaries and hospitals to validate the accuracy of the match. The remaining raw hits will be provided to HCFA for verification and resolution.

c. *Records to be Matched:* Records on Medicare Part A beneficiaries from the Intermediary Medicare Claims system (90-70-0503), 53 FR 52801 (Dec. 29, 1988) will be matched against the following VA records systems:

1. Individuals Submitting Invoices-Vouchers for Payment Systems (13VA047), Federal Register Privacy Act Issuances, 1988 Compilation, Vol. 5, p. 763.

2. Patient Medical Records System (24VA136), Federal Register Privacy Act Issuances, 1988 Compilation, Vol. 5, p. 771.

d. *Period of Match:* The match will begin in March 1989 and will be completed within 5 months.

e. *Safeguards:* Records used in this match will be maintained under strict security. Access to the computer files and printed information will be restricted to only those persons having a "need to know" for the purposes of additional review or resolution. The records being matched will be kept in locked file cabinets under control of the Office of Inspector General, or in secured Government computer facilities. We will return all of the VA computer source tapes to the VA upon completion of the match. Computer tapes are protected by the use of passwords to prohibit unauthorized access. All computer files are safeguarded in accordance with the provisions of the National Bureau of Standards Federal Information Processing Standards 41 and HHS ADP Systems Security Manual, Part 6, "ADP Systems Security".

f. *Retention and Disposition of Records:* Only those records produced in the match which meet predetermined criteria will be maintained. All records maintained will be destroyed within 6 months except those which are necessary to the resolution of duplicate payments identified by the matching program. The date will be verified to insure accuracy prior to any dissemination of records on individuals.

[FR Doc. 89-4751 Filed 3-1-89; 8:45 am]

BILLING CODE 4150-04-M

VOL 54 ISS 40 MR 2 1989 UMI

**Centers for Disease Control**

**[Announcement Number 909]**

**Sexually Transmitted Diseases Research and Demonstrations**

**Introduction**

The Centers for Disease Control (CDC) announces that grant applications are to be accepted for Sexually Transmitted Diseases (STD) Research and Demonstrations.

**Authority**

This program is authorized under section 318(b) of the Public Health Service Act (42 U.S.C. 247c(b)), as amended. Regulations governing programs for preventive health services are codified at 42 CFR Part 51b, Subparts A and P.

**Eligible Applicants**

Eligible applicants are the official public health agencies of State and local governments, including the District of Columbia, American Samoa, the Commonwealth of Puerto Rico, the Federated States of Micronesia, Guam, the Marshall Islands, the Northern Marianna Islands, Palau, and the Virgin Islands, and any other public or nonprofit private entity. Thus, universities, colleges, research institutions, and hospitals are eligible to apply. In addition, in order to ensure statistically significant results, applicants applying for assistance in the area of syphilis control must be those which reported case rates of primary and secondary syphilis of at least 20 per 100,000 population for 1988.

**Availability of funds**

Approximately $800,000 is available in Fiscal Year 1989 to fund approximately 2 to 4 studies. It is expected that the average award will be $200,000, ranging from $100,000 to $300,000. Awards are expected to begin on or about July 1, 1989, for a 12 month budget period within a project period of 1 to 5 years. Funding estimates may vary and are subject to change. Continuation awards within the project period will be made on the basis of satisfactory progress and the availability of funds.

**Purpose**

The purpose of this grant program is to develop, improve, and evaluate methods for the prevention and control of STD through demonstrations and applied research. Applied research, as used in the context of this announcement, means the process of developing and evaluating operational approaches and solutions to practical STD control problems by formulating appropriate models and hypotheses and testing them in the field.

**Program Requirements**

Applications adressing the areas listed below will be considered for funding in Fiscal Year 1989:

A. *Syphilis Control, Behavioral Aspects:* Develop, implement, and evaluate strategies for innovative and cost effective interventions for infections syphilis. Applicants should work with community groups, especially those that serve and represent racial and ethnic minority populations, to conduct in-depth studies of the dynamics of sexual behavior in association with drug use.

B. *Primary Prevention:* Study and evaluate the prevalence of and attitudes toward condom use and develop and implement a disease intervention plan with condom use as the primary intervention strategy. Studies should include populations at highest risk of acquiring STD. Applicants should define from their own STD statistics the groups at highest risk of acquiring STD. Evaluation should concentrate on high risk groups. Incidence of disease should be one of the outcome measures of evaluation.

**Evaluation Criteria**

A. Competing application will be reviewed and evaluated by an ad hoc CDC-convened committee according to the following criteria:

1. The applicant's ability to assess the potential impact of long- and short-term objectives as evidenced by decreased reported incidence of sexually transmitted diseases.
2. The degree to which long- and short-term objectives are specific, measurable, and time-phased.
3. The quality of the plan of operation for conducting and monitoring activities designed to meet project objectives.
4. The extent to which the proposed project includes methods that are innovative and do not replicate prior or currently ongoing research.
5. The quality of the evaluation plan which specifies the methods and instruments of measurements to be used.
6. The extent to which qualified and experienced personnel are available, based on previous involvement with projects related to STD prevention and control.
7. The effectiveness of the applicant's collaboration with local or State STD control programs, hospitals, medical schools, laboratories, and any other agencies where joint liaison efforts would enhance the success of the project.
8. The appropriateness and feasibility of the project and the extent to which results may be transferred to other areas.

Consideration will also be given to the extent to which the budget request is reasonable and consistent with the intended use of grant funds.

B. Non-competing applications within an approved project period will be evaluated on satisfactory progress in meeting program objectives as determined by progress reports and the quality of the future plans. Awards will be made based on the availability of funds.

**Executive Order 12372**

Applications are not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs.

**Catalog of Federal Domestic Assistance Number**

The Catalog of Federal Domestic Assistance Number is 13.978.

**Application Submission and Deadline**

The original and two copies of the application (Form PHS 5161-1) must be submitted to Nancy Bridger, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE, Room 300, Atlanta, GA 30305, on or before April 28, 1989.

A. *Deadline:* Applications shall be considered as meeting the deadline if they are either:

1. Received on or before the deadline date, or
2. Sent on or before the deadline date and received in time for submission to the independent review group. (Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier of U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

B. *Late Applications:* Applications which do not meet the criteria in A.1. or 2. are considered late applications. Late applications will not be considered in the current competition and will be returned to the applicant.

**Where to Obtain Additional Information**

A complete program description, information on application procedures and application package may be obtained from Marsha Driggans, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE, Room 300, Atlanta, GA 30305, (404) 842-6640 or FTS 236-6640.

Please refer to Announcement Number 909, "PROJECT GRANTS FOR SEXUALLY TRANSMITTED DISEASE RESEARCH AND DEMONSTRATIONS" when requesting information and submitting any application on the Request For Assistance. Technical assistance may be obtained from Alfred A Harry, Division of Sexually Transmitted Diseases, Center for Prevention Services, Centers for Disease Control, Atlanta, GA 30333, (404) 639-2584 or FTS 236-2584.

Dated: February 23, 1989.

**Robert L. Foster,**

*Acting Director, Office of Program Support, Centers for Disease Control.*

BILLING CODE 4160-18-M

**Food and Drug Administration**

**[Docket No. 89N-0069]**

**Drug Export; PROLEUKIN® for Injection 1 MG**

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing that Cetus Corp. has filed an application requesting approval for the export of the biological product PROLEUKIN® for Injection 1 mg to Belgium, Denmark, Federal Republic of Germany, Finland, France, Ireland, Italy, The Netherlands, Norway, Spain, Sweden, and The United Kingdom.

**ADDRESS:** Relevant information on this application may be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human biological products under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

**FOR FURTHER INFORMATION CONTACT:** Boyd Fogle, Jr., Center for Biologics Evaluation and Research (HFB-120), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8191.

**SUPPLEMENTARY INFORMATION:** The Drug Export Amendments Act of 1986 (Pub. L. 99-660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of drugs that are not currently approved in the United States. The approval process is governed by section 802(b) of the act. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Cetus Corp., 1400 53d St., Emeryille, CA 94608, has filed an application requesting approval for the export of the biological product PROLEUKIN® for Injection 1 mg to Belgium, Denmark, Federal Republic of Germany, Finland, France, Ireland, Italy, The Netherlands, Norway, Spain, Sweden, and The United Kingdom. The product PROLEUKIN® for Injection 1 mg is intended for use in the treatment of metastic renal cell carcinoma. The application was received and filed in the Center for Biologics Evaluation and Research on February 3, 1989, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by March 13, 1989, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802, Pub. L. 99-660 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated under 21 CFR 5.44.

Dated: February 16, 1989.

**Madge L. Crouch,**

*Deputy Director, Office of Compliance, Center for Biologics Evaluation and Research.*

BILLING CODE 4160-01-M

**Public Health Service**

**Office of the Assistant Secretary for Health; National Center for Health Services Research and Health Care Technology Assessment; Assessment of Medical Technology**

The Public Health Service (PHS), through the Office of Health Technology Assessment (OHTA), announces that it is coordinating an assessment of patient criteria for electrostimulation of salivary production in the treatment of xerostomia secondary to Sjogren's Syndrome. In this procedure an electro-stimulation device (salivation electro-stimulator) is used to stimulate salivary production from existing glandular tissue.

This assessment seeks to answer the following questions: (1) Is electrostimulation for salivary production widely accepted as a safe and clinically effective method in the treatment of xerostomia secondary to Sjogren's Syndrome? (2) What patient selection criteria would identify xerostomic patients that would benefit from this procedure? (3) Can specific subgroups of patients be identified? (4) Can guidelines be developed to specify which types of xerostomic patients with which conditions and at what points in their clinical evaluation and/or management would benefit from this type of procedure? If so, please suggest a set of guidelines. (5) At what level of salivary deficiency is therapeutic intervention warranted? (6) If the amount of salivation induced by electrostimulation varies from patient to patient how is successful treatment determined? (7) What would be the cost associated with such treatment, and (8) Are there any disadvantages or limitations associated with the use of this procedure? This assessment also seeks to determine if one procedure for xerostomia is more appropriate for patients with a specific clinical condition as opposed to another.

The PHS assessment consists of a synthesis of information obtained from appropriate organizations in the private sector and from PHS agencies and others in the Federal Government. PHS assessments are based on the most current knowledge concerning the safety and clinical effectiveness of a technology. Based on this assessment, a PHS recommendation will be formulated to assist the Health Care Financing Administration (HCFA) in establishing Medicare coverage policy. The information being sought is a review and assessment of past, current, and planned research related to this

VOL 54 ISS 40 MR 2 1989 UMI

technology, a bibliography of published, controlled clinical trials and other well-designed clinical studies. Information related to the characterization of the patient population most likely to benefit, as well as on clinical acceptability and the effectiveness of this technology and extent of use are also being sought. Any person or group wishing to provide OHTA with information relevant to this assessment should do so in writing no later than May 1, 1989 or within 90 days from the date of publication of this notice.

Written material should be submitted to: Mr. Martin Erlichman, Health Science Analyst, Office of Health Technology Assessment, 5600 Fishers Lane, Room 18A-27, Rockville, MD 20857, 301-443-4990.

Date: February 1, 1989.

**Donald Goldstone,**

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

### Road Closure

**AGENCY:** Bureau of Land Management.

**ACTION:** Road closure and restrictions.

**SUMMARY:** Pursuant to 43 CFR 8364.1(1) the following Bureau of Land Management (BLM) roads in Saguache County will be temporarily closed to protect roads and fragile environment during the spring thaw: Poncha Loop Road, Clover Creek Road, Dorsey Creek Road, Noland Gulch Loop Road, Clayton Cone, Findley Gulch, Poison-Dry Loop, Ford Creek, Cabin Draw Loop, Ward Gulch, Antelope Creek, Trickle Mountain, Big Dry Gulch, Rabbit Mesa, Holey Rock, Lightning Pass, Taylor Canyon, Spanish Creek and Squaw Creek Roads.

BLM roads to be closed in Conejos county include the following: Cumbres-Toltec Road, Bighorn Creek, Los Mesitas, Poso Loop, Rs Jadero, Whippoorwill, Capulin Peak and Cinder Pit Roads.

Approximate road closure dates are March 1, 1989 to May 31, 1989. Roads that are dry prior to May 31, 1989, may be opened for public use. Pursuant to 43 CFR 8364.1(4), the following persons are exempted from this order:

(1) Persons with a permit specifically authorizing the otherwise prohibited act.

(2) Any Federal, State, or local officer, or member of an organized rescue or fire fighting force in the performance of an official duty.

**FOR FURTHER INFORMATION CONTACT:** Dennis Zachman, Area Manager, (719) 589-4975, 1921 State Avenue, Alamosa, Colorado.

**Donnie R. Sparks,**

*District Manager.*

[ID-010-09-4410-08]

### Land Use Plan Amendment; Jarbidge RMP and Twin Falls MFP; Boise and Burley Districts, ID

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of action.

**SUMMARY:** The Idaho State Director for the Bureau of Land Management has approved the release of a proposed land use plan amendment that involves (1) designation of the Salmon Falls Creek Canyon Area of Critical Environmental Concern (ACEC) in both the Twin Falls Management Framework Plan (MFP) and the Jarbidge Resource Management Plan (RMP), and (2) providing for additional structural range improvement projects in the Jarbidge RMP.

**DATE:** The amendment is subject to a 30-day protest period beginning Thursday, March 2, 1989, and ending April 3, 1989.

**ADDRESS:** Any protests to the amendment must be submitted in writing to: Director (760), Bureau of Land Management, 18th and C Streets NW., Washington, DC 20240. Protests must comply with the requirements of 43 CFR 1610.5-2 and be filed prior to the end of the protest period as stated above.

**FOR FURTHER INFORMATION CONTACT:** Gary Carson, Jarbidge Area Manager, or Terry Costello, Chief, Planning and Environmental Assistance Staff, at 3948 Development Avenue, Boise, Idaho 83705, or call (208) 334-1582.

**SUPPLEMENTARY INFORMATION:** Approval of the proposed land use plan amendment will constitute formal designation of 30 miles of Salmon Falls Creek Canyon as an ACEC, which will ensure continued protection of the Canyon's unique natural and scenic values. Also, based upon information obtained after the Jarbidge RMP was completed, the amendment will provide for construction of fences, pipelines, and water developments that are necessary to meet the land use objectives in the RMP. No changes are proposed in the level of land treatments identified in the RMP. The miles of fence to be constructed will be increased from 166 to 306, the miles of water pipelines from 131 to 444, and the number of water developments (wells, reservoirs, and springs) from 5 to 19. Analysis of the proposed amendment indicated that these range improvements are needed to improve soil, vegetation, and watershed conditions; provide adequate forage for identified numbers of livestock, wildlife, and wild horses; improve lands in poor ecological condition; maintain existing vegetative improvements; and manage big game habitat to support the populations specified in the RMP.

Date: February 21, 1989.

### Oregon; Prineville District Grazing Advisory Board Meeting, Prineville, Oregon

February 23, 1989.

Notice is hereby given in accordance with Pub. L. 91-463 of a meeting of the Prineville District Grazing Advisory Board to be held April 13, 1989.

The meeting will begin at 10:00 a.m. in the conference room of the Bureau of Land Management office located at 185 East 4th Street, Prineville, Oregon 97754.

The agenda will include the following items:

1. Election of officers.
2. Orientation to District Programs and Organization.
3. Grazing decisions from Brothers-LaPine Resource Management Planning Process.
4. Allotment management planning status.
5. Grazing Evaluations/Decisions status.
6. Review of Geographic Emphasis Areas' major project, implementation program.
7. Disposition of other proposed range improvements.
8. Disposition of County Advisory Board Funds.

The meeting is open to the public. Anyone wishing to attend and/or make written or oral statements to the Board is requested to contact the District Manager at the above address on or prior to April 7, 1989.

Summary minutes of the meeting will be available for review and reproduction within 30 days following the meeting.

Dated: February 23, 1989.

### Safford District Grazing Advisory Board Meeting

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of meeting.

**SUMMARY:** Notice is hereby given, that a meeting of the Safford District Grazing Advisory Board will be held.

**DATE:** Wednesday, April 5, 1989; 9:00 a.m.

**ADDRESS:** Safford District BLM Office, 425 E. 4th St., Safford, AZ 85546.

**SUPPLEMENTARY INFORMATION:** This meeting is held in accordance with Pub. L. 92-463. The agenda for the meeting will include:

1. Field tour to Bonita Creek to discuss Riparian issues.
2. Discussion of Game Management Practices in Hunt Unit 28.
3. BLM managment Update.
4. Business from the floor.

The meeting will be open to the public. Board members will meet at the BLM Office, 425 E. 4th St., Safford, AZ 85546 at 9:00 a.m. From there they will depart via BLM-provided vehicles for a tour of Bonita Creek, and destination for the Board meeting. Members of the public may accompany the tour, and attend the meeting, but must provide their own transportation. It is expected the Board members will return to Safford by 4:00 p.m.

Interested persons may make oral statements to the Board. A written copy of the oral statement may be required to be provided at the conclusion of the presentation. Written statements may also be filed for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 425 E. 4th St., Safford, AZ 85546, by 4:15 p.m., Tuesday, April 4, 1989.

Summary minutes of the Board meeting will be maintained in the District Office and will be available for public inspection and reproduction (during regular business hours) within thirty (30) days following the meeting.

Date: February 24, 1989.

**Ray A. Brady,**

### Issuance of Land Exchange Patents, Interim Conveyance and Lease of Public Lands; Nevada

February 16, 1989.

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice.

**SUMMARY:** This notice identifies, in a general manner, Federal and non-Federal lands involved in a recently completed exchange transaction. All minerals were exchanged.

**FOR FURTHER INFORMATION CONTACT:** Marla B. Bohl, Chief, Branch of Lands and Minerals Operations, Nevada State Office, Bureau of Land Management, P.O. Box 12000, 850 Harvard Way, Reno, NV 89520, (720) 784-5703.

**SUPPLEMENTARY INFORMATION:** The United States issued Patent Nos. 27-88-0012 and 27-88-0013, Interim Conveyance 001 and a lease pursuant to the Nevada-Florida Land Exchange Authorization Act of 1988. Patent No. 27-88-0012 was for the following described land in Mineral County, Nevada:

**Mount Diablo Meridian, Nevada**

T. 6 N., R. 33 E.
Secs. 10-13, all;
Sec. 14, E½;
Sec. 15, W½;
Sec. 21, all;
Sec. 22, W½, S½SE¼;
Sec. 23, E½, S½SW¼;
Sec. 24, E½, W½NW¼, NE¼NW¼, N½SE¼NW¼, SE¼SE¼NW¼, SW¼;
Sec. 25, all;
Sec. 26, NE¼, W½, NE¼SE¼, W½SE¼;
Sec. 27, all;
Sec. 34, all;
Sec. 35, NE¼NE¼, W½, W½SE¼, SE¼SE¼;
Sec. 36, all.
Containing 8,910 acres

Patent No. 27-88-0012 also conveyed the mineral interest underlying the following described land:

T. 6 N., R. 33 E.
Sec. 14, W½;
Sec. 15, E½;
Sec. 22, NE¼, N½SE¼;
Sec. 23, NW¼, N½SW¼;
Sec. 24, SW¼SE¼NW¼.
Containing 1,130 acres.

Patent No. 27-88-0013, Interim Conveyance 001, and the lease were for lands in Lincoln and Clark Counties. The land generally be described as a parcel situated east of U.S. Highway 93 and north of State Highway 168. The townships involved are described as follows:

**Mount Diablo Meridian, Nevada**

T. 11 S., R. 63 E.
T. 12 S., R. 63 E.
T. 13 S., R. 63 E.
T. 12 S., R. 64 E.
T. 13 S., R. 64 E.

The total acreage conveyed by Patent 27-88-0013 and Interim Conveyance 001 totals 29,055.57 acres. The lease included approximately 13,767 acres. Precise legal descriptions can be ascertained from the records at the Bureau of Land Management at the above address.

The United States aquired land in Dade County, Florida in exchange for the above-described land. The exchange was made for the benefit of the U.S. Fish and Wildlife Service and its programs. A more detailed description of the land acquired by the United States is available in the records of the Bureau of Land Management at the above address.

**Edward F. Spang,**

*State Director, Nevada.*

### Bureau of Land Management

[NV-930-09-4212-11; N-48049]

### Realty Action in Nevada

**ACTION:** Notice of Realty Action—Direct sale of public lands for waste water disposal ponds to Humboldt County for the Community of Orovada, Nevada. This notice terminates the segregative effect on the public lands involved in the public lands sale application N-48049.

**SUMMARY:** This notice supersedes the Federal Register notice published December 30, 1988 (53 FR 53075). The Bureau of Land Management hereby terminates the segregative effect as it pertains to the following described lands:

**Mount Diablo Meridian, Nevada**

T. 43 N., R. 37 E., Sec. 34, SE¼NE¼.

Analysis of the proposed site and conflicts over the type of use caused the amendment of application N-48049. The above described parcel of land is hereby opened to the public land laws including the mining laws upon publication of this notice in the **Federal Register**.

Notice is hereby given that pursuant to the Act of October 21, 1976, Pub. L.

VOL 54 ISS 40 MR 2 1989 UMI

94–579, The Federal Land Policy and Management Act, section 203, the Bureau of Land Management will sell to Humboldt County a parcel of public land for the construction and operation of waste water disposal ponds to serve the community of Orovada. The parcel will be located in the following new location:

**Mount Diablo Meridian, Nevada**

T. 43 N., R. 37 E., Sec. 34, NE¼SW¼
40 acres.

For a period of 45 days from the date of publication of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, 705 East 4th Street, Winnemucca, NV 89445, (702) 623–3676.

**SUPPLEMENTARY INFORMATION:** Publication of this notice in the **Federal Register** shall segregate the public lands to the extent that the land will not be subject to appropriation under the public land laws, including the mining laws. Any subsequent application shall not be considered as filed and shall be returned to the applicant. This segregative effect of the notice of realty action shall terminate upon issuance of the patent or other document of conveyance to Humboldt County or publication of the notice of termination in the **Federal Register** or 270 days from the date of publication of this notice, whichever occurs first.

Dated: February 22, 1989.

**Ronald Wenker,**

*District Manager, Winnemucca.*

## Availability of Resource Management Plan; Socorro Resource Area, NM

**AGENCY:** Bureau of Land Management; Interior.

**ACTION:** Notice of availability.

**SUMMARY:** On January 29, 1989, Larry L. Woodard, New Mexico State Director, BLM, signed the Record of Decision (ROD) for the Socorro Resource Management Plan (RMP). This ROD documents the approval of the plan described in the Socorro Proposed RMP/Final Enviromental Impact Statement (EIS) of September 1988, on the land-use plan for the Socorro Resource Area (SRA).

This RMP will provide the framework to guide management decisions during the next 10 to 20 years on the SRA's 1.5 million surface acres of public land and 2.3 million acres of Federal subsurface.

The goal of this RMP is to provide for a combination of resource uses that will protect important environmental values and sensitive resources and at the same time allow development of resources which produce commercial goods and services.

The RMP also describes how the 7 key resource issues and 2 management concerns that were identified with public involvement early in the planning process will be resolved. These issues are: (1) Land Ownership Adjustments; (2) Vegetative Uses; (3) Off-Road Vehicle (ORV) Use; (4) Access; (5) Special Management Areas; (6) Wild Horse Management; and (7) Coal Leasing Suitability Assessment. The management concerns are: Fluid Mineral Leasing and Right-of-Way Exclusion and Avoidance Areas.

The Bureau has completed decisions to designate 6 Areas of Critical Environmental Concern (ACEC's) as follows:

| | Acres |
|---|---|
| Ladron Mountains | 62,460 |
| Agua Fria | 10,770 |
| Sawtooth | 120 |
| Horse Mountain | 7,720 |
| Tinajas | 3,520 |
| San Pedro | 1,200 |

The Bureau has also designated about 1.5 million acres of public land in Socorro and Catron Counties in central New Mexico as "open," "limited," or "closed" ORV use. Designations are the result of land-use planning decisions made in the RMP. Of the BLM-administered surface acres in the SRA, approximately 785,010 acres are "open"; 666,200 acres are "limited" to existing roads and trails (yearlong); 67,400 acres are "seasonally limited" to existing roads and trails; and 30 miles of trails are "closed" to ORV use.

The authority for the ORV designations is derived from Executive Orders No. 11644 and 11989, and the regulations contained in 43 CFR, Part 8340.

### Open Designations

Of the "open" category, 1,170 acres east of Socorro, New Mexico, are designated as intensive use areas for organized or competitive events. The remaining 783,840 acres are designated "open" for other ORV use.

### Limited to Existing Roads and Trails (Yearlong) Designations

Approximately 666,200 acres are designated "limited" to existing roads and trails. Included in this ORV designation are 12 Wilderness Study Areas (WSA's) and 23 Special Management Areas (SMA's) totalling 582,410 acres. Additionally 6 ACEC's, totalling 85,790 acres, are also designated "limited" to existing roads and trails.

### Limited to Existing Roads and Trails (Seasonally) Designations

Approximately 67,400 acres are "seasonally limited" to existing roads and trails from November through March. These areas are located adjacent to the Eagle Peak and Mesita Blanca WSA in northwestern Catron County.

### Closed Designations

Approximately 36 miles of trails are closed. These include Sierra Ladron ACEC, 18 miles; Tinajas ACEC, 2 miles; Horse Mountain ACEC, 2 miles; Antelope WSA, 4 miles; Continental Divide WSA, 9 miles; Playa Pueblos, 1 mile; and Teypama Site, 17 acres. Motorized access will be allowed in closed areas by administrative personnel and permittees who have specifically requested use consistent with other privileges.

**ADDRESS:** Copies of the Draft RMP/EIS, the Proposed RMP/FEIS, and the ROD are available from: Area Manager, Socorro Resource Area, USDI—Bureau of Land Management, 198 Neel Ave. NW., Socorro, NM 87801.

**FOR FURTHER INFORMATION CONTACT:** Harlen Smith, Area Manager, Socorro Resource Area, at the address above; telephone (505) 835–0412.

## Filing of Plats of Survey; Nevada

February 17, 1989.

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice.

**SUMMARY:** The purpose of this notice is to inform the public and interested State and local government officials of the latest filing of a Plat of Survey in Nevada.

**EFFECTIVE DATE:** Filing was effective at 10:00 a.m. on February 1, 1989.

**FOR FURTHER INFORMATION CONTACT:** Lacel Bland, Chief, Branch of Cadastral Survey, Bureau of Land Management (BLM), Nevada State Office, 850 Harvard Way, P.O. Box 12000, Reno, Nevada 89520, 702–784–5484.

**SUPPLEMENTARY INFORMATION:** The Plat of Survey of lands described below was officially filed at the Nevada State Office, Reno, Nevada on February 1, 1989.

**Mount Diablo Meridian, Nevada**

T. 11N., R. 21 E.—Dependent Resurvey

The plat was accepted on July 5, 1984. The dependent resurvey was executed to meet certain administrative needs of the BLM. The above-listed plat is now the basic record for describing the lands for all authorized purposes. The plat will be placed in the open files in the BLM Nevada State Office and will be available to the public as a matter of information. Copies of the plat and related field notes may be furnished to the public upon payment of the appropriate fee.

**Edward F. Spang,**

*State Director, Nevada.*

## Minerals Management Service

### Development Operations Coordination Document; Hall-Houston Oil Co.

**AGENCY:** Minerals Management Service, Interior.

**ACTION:** Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

**SUMMARY:** Notice is hereby given that Hall-Houston Oil Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 5357, Block 628, West Cameron Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Cameron, Louisiana.

**DATE:** The subject DOCD was deemed submitted on February 21, 1989. Comments must be received within 15 days of the publication date of this Notice or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

**ADDRESSES:** A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OSC Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

**FOR FURTHER INFORMATION CONTACT:** Ms. Angie D. Gobert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2876.

**SUPPLEMENTARY INFORMATION:** The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective May 31, 1988 (53 FR 10595).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Date: February 23, 1989.

**J. Rogers Pearcy,**

*Regional Director, Gulf of Mexico OCS Region.*

### Development Operations Coordination Document; McMoRan Oil & Gas Co.

**AGENCY:** Minerals Management Service, Interior.

**ACTION:** Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

**SUMMARY:** Notice is hereby given that McMoRan Oil & Gas Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 1088, Block 80, West Delta Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Venice, Louisiana.

**DATE:** The subject DOCD was deemed submitted on February 22, 1989. Comments must be received within 15 days of the publication date of this Notice or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

**ADDRESSES:** A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge,

VOL 54 ISS 40 MR 2 1989 UMI

Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70806.

**FOR FURTHER INFORMATION CONTACT:** Mr. W. Williamson; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736-2874.

**SUPPLEMENTARY INFORMATION:** The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Land Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective May 31, 1988 (53 FR 10595).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Date: February 2, 1989.

## Outer Continental Shelf Operations: Official Protraction Diagrams; Availability

**AGENCY:** Minerals Management Service, Interior.

**ACTION:** Publication of revised Outer Continental Shelf Official Protraction Diagrams.

**SUMMARY:** Notice is hereby given that effective with this publication, the following OCS Official Protraction Diagrams, last revised on November 8, 1988, are on file and available for information only, in the Gulf of Mexico OCS Regional Office, New Orleans, Louisiana. In accordance with Title 43, Code of Federal Regulations, these Official Protraction Diagrams are the basic record for the description of mineral and oil and gas lease sales in the geographic areas they represent.

| Description | Revision | Latest revision date |
|---|---|---|
| Mobile, NH 16-4. | Federal/State boundary and 8(g) zone. | Nov. 8, 1988. |
| Pensacola, NH 16-5. | do | Do. |

**ADDRESS:** Copies of these Official Protraction Diagrams may be purchased for $2.00 each from Public Information Unit (OPS-3-4), Minerals Management Service, Gulf of Mexico OCS Regional Office, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123-2394 (504) 736-2519.

Technical comments or questions pertaining to these maps should be directed to Office of Leasing and Environment, Supervisor, Sales and Support Unit (504) 736-2761.

Dated: February 22, 1989.

### Chattahoochee River National Recreation Area; Advisory Commission Meeting

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice of advisory commission meeting.

**SUMMARY:** Notice is hereby given in accordance with the Federal Advisory Commission Act that a meeting of the Chattahoochee River National Recreation Area Advisory Commission will be held at 2:00 p.m. at the following location and date.

**DATE:** March 16, 1989.

**ADDRESS:** The Chattahoochee River National Recreation Area, Headquarters Building, at the Island Ford Unit in North Fulton County.

**FOR FURTHER INFORMATION CONTACT:** Warren D. Beach, Superintendent, Chattahoochee River National Recreation Area, 1978 Island Ford Parkway, Dunwoody, Georgia 30350. Telephone (404) 394-7812.

**SUPPLEMENTARY INFORMATION:** The purpose of the Chattahoochee River National Recreation Area Advisory Commission is to consult and advise the Secretary of the Interior regarding the management and operation of the area, protection of resources within the area, and the priority of lands to be acquired within the area. The members of the Advisory Commission are as follows:

Mr. J. Neal Shepard, Jr.
Mr. Robert A. Meadows
Mrs. Paula S. Hovater
Mr. Benjamin H. West
Mr. Howard D. Zeller
Mr. Larry B. Thompson
Mrs. Lillian Webb
Mr. David O. Eldridge
Mr. Robert Kerr
Mr. H. Edwin Schultz
Ms. Evelyn H. Hopkins
Mr. Michael Bennett
Mr. James O. Watson, Jr.

The meeting will be a forum to share information on the Chattahoochee River National Recreation Area and discuss current issues.

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited. Any member of the public may file with the Commission a written statement concerning the matters to be discussed. Written statements may also be submitted to the Superintendent at the address above. Minutes of the meeting will be available at Park Headquarters for public inspection approximately 4 weeks after the meeting.

Date: February 17, 1989.

C. W. Ogle,

*Acting Regional Director, Southeast Region.*

## INTERNATIONAL TRADE COMMISSION

### Agency Form Submitted for OMB Review

**AGENCY:** United States International Trade Commission.

**ACTION:** In accordance with the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Commission has submitted a request for the extension of approval for questionnaires to the Office of Management and Budget for review.

**PURPOSE OF INFORMATION COLLECTION:** The forms are for use by the Commission in connection with investigation No. 332-209, Competitive Conditions in the Steel Industry and Industry Efforts to Adjust and Modernize, instituted under the authority of section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)).

*Summary of Proposals:*

(1) Number of forms submitted: two.

(2) Title of form: Annual Surveys Concerning Competitive Conditions in the Steel Industry and Industry Efforts to Adjust and Modernize—Questionnaires for U.S. Producers and Importers.

(3) Type of request: extension.

(4) Frequency of use: annual, through 1989.

(5) Description of respondents: firms which produce or import carbon and alloy steel products.

(6) Estimated annual number of respondents: 305.

(7) Estimated total number of hours to complete the forms: 6,800.

(8) Information obtained from the form that qualifies as confidential business information will be so treated by the Commission and not disclosed in a manner that would reveal the individual operations of a firm.

**ADDITIONAL INFORMATION OR COMMENT:** Copies of the forms and supporting documents may be obtained from Mark Paulson (USITC, tel. no. (202) 252-1432). Comments about the proposals should be directed to the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, DC 20503, Attention: Francine Picoult, Desk Officer for the U.S. International Trade Commission. If you anticipate commenting on a form but find that time to prepare comments will prevent you from submitting them promptly you should advise OMB of your intent as soon as possible. Ms. Picoult's telephone number is (202) 395-7340. Copies of any comments should be provided to Charles Ervin (U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436).

Hearing impaired individuals are advised that information on this matter can be obtained by contacting our TDD terminal on (202) 252-1810.

By order of the Commission.

Kenneth R. Mason,

*Secretary.*

BILLING CODE 7020-02-M

[Investigation No. 701-TA-298 (Preliminary)]

### Fresh, Chilled, or Frozen Pork From Canada

#### Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines,[2] pursuant to section 703(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a)), that there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury by reason of imports from Canada of fresh, chilled, or frozen pork, provided for in subheadings 0203.11.00, 0203.12.90, 0203.19.40, 0203.21.00, 0203.22.90, and 0203.29.40 of the Harmonized Tariff Schedule of the United States, that are alleged to be subsidized by the Government of Canada.

#### Background

On January 5, 1989, a petition was filed with the Commission and the Department of Commerce by the National Pork Producers Council (NPPC), Des Moines, IA, and others, alleging that an industry in the United States is materially injured by reason of subsidized imports of fresh, chilled, or frozen pork from Canada. Accordingly, effective January 5, 1989, the Commission instituted preliminary countervailing duty investigation No. 701-TA-298 (Preliminary).

Notice of the institution of the Commission's investigation and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the Federal Register of January 11, 1989 (54 FR 1014). The conference was held in Washington, DC, on January 26, 1989, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on February 21, 1989. The views of the Commission are contained in USITC Publication 2158 (February 1989), entitled "Fresh, Chilled, or Frozen Pork from Canada: Determination of the Commission in Investigation No. 701-TA-298 (Preliminary) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

Issued: February 22, 1989.

By Order of the Commission.

Kenneth R. Mason,

*Secretary.*

[FR Doc. 89-4778 Filed 3-1-89; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 332-270]

### The Effects of the Steel Voluntary Restraint Agreements on U.S. Steel Consuming Industries

**AGENCY:** United States International Trade Commission.

**ACTION:** Institution of investigation, announcement of public hearing, and request for written submissions.

**EFFECTIVE DATE:** February 27, 1989.

**FOR FURTHER INFORMATION CONTACT:** Gerald Berg (202) 252-1233, Research Division, Office of Economics, U.S. International Trade Commission, Washington, DC 20436.

*Background:* Following receipt of a letter on February 13, 1989, from the Chairman of the Subcommittee on Trade of the House Committee on Ways and Means, the Commission instituted investigation No. 332-270 under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)) for the purpose of studying and reporting on the effects of the steel voluntary restraint agreements (VRAs) on U.S. steel consuming industries.

As requested by the Subcommittee, the Commission in its report will seek to provide estimates of the effects of these VRAs on exports, imports, and domestic sales of major steel consuming industries for each of the years 1985 through 1988. The Commission will also provide analysis of the likely effects of continuing these restraints in the future. The Commission will provide the

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] Acting Chairman Brunsdale and Commissioner Cass determine that there is no reasonable indication that an industry in the United States is materially injured or threatened with material injury, or that the establishment of an industry in the United States is materially retarded, by reason of imports from Canada of fresh, chilled, or frozen pork that are alleged to be subsidized by the Government of Canada. Commissioner Lodwick did not participate in this investigation.

BEST COPY AVAILABLE

VOL 54 ISS 40 MR 2 1989 UMI

estimates using the same approach and product detail as in the Commission's 1985 study (USITC Publication 1786, Report on Investigation No. 332-214, December 1985—copies are available from the Publications Office (202) 253-1807). The Commission will also explore other economic effects of VRAs focusing on the following: the automotive industry, the construction industry, heavy agricultural and construction equipment manufacturers, appliance and household goods producers, forging producerss and metal stampers.

The Subcommittee requested that the final report on this investigation be submitted on or before May 8, 1989.

*Public Hearing and Written Submissions:* Interested persons are invited to present, either at a public hearing or in written statements, information concerning matters to be addressed in this study and to comment on the analytical approach used in the Commission's 1985 study. In addition, interested persons are requested to provide, as appropriate, response to the following questions regarding conditions in steel consuming industries and the effects of VRAs.

Industry conditions:

Please describe the primary market factors that have affected your industry during 1984-88 (i.e., how have supply and demand conditions for your products changed and what have been the principal factors underlying the changes).

What was your company's return on sales in each year during 1984-88?

Steel prices:

How has the price of steel purchased by your firm changed in each year during 1984-88?

How much of the changes, if any, do you attribute to the steel VRAs? (Please explain.)

What other factors (such as changes in exchange rates, raw materials costs, and/or world demand) may have contributed to steel price changes?

Steel supply:

Please describe any difficulties you have experienced in obtaining steel products during 1984-88? Such problems might include inability to purchase a certain product, relatively long lead times, or quality problems.

Please explain the extent to which you attribute these difficulties to the steel VRAs.

What other factors may have contributed to these difficulties?

Effects of the VRAs on competitive conditions:

How have steel price changes affected your unit production costs in each of the years during 1984-88?

Please explain how steel supply problems affected your operations, if at all, during 1984-88 (i.e., discuss the extent to which they may have resulted in lost sales, production bottlenecks, or changes in production schedules).

How do you believe the VRAs have affected your ability to compete with imports?

How do you believe the VRAs have affected your ability to export?

What other effects, if any, have the VRAs had on your company (e.g., have they affected investment decisions, the level of steel inventories held, or other areas of your operations)?

Other:

What positive effects, if any, do you believe the VRAs have had on your operations (such as improved quality or lower prices of domestic steel products)?

Implications:

Please describe the effects that you expect, if any, of continuation of the VRAs on your operations and your ability to compete in the U.S. and foreign markets.

In addition to your oral or written comments, please supply a copy of your most recent annual report and 10K report with your response (if unavailable, comparable reports that supply financial information for the years 1984-88 would be appreciated).

The public hearing on this investigation will be held in the Commission Hearing Room, 500 E Street, SW., Washington, DC 20436, beginning at 9:30 a.m. on March 10, 1989. All persons shall have the right to appear by counsel or in person, to present information and to be heard. Requests to appear at the public hearing should be filed with the Secretary, United States International Trade Commission, 500 E Street, SW., Washington, DC 20436, no later than noon, March 8, 1989.

Written statements and post-hearing briefs should be submitted to the Secretary of the Commission at the same address. Commercial or financial information that a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons in the Office of the Secretary to the Commission. To be assured of consideration by the Commission, written submissions should be received no later than March 17, 1989.

Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 252-1810.

By order the Commission.

Issued: February 28, 1989.

## DEPARTMENT OF JUSTICE

### Information Collections Under Review

February 27, 1989.

The Office of Management and Budget (OMB) has been sent the following proposals for the collection of information for review under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories. Each entry contains the following information: (1) The title of the form or collection; (2) the agency form number, if any, and the applicable component of the Department sponsoring the collection; (3) how often the form must be filled out or the information is collected; (4) who will be asked or required to respond, as well as a brief abstract; (5) an estimate of the total number of respondents and the amount of time estimated for an average respondent to respond; (6) an estimate of the total public burden (in hours) associated with the collection; and (7) an indication as to whether Section 3504(h) of Public Law 96-511 applies. Comments and/or suggestions regarding the item(s) contained in this notice, especially those regarding the estimated response time, should be directed to the OMB reviewer, Mr. Edward H. Clarke, on (202) 395-7340 AND to the Department of Justice's Clearance Officer, Mr. Larry E. Miesse, on (202) 633-4312. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should so notify the OMB reviewer AND the DOJ Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, AND to Mr. Larry E. Miesse, DOJ Clearance Officer, SPS/JMD/5031 CAB, Department of Justice, Washington, DC 20530.

**Reinstatement of a Previously Approved Collection for Which Approval has Expired**

(1) Sample Survey of Jails.
(2) CJ5, CJ5A. Bureau of Justice Statistics, Office of Justice Programs.
(3) Annually.
(4) State or local governments. This sample survey of local jails is needed to provide current information on inmate population. The survey updates data from the 1988 Census of Jails. Data is used for program planning and policy making for corrections.
(5) 1,000 respondents at .2 hours per response.
(6) 200 estimated annual burden hours.
(7) Not applicable under 3504(h)

**Extension of the Expiration Date of a Currently Approved Collection Without any Change in the Substance or in the Method of Collection**

(1) Monthly Return of Arson Offenses Known to Law Enforcement.
(2) DO-73. The Federal Bureau of Investigation.
(3) Monthly.
(4) State or local governments. Used to collect the number of arsons and the dollar loss from arson throughout the United States.
(5) 1,716 respondents, 12 responses each annually, at .5 hours per response.
(6) 10,296 estimated annual public burden hours.
(7) Not applicable under 3504(h).
(1) Supplementary Homicide Report.
(2) DO-56. The Federal Bureau of Investigation.
(3) On occasion of a murder.
(4) State or local governments. Needed to collect the age, sex, race, ethnic origin and relationship of murder victims; the weapons and motive. Summary statistics are published in the annual "Crime in the United States."
(5) 929 respondents at .12 hours each.
(6) 110 estimated annual public burden hours.
(7) Not applicable under 3504(h).
(1) Number of Full Time Law Enforcement Employees as of October 31.
(2) DO 52, 52a, 52b. The Federal Bureau of Investigation.
(3) Annually.
(4) State or local governments. Information is needed to determine the number of civilian and sworn male and female law enforcement employees in the United States.
(5) 11,702 respondents at .2 hours each.
(6) 2,340 estimated annual public burden hours.
(7) Not applicable under 3504(h).

**New Collection**

(1) Petition for Temporary Resident Status As a Replentishment Agricultural Worker (RAW).
(2) I-805, Immigration and Naturalization Serice.
(3) Annually.
(4) Individuals or households. Petition to be filed by alien for determination by INS if alien is eligible for RAW status.
(5) 300,000 respondents at .5 hours each.
(6) 150,000 estimated annual burden hours.
(7) Not applicable under 3504(h).
(1) Request for consideration as a Replenishment Agricultural Worker.
(2) I-807, Immigration and Naturalization Service.
(3) Annually.
(4) Individuals or households. Registration card to be filed by am alien if he/she desires to be considered for RAW (Replenishment Agricultural Worker) status.
(5) 2,447,000 respondents at .5 hours each.
(6) 1,223,500 estimated annual burden hours.
(7) Not applicable under 3504(h).

**Larry E. Miesse,**

BILLING CODE 4410-10-M

---

**[AAG/A Order No. 31-89]**

### Privacy Act of 1974; New System of Records

Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), notice is hereby given that the Department of Justice proposes to establish a new system of records to be maintained by the Immigration and Naturalization Service (INS).

The Password Issuance and Control System (PICS), JUSTICE/INS-011, is a new system of records for which no public notice consistent with the provisions of 5 U.S.C. 552a(e)(4) has been published. The purpose of the system is to expedite determinations of eligibility to access INS automated systems and to improve control by ADP Security Officers of ADP password and user ID distribution.

5 U.S.C. 552a(e) (4) and (11) provide that the public be given a 30-day period in which to comment on the new routine uses; the Office of Management and Budget (OMB), which has oversight responsibility under the Act, requires a 60-day period in which to conclude its review of the system. Therefore, please submit any comments by April 3, 1989. The public, OMB, and the Congress are invited to submit comments to Patricia E. Neely, Staff Assistant, Facilities and Administrative Services Staff, Justice Management Division, Department of Justice, Room 528, 633 Indiana Avenue NW., Washington, DC 20531.

In accordance with 5 U.S.C. 552a(o), the Department has provided a report on this system to OMB and the Congress.

The system description is printed below.

Date: February 14, 1989.

**Harry H. Flickinger,**

*Assistant Attorney General for Administration.*

**JUSTICE/INS-011**

**System Name:**

Password Issuance and Control System (PICS).

**System Location:**

Central, Regional, and District offices of the Immigration and Naturalization Service (INS) as detailed in JUSTICE/INS-999.

**Categories of Individuals Covered by the System:**

Those INS employees, INS contractor employees, and other Federal, State or local government employees for whom authorization to access and use INS automated data processing (ADP) systems has been requested.

**Categories of Records in the System:**

This system of records consists of paper records (INS Form G-872, Request for ADP Password) and an automated data base. INS Form G-872 contains personal identification data such as name, social security number, office location code, organization code, ADP security clearance information, office telephone number, company name of contractor employees, and a statement by the supervisor certifying the official need for access. Upon approval of the request, the user ID code and password issued will be included on the Form. The automated data base may include information extracted from INS Form G-872 and from the Secrutiy Clearance Inforamtion System (SCIS), JUSTICE/JMD-008. The SCIS data is necessary to determine the suitability and trushworthiness to access the information.

VOL 54 ISS 40 MR 2 1989 UMI

**Authority for Maintenance of the System:**

Section 103 of the Immigration and Nationality Act (8 U.S.C. 1103) as amended by Section 274A of the Immigration Reform and Control Act of 1986 (8 U.S.C. 1324) and Department of Justice Order 2640.2A which delegates ADP security authority to INS for maintaining and operating its systems.

**Purpose(s):**

The purpose of the system is to expedite determinations of eligibility to access INS automated systems and to improve control by ADP Security Officers of ADP password and user ID distribution.

**Routine Uses of Records Maintained in the System Including Categories of Users and Purpose of Such Uses:**

Relevant information contained in this system of records may be disclosed as follows:

A. Where there is an indication of violation or potential violation of law (whether civil, criminal or regulatory in nature), to the appropriate agency (whether Federal, State, local or foreign) charged with the responsibility of investigating or prosecuting such violations, or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

B. To the General Services Administration and the National Archives and Records Administration in records managmenet inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

**Polices and Practices for Storing, Retrieving, Accessing, Retaining, and Disposing of Records in the System:**

**Storage:**

Those records which can be accessed electronically are stored in a database on magnetic disc. Forms G–672, Request for ADP Password, are maintained in file folders at Central, Regional and District ADP Security Offices.

**Retrievability:**

These records are retrieved by social security number.

**Safeguards:**

INS offices are located in buildings under security guard, and access to premises is by official identification. Paper records are stored in locked files during non-duty hours. Access to automated data is obtained through terminals which require the use of restricted passwords and user IDs. Only designated Security Officers have access to PICS for creating and updating records of users within their jurisdiction.

**Retention and Disposal:**

Inactive automated records are retained 10 years after date of last action and then deleted from the system. INS Forms G–672, Request for ADP Password, are retained 3 years after final action and then destroyed by shredding.

**System Manager and Address:**

The Servicewide system manager is the Director, Technical Services Branch, Data Systems Division, Immigration and Naturalization Service, 425 I Street NW., Washington, DC 20536.

**Notification Procedure:**

Address inquires to the system manager identified above.

**Record Access Procedures:**

Make all requests for access in writing to the Freedom of Information Act/Privacy Act (FOIA/PA) Officer at the address identified above. Clearly mark the envelope and letter "Privacy Act Request." Provide the full name, social security number, user ID, and notarized signature of the individual who is the subject of the record, and a return address.

**Contesting Records Procedures:**

Direct all requests to contest or amend information to the FOIA/PA Officer at the address identified above. State clearly and concisely the information being contested, the reason for contesting it, and the proposed amendment thereof. Clearly mark the envelope "Privacy Act Request." The record must be identified in the same manner as described for making a request for access.

**Record Source Categories:**

INS Form 672, Request for ADP Password, completed by the supervisor or program manager, and security clearance information extracted from SCIS, JUSTICE/JMD–006.

**Systems Exempted from Certain Provisions of the Act:**

None.

BILLING CODE 4410–10

## Antitrust Division

### Proposed Termination of Final Judgement; F&M Schaefer Brewing Co. and Anheuser-Busch, Inc.

Notice is hereby given that Anheuser-Busch, Inc. ("ABI"), has filed a motion in the United States District Court for the Eastern District of New York to terminate the "Final Judgment" entered against it in *United States* v. *F. & M. Schaefer Brewing Company and Anheuser-Busch, Inc.*, Civil No. 62 C 1421. The Department of Justice ("Department"), in a stipulation also filed with the court has consented to the termination of the judgment, but has reserved the right to withdraw its consent pending receipt of public comments.

The complaint in this case, filed December 20, 1962, alleged that a 1961 agreement between ABI and F. & M. Schaefer Brewing Company ("Schaefer") pursuant to which Schaefer would be the sole distributor of ABI products in the New York City area unlawfully restrained trade. At that time, Schaefer was the largest seller of beer in the New York City area and ABI was the largest seller of beer in the United States.

The Final Judgment entered against ABI upon consent on January 30, 1968 enjoins ABI from entering into any agreement whereby: (1) It would distribute the beer of another brewer; (2) it would distribute its beer through another brewer; (3) it would agree with another brewer to appoint a third person to distribute both their beers; (4) it would distribute its beer through a distributor in which another brewer has a stock interest or a common officer, director or managing agent; or (5) another brewer would distribute beer through a distributor in which ABI has a stock interest or a common officer, director, or managing agent.

The Department has filed with the court a memorandum setting forth the reasons why the Department believes that termination of the judgment would serve the public interest. Copies of the complaint and Final Judgment, ABI's motion papers, the stipulation containing the Government's consent, the Department's memorandum and all further papers filed with the court in connection with this motion will be available for inspection at Room 3233, Antitrust Division, Department of Justice, Tenth Street and Pennsylvania Avenue, NW., Washington, DC 20530 (telephone: 202–633–2481), and at the Office of the Clerk of the United States District Court for the Eastern District of New York, 225 Cadman Plaza East, Brooklyn, New York 11201. Copies of any of these materials may be obtained from the Antitrust Division upon request and payment of the copying fee set by Department of Justice regulations.

Interested persons may submit comments regarding the proposed termination of the decree to the Department. Such comments must be received within the sixty (60) day period established by court order, and will be filed with the court. Comments should be addressed to Anthony V. Nanni, Chief, Litigation I Section, Antitrust Division, Department of Justice, 555 4th Street, NW., Room 10–102, Washington, DC 20001 (telephone 202–724–6694).

BILLING CODE 4410–01–M

### Proposed Modification of Final Judgment; Time Finance Adjusters

Notice is hereby given that Time Finance Adjusters ("TFA") has filed with the United States District Court for the Middle District of Florida a motion to modify the final judgment in *United States* v. *Time Finance Adjusters*, Civil No. 81–003–Orl–CIV–Y (the "1981 Judgment"); and the Department of Justice ("Department"), in a stipulation also filed with the court, has consented to modification of the judgment, but has reserved the right to withdraw its consent pending receipt of public comments.

The complaint in this case (filed on January 6, 1981) alleged that TFA had combined and conspired to agree on, prepare, publish in its directory, disseminate and encourage members to adhere to fee schedules for repossession services; to restrict membership to one or few members in each designated geographic territory; to restrict the area for which each of defendant's members could advertise its repossession services; and to establish arbitrary and unreasonable membership rules and restrictions.

The 1981 Judgment: (1) Prohibits price fixing and other conduct relating to pricing, such as publishing or recommending prices and communicating with other repossessor organizations about prices; (2) prohibits TFA from imposing advertising and operating restrictions upon its members; (3) prohibits territorial exclusivity; and (4) requires TFA to admit into membership and repossessor who meets certain minimum criteria.

The proposed modification to the 1981 Judgment would allow TFA to exclude or terminate from membership any person that uses as a business name in any aspect of its repossession business a name that identifies any trade association, membership organization, franchise or other association of businesses engaged in the repossession business such as, but not limited to, TFA, National Finance Adjusters, Allied Finance Adjusters, American Recovery Association, American Lenders Service Company, or any variation thereof. The modified decree would expire on November 17, 1991, ten years after the entry of the original decree.

The Department has filed with the court a memorandum setting forth the reasons why the Department believes that modification of the judgment would serve the public interest. Copies of the complaint and final judgment, TFA's motion papers, the stipulation containing the Government's consent, the Department's memorandum and all further papers filed with the court in connection with this motion will be available for inspection at Room 3233, Antitrust Division, United States Department of Justice, 10th Street and Pennsylvania Avenue, NW., Washington, DC 20530 (telephone: 202/633–2481), and at the office of the Clerk of the United States District Court for the Middle District of Florida, Orlando, Florida. Copies of any of these materials may be obtained from the Antitrust Division upon request and payment of the copying fee set by Department of Justice regulations.

Interested persons may submit comments regarding the proposed modification of the decree to the Department. Such comments must be received within the sixty-day period established by court order and will be filed with the court. Comments should be addressed to Robert E. Bloch, Chief, Professions and Intellectual Property Section, Antitrust Division, United States Department of Justice, Washington, DC 20530. (telephone: 202/724–7425)

BILLING CODE 4401–01–M

### Westinghouse Electric Corp., et al.; Competitive Impact Statements and Proposed Consent Judgments

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16 (b) through (h), that a proposed Final Judgment, Stipulation, and Competitive Impact Statement have been filed with the United States District Court for the Southern District of New York in *United States v. Westinghouse Electric Corporation, ABB Asea Brown Boveri Ltd., and Asea Brown Boveri Inc.*, Civil Action No. 89–CIV–1032.

The Complaint in this case alleges that the effect of the proposed joint ventures between Westinghouse and ABB may be substantially to lessen competition in the United States markets for power transformers, converter transformers, steam turbine generator equipment and steam turbine generator service, in violation of section 7 of the Clayton Act, 15 U.S.C. 18.

The proposed Final Judgment: (a) Orders and directs ABB to divest any and all interest that it has or shall acquire in all power transformer business and assets of ABB Electric, Inc. in Waukesha, Wisconsin; (b) orders and directs Westinghouse to sell its converter transformer and smoothing reactor technology, or grant the right to use or license that technology; (c) enjoins and restrains Westinghouse and ABB for a period of ten (10) years from the entry of the proposed Final Judgment from any merger, consolidation, acquisition of stock or assets or other combination, or any joint venture, partnership or other agreement, the purpose or effect of which would be to integrate or otherwise combine any of the respective businesses of manufacture or sale of steam turbine generator equipment or steam turbine generator service of Westinghouse and ABB; and (4) orders and directs Westinghouse to abrogate restraints on the manufacture and sale of power transformers by General Electric Company which arose out of General Electric Company's sale of power transformer assets to Westinghouse in 1986.

The proposed Final Judgment requires Westinghouse and ABB to divest and dispose of, respectively, the above-described power transformer assets and converter transformer technology within one hundred eighty (180) days of entry of the proposed Final Judgment. If the divestiture and disposition are not accomplished within the 180-day period, the Court shall, upon application of the United States, appoint a trustee to effect the remaining divestiture or disposition. Under the proposed Final Judgment, Westinghouse and ABB or the trustee, whichever is then responsible for effecting the divestiture or disposition required, shall notify the Department of any proposed divestiture or disposition required by the Final Judgment. The divestiture and disposition are to be made to persons acceptable to the United States in its sole determination.

Public comment is invited within the statutory 60-day comment period. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the Court. Comments should be directed to Ralph T. Giordano, Chief, New York Field Office, Antitrust Division, United States Department of Justice, 26 Federal Plaza, Room 3630,

New York, New York 10278-0098, (212) 264-0390.

Joseph H. Widmar,

*Director of Operations, Antitrust Division.*

Civil No. 89-CIV-1032
Filed: February 14, 1989
Judge: Robert W. Sweet.

**Stipulation**

It is stipulated by and between the undersigned parties, by their respective attorneys, as follows:

(1) The Court has jurisdiction over the subject matter of this action and over each of the parties hereto, and venue of this action is proper in the Southern District of New York.

(2) The parties consent that a Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendants and by filing that notice with the Court.

(3) In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever, and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding.

Stipulation Approved for Filing.

Done this _____ day of February 1989.

*United States District Judge.*

**Final Judgment**

Whereas, plaintiff, United States of America, has filed its Complaint herein on February 14, 1989, and the plaintiff and defendants, by their respective attorneys, have consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law and without this Final Judgment constituting any evidence against or an admission by any party with respect to any such issue;

And whereas, defendants have agreed to be bound by the provisions of this Final Judgment pending its approval by the Court;

And whereas, defendants' prompt and certain divestiture and disposition of assets and other interests are, among other things, essential to this agreement, and defendants have represented to the plaintiff that the divestiture and disposition required below can and will be made and that defendants will later raise no claim of hardship or difficulty as grounds for asking the Court to modify any of the divestiture or disposition requirements set forth below;

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby

Ordered, adjudged, and decreed as follows:

*I—Jurisdiction*

This court has jurisdiction over the subject matter of this action and over each of the parties hereto. The Complaint states a claim upon which relief may be granted against defendants under section 7 of the Clayton Act, as amended (15 U.S.C. 18).

*II—Definitions*

As used in this Final Judgment:

A. "Westinghouse" means defendant Westinghouse Electric Corporation; each division, subsidiary, or other person controlled by it; and each officer, director, employee, agent, or other person acting for or on behalf of any of them.

B. "ABB" means defendants ABB Asea Brown Boveri Ltd. and Asea Brown Boveri Inc.; each division, subsidiary, or other person controlled by it; and each officer, director, employee, agent, or other person acting for or on behalf of any of them.

C. "Person" means any individual, corporation, association, firm, partnership, or other business or legal entity.

D. "Transformer" means a static device used to transfer electrical energy from one circuit to another by induction.

E. "Power Transformer" means a transformer with a minimum OA nameplate power rating of 40 megavolt-amperes ("MVA") or higher.

F. "Converter transformer" means a specialized transformer that is a component of a converter unit, which converts alternating electrical current to direct current or vice versa, for use primarily as a component of high voltage direct current systems.

G. "Smoothing reactor" means a device used to introduce reactance into a circuit for the purpose of reducing the alternating current component in a direct current power system.

H. "Steam turbine generator equipment" means steam turbines, 65 megawatts or higher, and/or electric generators, 65 megawatts or higher, used to convert the energy of high temperature pressurized steam to electrical energy.

I. "Steam turbine generator service" means the repair, retrofitting, or modernization of steam turbine generator equipment.

J. "Westinghouse converter transformer and smoothing reactor technology" means all patents, patent applications, trade secrets, confidential technical information, manufacturing instructions, and other intellectual property and property rights owned by, or licensed to, Westinghouse prior to consummation of the electric transmission and distribution equipment joint venture with ABB and used principally in the design or manufacture of converter transformers or smoothing reactors. The term Westinghouse converter transformer and smoothing reactor technology shall also include existing manufacturing drawings employed exclusively in the design or manufacture of converter trnsformers or smoothing reactors. A grantee of rights pursuant to Section VI of this Final Judgment may request within one (1) year of the grant a copy of the existing manufacturing drawings, subject to the requirement that the grantee shall fully reimburse Westinghouse for any reasonable costs associated with the duplication of such drawings.

*III—Application*

A. The provisions of the Final Judgment shall apply to Westinghouse and ABB, each of their successors and assigns, and to all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise.

B. The provisions of Sections V through XI of this Final Judgment shall be applicable only upon the consummation of the proposed joint venture between Westinghouse and ABB relating to electrical transmission and distribution equipment.

C. Nothing contained in this Final Judgment shall suggest that any portion of this Final Judgment is or has been created for the benefit of any third party, and nothing herein shall be construed to provide any rights to any third party.

D. Westinghouse and ABB shall require, as a condition of the sale or other disposition of all or substantially all of their assets or stock, that the acquiring party or parties agree to be bound by the provisions of this Final Judgment.

*IV—Injunction*

Westinghouse and ABB are enjoined and restrained for a period of ten (10) years from the entry of this Final Judgment from any merger, consolidation, acquisition of stock or assets or other combination, or any joint venture, partnership or other agreement between them, the purpose or effect of which would be to integrate or otherwise combine any of their respective businesses of the manufacture or sale of steam turbine generator equipment or steam turbine generator service in the United States, without the prior written approval of the Assistant Attorney General in charge of the Antitrust Division or his designee.

*V—Assets To Be Divested by ABB*

A. ABB is hereby ordered and directed to divest, to an eligible purchaser, any and all interest that it has or shall acquire in all transformer businesses of ABB Electric, Inc. located in Waukesha, Wisconsin, including any and all interest in any plants or other real or personal property relating to such businesses, the right to use any relevant technology or known-how, and the right to enter into all relevant licenses.

B. Unless the plaintiff otherwise consents, divestiture under Section V.A., or by the trustee appointed pursuant to Section VII, shall be accomplished in such a way as to satisfy the plaintiff, in its sole determination, that the business and assets to be divested can and will be operated by the purchaser as a viable, ongoing business, engaged in the manufacture and sale of power transformers in the United States. Divestiture under Section V.A., or by the trustee, shall be made to a purchaser for whom it is demonstrated to the plaintiff's sole satisfaction that: (1) The purchase is for the purpose of competing effectively in the manufacture and sale of power transformers in the United States and (2) the purchaser has the managerial, operational, and financial capability to compete effectively in the manufacture and sale of power transformers in the United States.

C. ABB shall take all reasonable steps to accomplish quickly the divestiture of the power transformer business and assets of ABB Electric, Inc. contemplated by this Final Judgment.

*VI—Assets To Be Disposed of by Westinghouse*

Westinghouse is hereby ordered and directed: (1) To sell to an eligible person the Westinghouse converter transformer and smoothing reactor technology; or (2) to grant to an eligible person the right to use and to license said technology. The sale or grant shall be subject to pre-existing rights held by any third party with respect to the relevant technology. The grant shall be subject to the continuing right of defendant Westinghouse or its successors and assigns to use and to license said technology. The sale or grant shall be made to a person for whom it is demonstrated to plaintiff's sole satisfaction that: (a) The sale or grant is for the purpose of enabling the purchaser or grantee to compete effectively in the sale of converter transformers in the United States; and (b) the purchaser or grantee has the managerial, operational and financial capability to compete effectively in the sale of converter transformers in the United States. Westinghouse shall hold separate and not disclose to ABB the Westinghouse converter transformer and smoothing reactor technology until such time as a disposition required under this section is completed.

*VII—Appointment of Trustee*

A. In the event that defendants have not divested or disposed of all of their interests as required by Sections V.A. and VI within 180 days of the entry of this Final Judgment, the Court shall, on application of the plaintiff, appoint a trustee to effect the required divestiture or disposition, provided, however, that plaintiff may, at its sole discretion, extend the time period for an additional period of time not to exceed ninety (90) days if defendants request such an extension and demonstrate to plaintiff's satisfaction that ongoing negotiations are likely to result in the required divestiture or disposition but that the divestiture or disposition cannot be completed within the initially specified period. After the appointment of a trustee becomes effective, only the trustee shall have the right to effect the divestiture or disposition required pursuant to Section V.A. and VI. The trustee shall have the power and authority to accomplish the divestiture or disposition at the best prices then obtainable upon a reasonable effort by the trustee, subject to the provisions of Section VIII of this Final Judgment, and shall have such other powers as the Court shall deem appropriate. Defendants shall not object to a divestiture or disposition by the trustee on any grounds other than the trustee's malfeasance. Any such objections by defendants must be conveyed in writing to the plaintiff and the trustee within 15 days after the trustee has provided the notice required under Section VIII.

B. If defendants have not divested or disposed of all of their interests as required by Section V.A. and VI within 150 days of entry of this Final Judgment, the plaintiff and defendants shall immediately notify each other in writing of the names and qualifications of not more than two (2) nominees for the position of the trustee who shall effect the required divestiture or disposition. The parties shall attempt to agree upon one of the nominees to serve as the trustee. If the parties are able to agree on a trustee within 30 days of the exchange of names, the plaintiff shall notify the Court of the person upon whom the parties agreed, and the Court shall appoint such person as the trustee. If the parties are unable to agree within that time period, the plaintiff shall furnish the Court the names of each party's nominees. The Court may hear the parties as to the qualifications of the nominees and shall appoint one of the nominees as the trustee.

C. The trustee shall serve at the cost and expense of defendants, on such terms and conditions as the Court may prescribe, and shall account for all monies derived from the sale of the assets sold by the trustee and all costs and expenses so incurred. After approval by the Court of the trustee's accounting, including fees for its services, all remaining monies shall be paid to ABB or Westinghouse, as may be appropriate, and the trust shall then be terminated. The compensation of such trustee shall be based on a fee arrangement providing the trustee with an incentive based on the price and terms of the divestiture or disposition and the speed with which it is accomplished.

D. Defendants shall use their best efforts to assist the trustee in accomplishing the required divestiture or disposition. Upon reasonable notice to defendants, the trustee and any

VOL 54 ISS 40 MR 2 1989 UMI

consultants, accountants, attorneys, and other persons retained by the trustee shall have full and complete access to personnel, books, records, and facilities as reasonably necessary to accomplish the divestiture or disposition, and defendants shall develop such relevant financial or other information as the trustee may reasonably request, subject to reasonable protection for trade secret or other confidential research, development, or commercial information. Defendants shall take no action to interfere with or impede the trustee's accomplishment of the divestiture or disposition.

E. After its appointment, the trustee shall file monthly reports with the parties and the Court setting forth the trustee's efforts to accomplish the divestiture or disposition ordered under this Final Judgment. If the trustee has not accomplished such divestiture or disposition within 180 days after its appointment, the trustee shall thereupon promptly file with the Court a report setting forth: (1) The trustee's efforts to accomplish the required divestiture or disposition, (2) the reasons, in the trustee's judgment, why the required divestiture or disposition has not been accomplished, and (3) the trustee's recommendations. The trustee shall at the same time furnish such report to the parties, who shall each have the right to be heard and to make additional recommendations consistent with the purpose of the trust. The Court shall thereafter enter such orders as it shall deem appropriate in order to carry out the purpose of the trust, which may, if necessary, include extending the trust and the term of the trustee's appointment.

*VIII—Notification*

A. Defendants or the trustee, whichever is then responsible for effecting the divestiture or disposition required herein, shall notify the plaintiff of any proposed divestiture or disposition required by Section V.A. or VI of this Final Judgment. If the trustee is responsible, it shall similarly notify defendants. The notice shall set forth the details of the proposed transaction and list the name, address, and telephone number of each person not previously identified who offered or expressed an interest or desire to acquire any of the assets or interests to be divested or disposed, together with full details of the same. Within 15 days after receipt of the notice, the plaintiff may request additional information concerning the proposed divestiture or disposition, the proposed purchaser or grantee, and any other potential purchaser or grantee. Defendants or the trustee shall furnish the additional information within 15 days of the receipt of the request unless plaintiff agrees to extend the time. Within 30 days after receipt of the notice or within 30 days after receipt of the additional information, whichever is later, the plaintiff shall notify in writing defendants and the trustee, if there is one, if it objects to the proposed divestiture or disposition. If the plaintiff fails to object within the period specified, or if the plaintiff notifies in writing defendants and the trustee, if there is one, that it does not object, then the divestiture or disposition may be consummated, subject only to defendants' limited right to object to the sale under Section VII.A. Upon objection by defendants under Section VII.A. Upon objection by defendants under Section VII.A., the proposed divestiture or disposition shall not be accomplished unless approved by the Court.

B. Thirty (30) days from the date of entry of this Final Judgment and 30 days thereafter until the divestiture and disposition have been completed, defendants shall deliver to the plaintiff a written report as to the fact and manner of compliance with Sections V and VI of this Final Judgment. Each such report shall include, for each person who during the preceding 30 days made an offer, expressed an interest or desire to acquire, entered into negotiations to acquire, or made an inquiry about acquiring any of the assets or interests to be divested or disposed, the name, address, and telephone number of that person and a detailed description of each contact with that person during that period. Defendants shall maintain full records of all efforts made to accomplish the divestiture or disposition.

*IX—Financing*

Defendants shall not finance all or any part of any purchase made pursuant to sections V or VI of this Final Judgment without the prior consent of the plaintiff.

*X—Preservation of Assets to be Divested by ABB*

A. ABB shall preserve, hold, and continue to operate as a going business the assets to be divested pursuant to Section V, with its assets, management, and operations separate, distinct, and apart from those of defendants, unless the plaintiff otherwise consents. ABB shall use all reasonable efforts to maintain the assets to be divested as a viable and active competitor in the market for power transformers.

B. ABB shall not sell, lease, assign, transfer, or otherwise dispose of, or pledge as collateral for loans (except such loans as are currently outstanding or replacements or substitutes therefore), the assets to be divested, except that any such asset that is replaced in the ordinary course of business with a newly purchased asset may be sold or otherwise disposed of, provided the newly purchased asset is so identified as a replacement for an asset to be divested.

C. The provisions of Sections X.A. and X.B. include but are not limited to: preserving all plants and equipment used for the manufacture or sale of power transformers; preserving all air pollution and operating permits (including proceeding with such application or operation as is necessary to renew such permits or make permanent any temporary permits); and preserving all administrative and support facilities. These provisions do not preclude the sale in the ordinary course of business of the power transformers as may be produced by the assets to be divested.

D. ABB shall provide and maintain sufficient working capital to maintain the assets to be divested as a viable, ongoing business.

E. ABB shall provide and maintain sufficient lines and sources of credit to maintain the assets to be divested as a viable, ongoing business.

F. ABB shall preserve the assets to be divested in a state of repair equal to their state of repair as of the date of defendants' joint venture agreement

G. ABB shall identify separately all major assets or replacements for or proceeds therefrom that were used in the manufacture or sale of power transformers by ABB Electric, Inc. prior to the date on which defendants consummate their joint venture relating to electric transmission and distribution equipment.

H. ABB shall maintain on behalf of the assets to be divested, in accordance with sound accounting practice separate, true and complete financial ledgers, books and records reporting the profit and loss and liabilities of the assets to be divested on a monthly and quarterly basis.

I. ABB shall refrain from terminating or reducing any current employment, salary, or benefit agreements for any management, engineering, or other technical personnel employed in connection with the assets to be divested, except in the ordinary course of business, without the prior approval of plaintiff.

J. Defendants shall refrain from taking any action that would have effect of reducing the scope or level of competition between the assets to be divested and other manufacturers or sellers or power transformers, without the prior approval of the plaintiff.

K. Defendant shall refrain from taking any action that would jeopardize the sale of the assets to be divested as a viable going concern.

*XI—Amendment to General Electric Company and Westinghouse Asset Purchase Agreement*

Westinghouse, having agreed on February 9, 1989 with General Electric Company to amend their November 16, 1988 assest purchase agreement relating to power transformers, which amendment would allow General Electric Company, to the extent provided therein, to resume the manufacture and sale of power transformers and to use intellectual property relating to power transformers, it is hereby ordered and directed to take all reasonable steps to consummate and otherwise give full force and effect to February 9, 1989 amendment.

*XII—Compliance Inspection*

For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time:

A. Duly authorized representatives of the Department of Justice, including consultants and other persons retained by the Department, shall, upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to defendants made to their principal offices, be permitted:

1. Access during office hours to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of defendants, which may have counsel present, relating to any matters contained in this Final Judgment; and

2. Subject to the reasonable convenience of defendants and without restraint or interference from them, to interview their officers, employees, and agents, who may have counsel present, regarding any such matters.

B. Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division made to defendants at their principal offices, defendants shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested.

C. No information or documents obtained by the means provided in this Section XII shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party (including grand jury proceedings), or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

D. If a time information or documents are furnished by defendants to plaintiff, defendants represent and identify in writing the material in any such information or documents for which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and defendants mark each pertinent page of such material, "subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then plaintiff shall give ten (10) days notice to defendants prior to divulging such material in any legal proceeding (other than a grand jury proceeding) to which defendants are not a party.

*XIII—Retention of Jurisdiction*

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction, implementation, or modification of any of the provisions of this Final Judgment, for the enforcement of compliance herewith, and for the punishment of any violations hereof.

*XIV—Termination*

This Final Judgment will expire on the tenth anniverary of the date of its entry.

*XV—Public Interest*

Entry of this Final Judgment is in the public interest.

Dated: _____

Court approval subject to procedures of Antitrust Procedures and Penalties Act, 15 U.S.C. 16.

---

United States District Judge.

**Competitive Impact Statement**

The United States, pursuant to section 2(b) of the Antitrust Procedures and Penalties Act ("APPA") 15 U.S.C. 16(b)–(h), files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

*I—Nature and Purpose of the Proceeding*

Contemporaneously with this statement, the United States filed a civil antitrust Complaint under Section 15 of the Clayton Act, 15 U.S.C. 25, alleging that two proposed partnership joint ventures between Asea Brown Boveri Inc. and Westinghouse Electric Corporation ("Westinghouse") would violate Section 7 of the Clayton Act, 15 U.S.C. 18. The Complaint names as defendants Westinghouse and Asea Brown Boveri, Inc. and its parent company, ABB Asea Brown Boveri Ltd.[1] The Complaint alleges that the effects of the joint ventures may be substantially to lessen competition in the United States markets for power transformers, converter transformers, steam turbine generator equipment and steam turbine generator service. The Complaint seeks such injunctive relief and relief by way of preservation of assets and divestiture as is appropriate to prevent the anticompetitive effects of the joint ventures and to maintain existing competitive conditions in these markets.

Together with the filing of this Competitive Impact Statement, the United States and defendants have filed a stipulation by which they consent to the entry of a proposed Final Judgment designed to eliminate the anticompetitive effects of the proposed joint ventures. Under the proposed Final Judgment, as explained more fully below, ABB would be required, within six months, to sell any and all interest it has or shall acquire in all the transformer businesses of ABB Electric, Inc. in Waukesha, Wisconsin ("Waukesha business"). If it does not do so, a trustee apponted by the Court would be empowered for an additional six months to sell the Waukesha business. If the trustee is unable to do so, the Court may extend the trustee period or enter such other orders as it shall deem appropriate in order to carry out the purpose of the trust.

The proposed Final Judgment would also require Westinghouse, within six months, to sell its converter transformer and related smoothing reactor technology, or grant the right to use and to license that technology to an eligible person. If it does not do so, the Court would be empowered to appoint a trustee to accomplish such a sale or grant.

Under the proposed Final Judgment, Westinghouse would be further required to release General Electric Company

---

[1] Hereinafter, the term "ABB" means ABB Asea Brown Boveri Ltd. and Asea Brown Boveri Inc.

VOL 54 ISS 40 MR 2 1989 UMI

from its covenant not to compete with Westinghouse in power transformers, which General Electric agreed to in connection with the sale of its power transformer business to Westinghouse in 1986.

The proposed Final Judgment would also enjoin, for a period of 10 years, Westinghouse and ABB from combining their steam turbine generator equipment or steam turbine generator service businesses in the United States.

The United States and defendants have stipulated that the proposed Final Judgment may be entered after compliance with the APPA, unless the United States withdraws its consent. Entry of the proposed Final Judgment would terminate the action, except that the Court would retain jurisdiction to construe, modify, or enforce the provisions of the proposed Final Judgment and to punish violations of the proposed Final Judgment.

*II—Events Giving Rise to the Alleged Violation*

ABB, with headquarters in Zurich, Switzerland, is the world's largest producer of electric power equipment. Westinghouse, with headquarters in Pittsburgh, Pennsylvania, is also one of the world's leading producers of electric power equipment. ABB and Westinghouse have agreed to form two partnership joint ventures,[3] one relating to electric power transmission and distribution products, and the other relating to electric power generation products. The power transmission and distribution joint venture would combine, among other thing, the companies' respective power transformer and converter transformer businesses in the United States. The power generation joint venture would combine defendants' respective steam turbine generator equipment and steam turbine generator service businesses in the United States. Defendants would transfer certain manufacturing plants, technology, or other assets to the new joint venture companies. ABB also would pay Westinghouse more than $500 million in cash. Each of the joint ventures would be conditioned on the performance of the important terms of the other joint venture.

A. Power Transformers

Power transformers are static devices used to transfer electric energy from one circuit to another by induction.[5] They are used by electric power utilities to convert low voltage electricity produced by a power generating unit to higher voltages that are more efficiently carried over transmission lines, and to reduce voltages between transmission and distribution lines to deliver electricity safely to utility customers. Investor owned utilities and utilities owned and operated by federal, state, county and municipal governments are the principal purchasers of power transformers in the United States.

The Complaint alleges that the sale of power transformers constitutes a line of commerce and a relevant product market, and that the United States is a section of the country and a relevant geographic market in which power transformers are sold within the meaning of Section 7 of the Clayton Act. Successful entry into the power transformer market is difficult because of the cost and time required to develop the necessary technology to produce power transformers, to construct the physical facilities required for production of power transformers, to assemble the necessary technical, sales and service personnel, and to become a qualified source of power transformers for domestic electric utilities.

ABB was the largest seller of power transformers in the United States in 1987. In that same year, Westinghouse was the second leading seller of power transformers in the United States. In terms of unit sales, the 1987 power transformer market shares of ABB and Westinghouse were 27 percent and 26 percent, respectively. The Complaint alleges that the United States market for power transformers is highly concentrated. Based on 1987 units sales, the proposed combination would increase the Herfindahl-Hirschman Index ("HHI") [4] by over 1388 to 3284.

B. Converter Transformers

The manufacture of converter transformers involves a technology different from that used in the manufacture of power transformers. Converter transformers are sold primarily to companies that design high voltage direct current (HVDC) systems, which are used in transmitting electricity over long distance transmission lines. They are also used to connect asynchronous transmission systems. Converter transformers are major cost items in HVDC systems.

The Complaint alleges that sale of converter transformers constitutes a line of commerce and a relevant product market, and that the United States is a section of the country and a relevant geographic market in which converter transformers are sold, within the meaning of section 7 of the Clayton Act.

ABB is the largest seller of converter transformers in the United States and, since 1981, has accounted for more than 50 percent of all converter transformers sold in the United States. General Electric Company was a major competitor of ABB until it sold its converter transformer technology (and related smoothing reactor technology [6]) to Westinghouse in 1988. Westinghouse is one of only a few companies possessing such technology since 1988, Westinghouse has been one of only four companies bidding to supply converter transformers in the United States.

C. Steam Turbine Generator Equipment

Steam turbine generator equipment consists of a turbine and a connecting generator. Steam passes through the turbine causing the generator rotor and an attached electromagnet to rotate within a stator, generating electicity. Steam turbine generator equipment is the principal means by which nuclear and fossil-fueled utility plants generate electricity from steam energy produced by nuclear reactor or conventional boiler operations. The principal purchasers of steam turbine generator equipment are utilities. Steam turbine generator equipment is also sold to cogenerators, independent power producers and industrial customers.

The Complaint alleges that the sale of steam turbine generator equipment constitutes a line of commerce and a relevant product market, and that the United States is a section of the country and a relevant geographic market in which steam turbine generator equipment is sold within the meaning of section 7 of the Clayton Act. Successful entry into the steam turbine generator equipment market in the United States is difficult because of the cost and time required to develop the necessary technology to produce steam turbine generator equipment, to construct the physical facilities required for production and service of steam turbine generator equipment, to assemble the necessary technical, sales and service personnel and to become a qualified source of steam turbine generator equipment for domestic electric utilities.

In the period 1983 through 1987, total sales of steam turbine generator equipment in the United States were approximately $442 million. Westinghouse and ABB were the first and third largest suppliers of steam turbine generator equipment in the United States in that period, with market shares of 43 percent and 19 percent, respectively.

The Complaint alleges that the United States market for steam turbine generator equipment is highly concentrated. The proposed joint venture would create a firm controlling approximately 62 percent of steam turbine generator equipment sold in the United States, based on sales in the period 1983 through 1987. The proposed combination would increase the HHI by 1566 to 4093.

D. Steam Turbine Generator Service

Owners of steam turbine generator equipment may at times require equipment repairs involving the replacement or retrofitting of major components, or equipment modernization efforts aimed at significant efficiency enhancements or life extensions. Such steam turbine generator service is provided principally to private and public utility companies. In the past several years manufacturers of steam turbine generator equipment have begun bidding to provide such service not only for equipment of their own manufacture but also for equipment manufactured by others.

The Complaint alleges that the sale of steam turbine generator service constitutes a line of commerce and a relevant product market, and that the United States is a section of the country and a relevant geographic market in which steam turbine generator service is provided within the meaning of section 7 of the Clayton Act. Successful entry into the steam turbine generator service market is difficult because of the cost and time required to develop the necessary technology to provide steam turbine generator service, to construct the physical facilities required for provision of such service, to assemble the necessary technical, sales and service personnel, and to become a qualified source for steam turbine generator service for domestic electric utilities.

The Complaint alleges that the United States market for steam turbine generator service is highly concentrated. Westinghouse and ABB are leading suppliers of steam turbine generator service in the United States. Only five companies have provided such steam turbine generator service in the United States during the period from 1983 through 1987.

*III—Explanation of the Proposed Final Judgment*

The United States brought this action because the effect of these joint ventures may be substantially to lessen competition in the United States markets for power transformers, converter transformers, steam turbine generator equipment and steam turbine generator service, in violation of section 7 of the Clayton Act. As described in detail below, the provisions of the Final Judgment are designed to eliminate the anticompetitive effects of the proposed joint ventures.

A. Remedy as to Power Transformers

The proposed Final Judgment contains two remedies that will preserve the competition in power transformers that the joint venture of defendants would otherwise eliminate. First, the proposed Final Judgment requires ABB, within six months of its filing, to divest itself of its power transformer plant at Waukesha, Wisconsin, which is its only power transformer facility in the United States.[8] If ABB cannot accomplish the required divestiture within that period, the proposed Final Judgment provides that, upon application by the United States, the Court shall appoint a trustee to effect the divestiture.

The proposed Final Judgment provides that the Waukesha business must be divested in such a way as to satisfy the United States that this business can and will be operated by the purchaser as a viable, ongoing business that can compete effectively in the power transformer market. ABB must take all reasonable steps necessary to accomplish the divestiture and shall cooperate with bona fide prospective purchasers and, if one is appointed, the trustee.

In a trustee is appointed, the proposed Final Judgment provides that defendants will pay all costs and expenses of the trustee. The trustee's commission will be structured so as to provide an incentive for the trustee based on the price obtained and the speed with which divestiture is accomplished. After the trustee's appointment becomes effective, the trustee will file monthly reports with the parties and the Court setting forth the trustee's efforts to accomplish divestiture. At the end of six months, if the trustee has not accomplished the divestiture, the trustee and the parties will make recommendations to the Court and the Court shall thereafter enter such orders as it shall deem appropriate in order to carry out the purpose of the trust, including extending the trust or the term of the trustee's appointment.

The proposed Final Judgment provides the United States an opportunity to review any proposed divestiture before it occurs. If the United States requests information from defendants to assess a proposed sale, the sale may not be consummated until at least 20 days after defendants supplied the information. If the United States objects to a proposed divestiture, the sale may not be completed.

The proposed Final Judgment provides that until the required divestiture has been accomplished, ABB must preserve and maintain the Waukesha business as a viable and active competitor. ABB must hold the Waukesha business, including all books and records, separate and apart from its other assets and businesses, and must maintain the Waukesha business as a saleable and economically viable, ongoing business.

The second element of the power transformer relief in the proposed Final Judgment provides for the restoration of General Electric Company as a competitor in the United States power transformer market. In 1986 General Electric sold most of its power transformer business to Westinghouse; the substantial terms of this transaction are reflected in an agreement between the parties dated November 18, 1986. As a part of that transaction General Electric agreed not to compete for the sale of power transformers of 40 MVA and above for a period of ten years; that period expires in November, 1996.[7] General Electric again desires to compete in the power transformer market. On February 9, 1989, it agreed with Westinghouse to an amendment to the 1986 agreement which abrogates the covenant not to compete and also grants to General Electric a license to use the technology relating to power transformers that General Electric sold to Westinghouse. The amendment will become effective upon the commencement of operations by the Westinghouse-ABB joint venture. The proposed Final Judgment requires

---

[3] Defendants agreed to a preliminary Memorandum of Understanding in April of 1988.

[5] As used herein, power transformers refers to transformers with minimum OA power ratings of 60 megavolt-amperes ("MVA") or higher.

[4] The HHI is a measure of market concentration calculated by squaring the market share of each firm competing in the market and then summing the resulting numbers. for example, for a market consisting of four firms with shares of 30, 30, 20, and 20 percent, the HHI is 2600 ($30^2 + 30^2 + 20^2 + 20^2 = 2600$). The HHI, which takes into account the relative size and distribution of the firms in a market, ranges from virtually zero to 10,000. The index approaches zero when a market is occupied by a large number of firms of relatively equal size and reaches its maximum of 10,000 when a market is controlled by a single firm. The HHI increases both as the number of firms in the market decreases and as the disparity in size between the leading firms and the remaining firms increases.

[6] A smoothing reactor is a device used to introduce reactance into a circuit for the purpose of reducing the alternating current component in a direct current power system.

[8] ABB also manufactures power transformers at plants in Canada and Europe.

[7] General Electric continues to manufacture power transformers of less than 40 MVA at its plant in Rome, Georgia.

VOL 54 ISS 40 MR 2 1989 UMI

Westinghouse to consummate that agreement.

Thus, the proposed Final Judgment requires the divestiture of the assets used by ABB in the manufacture of power transformers in the United States. In addition, it will permit General Electric Company, which in years past has been the largest United States manufacturer of electric equipment, again to become a competitor in the power transformer market. The combination of the two elements of relief will restore the competition in power transformers that would otherwise be eliminated by the joint venture of Westinghouse and ABB.

B. Remedy as to Converter Transformers

In its 1986 agreement with General Electric Company, Westinghouse also purchased General Electric's technology relating to converter transformers. That technology enabled Westinghouse to enter the converter transformer market and to begin bidding to supply converter transformers for use in high voltage direct current (HVDC) systems. As alleged in the Complaint, Westinghouse and ABB are two of only a few firms possessing such technology and currently bidding to supply converter transformers in the United States.

The proposed Final Judgment requires Westinghouse to sell or to grant the right to use and license its converter transformer (and related smoothing reactor) technology. The sale or license would be subject to any pre-existing rights held by any third party with respect to the relevant technology. The sale or license is to be made to a person, for whom it is demonstrated to plaintiff's sole satisfaction, that intends to sell and is capable of selling converter transformers in the United States. Westinghouse is to hold separate and not disclose to ABB the technology pending completion of the required disposition.[6]

C. Remedies as to Steam Turbine Generator Equipment and Steam Turbine Generator Service

The proposed Final Judgment enjoins and restrains Westinghouse and ABB, for a period of 10 years, from entering into their proposed joint venture, or any similar agreement, relating to steam turbine generator equipment and steam turbine generator service without the prior written approval of the Antitrust Division.

*IV—Remedies Available to Potential Private Litigants*

Section 4 of the Clayton Act (15 U.S.C. 15) provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages the person has suffered, as well as costs and reasonable attorneys' fees. Entry of the proposed Final Judgment will neither impair nor assist the bringing of any private antitrust damage action. Under the provisions of sectdion 5(a) of the Clayton Act (15 U.S.C. 16(a)), the proposed Final Judgment has no *prima facie* effect in any subsequent private lawsuit that may be brought against defendants.

*V—Procedure Available for Modification of the Proposed Final Judgment*

The United States and defendants have stipulated that the proposed Final Judgment may be entered by the Court after compliance with the provisions of the APPA, provided that the United States has not withdrawn its consent. The APPA conditions entry upon the Court's determination that the proposed Final Judgment is in the public interest.

The APPA provides a period of at least 60 days preceding the effective date of the proposed Final Judgment within which any person may submit to the United States written comments regarding the proposed Final Judgment. Any person who wishes to comment should do so within 60 days of the date of publication of this Competitive Impact Statement in the **Federal Register**. The United States will evaluate the comments, determine whether it should withdraw its consent, and respond to comments. The comments and the response of the United States will be filed with the Court and published in the **Federal Register**.

Written comments should be submitted to: Ralph T. Giordano, Chief, Antitrust Division, New York Field Office, United States Department of Justice, 26 Federal Plaza, Room 3630, New York, NY 10278–0096.

*VI—Alternatives to the Proposed Final Judgment*

With respect to the power generation joint venture agreement, the injunction in the proposed Final Judgment prohibiting Westinghouse and ABB from combining their respective steam turbine generator equipment and steam turbine generator service businesses provides all the relief that could be obtained by the United States with respect to that joint venture after a full trial on the merits.

With respect to the transmission and distribution joint venture agreement, an alternative to settling this action pursuant to the proposed Final Judgment would be for the United States to seek preliminary and permanent injunctions against consummation of the joint venture agreement that relates to, among other things, the market for power transformers and converter transformers. The United States rejected this alternative because the sale required under the proposed Final Judgment of ABB's Waukesha business will establish a viable, independent competitor in the power transformer market in the United States. The Waukesha plant is ABB's only power transformer facility in the United States and manufactures a substantial range of the sizes of power transformers that sells in the United States. ABB manufactures larger sizes that it sells in the United States at plants in other countries. A buyer which, like ABB, also makes large power transformers at plants in other countries, will assume a similar position in the United States market as that now held by ABB. Whether or not the purchaser of Waukesha produces large power transformers, however, Westinghouse's release of General Electric Company from its covenant not to compete in the United States in the manufacture and sale of power transformers will likely result in General Electric's reentry as a viable, independent competitor in the power transformer market in the United States.

With respect to the converter transformer market, the sale or grant of the right to use and license Westinghouse's converter transformer and smoothing reactor technology will facilitate new entry into that market. That transaction will duplicate the transaction that brought Westinghouse into the converter transformer market.

The United States is therefore satisfied that the proposed Final Judgment fully resolves the anticompetitive effects of the proposed joint ventures alleged in the complaint. Further, although the proposed Final Judgment may not be entered until the criteria established by the Antitrust Procedures and Penalties Act (15 U.S.C. 16(b)-(h)) have been satisfied, the public will benefit immediately from the safeguards in the proposed Final

[6] The February 9, 1989 amendment to the Westinghouse-General Electric agreement also permits General Electric to reenter the converter transformer market and grants to General Electric a license to use the converter transformer technology it sold to Westinghouse in 1986. That transaction is independent of the requirement of the proposed Final Judgment relating to converter transformer technology. Plaintiff takes no position at this time as to whether that transaction satisfies the converter transformer requirement of the proposed Final Judgment.

Judgment because defendants have agreed to comply with the terms of the Judgment pending its entry by the Court.

*VII—Determinative Documents*

Amendment 3 to the 1986 Asset Purchase Agreement between General Electric Company and Westinghouse Electric Corporation, dated February 9, 1989, and the 1986 agreement itself are determinative documents within the meaning of the APPA that were considered by the United States in formulating the proposed Final Judgment. Accordingly, these documents are filed with this Competitive Impact Statement. However, insofar as the contracts contain confidential, commercially sensitive information relating to the prices paid for the various transfers of rights, that information has been redacted. The United States is prepared to file unredacted contracts with the Court, under seal, at its request.

## Drug Enforcement Administration

**[Docket No. 88-58]**

## Leon D. Goggin, M.D.; Revocation of Registration

On June 3, 1988, the Administrator of the Drug Enforcement Administration (DEA), issued an Order to Show Cause to Leon D. Goggin, M.D., (Respondent), of 620 Beaver Avenue, Midland, Pennsylvania, and Westinghouse Electric Corp., Beaver, Pennsylvania, proposing to revoke his two DEA Certificates of Registration, AG1664742 and BG0806377. The Order to Show Cause alleged that the Respondent's continued registration would be inconsistent with the public interest, as set forth in 21 U.S.C. 823(f) and 824(a)(4). Additionally, citing his preliminary finding that Respondent's continued registration posed an imminent danger to the public health and safety, the Administrator ordered the immediate suspension of his Certificates of Registration pending the outcome of these proceedings. 21 U.S.C. 824(d).

Respondent, through counsel, requested a hearing in a letter dated June 20, 1988. The matter was docketed before Administrative Law Judge Francis L. Young. Following prehearing procedures, a hearing was held in Washington, DC on November 22, 1988. Both parties waived the provisions of 21 CFR 1316.64 for the filing of post-hering findings and conclusions and written argument. Instead, at the conclusion of testimony, Judge Young heard oral argument from both sides. The Judge announced his findings, conclusions and decision from the bench immediately thereafter. On December 16, 1988, the Administrative Law Judge issued his written opinion and recommended ruling, findings, conclusions and decision. On January 6, 1989, Respondent filed exceptions to the opinion and recommended ruling of the Administrative Law Judge. On January 17, 1989, the Government filed a response to Respondent's exceptions. On January 24, 1989, Judge Young transmitted the record of these proceedings, including the aforementioned exceptions, to the Administrator. The Administrator has considered the record in its entirety and pursuant to 21 CFR 1316.67, hereby issues his final order in this matter based upon the findings of fact and conclusions of law as hereinafter set forth.

The Administrative Law Judge found that Respondent is a physician licensed to practice in the State of Pennsylania. In January 1988, a cooperating individual was interviewed by DEA Task Force Agents. This individual indicated that he was a patient of Respondent and that he was receiving Percocet, a Schedule II narcotic controlled substance, from Respondent because of his drug addiction. On February 16, 1988, the cooperating individual went to Respondent's medical office under the supervision of DEA Task Force Agents. The cooperating individual was equipped with an electronic recording/transmitting device. The cooperating individual told Respondent that he no longer needed drugs to relieve back pain, but that he was hooked on Percocet. The Respondent then issued the cooperating individual a prescription for 40 Percocet. The Administrative Law Judge found that on the date in question, the preponderance of the evidence established Respondent's prescribing of Schedule II controlled substances for no legitimate medical purpose and outside the scope of professional practice.

The Administrative Law Judge also found that three DEA Task Force Agents posing as patients went to Respondent's office and, on each of six occasions, obtained prescriptions for Percocet from Respondent for no legitimate medical purpose. On March 4, 1988, a DEA Agent conducted surveillance outside the building that houses Respondent's medical office. The Agent observed large numbers of persons known to the police to be drug dependent or drug addicted waiting to see Respondent at his office or emerging therefrom. At the hearing, this DEA Agent testified that he visited Respondent's office on three occasions in an undercover capacity using a fictitious name. On two occasions he received a prescription for 40 dosage units of Percocet. The first visit was on March 18, 1988. The DEA Agent went to Respondent's Midland, Pennsylvania office and told Respondent that he fell off a scaffolding a few years ago and hurt his back. Respondent told the Agent that he knew the Agent was using the story just to get Percocet. Respondent then told the Agent that he was going to treat his codeine abuse, because he did not have a back problem, and that he would try to control the amount he took and decrease it over period. Respondent then wrote the Agent a prescription for 40 dosage units of Percocet.

When the DEA Agent returned to Respondent's office on April 18, 1988, again in an undercover capacity, he observed individuals handing in empty prescription vials and receiving prescriptions in return. The Agent then handed the nurse his empty prescription vial. The nurse returned with a prescription for the Agent for 40 dosage units of Percocet. Thus, the Agent received a prescription for Percocet from Respondent without Respondent's having ever made an examination or even spoken to the Agent, who was supposedly his patient.

The Administrative Law Judge found that an additional DEA Task Force Agent, also operating under an assumed name, went to Respondent's medical office on March 1, 1988, and asked the Respondent for something for pain from a car accident that occurred 18 months previously. Respondent asked the Agent

VOL 54 ISS 40 MR 2 1989 UMI

how long he had been hooked on Percocets and why he was taking them. The Agent told Respondent that he enjoyed taking them and they made him relax. Respondent then told the Agent that he was strung out and that Respondent was treating him for his drug problem. Resondent then wrote the Agent a prescription for 40 tablets of Percocet and told him to only take three a day.

This DEA Agent returned to Respondent's medical office two more times. Each time Respondent conducted a cursory medical examination and wrote the Agent a prescription for 40 tablets of Percocet. Respondent issued these prescriptions even after the DEA Agent told Respondent that in addition to the Percocet he was receiving from Respondent, he was also getting Percocet on the streets and taking more Percocets than the Respondent had advised him to take.

The Administrative Law Judge concluded that all these prescriptions for Percocet were written by Respondent for no legitimate medical purpose. At the hearing, Respondent stated that he wrote those prescriptions for Percocet to treat the "patients" narcotic addiction or dependency. Respondent maintained that he did not know such conduct was prohibited by law, and that he was trying, in good faith, to treat these individuals for their dependency. The Administrative Law Judge found that such a purpose, even if it had been the true, honest purpose and intent of Respondent, is beyond what the law permits the Respondent to do. The prescribing of a narcotic to a narcotic dependent person for treatment of his dependency or for maintenance is not lawful in any case. Although direct administration or dispensing can be lawful, one must have a special DEA Registration to do so. Respondent does not have such a registration. 21 U.S.C. 823(g); 21 CFR 1306.07(a).

The Administrative Law Judge concluded that Respondent's stated purpose was a sham. Respondent did not prescribe these substances to the DEA Agents in good faith for a legitimate medical purpose. Respondent undertook only the most superficial of medical examinations before issuing his customary 40 Percocet prescriptions. Respondent took extremely skimpy histories from these supposed patient addicts before he began "treating" them for narcotic addiction or dependency by prescribing narcotic substances. The undercover Agents were not, in fact, narcotic dependent individuals, and the Respondent could have verified this if he had conducted any tests of their condition. None of the Agents patently represented to Respondent that they were dependent. Indeed, it was the Respondent who insisted that they were narcotic dependent.

The Administrative Law Judge recommended that the Administrator revoke Respondent's Certificates of Registration. The Administrator may revoke a DEA Certificate of Registration if he determines that such registration is inconsistent with the public interest. Included among the factors to be considered in determining the public interest is an individual's experience in dispensing controlled substances and compliance with applicable State, Federal or local law. 21 U.S.C. 823(f). Respondent's conduct was clearly in violation of Federal law, and his experience with regard to dispensing controlled substances was that he was maintaining narcotic addicts. Respondent's conduct was tantamount to dealing drugs under the guise of medical practice. An armed guard stood close by the receptionist as she collected fees, paid in cash, from so called "patients" when they entered the office and before they ever even saw the doctor. The circumstances surrounding Respondent's practices are indicative that his practice was outside the scope of his professional practice. Respondent's behavior leads to the inescapable conclusion that he cannot be permitted to maintain his DEA Registration.

The Administrator adopts the findings of fact, conclusions of law and decision of the Administrative Law Judge in its entirety. In view of the foregoing facts, it is quite clear that Respondent prescribed Schedule II controlled substances for no legitimate medical purpose and outside the scope of professional practice. Respondent's registration is clearly inconsistent with the public interest. Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificates of Registration AG1684742 and BG0906377, previously issued to Leon D. Goggin, M.D., be, and they hereby are, revoked. It is further ordered that any pending applications for renewal of said registrations be, and they hereby are, denied.

At the time the Order to Show Cause and Immediate Suspension was served on Respondent, all controlled substances possessed by Respondent under the authority of his then-suspended registration were placed under seal and removed for safekeeping. 21 U.S.C. 824(f) provides that no disposition may be made of such controlled substances under seal until the time for taking appeals has elpased. Accordingly, these controlled substances shall remain under seal until April 3, 1989, or until any appeal of this order has been concluded. At that time, all such controlled substances shall be forfeited to the United States and shall be disposed of pursuant to 21 U.S.C. 881(3).

This order is effective immediately.

Dated: February 27, 1989.

**John C. Lawn,**

*Administrator.*

BILLING CODE 4410-09-M

### Manufacturer of Controlled Substances; Registration; Sterling Drug Inc.

By Notice dated February 17, 1988, and published in the **Federal Register** on February 24, 1988, (53 FR 5480), Sterling Drug Inc., 33 Riverside Avenue, Rensselaer, New York 12144, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of pethidine (meperidine) (9230), a basic class of controlled substance listed in Schedule II.

No comments or objections have been received. Therefore, pursuant to section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and Title 21, Code of Federal Regulations, § 1301.54(e), the Administrator hereby orders that the application submitted by the above firm for registration as bulk manufacturer of the basic class of controlled substance listed above is granted.

Dated: February 24, 1989.

**Gene R. Haislip,**

*Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.*

BILLING CODE 4410-09-M

### Controlled Substances; Reestablishment of the 1989 Aggregate Production Quota for Methylphenidate

**AGENCY:** Drug Enforcement Administration (DEA), Justice.

**ACTION:** Notice of an established 1989 aggregate production quota.

**SUMMARY:** This notice reestablishes the 1989 aggregate production quota for methylphenidate taking into consideration the Administrator's order to recalculate the 1988 aggregate production quota.

**DATE:** This order is effective upon publication.

**FOR FURTHER INFORMATION CONTACT:** Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, 1405 I Street, NW., Washington, DC 20537, Telephone: (202) 633-1366.

**SUPPLEMENTARY INFORMATION:** Section 306 of the Controlled Substances Act (21 U.S. Code 828) requires the Attorney General to establish aggregate production quotas for all controlled substances in Schedules I and II each year. This responsibility has been delegated to the Administrator of DEA pursuant to § 0.100 of Title 28 of the Code of Federal Regulations.

On December 16, 1988, a notice was published in the **Federal Register** (53 FR 50591) stating the DEA Administrator's ruling concerning the 1988 quotas for methylphenidate. As stated in this notice, the Administrator has carefully reviewed the entire record, which included the opinion and recommendations of the Administrative Law Judge, the findings of fact and conclusions of law proposed by the parties, the response to those exceptions and motions filed by all counsels, all the exhibits and affidavits and all of the transcripts of the hearing sessions. Based on findings and conclusions stated in the notice, the Administrator has ordered the DEA staff to "redetermine the 1988 aggregate production quota for methylphenidate so as to provide for medical, scientific, research and industrial needs of the United States, for lawful export requirements and for the establishment and maintenance of reserve stock." Therefore, in this notice, DEA reestablishes the aggregate production quota for methylphenidate for 1989 which will permit the bulk manufacturers of methylphenidate to produce additional amounts of this controlled substance.

In determining the below listed reestablished 1989 aggregate production quota, the DEA staff considered the actual 1988 sales and year-end inventory, the amount manufactured by the companies in 1988 and in an inventory allowance of 50 percent of net disposals as per 21 CFR 1303.24(c) for the manufacturers of methylphenidate.

Pursuant to sections 3(c)(3) and 3(e)(2)(C) of Executive Order 12291, the Director of the Office of Management and Budget has been consulted with respect to these proceedings.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this matter does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The Administrator hereby certifies that this matter will have no significant impact upon small entities within the meaning and intent of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* The establishment of annual aggregate production quotas for Schedules I and II controlled substances is mandated by law and by the international commitments of the United States. Such quotas impact predominantly upon major manufacturers of the affected controlled substances.

Therefore, under the authority vested in the Attorney General by section 306 of the Controlled Substances Act of 1970 (21 U.S.C. 828) and delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations, the Administrator hereby orders that the 1989 aggregate production quota for methylphenidate, expressed in grams of anhydrous base, be established as follows:

| Basic Class | 1989 reestablished aggregate production quota (grams) |
|---|---|
| Schedule II: Methylphenidate | 2,527,000 |

**John C. Lawn**

*Administrator, Drug Enforcement Administration.*

## LIBRARY OF CONGRESS

### American Folklife Center, Board of Trustees Meeting

**AGENCY:** Library of Congress.

**ACTION:** Notice of meeting.

**SUMMARY:** This notice announces a meeting of the Board of Trustees of the American Folklife Center. This notice also describes the functions of the Center. Notice of this meeting is required in accordance with Pub. L. 94-463.

**DATE:** March 3, 1989, 9:00 a.m. to 1:00 p.m.

**ADDRESS:** Whittall Pavilion, Jefferson Building, Library of Congress, 10 First Street, SE., Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Raymond L. Dockstader, Deputy Director, American Folklife Center, Washington, DC 20540.

**SUPPLEMENTARY INFORMATION:** The meeting will be open to the public. It is suggested that persons planning to attend this meeting as observers contact Raymond Dockstader at (202) 707-6590.

The American Folklife Center was created by the U.S. Congress with passage of Pub. L. 94-201, the American Folklife Preservation Act, in 1976. The Center is directed to "preserve and present American folklife" through programs of research, documentation, archival preservation, live presentation, exhibition, publications, dissemination, training, and other activities involving the many folk cultural traditions of the United States. The Center is under the general guidance of a Board of Trustees composed of members from Federal agencies and private life widely recognized for their interest in American folk traditions and arts.

The Center is structured with a small core group of versatile professionals who both carry out programs themselves and oversee projects done by contract by others. In the brief period of the Center's operation it has energetically carried out its mandate with programs that provide coordination, assistance, and model projects for the field of American folklife.

Dated: February 24, 1989.

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (89-14)]

### NASA Advisory Council (NAC), Space Science and Applications Advisory Committee (SSAAC), Space Physics Subcommittee; Meeting

**AGENCY:** National Aeronautics and Space Administration.

**ACTION:** Notice of meeting.

**SUMMARY:** In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Science and Applications Advisory Committee, Space Physics Subcommittee.

VOL 54 ISS 40 MR 2 1989 UMI

**DATE AND TIME:** March 15, 1989, 9 a.m. to 5 p.m., and March 16, 1989, 9 a.m. to 5 p.m.

**ADDRESS:** Holiday Inn Capitol, 550 C Street SW., Washington, DC 20024.

**FOR FURTHER INFORMATION CONTACT:** Dr. Stanley Shawhan, Code ES, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-1676).

**SUPPLEMENTARY INFORMATION:** The Space Science and Applications Advisory Committee consults with and advises the NASA Office of Space Science and Applications (OSSA) on long-range plans for, work in progress on, and accomplishments of NASA's Space Science and Applications programs. The Space Physics Subcommittee provides advice to the Space Physics Division and to the SSAAC on operation of the Space Physics Program and on formulation and implementation of the Space Physics research strategy. The Subcommittee will meet to discuss the status of the Results of Fiscal Year 1988 NASA Research Announcements (NRA), Mission Operations and Data Analysis Plans, Strategic Planning, Budget Priorities, and future plans for the Subcommittee. The Subcommittee is chaired by Dr. George Siscoe and is composed of 18 members. The meeting will be open to the public up to the capacity of the room (approximately 35 including Subcommittee members).

*Type of Meeting:* Open.

*Agenda:*

Wednesday, March 15

- 9 a.m.—Introduction and Opening Remarks.
- 11 a.m.—Mission Operations and Data Analysis Plans.
- 1:30 p.m.—US/USSR Joint Working Group Planning.
- 3:30 p.m.—Strategic Plan: Orbiting Solar Laboratory (OSL), future mission candidates, and active space plasma experiments.
- 5 p.m.—Adjourn.

Thursday, March 16

- 9 a.m.—Budget Priorities.
- 1 p.m.—Issues Relating to Health of the Space Physics Community.
- 2 p.m.—Subcommittee Discussion and Future Planning.
- 5 p.m.—Adjourn.

**Ann Bradley,**

*Advisory Committee Management Officer, National Aeronautics and Space Administration.*

[FR Doc. 89-4762 Filed 3-1-89; 8:45 am]

BILLING CODE 7510-01-M

## NUCLEAR REGULATORY COMMISSION

**[Docket Nos. 50-369 and 50-370]**

### Duke Power Co.; Environmental Assessment and Finding of No Significant Impact

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF-9 and NPF-17 issued to Duke Power Company (the licensee), for operation of the McGuire Nuclear Station, Units 1 and 2, located in Mecklenburg County, North Carolina.

**Environmental Assessment**

*Identification of Proposed Action*

The amendments would revise Technical Specification (TS) 3/4.7.13 "Groundwater Level" and referenced Table 3.7-7 "Groundwater Level Monitors." TS 3.7.13 presently requires that groundwater level be maintained at specified levels as determined from eleven interior and exterior groundwater level monitors situated in or near the Reactor Buildings, the Auxiliary Building and the Diesel Generator Buildings. The proposed change would delete the groundwater monitors for the Reactor Buildings and the Diesel Generator Buildings, leaving only the five monitors for the Auxiliary Building. The change would introduce a single alarm level (731 feet MSL) for the Auxiliary Building monitors, and would change the unit shutdown requirements from one alarmed monitor to three alarmed monitors out of a total of five for the Auxiliary Building. Duke Design Engineering has performed analyses which show that the Reactor Buildings and Diesel Generator Buildings can withstand groundwater elevation corresponding to plant grade, 760 feet MSL (which is also the full pond level for Lake Norman) and that, therefore, it is not necessary to continue monitoring the groundwater levels for these particular buildings. Elevation 737 feet MSL was calculated to be the maximum level that groundwater could rise before overturning due to buoyancy would begin for the Auxiliary Building. To avoid reaching this level, the proposed TS would require that if groundwater level exceeds elevation 731 feet MSL as indicated by 3 of 5 monitor alarms, and cannot be reduced in one hour, the McGuire Station (both units) must be in at least hot standby within 6 hours, and hot shutdown within the next 6 hours, and cold shutdown within the following 30 hours. The associated surveillance requirements would be changed to require that: (1) The groundwater level be demonstrated each shift to be below elevation 731 feet MSL and (2) the groundwater level monitor instrument/loop for the specified locations be demonstrated operable annually by loop calibration or operational test.

The proposed action is in accordance with the licensee's application for amendments dated January 27, 1988, which replaced a previous related application dated October 31, 1984.

*The Need for the Proposed Action*

The proposed change is needed to eliminate an inconsistency between the "alert" levels needed to satisfy existing TS 3.7.13 and the detection capabilities of the interior monitoring instruments as actually installed at McGuire. The current TS requires specified action at an "alert" level that is 2 feet above floor level. As installed, the interior monitors are located in the exterior walls at 2 feet 8 inches above floor level and the pressure sensors are at 3 or 4 feet above floor level. Thus, the lowest possible level alarm for these monitors is about 3 or 4 feet above floor level. The proposed action would eliminate the present inconsistency by substituting a new alarm level at 731 MSL as the basis for action. The proposed change would also avoid needless shutdown of the reactor at groundwater levels or localized increases for which licensee's design analysis have demonstrated no adverse effect to structures.

*Environmental Impacts of the Proposed Action*

Since the lower elevations of some Category 1 structures at the McGuire Nuclear Station are below the natural water table, a permanent groundwater dewatering (drainage) system was installed during initial construction to lower the water table. The groundwater system relieves subsurface hydrostatic loadings by collecting groundwater in wall drains, basemat flow channels and sumps, thereby creating a depression in the water table in the vicinity of the powerblock. This protects the structures by limiting structural stresses exerted upon the Auxiliary and Reactor Buildings due to hydrostatic pressures and uplift forces as a result of high groundwater levels. During normal operation of the underdrain system, groundwater level is maintainted at or below elevation 712 feet MSL in the Auxiliary Building areas and elevation 717 feet MSL in the Reactor Building areas. Groundwater collected in the underdrain sumps is pumped to the Yard Storm Drain System or to the Turbine Building sumps via sump pumps located in the Auxiliary Building and is subsequently discharged to the Catawba River by way of the Conventional Waste Water Basin.

The proposed changes do not alter the design of the dewatering system or its function. Therefore, the groundwater levels normally maintained by this system and groundwater hydrology for the site are not changed. Similarly, the quantity and quality of groundwater collected and discharged from the station are not changed.

The purpose of the TS is to ensure that groundwater levels are monitored and preventing from rising to a potential failure to limit for the Auxiliary Building (such as could result from gross failure of the undrain system, followed by prolonged inattention). The potential failure limit is based on engineering calculations indicating that the Auxiliary Building is susceptible to overturning due to buoyancy at elevation 737 feet MSL. Under the requirements of the proposed TS change, if groundwater level at the Auxiliary Building exceeds elevation 731 feet MSL as indicated by 3 of 5 specified groundwater monitor alarms, and cannot be reduced in 1 hour, the McGuire units would be placed in a cold shutdown condition. Other analyses have determined that the Reactor Buildings and the Diesel Generator Buildings are designed to withstand hydrostatic loadings due to groundwater levels up to top of grade (760 feet MSL) which is also the full pond level for nearby Lake Norman. Therefore, no TS requirement is needed regarding groundwater for the Reactor Buildings or Diesel Generator Buildings.

The staff has reviewed the proposed changes and has found them to be based upon conservative analyses of limiting structural concerns due to groundwater, and to provide for reliable and timely indications of the need for actions to place the facility in a safer condition before groundwater levels sufficient to cause these limting structural concerns could be reached. The requirement to be in cold shutdown before groundwater levels at structural limits can be reached is consistent with the existing TS. Thus, the proposed change does not increase the probability or consequences of accidents.

The groundwater system is a non-radiological system. The proposed change involves no adverse change in the types or amounts of radiological (or non-radiological) effluents that may be released offsite, and no increase in allowable individual or cumulative occupational radiation exposure.

Accordingly, the Commission concludes that this proposed action would result in no significant adverse environmental impact.

*Alternative to the Proposed Action*

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendments. This would not reduce environmental impacts of plant operation and could result in reduced operational flexibility and needless shutdowns.

*Alternative Use of Resources*

This action does not involve the use of resources not previously considered in connection with the "Final Environmental Statement Relating to Operation of the William B. McGuire Nuclear Station, Units 1 and 2," dated April 1976 or its addendum dated January 1981.

*Agencies and Persons Consulted*

The NRC staff has reviewed the licensee's request and did not consult other agencies or persons.

**Finding of No Significant Impact**

The Commission has determined not to prepare an environmental impact statement for the proposed license amendments.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant adverse effect on the quality of the human environment.

For further details with respect to this action, see the application for amendments dated January 27, 1988 and a previous application of October 31, 1984, which it replaced. Also see the licensee's letters dated April 26, June 21, and August 25, 1988, which provided revised or supplemental information in support of the January 27, 1988 application. A detailed description of the groundwater system can be found in McGuire FSAR section 2.4.13. These documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC and at the Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Caroline 28223.

Dated at Rockville, Maryland, this 24th day of February 1989.

For the Nuclear Regulatory Commission.

**David B. Matthews,**

*Director, Project Directorate II-3, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.*

[FR Doc. 89-4850 Filed 3-1-89; 8:45 am]

BILLING CODE 7590-01-M

## Advisory Committee on Reactor Safeguards; Meeting Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on March 9-11, 1989, in Room P-110, 7920 Norfolk Avenue, Bethesda, Md. Notice of this meeting was published in the Federal Register on February 22, 1989.

**Thursday, March 9, 1989**

*8:30 a.m.-8:45 a.m.: Comments by ACRS Chairman* (Open)—The ACRS Chairman will report briefly regarding items of current interest.

*8:45 a.m.-12:00 Noon: Peach Bottom Nuclear Power Station* (Open)—The Committee will review and report on the proposed restart of the Peach Bottom Nuclear Power Station.

*1:00 p.m.-2:30 p.m.: Containment Design Criteria* (Open)—Discuss proposed ACRS activities regarding the development of containment design criteria for future nuclear power plants.

*2:45 p.m.-3:15 p.m.: Future ACRS Activities* (Open)—The membes will discuss anticipated ACRS subcommittee activities and items proposed for consideration by the full Committee.

*3:15 p.m.-3:45 p.m.: ACRS Subcommittee Activities* (Open)—The members will hear and discuss the status of assigned ACRS subcommittee activities by designated subcommittees.

*3:45-5:15 p.m.: Severe Accident Research Program Plan* (Open)—Review and report on proposed NRC Severe Accident Research Program Plan.

*5:15 p.m.-6:00 p.m.: Appointment of ACRS Members* (Open/Closed)—Discuss the status of appointment of ACRS members and proposed plans for selection of future ACRS members.

Portions of this session will be closed as appropriate to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

**Friday, March 10, 1989**

*8:30 a.m.-9:30 a.m.: NRC Safety Goal Policy* (Open)—Discuss proposed ACRS comments/recommendations regarding the use of NRC Safety Goal Policy for evaluating the effectiveness of NRC

VOL 54 ISS 40 MR 2 1989 UMI

regulations in protecting the public health and safety.

*8:30 a.m.–12:00 noon: Leak-Before-Break Technology* (Open)—Discuss proposed NRC Commission policy statement regarding additional application of the leak-before-break technology to emergency core cooling systems design and environmental qualification of components.

*1:00 p.m.–2:30 p.m. Meeting with the NRC Executive Director for Operations* (Open)—The members will discuss the plans for completion and use of NUREG–1150, Reactor Risk Reference Document, and other matters of mutual interest.

*2:45 p.m.–5:30 p.m.: Preparation of ACRS Reports* (Open)—Discuss proposed ACRS reports to NRC regarding items considered during this meeting.

**Saturday, March 11, 1989**

*8:30 a.m.–12:00 noon: Preparation of ACRS Reports* (Open)—Discuss proposed ACRS reports to NRC regarding items considered during this meeting.

*1:00 p.m.–2:30 p.m.: Miscellaneous* (Open)—Continue discussion of items considered during this meeting.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 27, 1988 (53 FR 43487). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with subsection 10(d) Pub. L. 92–463 that it is necessary to close portions of this meeting as noted above to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 301/492–8049), between 8:15 a.m. and 5:00 p.m.

Date: February 24, 1989.

**John C. Hoyle,**

*Advisory Committee Management Officer.*

[FR Doc. 89–4858 Filed 3–1–89; 8:45 am]

BILLING CODE 7590–01–M

---

**[Docket No. 50–425A]**

### Georgia Power Co., et al; No Significant Antitrust Changes and Time for Filing Requests for Reevaluation

The Director of the Office of Nuclear Reactor Regulation has made a finding in accordance with section 105c(2) of the Atomic Energy Act of 1954, as amended, that no significant (antitrust) changes in the licensees' activities or proposed activities have occurred subsequent to the previous antitrust operating license review of Unit 1 of Plant Vogtle by the Attorney General and the Commission. The finding is as follows:

Section 105c(2) of the Atomic Energy Act of 1954, as amended, provides for an antitrust review of an application for an operating license if the Commission determines that significant changes in the licensee's activities or proposed activities have occurred subsequent to the previous construction permit review. The Commission has delegated the authority to make the "significant change" determination to the Director, Office of Nuclear Reactor Regulation. Based upon an examination of the events since the issuance of the Plant Vogtle 1 operating license to Georgia Power Company, *et al.*, the staffs of the Policy Development and Technical Support Branch, Office of Nuclear Reactor Regulation and the Office of the General Counsel, hereafter referred to as "staff," have jointly concluded, after consultation with the Department of Justice, that the changes that have occurred since the Plant Vogtle Unit 1 antitrust operating license review are not of the nature to require a second antitrust review at the operating license stage of the application.

In reaching this conclusion, the staff considered the structure of the electric utility industry in Georgia, the events relevant to the Plant Vogtle Unit 1 operating license review, as well as the events that have occurred subsequent to the Plant Vogtle Unit 1 operating license review.

The conclusion of the staff's analysis is as follows:

Section 105c of the Atomic Energy Act of 1954, as amended, provides for pre-licensing antitrust reviews of commercial power reactors at the construction permit and operating license stages of the licensing process. The antitrust operating license review is not intended as a *de novo* review but is focused only on those activities of the licensee(s) that have occurred since the completion of the construction permit review.

This concept of reviewing only significant *changes* in the licensee's activities at the operating license stage has been applied by the staff to reviews of multiunit plant applications. For those plants with multiple reactor licenses, the staff conducts separate antitrust reviews for each reactor when the reactors are licensed on a delayed or staggered schedule, i.e., when the reactors are scheduled to be licensed eighteen months or more apart.

As indicated *supra*, the antitrust operating license review of Unit 1 of Plant Vogtle was completed in November of 1986 and the reactor was licensed in March of 1987. Unit 2 of Plant Vogtle is scheduled to be licensed in March of 1989 and in light of the two-year lapse since the previous review of the licensees, the staff initiated a separate antitrust review of Unit 2—with the focus of the review on any significant changes in the licensees' activities since the completion of the previous review in 1986.

The changes in the licensees' activities since the previous antitrust review have been largely the result of policies and agreements that were intitiated as a result of license conditions placed upon the principal licensee, Georgia Power Company, during the antitrust construction permit review. The staff noted in its operating license review of Unit 1 of Plant Vogtle, that the competitive process in the Georgia electric bulk power industry had improved markedly. Moreover, the staff attributed this positive change to the successful implementation of the antitrust license conditions imposed by the Commission. It was also noted that power systems throughout Georgia and adjacent states were better able to control their own power supply destinies by taking advantage of new power supply options and alternatives made available by a more competitive bulk power supply system.

The staff's review of changes in the licensees' activities since 1986 indicates that the procompetitive effects identified during the Votgle 1 OL review are continuing. Various energy exchange agreements among industry players have been entered into and activated, thereby stimulating more efficient operations among a wide variety of industry players throughout the southeastern portion of the country. Georgia Power Company is providing power and energy transactions to various power systems in Georgia as well as Florida. The integrated transmission system that emerged from the Commission's antitrust construction permit review of Plant Vogtle in the mid-1970's allows for ownership of portions of the Georgia transmission grid by all power systems in the state and this transmission arrangement has been cited by industry observers as a model for joint transmission agreements in other areas of the country.

The staff believes the competitive stimuli introduced during the antitrust construction permit review are continuing to promote competition and enhance the competitive process throughout the Georgia electric bulk power market. The staff does not believe that there have been any "significant changes" in the licensees' activities since the previous antitrust review and recommends that no affirmative significant change determination be made pursuant to the operating license for Unit 2 of Plant Vogtle.

Based upon the staff's analysis, it is my finding that there have been no "significant changes" in the licensees' activities or proposed activities since the completion of the previous antitrust review.

Signed on February 28, 1989 by Thomas E. Murley, Director of the Office of Nuclear Reactor Regulation.

Although the Atomic Energy Act of 1954, as amended, does not address a specific period for public comments pursuant to reevaluation of the Director's Finding, the Commission has adopted rules that normally allow for a 30 day comment period. The staff has determined that in the instant proceeding an exemption from the comment period from 30 days to 15 days should be granted to avoid delay in the issuance of the operating license for Plant Vogtle Unit 2. Moreover, the staff has determined that this exemption will not present an undue risk to the public health and safety nor adversely affect any potential interested party's ability to provide comments to the Commission.

Any person whose interest may be affected by this finding, my file, with full particulars, a request for reevaluation with the Director of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555 within 15 days of the initial publication of this notice in the **Federal Register**. Requests for a reevaluation of the no significant changes determination shall be accepted after the date when the Director's finding becomes final, but before the issuance of the OL, only if they contain new information, such as information about facts or events antitrust significance that have occurred since that date, or information that could not reasonably have been submitted prior to that date.

Dated at Rockville, Maryland, this 28th day of February 1989.

For the Nuclear Regulatory Commission.

**Cecil O. Thomas,**

*Chief, Policy Development and Technical Support Branch, Program Management, Policy Development and Analysis Staff, Office of Nuclear Reactor Regulation.*

**[Docket No. 50–294]**

### Michigan State University; Proposed Issuance of Orders Authorizing Disposition of Component Parts and Terminating Facility License

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of Orders authorizing Michigan State University (the licensee) to dismantle the reactor facility and dispose of the component parts, and termination of Facility License No. R–114, in accordance with the licensee's application dated January 20, 1989.

The first of these Orders would be issued following the Commission's review and approval of the licensee's detailed plan for decontamination of the facility and disposal of the radioactive components, or some alternate disposition plan for the facility. This Order would authorize implementation of the approved plan. Following completion of the authorized activities and verification by the Commission that acceptable radioactive contamination levels have been achieved, the Commission would issue a second Order terminating the facility license and any further NRC jurisdiction over the facility. Prior to issuance of each Order, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

By April 3, 1989, the licensee may file a request for a hearing with respect to issuance of the subject Orders and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the action under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the

VOL 54 ISS 40 MR 2 1989 UMI

petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Charles L. Miller: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Ms. Mary Elizabeth Kurz, General Counsel, Michigan State University, 494 Administration Building, East Lansing, Michigan 48824–1046, attorney for licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petitioner and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the licensee's application dated January 20, 1988, which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC.

Dated at Rockville, Maryland, this 23rd day of February 1989.

For The Nuclear Regulatory Commission.

[Docket No. 50–206]

**Southern California Edison Co.; San Diego Gas and Electric Co.; San Onofre Nuclear Generating Station, Unit No. 1 Consideration of Issuance of Amendment to Provisional Operating Licenses and Opportunity for Hearing**

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Provisional Operating License No. DPR–13 issued to Southern California Edison Company, *et al.* (the licensee), for operation of San Onofre Nuclear Generating Station, Unit No. 1, located in San Diego County, California. The request for amendment was submitted by letter dated February 17, 1989.

The proposed amendment seeks approval to operate during Fuel Cycle 10 with degraded fasteners in the reactor vessel thermal shield. The proposed amendment would provide a thermal shield monitoring program to monitor the condition of the thermal shield throughout the fuel cycle (approximately eighteen months).

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 3, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject provisional operating license, and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition, and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene must set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspects(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such as amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to George W. Knighton: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel-White Flint, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Charles R. Kocher, Assistant General Counsel, and James Beoletto, Esq., Southern California Edison Company, P.O. Box 800, Rosemead, California 91770, attorneys for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the

Commission, the presiding officer of the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed findings of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and at the General Library, University of California, P.O. Box 19557, Irvine, California 92713.

Dated at Rockville, Maryland, this 23rd day of February 1989.

For the Nuclear Regulatory Commission.

[Docket No. 50–602]

**University of Texas; Order Extending Construction Completion Date**

The University of Texas is the current holder of Construction Permit No. CPRR–123, issued by the Nuclear Regulatory Commission on June 4, 1985, for construction of the University of Texas TRIGA Mark II research reactor. The reactor facility is presently under construction at the Balcones Research Center in Austin, Texas.

On October 17, 1988, the University of Texas (UT or the applicant) filed a request for an extension of the completion date from December 31, 1988 to April 30, 1989. On November 23, 1988, the applicant requested a revision of the date requested in the earlier submittal to December 31, 1989. The extension has been requested because construction has been delayed by the default of the General Contractor in charge of the project. The General Contractor was found in default because of its inability to meet the construction schedule. The completion of the project is now the responsibility of the bonding company. The facility exclusive of the reactor structural and instrumentation components is estimated to be 95 percent complete.

Good cause has been shown for the delay; the cause is beyond the control of the applicant; and the requested extension is for a reasonable period, the basis for which are set forth in the staff's evaluation of the request for extension.

Pursuant to 10 CFR 51.32, the Commission has determined that extending the construction completion date will have no significant impact on the environment (54 FR 7897, February 23, 1989).

The NRC staff safety evaluation of the request for extension of the construction permit is available for public inspection at the Commission's Public Document Room, Gelman Building, 2120 L Street, NW., Washington, DC 20555.

*It is hereby ordered,* That the latest completion date for Construction Permit No. CPRR–123 is extended from December 31, 1988 to December 31, 1989.

For The Nuclear Regulatory Commission.

Date of Issuance: February 24, 1989.

**Gary M. Holahan,**

*Acting Director, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.*

## OFFICE OF PERSONNEL MANAGEMENT

**Excepted Service; Positions Placed or Revoked**

**AGENCY:** Office of Personnel Management.

**ACTION:** Notice.

**SUMMARY:** This gives notice of positions placed or revoked under Schedules A, B, and C in the excepted service, as required by civil service rule VI, Exceptions from the Competitive Service.

**FOR FURTHER INFORMATION CONTACT:** Leesa Martin, (202) 632–0728.

**SUPPLEMENTARY INFORMATION:** The Office of Personnel Management published its last monthly notice updating appointing authorities established or revoked under the Excepted Service provisions of 5 CFR Part 213 on January 25, 1989 (54 FR 15). Individual authorities established or revoked under Schedule A, B, or C between January 1, 1989, and January 31, 1989, appear in a listing below. Future notices will be published on the fourth Tuesday of each month, or as soon as possible thereafter. A consolidated listing of all authorities will be published as of June 30 of each year.

**Schedule A**

No Schedule A authorities were established or revoked during January.

**Schedule B**

No Schedule B authorities were established or revoked during January.

**Schedule C**

*Department of Commerce*

One Director, Office of Private Sector Initiatives to the Director for the Office of Business Liaison. Effective January 19, 1989.

*Department of Energy*

One Staff Assistant to the Assistant Secretary for Defense Programs. Effective January 10, 1989.

One Executive Assistant for Business and Education Programs to the Director of Minority Economic Impact. Effective January 18, 1989.

One Staff Assistant to the Assistant Secretary for Fossil Energy. Effective January 18, 1989.

One Confidential Assistant (Secretary) to the Administrator, Economic Regulatory Administration. Effective January 24, 1989.

One Technical Advisor to a Member of the Commission. Effective January 25, 1989.

*Department of the Interior*

## COMMISSION ON RAILROAD RETIREMENT REFORM

### Meeting

### Background

The Commission on Railroad Retirement Reform was created by Pub. L. 100–203, signed on December 22, 1987. The purpose of the Commission is to conduct a comprehensive study of the issues pertaining to the long-term financing of the railroad retirement system and the system's short-term and long-term solvency. The Commission is to submit a report containing a detailed statement of it findings and conclusions together with recommendations to the Congress not later than October 1, 1990. The Commission is composed of seven members—four appointed by the President, one by the Speaker of the House of Representatives, one by the President pro tempore of the Senate, and one by the Comptroller General.

This notice announces the first meeting of the Commission.

*Time:* 9:00 a.m.–4:00 p.m. March 20, 1989.

*Place:* Railway Labor Executives Association, 400 First Street NW., 8th Floor, Washington, DC.

*Status:* Open meeting except for initial 90 minutes which will be closed to discuss matters exempted from public disclosure pursuant to subsection (c) of section 552b of title 5, United States Code.

*Contact:* Dennis Condie Telephone (202) 472–9068.

Robert J. Myers,
*Chairman, Commission on Railroad Retirement Reform.*

Date: February 21, 1989.

## SECURITIES AND EXCHANGE COMMISSION

**[Release No. 34-26586; File No. SR-AMEX-88-21]**

### Self-Regulatory Organization; American Stock Exchange, Inc. Order Partially Approving Proposed Rule Change Relating to Obligation of Registered Option Traders

On August 26, 1988, the American Stock Exchange, Inc. ("AMEX" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] a proposed rule change to modify certain obligations of Registered Option Traders ("ROTs").

The proposed rule change was noticed in Securities Exchange Act Release No. 26066 (September 7, 1988) 53 FR 35571 (September 14, 1988). No comments were received on the proposed rule change.

The Exchange proposes, among other things, to narrow the maximum permissible spread between bids and offers for any option series and to eliminate the wider spread differentials that currently apply to the longest term options. The present rule requires ROTs to bid or offer for options contracts within certain bid-ask differentials based on the value of the option contract.[3] The maximum allowable differential increases as the dollar value of the bid increases. The Exchange proposes for options, where the underlying security is a stock, to reformulate the permissible bid-ask differentials for those option contracts with a prevailing bid of $10 or less. Specifically, the Exchange proposes to permit bidding and offering so as to create differences of no more than ¼ of $1 between the bid and offer for each option contract for which the prevailing bid is $1 or less, no more than ⅜ of $1 where the prevailing bid is more than $1 but does not exceed $5, and no more than ½ of $1 where the prevailing bid is more than $5 but does not exceed $10. These changes will result in narrower spreads for bids and offers between ½ of $1 and $5.

The Exchange also proposes to clarify and modify certain obligations of ROTs set forth in Exchange Rule 958. First, the Exchange proposes to clarify that ROTs, when in trading crowds in other than a floor brokerage capacity, are required to make competitive bids and offers as reasonably necessary to contribute to the maintenance of fair and orderly markets. Additionally, the Exchange proposes that a ROT, when establishing or increasing an options position for any account in which he has an interest, must initiate such transactions in trading areas [4] for those transactions to be considered registered trader transactions.[5] Moreover, the Exchange proposes to require ROTs, prior to executing an order in an account in which they have an interest, to announce whether the order is a "trader opening" or "trader closing" order.[6]

The Exchange believes that the proposed amendments will improve options price continuity, result in more liquid markets and clarify the obligations of ROTs to maintain a fair and orderly market.

The Commission finds that the above-described portions of the proposed rule change are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, the requirements of section 6.[7] Specifically, the Commission finds that these proposals are consistent with section 6(b)(5) of the Act because narrowing the maximum allowable bid-ask differentials for options contracts bid between $0.50 and $5 and eliminating the wider spread differentials for the longest term options will result in improved price continuity and tighter, more liquid markets. The Commission also believes that expressly stating the obligation of ROTs to make competitive bids and offers as reasonably necessary to contribute to the maintenance of a fair and orderly market, reinforces the market making responsibilities attendant to ROTs under section 11 of the Act. Moreover, the Commission believes the proposed rule changes regarding the initiation of ROT transactions and the declaration of whether a ROT order is a "trader opening" or "trader closing" order will assist the Exchange in the monitoring and surveillance of its current rules.

The Exchange also proposed, in its rule filing, the establishment of rules regarding the in person trading requirements for ROTs. The Commission is not taking action on these portions of the Exchange proposal at this time.

*It is Therefore Ordered,* Pursuant to section 19(b)(2) of the Act,[8] that the proposed rule change is approved, solely as to the matters specified herein.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[9]

Dated: February 23, 1989.

Jonathan G. Katz,
*Secretary.*

[FR Doc. 89-4686 Filed 3-1-89; 8:45 am]
BILLING CODE 8010-01-M

[1] 15 U.S.C. 78s (b)(1) (1982).

[2] 17 CFR 240.19b–4 (1987).

[3] The proposal is based on the prevailing bid, whereas the present rule is based on the last transaction.

[4] A trading area is defined as the areas designated by the Exchange for trading stocks, bonds, options and other securities.

[5] A ROT engaged in a registered trader transaction is designated as a market maker on the Exchange for all purposes under the Securities Exchange Act of 1934 and is entitled to benefits such as specialist margin treatment.

[6] Commentary .07 of AMEX Rule 111 provides that "a Registered Trader, in establishing or increasing a position, may not retain priority over or have parity with an off-Floor order."

### Self-Regulatory Organizations; Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating To Bid Ask differentials

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 2, 1989, the Chicago Board Options Exchange, Incorporated filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

### I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Rule 6.20 (a) through (c) No change.

* * * Interpretations and Policies:

.01 through .03 No change.

.04 The activities which may impair the maintenance of a fair and orderly market or impair public confidence in the operations of the Exchange, include but are not limited to the following:

(i) Effecting or attempting to effect a transaction with no public outcry in violation of Rule 6.43 or 6.74;

(ii) Failure of a Market-Maker to respond to a request for a market by an Order Book Official pursuant to Rule 7.5;

(iii) Failure of a Market-Maker to bid or offer within the ranges specified by Rule 8.7(b);

(iv) Failure to adequately supervise an employee to insure his compliance with Exchange Rule 6.20(c);

(v) Failure to abide by a determination of Floor Officials; [and]

(vi) Refusal to provide information requested by a Floor Official acting in his official capacity; *and*

*(vii) Failure to abide by the provisions of Rule 8.51.*

.05 Two Floor Officials may nullify a transaction or adjust its terms if they determine the transaction to have been in violation of any of the following: (i) Rule 6.43 (manner of bidding and offering), (ii) Rule 6.45 (priority of bids and offers), (iii) Rule 6.46 (transactions outside the book's last quoted range), [or] (iv) Rule 6.47 (priority on split price transactions, *or (v) Rule 8.51 (trading crowd firm disseminated market quotes.*

.06 No change.

Rule 6.73 (a) through (c) No change.

* * * Interpretations and Policies:

.01 No change

.02 No change

*.03 Pursuant to Rule 6.73(a) a Floor Broker's use of due diligence in handling an order is applicable to the provisions of Rule 8.51 in that it includes taking the necessary measures to ensure the proper execution of an order as it pertains to the executable quantity for a trading crowd's firm disseminated market quote. Due diligence also shall apply to the representation in the crowd of an order as described in Rule 8.51 Interpretations and Policies .02.*

*.04 Pursuant to Rule 6.73(a) a Floor Broker's use of due diligence in handling an order shall include the immediate and continuous representation of market or marketable orders at the trading station where the option class represented by the order is traded.*

Chapter VIII

Market-Makers, [and Block Positioners] *Trading Crowds and*

*Modified Trading Systems*

Section A: Market-Makers

Obligations of Market-Makers

Rule 8.7. (a) through (b) (iii) no change.

(iv) To price options contracts fairly by, among other things, *bidding* and/or offering so as to create differences of no more than ¼ of $1 between the bid and offer for each option contract for which the bid [is $1 or less] *is less than $2,* no more than ⅜ of $1 where the bid is [more than $1] *at least $2* but does not exceed $5, no more than ½ of $1 where the bid is more than $5 but does not exceed $10, no more than ¾ of $1 where the bid is more than $10 but does not exceed $20, and no more than $1 where

VOL 54 ISS 40 MR 2 1989 UMI

the bid is more than $20, provided that the *Market Performance Committee* [Floor Procedure Committee] may establish differences other than the above for one or more options series. The bid/ask differentials stated above shall not apply [to option series which are ten or more points in-the-money] *to in-the-money series where the underlying securities market is wider than the differentials set forth above.* For these series, the bid/ask differential may be as wide as the quotation on the primary market of the underlying security. [During the last week of trading preceding expiration, the bid/ask differentials on expiring in-the-money options may be as wide as the quotation in the primary market of the underlying security.]

Rule 8.7(c) No change.

* * * Interpretations and Policies:

.01 to .04 no change.

.05 Unless an option class is exempted by the Market Performance Committee, under normal market conditions a Market-Maker's bid or offer for a series of options of unspecified size is for five contracts *except that a Market-Maker may be compelled to buy or sell a specific number of contracts at the disseminated bid or offer pursuant to his obligations under Rule 8.51.*

.06 to .07 no change

[Rule 8.12] *Rule 8.60 Renumbered*

[Rule 8.13] *Rule 8.80 Renumbered*

*Section B: Trading Crowds*

*Rule 8.50 Definitions*

*The term "trading crowd" means all market-makers who hold an appointment in the options classes at the trading station where such trading crowd is located and all market-makers who regularly effect transactions in person for their market-maker account at that station, but generally will consist of the individuals present at the trading station.*

*Rule 8.51 Trading Crowd Firm Disseminated Market Quotes*

*The Exchange will pilot a firm disseminated quote program. The pilot will be monitored and enforced by the Market Performance Committee ("MPC"). The expiration months and strikes which shall be subject to the pilot will be determined at the discretion of the MPC.*

*(a) Only non-broker dealer customer orders shall be entitled to an execution pursuant to the provisions of this rule.*

*(b) At all times other than during rotation, a trading crowd is required to sell (buy) at least ten (10) contracts at the offer (bid) which is displayed when a buy (sell) order reaches the trading station where the particular option class is located for trading unless a "fast market", as defined in Rule 8.6, has been declared in a class of options.*

*(c) On a case by case basis, the MPC may grant exemptions to the provisions of this rule for either a class or series within a class if, in their determination, the individual situation warrants such action. Additionally, MPC floor officials may determine that an exception to the rule is warranted, on a case by case basis, upon their determination that an obvious error occurred in the posting of the disseminated market quote.*

* * * Interpretations and Policies:

*.01 If the disseminated bid (offer) is on behalf of an order represented by a Floor Broker or the OBO and is for less than ten contracts the trading crowd is obligated to buy or sell the necessary number of contracts needed to make the disseminated quote firm for ten contracts.*

*.02 Where a Floor Broker or OBO has caused a bid or offer to be disseminated and the order is subsequently filled or cancelled, the Floor Broker or OBO will be responsible for causing such disseminated bid or offer to be removed. Failure to do so will result in the Floor Broker or OBO being responsible for satisfying the firm disseminated quote commitment. A Market-Maker who has caused a bid or offer to be disseminated is equally responsible for removing such bid or offer when he leaves the trading crowd.*

*.03 Market-Maker orders for less than ten contracts that are represented in the crowd by a Floor Broker should not be reflected in the displayed market quote. However, a Floor Broker remains obligated to use due diligence in the representation of an order as set forth in Rule 8.73.*

*.04 The MPC Floor Officials, pursuant to Rule 8.20(b) and Interpretations and Policies .04 thereunder, may impose a fine on members of the trading crowd for violations of this Rule and its Interpretations and Policies.*

*Rule 8.60 See prior rule 8.12*

*Section C: Modified Trading Systems*

*Rule 8.80 See prior rule 8.13*

**II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections (A), (B), and (C) below.

*(A) Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change*

The rule changes as proposed herein address three different areas. The first involves the tightening of markets for option series where the bid is less than $2 such that the bid/offer differential may not exceed ¼ of $1. As addressed in SR–CBOE–88–15, where the market quote differential was lowered to ⅜ of $1, the Exchange believes that since options in this price range are favored by a significant number of public investors, the narrowing will result in improved price continuity and more liquid markets. The Exchange intends to extend the prior exemption afforded to options which are ten dollars or more in-the-money to all in-the-money options. Therefore, when a market quote differential in the underlying security is wider than those allowed in options, the market differentials in these series can parallel that of the underlying but not exceed it.

To support extending the current exemption to all in-the-money series, the Exchange analyzed the impact of such a proposal. On average, there are 2600 series which would be impacted because they trade below the current 10 or more point in-the-money exemption. The Exchange has prepared a chart (Exhibit A) which reflects the various price ranges of these series and their respective delta values. A minimal number (346 or 13%) of existing series have a delta of less than .50 and, therefore, would be granted an exemption to trade at the same bid-ask differential as their underlying security under the proposed rule changes.

The second area addresses a format change to Chapter VIII of the Exchange Rules. The chapter will be divided into three sections, one each for market makers, trading crowds and modified trading systems. As such, current Rules 8.12 and 8.13 will become Rules 8.60 and 8.80 respectively.

The final area addressed by the proposed rule changes represents the Exchange's intent to create a pilot program whereby a disseminated market quote would become a firm quote for ten contracts by a trading crowd. As a result of the pilot as described in proposed Rules 8.50 and 8.51, the Exchange has imposed upon Floor Brokers in Rule 6.73 Interpretations and Policies .03 and .04 certain obligations relating to due diligence in the handling of orders subject to execution under the pilot. As stated, Floor Brokers can be made responsible for disseminated markets in such instances. The pilot also places additional responsibility on individual market makers who make unspecified bids or offers, as noted in Rule 8.7 Interpretations and Policies .06, when they are the only representative of a trading crowd.

The Exchange believes that the proposed rule changes are consistent with the requirements of the Securities Exchange Act of 1934 and the rules and regulations thereunder. In particular, the proposed rule changes are consistent with section 6(b)(5) of the Exchange Act, such that they promote just and equitable principles of trade and are designed to remove impediments to and perfect the mechanism of a free and open market.

*(B) Self-Regulatory Organization's Statement on Burden on Competition*

This proposed rule change will not impose a burden on competition.

*(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others*

Comments were neither solicited nor received.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and published its reasons forso finding or (ii) as to which the self-regulatory organization consents, the commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other that those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by March 23, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 24, 1989.

Jonathan G. Katz,

*Secretary.*

[Release No. 34-26669; File No. SR-GSCC-88-3]

## Self-Regulatory Organizations; Order Approving Proposed Rule Change by the Government Securities Clearing Corporation Regarding the Submission of Financial Information

On December 22, 1988, the Government Securities Clearing Corporation ("GSCC") filed a proposed rule change (File No. SR-GSCC-88-3) pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] to authorize GSCC to require applicants and members to submit financial information to GSCC. On January 19, 1989, the Commission published notice of the proposed rule change in the **Federal Register** to solicit comments from interested persons.[2] No comments have been received on this proposal. This Order approves the proposal.

### I. Description

The proposal amends GSCC's rules to authorize GSCC to require applicants for membership and current GSCC members to submit certain information that GSCC plans to use to assess each applicant's and member's financial responsibility and operational capacity. Each applicant and member must submit, among other things, the financial statements and the reports filed with its appropriate regulatory agency ("ARA") and a copy of its latest certified financial statement.

Each applicant must submit a copy of its certified financial statement prepared by its independent certified public accountant accompanied by a statement signed by the applicant's chief financial officer or chief executive stating that no material adverse changes have occurred since the date of the most recent report submitted to GSCC. A registered broker-dealer or a government securities broker-dealer applicant, also must submit its three most recent Form X-17A-5 Financial and Operational Combined Uniform Single Reports ("FOCUS") or its three most recent Form G-405 Reports on Finances and Operations ("FOGS"). A bank applicant must submit its three most recent Consolidated Reports of Condition and Income ("Call Reports"). An applicant (other than a broker-dealer or a bank) which is subject to state or federal regulation must submit the three most recent reports submitted to its regulatory authority. An applicant which is not subject to state or federal regulation must submit copies of its three most recent unaudited quarterly financial statements, accompanied by a certificate of the applicant's chief financial officer that the financial statements have been prepared in accordance with generally accepted accounting principles consistently applied and fairly present the financial position of the applicant and the results of its operations for the period covered. An applicant which proposes to satisfy any of GSCC's financial requirements by means of a guaranty of its obligations by its parent company, must submit to GSCC the parent company's financial statements, FOCUS reports, FOGS reports, Call Reports or other comparable reports submitted to its ARA.

The proposal requires each GSCC member to submit to GSCC periodically the same reports (listed above) that each applicant must submit to GSCC. For example, a broker-dealer member must submit FOCUS reports or FOGS reports to GSCC promptly following its filing with its ARA. It also must submit its annual financial statements, certified without qualification by its independent certified public accountant and accompanied by a certificate prepared by its chief financial officer that the member has not guaranteed the obligations of any other person, and is not subject to any other contingent liabilities not set forth in the financial statements.

### II. GSCC's Rationale

GSCC believes the proposal is consistent with section 17A of the Act because it will enable GSCC to require applicants and members to submit financial information to GSCC. GSCC plans to use this information to assess each applicant's and member's financial responsibility and to evaluate potential risks to GSCC. GSCC believes that it needs this information to assure the safeguarding of securities and funds under its control or for which it is responsible and to promote the prompt and accurate clearance and settlement of securities transactions.

### III. Discussion

The Commission believes that the proposal is consistent with section 17A of the Act. Specifically, the Commission agrees with GSCC that the proposed rule change will assist GSCC in fulfilling its responsibility to facilitate the prompt and accurate clearance and settlement of securities and the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which it is responsible. In addition, the Commission believes that the proposal should aid GSCC's efforts in developing appropriate membership and applicant standards.

When the Commission granted GSCC temporary registration as a clearing agency, it exempted GSCC from section 17A(b)(3)(B) and seciton 17A(b)(4)(B) of the Act.[3] Section 17A(b)(4)(B) requires a registered clearing agency to have financial responsibility, operational capability, experience and competency standards that are used to accept, deny, or condition participation of any participant or any category of participants enumerated in section 17A(b)(3)(B). In accordance with the exemption, GSCC's current rules do not set any specific operational capacity, financial responsibility, experience, or competency standards. When GSCC requested its exemption, GSCC represented that it would develop appropriate member financial and operational standards in the near future, before it expanded its range of services, and, in any event, before it offered trade accounting or netting services. The collection and evaluation of such information should provide GSCC with useful information in developing such membership and applicant standards.

The Commission believes it is essential that GSCC obtains from applicants the financial and operational information described above and analyze that information to ensure that applicants without sufficient financial and operational capability are not admitted as members, thus minimizing GSCC's exposure to risk. The Commission believes that it is equally important for GSCC to obtain periodic updated information regarding current financial and operational capabilities of existing members to assess any changes in their financial capabilities. Obtaining this information will allow GSCC to take any appropriate action it deems necessary to protect itself from the risk of change in a member's financial capability.[4] Furthermore, the Commission believes that the periodic filing and review of updated financial information is essential to GSCC as it prepares the policies and procedures necessary to establish a netting service.

---

[1] 15 U.S.C. 78s(b)(1)

[2] *See* Securities Exchange Act Release No. 26452 (January 12, 1989), 54 FR 2268.

[3] *See* GSCC's temporary registration order. Securities Exchange Act Release No. 25740 (May 24, 1988), 53 FR 19830.

[4] The Commission notes that GSCC has designed its proposal to minimize the burden on potential applicants and members by only requesting copies of documents which potential applicants and members have already prepared.

### IV. Conclusion

*It is Therefore Ordered*, Pursuant to section 19(b)(2) of the Act, that the proposed rule change (File No. SR-GSCC-88-3) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 23, 1989.

**Shirley E. Hollis,**

*Assistant Secretary.*

[Release No. IC-16836; File No. 812-7224]

## Keystone Provident Life Insurance Co., et al.; Application for Exemption

February 24, 1989.

**AGENCY:** Securities and Exchange Commission ("SEC").

**ACTION:** Notice of application for exemption under the Investment Company Act of 1940 ("Act").

*Applicants:* Keystone Provident Life Insurance Company ("Keystone"); KMA Variable Account (the "Account") and Keystone Provident Financial Services Corp. ("KPFSC") (collectively, the "Applicants").

*Relevant 1940 Act Sections:* Exemption requested under section 6(c) from sections 2(a)(35), 26(a)(2)(C) and 27(c)(2).

*Summary of Application:* Applicants seek an order to the extent necessary to permit the deduction of an asset based sales charge and the mortality and expense risk charge from the assets of the Account.

*Filing Date:* The application was filed on January 24, 1989.

*Hearing or Notification of Hearing:* If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on March 20, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the Commission, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the Commission.

**ADDRESSES:** Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549. Applicants, c/o Robert R. Baird, Esq., Keystone Provident Life Insurance Company, 99 High Street, Boston, Massachusetts 02110. Copies to Joan E. Boros, Esq., Freedman, Levy, Kroll & Simonds, 1050 Connecticut Avenue NW., Suite 825, Washington, DC 20036.

**FOR FURTHER INFORMATION CONTACT:** Jeffrey M. Ulness, Attorney, at (202) 272-2028 or Clifford E. Kirsch, Special Counsel, at (202) 272-2061 (Division of Investment Management).

**SUPPLEMENTARY INFORMATION:** Following is a summary of the application; the complete application is available for a fee from either the Public Reference Branch in person or the Commission's commercial copier which may be contacted at (800) 231-3282 (in Maryland (301) 258-4300).

### Applicants' Representations

1. The Account, registered as a unit investment trust under the Act, was established to fund certain variable annuity contracts, including the individual variable annuity contract (the "Contract") to be issued by Keystone. The Account is divided into sub-accounts which invest solely in the shares of one of the several corresponding portfolios of the SteinRoe Variable Investment Trust. Purchase payments under a Contract may be invested in both the Account and in Keystone's general account.

2. KPFSC will serve as principal underwriter for the Contracts. KPFSC is a broker-dealer registered under the Securities Exchange Act of 1934 and is a member of the National Association of Securities Dealers, Inc.

3. Keystone will have responsibility for all administration of the Contract and Account. For such services, the contract maintenance charge is initially set at $30 per year, and may not exceed costs or $100 per year. The full amount of this charge will be deducted, prior to the annuity date, from the Account on the anniversary of the effective date of a Contract and on the date of any total surrender not falling on the anniversary of the effective date of the Contract.

4. No sales charge will be deducted from a Contract's purchase payment when initially received. A contingent deferred sales charge ("CDSC") may be deducted upon a partial or total surrender of a Contract. The first surrender in any Contract year is free of the CDSC to the extent the surrendered amount does not exceed 10% of the account value at the time of surrender. The amount of the surrender will be deducted from the purchase payments in chronological order from the oldest to the most recent until such amount is fully deducted. Any amount deducted in excess of the 10% limit will be subject to CDSC as follows. The CDSC for each purchase payment from which a deduction will be made equal to (x) multiplied by (y), where: (x) is the amount so deducted; and (y) is the applicable percentage from the table below for the number of years that have elapsed from the date of payment to the date of surrender.

| Year from date of payment | Charge, percent |
|---|---|
| 1 | 7 |
| 2 | 6 |
| 3 | 5 |
| 4 | 4 |
| 5 | 3 |
| 6 | 2 |
| 7 | 1 |
| Thereafter | 0 |

No CDSC will be imposed on payments received more than 7 years prior to the surrender.

5. During each year of the accumulation period of a Contract, Keystone will assess each sub-account of the Account with a daily sales charge that will amount to an aggregate of .15% annually of the assets of each sub-account. The asset based sales charge will only be deducted if the sum of such charge plus any previously deducted CDSC, does not exceed 8.5% of the total purchase payments under each Contract. Keystone will establish and apply administrative procedures for monitoring the applicable sales charges. No asset based sales charge will be assessed during a Contract's annuity period.

6. Applicants submit that the asset based sales charge and the CDSC are designed to reimburse Keystone for expenses of selling the Contract, including compensation paid to selling dealers and the costs of sales material. Applicants further submit that the deduction of the sales charges under the Contracts, as an asset based sales charge and as a CDSC, will be more favorable to a Contract Owner than the deduction of the sales charges from purchase payments, for the following reasons: the amount of a Contract Owner's purchase payments that will be allocated to the Variable Account to be invested will be greater than it would be if the sales charge were deducted from such purchase payments; and among other benefits, the death benefit under a Contract may be greater since the death benefit may be based, in part, on a Contract Owner's total accumulation value under his or her Contract as of the seventh policy anniversary. Applicants submit that, although the proposed asset

VOL 54 ISS 40 MR 2 1989 UMI

based sales charge may not fall within the literal terms of section 2(a)(35), the charge is consistent with the intent and definition of sales load in the Act. Keystone will not impose a front-end sales charge on purchase payments under the Contracts, although Keystone will continue to incur expenses for the sale of the Contract. Applicants submit that such expenses are within the definition of "sales load," and, except for the timing and imposition of the asset based sales charge, would otherwise comply with section 2(a)(35) of the Act.

7. Keystone will deduct from each sub-account of the Variable Account a mortality and expense risk charge equal on an annual basis to 1.25% of the average daily net asset value of each such sub-account (currently estimated to consist of .70% for mortality risks and .55% for expense risks).

8. Variable annuity payments made to annuitants will vary with the investment experience of the Variable Account, but will not be affected by the mortality experience (death-rate) of persons receiving such payments or of the general population. Keystone guarantees a death benefit equal to the surrender value upon the death of Contact Owners and annuitants. Keystone also guarantees a minimum death benefit paid upon the death of certain Contract Owners and annuitants that may exceed purchase payments or the surrender value at the time of death. This payment will not be reduced by any CDSC.

9. Keystone will assume an expense risk because the maintenance responsibilities both before and after the date on which annuity payments begin will be the same and the contract maintenance charge may not be sufficient to reimburse Keystone for its costs. Keystone also assumes the risk that the expenses of administering the Contract after annuity payments begin may exceed the charge in effect at the time or annuitization.

10. Applicants represent that the level of the mortality and expense risk is within the range of industry practice for the comparable variable annuity contracts. Applicants state that they have reviewed publicly available information regarding products of other companies taking into consideration such factors as: guaranteed minimum death benefits; guaranteed annuity purchase rates; minimum initial and subsequent purchase payments; other contract charges; the manner in which charges are imposed; market sector; investment options under the Contract; and availability to fund individual qualified and non-qualified Plans. Applicants represent that they will maintain at their administrative office, and make available to the Commission, a memorandum setting forth in detail the variable annuity products analyzed and the methodology, and results of, Keystone's comparative review.

11. Keystone represents that the asset based sales charge and CDSC may be insufficient to cover all costs related to distribution of the Contracts and that if a contribution to surplus is realized from the mortality and expense risk charge, all or a portion of that charge may be used for distribution expenses. Keystone has concluded that there is a reasonable likelihood that the proposed distribution financing arrangements made with respect to the Contracts will benefit the Account and Contract Owners. The basis for such conclusion is set forth in a memorandum which will be maintained by Keystone at its administrative offices and will be available to the Commission. Moreover, Keystone represents that the Account will invest only in an underlying mutual fund, which undertakes, in the event it should adopt any plan under Rule 12b-1 under the Act to finance distribution expenses, to have such plan formulated and approved by a board of directors, a majority of which are not "interested persons" of such fund within the meaning Section 2(a)(19) of the 1940 Act.

12. Applicants submit, for all the reasons stated herein, that their requests for exemption meet the standards set out in section 6(c) and summarized above and that an order of the Commission, should, therefore, be granted. Accordingly, Applicants request exemption pursuant to section 6(c) from sections 2(a)(35), 26(a)(2)(C) and 27(c)(2) of the Act to the extent necessary to permit the assessment and deduction of the asset based sales charge and the mortality and expense risk charge with respect to the Contracts.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

**[Rel. No. IC-16837; 812-7234]**

## Security Mortgage Acceptance Corp. et al.; Application for Exemption

February 24, 1989.

**AGENCY:** Securities and Exchange Commission ("SEC").

**ACTION:** Notice of application for exemption from all provisions of the Investment Company Act of 1940 ("1940 Act").

*Applicants:* Security Mortgage Acceptance Corporation—1, on behalf of itself and the other entities covered or to be covered by the requested order (the "Applicant") and Bear Stearns & Co. Inc. *Relevant 1940 Act Section:* Exemption requested under section 6(c) from all provisions of the 1940 Act.

*Summary of Application:* Applicant seeks an order amending a previous order (the "Existing Order") issued to Applicant (Investment Company Act Release No. 16715, December 28, 1988) to permit the sale of residual interests in the Old SMAC Companies (as defined in paragraph 2 below under the heading "Applicant's Representations") under the circumstances summarized below and described more fully in the application.

*Filing Date:* The application was filed on February 3, 1989 and an amendment to the application was filed on February 21, 1989.

*Hearing or Notification of Hearing:* If no hearing is ordered, the application will be granted. Any interested person may request a hearing on the application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on March 20, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

**ADDRESSES:** Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Security Mortgage Acceptance Corporation—1, 1385 Eaton Center, 1111 Superior Avenue, Cleveland, Ohio 44114.

**FOR FURTHER INFORMATION CONTACT:** H.R. Hallock, Jr., Special Counsel, at (202) 272-3030, Office of Investment Company Regulation, Division of Investment Management.

**SUPPLEMENTARY INFORMATION:** Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231-3282 (in Maryland (301) 258-4300).

### Applicant's Representations

1. Security Mortgage Acceptance Corporation—1, on its own behalf and on behalf of future corporations

originally sponsored and wholly-owned by Alfred Lerner and organized for the same limited purpose as Security Mortgage Acceptance Corporation—1 (collectively "SMAC"), filed an application on November 20, 1985 (the "First Application"), for an order of the SEC exempting them from all provisions of the 1940 Act to permit SMAC to sell Bonds [1] collateralized by Mortgage Collateral. On July 23, 1986, the SEC granted the requested relief (Investment Company Act Release No. 15220) (the First Order"). On August 22, 1988, Applicant filed an application (the "Second Application") requesting an amendment to the First Order to sell Residual Interests to (i) institutional investors or (ii) non-institutional investors which are "accredited investors" as defined in Rule 501(a) of the Securities Act of 1933, as amended (such Investors being collectively referred to as "Eligible Purchasers"). On December 28, 1988, the SEC granted the Existing Order (Investment Company Act Release No. 16715).

2. To date, Mr. Lerner has sponsored two corporations which are subject to the Existing Order, Security Mortgage Acceptance Corporation—1 and Security Mortgage Acceptance Corporation—2 (the "Old SMAC Companies"), each of which has issued two series of Bonds. The Existing Order currently permits the sale of stock of SMAC, including the old SMAC Companies, or a sale of beneficial interests in the Residual Interest therein. On December 30, 1988, Mr. Lerner sold all the outstanding capital stock in the Old SMAC Companies to Barr, Stearns & Co. Inc. (the "Purchaser"), an Eligible Purchaser, in a transaction consummated in accordance with the terms of the Existing Order. The Purchaser desires to sell the Residual Interest in the Old SMAC Companies as permitted by the Existing Order and/or as contemplated in the application and summarized below.

3. To maximize the value of the Residual Interest,[2] it currently is proposed that the Old SMAC Companies be permitted to reorganize as an owner trust. The Old SMAC Companies as the depositors and an owner trustee, which is unaffiliated with the Applicant, would form an owner trust (the "Trust"), a single purpose entity as defined by the same nationally recognized statistical rating agency or agencies that rated the relevant series of Bonds and would be "bankruptcy remote" to the same extent as the Old SMAC Companies. Its sole purpose would be to hold the Mortgage Collateral and to engage in activities incidental thereto. Unlike the typical owner trust, the Trust would not be permitted to issue any additional series of Bonds in reliance on the requested order.

4. The Old SMAC Companies would sell the Mortgage Collateral securing the Bonds to the Trust in exchange for all of the trust certificates in the Trust (which would constitute the Residual Interest). The Residual Interest than would be sold. The Trust would assume all obligations of each of the Old SMAC Companies under the relevant Indenture and would succeed as issuer of the Bonds, which would remain outstanding. Bondholders would receive notice of the reorganization, and the Old SMAC Companies would be dissolved. The reorganization would not require registration under the Securities Act of 1933, as amended, and would not violate any provisions of the Securities Exchange Act of 1934, as amended, or the Trust Indenture Act of 1939, as amended. The Trust would own the Mortgage Collateral, and the Trustee under the Indenture or its nominee would hold the Mortgage Collateral, in each case subject to the lien of the relevant Indenture, which explicitly permits a reorganization of the character described without the necessity of obtaining Bondholder consent. No payment term of the Bonds would be changed thereby, the Mortgage Collateral would not be adversely impaired or affected as a result thereof, no lien ranking prior to or on a parity with the lien of the related Indenture with respect to the Mortgage Collateral would be created thereby, and nothing in the proposed reorganization would deprive the Bondholders of the security afforded by the lien of the related Indenture or result in the purchasers of the Residual Interest having priority over Bondholders. The rating of the Bonds would be unaffected by the proposed reorganization.

5. As an alternative to the transaction described in paragraph 4 above, one or both of the Old SMAC Companies may desire to transfer Mortgage Collateral securing one (or both) series of Bonds issued by that Old SMAC Company to one or more owner trusts or other entities. It shall be a condition to the requested relief that in no event would a transaction be consummated where the representations made in paragraph 4 above could not be made,[3] except as provided in footnote 3 below, or where the condition set forth below would not be applicable.

### Revised Condition

The condition set forth in the body of the Existing Order regarding the sale or other impairment of the Mortgage Collateral is revised in its entirety to read as follows:

Without the written consent of each Bondholder to be affected, neither the holders of any Residual Interest nor either Old SMAC Company (or the Trust or other entity described in the application) will be able to impair or adversely affect the Mortgage Collateral securing a series of Bonds (including, without limitation, selling the Mortgage Collateral while a series of Bonds remains outstanding), provided that any such entity would be permitted to sell the Mortgage Collateral without Bondholder consent to an owner trust or other entity that would succeed to its obligations under the relevant Indenture in the transaction of the type described in the application. The foregoing does not prohibit substitution of Mortgage Collateral as permitted by the Existing Order.

For the Commission, by the Division of Investment Management, under delegated authority.

**Shirley E. Hollis,**

**[Release No. IC-16838; File No. 811-5372]**

## John Hancock Variable Annuity Account F

February 24, 1989.

**AGENCY:** Securities and Exchange Commission ("SEC").

**ACTION:** Notice of Application for an Order under the Investment Company Act of 1940 (the "1940 Act").

*Applicant:* John Hancock Variable Annuity Account F ("Applicant")

*Relevant 1940 Act Sections:* Order requested under section 8(f).

[1] This and all other capitalized terms used herein, and not otherwise defined herein, shall have meanings ascribed to such terms in the First and Second Application.

[2] An election to be treated as a subchapter S corporation under the Internal Revenue Code had been filed in respect of each of the Old SMAC Companies. This advantageous tax treatment was lost when the stock of the Old SMAC Companies was sold to the Purchaser. As a result, a subsequent purchaser of the stock could be subject to tax at two levels: first at the Old SMAC Companies' level and second at its own level. Consequently, the net cash flow from the Residual Interest would be less than if the sale took a form other than a sale of stock.

[3] Where the Mortgage Collateral securing one of the two Series of Bonds issued by an Old SMAC Company is sold and the Mortgage Collateral securing the other Series is not, however, the relevant Old SMAC Company would not be dissolved as described in paragraph 4 above.

VOL 54 ISS 40 MR 2 1989 UMI

*Summary of Application:* Applicant seeks an order under section 8(f) of the 1940 Act declaring that it has ceased to be an investment company.

*Filing Date:* The application was filed on January 23, 1989.

*Hearing or Notification of Hearing:* If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on March 20, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

**ADDRESS:** Secretary, SEC, 450 5th Street NW., Washington DC 20549. John Hancock Variable Annuity Account F, John Hancock Place, P.O. 111 Boston, Massachusetts 02117.

**FOR FURTHER INFORMATION CONTACT:** Cindy J. Rose, Financial Analyst (202) 272-2058 or Clifford E. Kirsch, Special Counsel (202) 272-2061 (Division of Investment Management).

**SUPPLEMENTARY INFORMATION:** Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

**Applicant's Representations**

1. On October 22, 1987, Applicant, a separate account of John Hancock Mutual Life Insurance Company, filed a Notification of Registration on Form N-8A and a registration statement on Form N-4. The registration statement never became effective and no public offering of the securities of the Applicant was ever made.

2. Applicant represents that it has never had any assets, has no debts or other liabilities outstanding, is not a party to any litigation or administrative proceeding, has no security holders and is not now engaged, nor does it propose to engage, in any business activities.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

**Jonathan G. Katz,**

*Secretary.*

## DEPARTMENT OF STATE

**[CM-8/1267]**

**Advisory Committee on International Communications and Information Policy; Meeting**

The Department of State announces that the Advisory Committee on International Communications and Information Policy will meet on March 20 in the Lecture Room of the National Academy of Sciences, 22nd and C Streets, NW., Washington, DC, from 9 a.m. until 12:45 p.m.

The Committee serves the Department of State in an advisory capacity concerning major economic, social and legal issues and problems in international communications and information policy, especially as these issues and problems involve users of information and communications services, providers of such services, technology research and development, foreign industrial and regulatory policy and the activities of international organizations with regard to communications and information, and developing country interests.

In view of the regulatory and structural changes taking place in the telecommunications sector, the March 20 meeting will focus on development of U.S. policy toward the International Telecommunication Union (ITU) and review technology transfer issues in the telecommunications sector. The ITU discussion will focus particularly on the upcoming ITU Plenipotentiary Conference which will review the structure, purpose and international regulatory reach of the organization.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating

VOL 54 ISS 40 MR 2 1989 UMI

available. Prior to the meeting, persons who plan to attend should so advise the office of Mr. Lucy H. Richards, Department of State, Washington, DC, telephone (202) 647–5230.

Dated: February 14, 1989.

**Lucy H. Richards,**

**Advisory Committee on International Investment; Meeting**

The Department of State will hold a meeting of the Advisory Committee on International Investment on March 17, 1989 from 9 a.m. to 1 p.m. The meeting will be held in Room 1912 at the Department of State, 2201 "C" Street, NW., Washington, DC 20520.

The agenda and approximate times topics will be discussed are as follows:

—9:00 Review of agenda and introduction of first speaker by Professor Isaiah Frank of the Johns Hopkins School of Advanced International Studies.

—9:05 Welcoming remarks by Assistant Secretary of State for Economic and Business Affairs Eugene J. McAllister.

—9:20 Commentary on the current status of the U.S. initiative on investment in the OECD, the bilateral investment treaty (BIT) program, and of TRIMs in the GATT by William B. Milam, Deputy Assistant Secretary of State for International Finance and Development and Marilyn A. Meyers, Director of the Office of Investment Affairs at the Department of State. Remarks to be followed by questions and comments by committee members.

—10:00 Coffee.

—10:15 Presentation by Professor John Kline of Georgetown University on the concept of corporate nationality and on recent attempts by the Congress and the Reagan Administration to regulate imports and foreign investment and to establish an industrial policy. Followed by comments and questions by members of the committee.

—11:45 Presentation by Betty L. Barker, Chief, International Investment Division, Bureau of Economic Analysis, Department of Commerce on the data collection activities of the U.S. government with respect to inward investment in the United States. Discussion of what currently available data reveal about the effects and extent of foreign investment in the United States. Followed by comments and questions by members of the committee.

—1:00 Meeting concludes.

Access to the Department of State is controlled. Therefore, members of the public wishing to attend the meeting must notify the Office of Investment Affairs at (202) 647–2585 in order to arrange admittance. Please use the "C" Street entrance.

**Shipping Coordinating Committee; Meeting**

The Shipping Coordinating Committee (SHC) will conduct an open meeting at 9:30 a.m. on March 28, 1989, in room 6103, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593.

The purpose of the meeting is to finalize preparations for the 57th Session of the Maritime Safety Committee (MSC) of the International Maritime Organization (IMO) which is scheduled for 3–12 April 1989 in London at the IMO headquarters. The purpose of the meeting is to discuss the papers received and the draft U.S. positions for the 57th Session. Interalia, the items of particular interest on the agenda for this Session are:

—Reports of the various subcommittees

—Outcome of 1988 Global Maritime Distress Safety System (GMDSS) Conference and the GMDSS Protocol Conference

—IMO Guidelines on Management for Safe Ship Operation and Pollution

—Guidelines and Standards for the removal of offshore installations

—Piracy and armed robbery against ships

—Work programme

Members of the public may attend these meetings up to the seating capacity of the room. Interested persons may seek information by writing: Mr. G.P. Yost, U.S. Coast Guard Headquarters (G–CI), 2100 Second Street, SW., Washington, DC 20593 or by Calling: 202–267–2280.

Date: February 21 1989

**Organization for the International Telegraph and Telephone Consultative Committee CCITT Study Group A; Cancellation and Rescheduling Meeting**

The Department of State announces that the meeting previously scheduled for March 9, 1989 is cancelled and has been rescheduled. Study Group A of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) is rescheduled to meet on March 30, 1989 at 9:30 a.m. in Room 1107, Department of State, 2201 C Street, NW., Washington, DC.

Study Group A deals with international telecommunications policy and services.

The purpose of the meeting will be to:

(a) Debrief of relevant Administrative Council meeting issues

(b) Debrief of relevant Study Group XVIII meeting issues (liaisons)

(c) Debrief of CCITT Study Group II issues

(d) Development and/or review of contributions to CCITT Study Group

I. III (April 24–28, 1989)

2. I (May 2–12, 1989)

While it is noted that U.S. Study Group D would normally consider contributions for CCITT Study Group VIII, this meeting may, exceptionally consider possible delayed contributions for the meeting of Study Group VIII, scheduled for 12–20 April, in Geneva.

The meeting may consider other issues concerning CCITT Study Group activity. Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Prior to the meeting, persons who plan to attend should so advise the office of Mr. Earl S. Barbely, State Department, Washington, DC; telephone 647–5220. All attendees must use the C Street entrance to the building.

Dated: February 17, 1989.

**Earl S. Barbely,**

*Director, Office of Telecommunications and Information Standards; Chairman, U.S. CCITT National Committee.*

**TENNESSEE VALLEY AUTHORITY**

**Information Collection Under Review by the Office of Management and Budget**

**AGENCY:** Tennessee Valley Authority.

**ACTION:** Information collection under review by the Office of Management and Budget (OMB).

**SUMMARY:** The Tennessee Valley Authority (TVA) has sent to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), as amended by Pub. L. 99–591.

Requests for information, including copies of the information collection proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be directed to the Agency Clearance Officer and also to the Desk Officer for the Tennessee Valley Authority, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; Telephone: (202) 395–3084.

*Agency Clearance Officer:* Mark R. Winter, Tennessee Valley Authority, 100 Lupton Building, Chattanooga, TN 37401; (615) 751–2523.

*Type of Request:* Regular submission.

*Title of Information Collection:* Power Distributors Annual Report to TVA.

*Frequency of Use:* Annually.

*Type of Affected Public:* Business or other for-profit, small businesses or organizations.

*Small Businesses or Organizations Affected:* Yes.

*Federal Budget Functional Category Code:* 271.

*Estimated Number of Annual Responses:* 320.

*Estimated Total Annual Burden Hours:* 3,072.

*Estimated Average Burden Hours Per Response:* 9.6.

*Need For and Use of Information:* This information collection supplies TVA with financial and accounting information to help ensure that electric power produced by TVA is sold to consumers at rates which are as low as feasible.

BILLING CODE 8120–01–M

**OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE**

**Identification of Priority Practices; Request for Public Comments**

**AGENCY:** Office of the United States Trade Representative.

**ACTION:** Request for written submissions from the public on practices that should be considered with respect to identification of priority practices under section 310 of the Trade Act of 1974, as amended (19 U.S.C. 2420).

**SUMMARY:** Section 310 of the Trade Act requires the United States Trade Representative (USTR) to identify trade liberalization priorities, "including major barriers and trade distorting practices, the elimination of which are likely to have the most significant potential to increase United States exports, either directly or through the establishment of a beneficial precedent." USTR is requesting written submissions from the public concerning foreign countries' practices that should be considered under section 310.

**DATE:** Submissions must be received on or before March 24, 1989.

**FOR FURTHER INFORMATION CONTACT:** A. Jane Bradley, Associate General Counsel and Chairman, Section 301 Committee, or Dorothy Balaban, Staff Assistant to the Section 301 Committee, Office of the United States Trade Representative, 600 17th Street NW., Washington, DC 20506, [202) 395–3432.

**SUPPLEMENTARY INFORMATION:** Section 310 (a) of the Trade Act requires the USTR, no later than May 30, 1989, to identify United States trade liberalization priority practices and countries and submit a report on such priorities to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives, and publish it in the Federal Register. Section 310(b) of the Act requires the Trade Representative to initiate investigations under section 302 of the Act, by June 20, 1989, with respect to priorities identified in said report.

USTR invites submissions on major foreign trade barriers and trade distorting practices that should be considered in identifying priorities. Submissions should: (1) Include information on the nature and significance of the foreign policy or practice, (2) identify the United States product, service, intellectual property right, or foreign direct investment matter which is affected by the foreign practice, (3) indicate the volume of trade in the goods or services involved, and (4) provide any other information considered relevant.

Interested persons must provide twenty copies of the submission to Dorothy Balaban, Section 301 Committee, Room 222, 600 17th Street NW., Washington, DC 20506.

**A. Jane Bradley,**

*Chairman, Section 301 Committee.*

[FR Doc. 89–4956 Filed 3–1–89; 8:45 am]

BILLING CODE 3190–01–M

**Generalized System of Preferences; Information on Imports During First 10 Months of 1988 and Invitation of Comments**

This notice is for information only and has no legal effect. It is provided in order to inform the public of certain import statistics covering the period of January through October 1988 and to afford the public an opportunity to comment on certain discretionary decisions the President must make on or about April 1, 1989 with respect to the GSP program. These decisions concern the GSP "competitive need" limits set forth in section 504(c) and section 504(d)(2) of the Trade Act of 1974 (19 U.S.C. 2464 (c)), and possible redesignation of articles previously graduated from GSP. Presidential decisions concerning the application of competitive need limits and all other product-related decisions stemming from the 1988 Annual Review are expected to be announced on or about April 1, and implemented on July 1, 1989.

Pursuant to section 504(c), any GSP eligible beneficiary country that exported to the United States during the most recent calendar year a quantity of any one GSP eligible article in excess of (1) $25 million indexed to the U.S. Gross National Product since 1974, or (2) 50 percent of the value of total U.S. imports of the article, is to be removed from GSP eligibility not later than July 1 of the next calendar year.

Based on preliminary data and subject to revision, the aforementioned dollar limit is expected to be approximately $82,504,413 million for calendar year 1988.

As a result of the Trade and Tariff Act of 1984, a general review of the GSP was initiated in 1985 and the results of the review announced on January 2, 1987 (52 FR 389). The purpose of the review was to determine whether beneficiary countries have become sufficiently competitive in GSP-eligible products, on a product and country specific basis. For countries found to be sufficiently competitive with respect to a product, the percentage competitive need limit was reduced to 25 percent and the dollar limit was reduced to $25 million indexed

VOL
54
ISS
40
MR
2
1989
UMI

to the nominal growth of U.S. GNP since 1984. Based on preliminary data and subject to revision, the aforementioned dollar limit for countries found to be sufficiently competitive is expected to be approximately $32,212,635 million for the calendar year 1988.

Section 504 (d)(2) of the Trade Act of 1974, as amended, permits the President to disregard the 50 percent "competitive need" limit with respect to any eligible article if the value of total imports of the article during the most recent calendar year did not exceed $5 million, adjusted annually to reflect changes in the U.S. Gross National Product. This *"de minimis"* level is expected to be approximately $9,669,219 million dollars for calendar year 1988.

A proclamation will be issued to be effective July 1, 1989, making the adjustments that are required by section 504(c) of the Trade Act and announcing the discretionary decisions referred to in this notice, on the basis of official data covering all of calendar year 1988.

It should be emphasized that the information set forth below covers only the first 10 months of 1988. While this is not complete information, it is being published now in order to provide the maximum possible advance indication as to adjustments that may be made to meet the requirements of section 504(c) of the Trade Act and to afford the opportunity for comment in potential discretionary decisions.

List I below shows specific GSP-eligible articles for countries which have already exceeded estimated competitive need limitations (country supplied over $82,504,413 million, or $32,212,635 million in the case where a country has been found sufficiently competitive in the product, during January-October 1988) or have been graduated from the GSP in earlier years pursuant to the President's discretionary authority.

List II below shows countries which are approaching the competitive need limitations (country accounted for over 47 percent of the value of total U.S. imports and/or over $64 million, or for countries found to be sufficiently competitive over 23 percent and/or $26 million during January-October 1988).

List III below shows countries which, despite accounting for more than 50 percent (or 25 percent in the case of a country found sufficiently competitive in a product) of the value of total U.S. imports of an article, may be eligible to receive GSP benefits through the *de minimis waiver* (country accounted for more than applicable percentage limit and the value of total U.S. imports of the item was less than $9,669,219 million during January–October 1988).

List IV below shows countries which are currently ineligible for the GSP but which may be eligible for redesignation to GSP status pursuant to the President's discretionary authority (country accounted for less than 50 percent, or 25 percent in the case if products determined to be sufficiently competitive, of the value of U.S. imports and the value of total U.S. imports was less than the applicable dollar limit during January–October 1988).

As noted above, the decisions that the President will make on whether to waive the percentage limit in cases where trade is *de minimus* and whether to redesignate countries with respect to products are discretionary. In this regard, the GSP Subcommittee of the Trade Policy Staff Committee invites public comment relevant to these potential upcoming decisions.

All written comments with regard to these decisions should be addressed to: GSP Subcommittee, Office of the U.S. Trade Representative, 600 17th Street, NW., Room 517, Washington, DC 20506. All submissions should conform to 15 CFR 2007, particularly §§ 2007.0, 2007.1(a)(1), 2007.1(a)(2) and 2007.1(a)(3). Furthermore, all those parties providing comments should indicate on the first page of the submission the name of the petitioner, HS subheading(s), and beneficiary country(s) of interest, and the type of action (i.e., the use of the President's *de minimus* waiver authority, etc * * *) in which the party is interested.

These statements must be accompanied by twenty copies, in English, of all comments and must be received by the Chairman of the GSP Subcommittee of the Trade Policy Staff Committee no later than 5 p.m. Thursday, March 9 at the address listed above. If the comments contain business confidential information, twenty copies of a nonconfidential version of the comments along with twelve copies of the confidential version must be submitted. A justification as to why the information contained in the submission should be treated confidentially must be included in the submission. In addition, the submission containing confidential information should be clearly marked "confidential" at the top and bottom of each page of the submission. The version that does not contain confidential information should also be clearly marked, at the top and bottom of each page, "public version" or "non confidential."

Written comments submitted in connection with these decisions will be subject to public inspection by appointment only with the staff of the GSP Information Center, except for information granted "business confidential" status pursuant to 15 CFR 2007.7. The GSP Information Center is located at the Office of the United States Trade Representative at the address listed above. The GSP Information Center phone number is (202) 395–6971.

**Sandra J. Kristoff,**

*Chairwoman, Trade Policy Staff Committee.*

## DEPARTMENT OF TRANSPORTATION

### Office of the Secretary

### Applications of Trans Continental Airlines, Inc. for Certificate of Authority Under Subpart Q

**AGENCY:** Department of Transportation.

**ACTION:** Notice of order to show cause, (Order 89-2-46) Dockets 45908 and 45909.

**SUMMARY:** The Department of Transportation is directing all interested persons to show cause why it should not issue orders finding Trans Continental Airlines, Inc. fit, and awarding it certificates of public convenience and necessity to engage in domestic and foreign charter air transportation of persons and property.

**DATE:** Persons wishing to file objections should do so no later than March 14, 1989.

**ADDRESSES:** Objections and answers to objections should be filed in Dockets 45908 and 45909 and addressed to the Documentary Services Division (C-55, Room 4107), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590 and should be served upon the parties listed in Attachment A to the order.

**FOR FURTHER INFORMATION CONTACT:** Delores King, Air Carrier Fitness Division (P-56, Room 6401), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-2343.

Dated: February 27, 1989.

**Patrick V. Murphy, Jr.,**

*Deputy Assistant Secretary for Policy and International Affairs.*

### Fitness Determination of Pocono Airlines, Inc., Trans World Express

**AGENCY:** Department of Transportation.

**ACTION:** Notice of commuter air carrier fitness determination—order 89-2-47, order to show cause.

**SUMMARY:** The Department of Transportation is proposing to find Pocono Airlines, Inc. d/b/a Trans World Express (as reorganized) fit, willing, and able to provide commuter air service under section 419(d)(2) of the Federal Aviation Act.

Responses: All interested persons wishing to respond to the Department of Transportation's tentative fitness determination should file their responses with the Air Carrier Fitness Division, P-56, Department of Transportation, 400 Seventh Street, SW., Room 6401, Washington, DC 20590, and serve them on all persons listed in Attachment A to the order. Responses shall be filed no later than March 6, 1989.

**FOR FURTHER INFORMATION CONTACT:** Mrs. Kathy L. Cooperstein, Air Carrier Fitness Division (P-56, Room 6401), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-9721.

Dated: February 27, 1989.

**Patrick V. Murphy, Jr.,**

*Deputy Assistant Secretary for Policy and International Affairs.*

## Federal Aviation Administration

### Air Traffic Control Tower; Commissioning

Notice is hereby given that on May 15, 1989, through September 30, 1989, the airport traffic control tower at the Martha's Vineyard Airport, Martha's Vineyard, Massachusetts, will be commissioned as a part-time Federal Aviation Administration (FAA) facility. Tower hours of operation will be established in advance by a Notice to Airmen, and thereafter published in the Airman's Information Manual. The designated facility identification for the FAA airport control tower will be: VINEYARD TOWER.

This information will be reflected in the FAA organization statement.

Communications to the tower should be directed to: Mr. Edwin S. Askew, Manager, Cape Hub, Federal Aviation Administration, Airport Traffic Control Tower, RFD, Martha's Vineyard Airport, Box 31, Vineyard Haven, Massachusetts 02568 (Telephone No. (617) 693-1170).

(49 U.S.C. 1348 and 1354(a); 49 USC 106(g) (Revised Pub. L. 97-449 (January 12, 1983)))

**James I. Lucas,**

*Manager, Air Traffic Division, New England Region.*

## DEPARTMENT OF THE TREASURY

### Public Information Collection Requirements Submitted to OMB for Review

Dated: February 24, 1989.

The Department of Treasuary has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue, NW., Washington, DC 20220.

**Interal Revenue Service**

*OMB Number:* New.
*Form Number:* None.
*Type of Review:* New Collection.
*Title:* Focus Group Interviews Concerning IRS Television Commercials.
*Description:* The group interviews are necessary to evaluate how the television commercials are communicating to the public, assess their effect on IRS image and assess their ability to motivate consumers to file promplty or use the tax assistance program. The results will provide guidance for further development of the commercials. Affected public is 90 participants.
*Respondents:* Individuals or households.
*Estimated Number of Respondents:* 90.
*Estimated Burden Hours Per Response:* 2 hours.
*Frequency of Response:* One-time interviews.
*Estimted Total Recordkeeping/ Reporting Burden:* 180 hours.
*Clearance Officer:* Garrick Shear (202) 535-4297, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.
*OMB Reviewer:* Milo Sunderhauf (202) 395-6880, Office of Management and Budget Room 3001, New Executive Office Building, Washington, DC 20503.

**Lois K. Holland,**

*Departmental Reports, Management Officer.*

# Sunshine Act Meetings

Federal Register
Vol. 54, No. 40
Thursday, March 2, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

**FEDERAL ELECTION COMMISSION**

**PREVIOUSLY ANNOUNCED DATE AND TIME:** Thursday, March 2, 1989, 10:00 a.m.

By direction of the Federal Election Commission, the Open Meeting scheduled for March 2, 1989 is cancelled.

**DATE AND TIME:** Tuesday, March 7, 1989, 2:00 p.m.

**PLACE:** 999 E. Street, NW., Washington, DC.

**STATUS:** This meeting will be closed to the public.

**ITEMS TO BE DISCUSSED:**

Compliance matters pursuant to 2 U.S.C. 437g.
Audits conducted pursuant to 2 U.S.C. 437g, 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration.
Internal personnel rules and procedures or matters affecting a particular employee.

**DATE AND TIME:** Thursday, March 9, 1989, 10:00 a.m.

**PLACE:** 999 E. Street, NW., Washington, DC. (Ninth Floor).

**STATUS:** This meeting will be open to the public.

**MATTERS TO BE DISCUSSED:**

Setting of Dates for Future Meetings.
Correction and Approval of Minutes.
Certification for Payment of 1988 Primary Matching Funds.
Explanation and Justification of the Regulation Governing Trade Association Solicitation of Parent and Subsidiary Corporations: 11 CFR 114.8(f)
Final Audit Report on Pete du Pont for President.
Legislative Recommendations
Administrative Matters

**PERSON TO CONTACT FOR INFORMATION:** Mr. Fred Eiland, Information Officer, Telephone: 202–376–3155.

**Marjorie W. Emmons,**
*Secretary of the Commission.*

BILLING CODE 6715-01-M

**FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS**

**TIME AND DATE:** 10:00 a.m., Wednesday, March 8, 1989.

**PLACE:** Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

**STATUS:** Closed.

**MATTERS TO BE CONSIDERED:**

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

**CONTACT PERSON FOR MORE INFORMATION:** Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Date: February 28, 1989.

**Jennifer J. Johnson,**
*Associate Secretary of the Board.*

**NUCLEAR REGULATORY COMMISSION**

**DATE:** Monday, March 6, 1989.

**PLACE:** Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

**STATUS:** Open.

**MATTERS TO BE CONSIDERED:**

*Monday, March 6*

10:00 a.m.
Briefing on Operator Training (Public Meeting)
2:30 p.m.
Briefing on Status of Generic Issues (Public Meeting)

Note.—Affirmation sessions are initially scheduled and announced to the public on a time-reserved basis. Supplementary notice is provided in accordance with the Sunshine Act as specific items are identified and added to the meeting agenda. If there is no specific subject listed for affirmation, this means that no item has as yet been identified as requiring any Commission vote on this date.

**TO VERIFY THE STATUS OF MEETINGS CALL (RECORDING):** (301) 492–0292.

**CONTACT PERSON FOR MORE INFORMATION:** William Hill (301) 492–1661.

### Uniform Relocation Assistance and Real Property Acquisition Regulations for Federal and Federally Assisted Programs; Final Rule and Notice

VOL 54 ISS 40 MR 2 1989 UMI

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 24

[FHWA Docket No. 87-22]

RIN 2125-AB 85

**Uniform Relocation Assistance and Real Property Acquisition Regulations for Federal and Federally Assisted Programs**

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: This regulation establishes a governmentwide single rule for the implementation of statutory amendments to the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (the Uniform Act) made by the Uniform Relocation Act Amendments of 1987 Title IV of the Surface Transportation and Uniform Relocation Assistance Act of 1987 (1987 Amendments), Pub. L. 100-17, 101 Stat. 246-250. The Uniform Act applies to all Federal or federally assisted activities that involve the acquisition of real property or the displacement of persons, including displacements caused by rehabilitation and demolition activities. This regulation is intended to ensure that the implementation of the Uniform Act by Federal agencies is, in fact, as uniform and consistent as possible, while encouraging State and local discretion in implementing the Uniform Act's provisions.

DATE: This regulation is effective March 2, 1989. Further information concerning agency implementation is provided below.

FOR FURTHER INFORMATION CONTACT: F.D. Luckow, Chief, Program Requirements Division, Office of Right-of-Way, HRW-10, (202) 366-0116; or Reid Alsop, Office of the Chief Counsel, HCC-40, (202) 366-1371. The address is Federal Highway Administration, 400 Seventh Street SW., Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

**Background**

This regulation is the final step in the development of a governmentwide single rule for implementing the Uniform Act. The background of this development is described in considerable detail in the preamble to the interim final rule issued on December 17, 1987 (52 FR 47904), and the Notice of Proposed Rulemaking (NPRM), issued on July 21, 1988 (53 FR 27598), and is not repeated here.

On February 27, 1985, a Presidential Memorandum was signed and published in the Federal Register on March 5, 1985 (50 FR 8953), naming the Department of Transportation (DOT) as the agency with lead responsibility for the Uniform Act. This led to the publication of a multi-agency governmentwide common rule on February 27, 1986 (51 FR 7000).

The 1987 Amendments named the DOT as lead agency. The Secretary of the Department of Transportation has delegated this responsibility to the Federal Highway Administration (FHWA). The 1987 Amendments require the lead agency, in coordination with other Federal agencies, to issue rules, establish procedures and make interpretations to implement provisions of the Uniform Act.

**Implementation of the 1987 Amendments**

On Tuesday, May 19, 1987 (52 FR 18768) the FHWA issued a Notice describing significant changes in the law and general plans to implement those changes. On Tuesday, December 1, 1987 (52 FR 45667) the FHWA issued a Notice of Regulatory Intent giving further notice of the specific regulatory actions that it and the other affected Federal agencies would take to implement the 1987 Amendments.

A few provisions of the 1987 Amendments upon which the law is explicit and allows for little, if any, administrative discretion or interpretation, and for which a period of public notice and comment would have been impractical, were implemented in an interim final rule in Part 24 issued by FHWA (52 FR 47904), on December 17, 1987.

On the same day (52 FR 48015) 17 Federal Departments and agencies that administer the Uniform Act, and had adopted the governmentwide common rule, published interim final rules rescinding the governmentwide common rule from the codification of their regulations and adopting in its place a cross-reference to the governmentwide single regulation published by FHWA at 49 CFR Part 24. The effective date for these agency rescissions and cross references varied, however all such actions were to take effect on or before April 2, 1989, the date the 1987 Amendments become mandatory.

An eighteenth Federal Department, the Department of Housing and Urban Development (HUD), was unable to join the other Federal agencies in publishing an interim final rescission and cross referencing action on December 17, 1987, because of its need to first satisfy certain Congressional review obligations. HUD subsequently published such an interim rule on February 19, 1988 (53 FR 4984).

As discussed in the preamble to the NPRM, no comments were received that objected to the use of the rescission and cross-referencing actions by the various Federal agencies concerned to establish a governmentwide single regulation. The only relevant comment objected to the effective date of HUD's rescission and cross-referencing action. HUD considered that comment but does not believe it is feasible to change the date for administrative reasons, in order to best achieve a smooth transition to the new requirements of the 1987 Amendments.

The objective of the February 27, 1985 Presidential memorandum, and one of the primary goals of the 1987 Amendments, was to establish governmentwide uniformity so as to eliminate the differences and inconsistencies among Federal agencies that had plagued Federal implementation of the Uniform Act since its enactment in 1971. These differences and inconsistencies had been particularly burdensome to State and local governments that were administering a variety of Federal programs, and also, in some cases, resulted in differences in the benefits provided to persons in like circumstances.

The 1987 Amendments clearly provide that a single Federal lead agency will promulgate a governmentwide single rule for the Uniform Act's implementation. Accordingly, other Federal agencies covered by the Act no longer have independent statutory authority to promulgate their own separate Uniform Act regulations and, in implementing the Uniform Act, must follow the regulations published by the lead agency. The Uniform Act is unique in that it imposes requirements directly upon a large number of Federal and Federally assisted programs, but assigns the authority for the publication of all necessary implementing regulations to one lead agency. (Of course, such regulations will continue to be developed with the participation of HUD and other Federal agencies).

Accordingly, because a governmentwide single regulation is required by law, because of the unique nature of the Uniform Act, because no comments were received, and because no useful purpose would be served by having 18 Federal agencies take additional regulatory action to formally finalize their rescission and cross-reference actions, the interim rescission and cross-reference actions taken by such agencies should henceforth be considered final, and will remain in effect indefinitely.

Those departments and agencies, and the parts of the Code of Federal Regulations which contain a cross reference to this part, are listed below:

Department of Agriculture, 7 CFR Part 21
Department of Commerce, 15 CFR Part 11
Department of Defense, 32 CFR Part 259
Department of Education, 34 CFR Part 15
Department of Energy, 10 CFR Part 1039
Environmental Protection Agency, 40 CFR Part 4
Federal Emergency Management Agency, 44 CFR Part 25
General Services Administration, 41 CFR Part 105-51
Department of Health and Human Services, 45 CFR Part 15
Department of Housing and Urban Development, 24 CFR Part 42
Department of the Interior, 41 CFR Part 114-50
Department of Justice, 41 CFR Part 128-18
Department of Labor, 29 CFR Part 12
National Aeronautics and Space Administration, 14 CFR Part 1208
Pennsylvania Avenue Development Corporation, 36 CFR Part 904
Tennessee Valley Authority, 18 CFR Part 1306
Veterans Administration, 38 CFR Part 25

The United States Postal Service will incorporate changes in its full-text regulation at 39 CFR Part 777 to make it consistent with this rule and will publish its final rule on or before April 2, 1989 in the Federal Register.

**Implementation Dates**

This final rule replaces the December 17, 1987 interim final rule that was contained in 49 CFR Part 24. As is discussed further below, this final rule is basically the same as the interim final rule except for the addition of provisions implementing those sections of the 1987 Amendments that were not implemented in the interim final rule. This final rule is the last regulatory step in the implementation of the 1987 Amendments. The preamble to the interim final rule noted that "a final rule will replace this interim final rule prior to the date the 1987 Amendments become mandatory".

The rescission and cross reference actions taken by the agencies listed above provided for some differences in the dates when each agency would implement 49 CFR Part 24. (However all the agencies will adopt Part 24 on or before April 2, 1989, the date on which the 1987 Amendments become mandatory). Agency implementation of this final rule is therefore governed by the implementation dates for implementing 49 CFR Part 24 contained in the various agency's December 17, 1987 rescission and cross reference actions. Generally those actions provide that direct Federal projects, undertaken by a Federal agency itself, will comply with Part 24, and that federally assisted projects would comply with Part 24 if the recipient of the Federal financial assistance was able to comply, except that all programs funded by the Department of Housing and Urban Development and the Environmental Protection Agency would not comply with Part 24 until April 2, 1989.

As was the case with the interim final rule, nothing in this rule prohibits the retroactive payment of any additional benefits provided by this rule. Whether to provide any such benefits retroactively depends entirely on an agency's discretion and funding authorities.

**Comments Received in Response to the NPRM**

On Thursday, July 21, 1988 (53 FR 27598) the FHWA issued a NPRM for the purpose of developing a comprehensive, governmentwide single rule for the uniform and consistent implementation of the Uniform Act, as amended.

The major changes made by the 1987 amendments include:

—Expansion of the Uniform Act coverage to include virtually all activities that receive Federal funds, including those undertaken by private entities.

—A moderate increase in benefit levels.

—The establishment of a lead agency to issue a governmentwide single implementing regulation.

—Providing that the computation of certain relocation benefits be done in accordance with the lead agency regulations, rather than prescribing the computation method in the statute.

—Granting States greater flexibility and discretion in implementing the provisions of the Uniform Act.

All members of the public affected by relocation or land acquisition activities undertaken or funded by Federal agencies were encouraged to comment on this NPRM. Comments from interested State and local governments were particularly requested.

The NPRM was a "full text" rule primarily as a convenience to the reader. Comments were specifically requested and desired on changes stemming from the 1987 Amendments. Numerous commenters however took the opportunity to again express an opinion on certain issues that were addressed in the governmentwide common rule or in the governmentwide single interim final rule. As such, comments were exhaustively dealt with in the preambles to those rules (51 FR 7000 and 52 FR 8015) respectively; they are not repeated in this rulemaking.

A description of the regulatory changes proposed for this part were set forth in the NPRM. The only major changes proposed were those required by enactment of the 1987 Amendments. Where no such changes were required, the provisions of the governmentwide common rule, as modified by the December 17, 1987 interim final rule, were generally repeated in the proposed rule. That is, the proposed rule was basically the same as the common interim final rule with the exception of those additional changes that were considered necessary to fully implement the 1987 Amendments. Comments were invited on both those non-discretionary changes that were adopted in the December 17, 1987, interim final rule and the remaining changes proposed in the NPRM.

In furtherance of the statutory objective of securing the views of State and local governments and the public in the promulgation of these regulations, the FHWA conducted three public meetings during the comment period following publication of the proposed rule.

Dates for the meetings were August 17, 1988 in Philadelphia, Pennsylvania, August 22 in Portland, Oregon and August 24 in Chicago, Illinois.

The purpose of these meetings was to receive comments on the proposed rule from interested parties. These comments are entered in FHWA Docket No. 87-22 and have been given full consideration in the development of the final rule.

In response to the July 21, 1988 Federal Register publication, there were a total of 120 comments received at the docket, including those received at the 3 public meetings. These 120 comments represent 101 different organizations or persons: 31 State highway administrations, 4 other State level agencies, 19 local public agencies, 7 private parties, 5 public interest groups, 4 consultants, and 31 associations. Most of the associations represented utilities and were concerned primarily with their new responsibilities as acquiring agencies under the Act or with § 24.307, dealing with discretionary utility relocation payments. Comments received from several organizations involved in the rural electric cooperative industry relating to acquisition activities claimed a significant economic impact on the industry. However, careful analysis of the comments indicates that because of their unfamiliarity with the provisions of the Uniform Act, the

VOL 54 ISS 40 MR 2 1989 UMI

respondents have misunderstood certain of the requirements of the regulation.

Great care and attention have been given to these comments and as most of the apparent questions concern real property acquisition requirements, these comments have been extensively considered and discussed in § 24.101 (b) and (c) of this preamble.

There is no basis for expecting that reasonable compliance with this regulation as required by the 1987 Amendments will impose exceptional additional expenditures on the part of the members of the rural electric cooperative industry. A number of unnecessary administrative requirements found in earlier regulations have been eliminated with a consequent reduction in the burden on affected entities. Other requirements have been reduced or modified to further the goals of efficient and cost effective implementation of the Uniform Act.

More than 1,200 specific comments were received. Many of the comments were directed at provisions in the current governmentwide common rule, for which no changes were proposed in the NPRM, or provisions which are specifically determined by the statute. A large number of comments were general statements, or questions, regarding a section or subsection which required no change in the regulation but which are addressed in the appropriate section discussion following in this preamble.

A number of respondents had questions about operational details which cannot be addressed in the rule itself. FHWA will, however, respond to these and other concerns in forthcoming technical advisories and similar instructive memoranda.

Except as related to a few specific provisions, which are addressed at the appropriate places in the preamble, the vast majority of the public comments dealt more with clarification of interpretation than with substantive matters.

Some commenters suggested different wording or rearranging certain paragraphs within the rule itself. While a certain amount of such editorial refinement has been done when it was necessary for clarity, the FHWA recognizes that the basic format, as well as most of the specific provisions of this rulemaking were articulated in the governmentwide common rule, and acquiring and displacing agencies have become familiar with the existing format. To avoid confusion, we therefore have not made wholesale changes in format or location of the respective provisions in this rule merely for editorial preference.

Some comments suggested changes that are precluded by statute; however, we are cognizant of the concerns expressed in such comments. We are interested in the experiences gained by persons and agencies as they operate within the framework of this regulation, and will consider legislative changes, if necessary.

In addition, an early draft of the NPRM, the NPRM itself, and a draft of this final rule were each circulated to affected Federal agencies for their review and comment. Further, a number of meetings were held with representatives of interested Federal agencies. Many useful comments were provided during this process. We were particularly assisted by the time and expertise provided by HUD.

All comments were reviewed and appropriate changes to the proposed rule were made. A description of the substantive changes from the proposed rule follows. Other changes not affecting content were made for clarity or readability.

**Section-by-Section Analysis**

Subpart A—General

*Section 24.1 Purpose*

Paragraph (c) was proposed to establish efficient and cost effective implementation as one of the primary purposes of this regulation. Two of the three comments on the paragraph commended the inclusion of the paragraph while the other indicated misgivings that, without a definition or explanation of the intent of the paragraph, it may appear to some agencies that cost savings are more important than providing the assistance or protection due an owner or displaced person. This paragraph has been included in the final regulation to emphasize the Federal concern that State and local agencies not be burdened with unnecessary regulatory requirements in the implementation of the Uniform Act. For this reason, the NPRM preamble discussion of this paragraph called attention to the waiver provision of § 24.7 and its use to avoid unnecessary delay or administrative burdens. The waiver provision, in turn, is explicit regarding two major considerations. The first is that the Federal agency, before waiving any requirement, must determine that the waiver does not reduce any assistance or protection provided to an owner or displaced person under this regulation. The second is that any request for a waiver shall be justified on a case-by-case basis. While FHWA does not interpret case-by-case to mean, necessarily, a parcel-by-parcel basis, neither does it encompass the waiver of a requirement on a program-wide scope. The broader the scope of the waiver, the more carefully the Federal agency must weigh its effect on the assistance and protection to be provided an owner or displaced person.

*Section 24.2 Definitions*

*Section 24.2(a) Agency.* There were several comments on this paragraph and as a result the paragraph on lead agency has been removed and is now a separate paragraph (§ 24.2) within the definitions.

Other respondents suggested deletions, expansions, or other changes in the remaining definitions. However, the definitions are taken from the statute and they remain unchanged. As explained in the preamble of the NPRM published in the **Federal Register** July 21, 1988, the term "Agency" is generally used throughout this part to encompass all entities subject to the Uniform Act.

*Section 24.2(d) Comparable replacement dwelling.* Comments were received from five entities concerning the definition of the term "comparable replacement dwelling." The term and its definition originate in the Uniform Act and the 1987 Amendments, as stated in the preamble of the NPRM. The terms "comparable style of living" and "functionally equivalent," taken together, mean that the comparable replacement dwelling selected for computing the replacement housing payment is located in the same, or same type of, residential development as the acquired dwelling, on a site typical in size for that development; is the same type of dwelling, i.e., single-family for single family, apartment for apartment, etc.; and provides the same or similar amenities within the dwelling. For example, if the displaced person entertains large groups frequently and the acquired dwelling is arranged to accommodate this living style, then the replacement comparable house should also be capable of being arranged in this fashion.

This does not, however, require strict and absolute adherence to an exhaustive, detailed, feature-by-feature comparison. A mechanistic approach is not required. Reasonable trade-offs can be made. These should reflect the range of purposes for which the various features of the replacement dwelling may be used. Additional discussion about this subject can be found in the appendix.

*Section 24.2(d)(8)(i).* A recommendation was received to change the word "paid" to "offered" in describing the replacement housing payment provided to a 180-day owner-occupant. We have retained the current wording because the computation of the full price differential, as described in § 24.401(c), is limited to the lesser of the amount needed for purchase of a comparable replacement dwelling or the actual dwelling purchased.

*Section 24.2(d)(8)(ii).* This section has been revised to clarify that the utility costs for replacement rental housing will be based on estimated average monthly utility costs because the actual utility costs will not be available. For additional clarification of the issue of utility costs refer to the discussion in this preamble for § 24.402(b), Rental assistance payment.

Eight comments were received about the use of 30 percent of the gross monthly income for determining the financial means of displaced tenants. In accordance with the discussion in the preamble of the NPRM, FHWA examined this issue carefully before revising § 24.2(d)(8) and § 24.402 Replacement housing payment for 90-day occupants. The use of 30 percent of gross monthly income for all tenants, to meet the statutory requirement that the income of a low-income tenant be considered when computing a rental assistance payment, is still considered to be the most equitable, practical, and appropriate method. It is similar to the method used by many agencies such as State highway agencies prior to the Common Rule. Additional discussion of this issue is to be found in this preamble for § 24.402(b) Rental assistance payment.

*Section 24.2(d)(8)(iii).* Eleven comments were received about the possible eligibility of a less than 90-day occupant for a replacement housing payment under Housing of last resort. Most objected to this eligibility.

Persons who are in occupancy at the time of the initiation of negotiations, but who do not meet the length of occupancy requirements in §§ 24.401 or 24.402, are displaced persons and are entitled to advisory assistance and moving payments. They may, also, be entitled to rental assistance under housing of last resort provisions if comparable rental replacement housing is not available at a rent not greater than 30 percent of the person's gross monthly household income. This section provides financial means standards for a class of displaced persons heretofore called "subsequent occupants." When section 205 was amended in 1987, section 205(c)(3) was revised to require assurances that a person shall not be required to move from a dwelling unless the person has had a reasonable opportunity to relocate to a comparable replacement dwelling. Since an occupant of less than 90 days is a displaced person, the necessary criteria for providing a comparable replacement dwelling was developed. The use of the financial means criteria assure that the displaced person will participate in the cost of a comparable replacement dwelling to the maximum extent of his or her financial capability. In response to another comment, FHWA also addressed the appropriate use of the income of those receiving public assistance. If they receive an amount designated for shelter and utilities, then that is the amount that should be used in determining the displaced person's financial means.

*Section 24.2(e) Contribute materially.* Four comments were received about this definition. Two recommended that all the criteria would have to be present for the business to contribute materially to the income of a displaced person. This is clearly not the case. One preferred that the displacing agency be authorized to develop alternative criteria. This definition has remained as written. FHWA considers that sufficient flexibility has been permitted in the definition of "contribute materially" to accommodate unusual circumstances.

*Section 24.2(f) Decent, safe, and sanitary dwelling.* Two comments were received concerning the addition of "cooling" to the requirement for heating. If cooling is determined to be as critical as heating for a particular State or area, a displacing agency may, in a uniform manner, require that an adequate cooling system be provided in a comparable replacement dwelling.

*Section 24.2(g)(2)(iv) Persons not displaced.* The NPRM specifically requested comments on § 24.2(g)(2)(iv) as to whether certain tenants who are affected by HUD funded rehabilitation activities should be considered "displaced persons." Such tenants are those who are not required to move permanently because of the federally funded physical alteration of their dwelling units, or a change in the unit's ownership, but whose rents are increased following completion of the rehabilitation activities, resulting in the tenants moving elsewhere. The NPRM proposed that such tenants would not be included in the definition of "displaced person" if the other conditions included in § 24.2(g)(2)(iv) were satisfied. These conditions included the opportunity to lease and occupy another dwelling unit in the same building or complex (without regard to the amount of rent charged) and the payment of any temporary relocation costs.

Twenty-two comments were received on this subject. Seven recommended that these tenants be covered. Eight recommended the addition of a further condition mentioned in the NPRM, to provide that, so long as the tenant is offered an opportunity to rent a decent, safe, and sanitary dwelling for the same amount as the tenant paid before the rehabilitation project, or 30 percent of the household's gross income, whichever is greater, such tenant would not be considered a displaced person. Two commenters recommended retaining the language in the NPRM. Three commenters generally opposed considering such tenants as displaced persons. Finally, two comments concerned technical matters.

HUD recommended that this section be deleted from the regulation, but suggested that it could be covered in HUD's various program regulations so that coverage could be tailored to each affected HUD program. HUD continues to believe that these tenants are not covered by the Uniform Act because the rental increase that prompts their move is, in HUD's view, not a direct result of rehabilitation. However, HUD has indicated its willingness and desire to treat the financial hardship faced by such persons on a program-by-program basis, and to deal specifically with this issue in developing new regulations implementing its several programs assisting residential rehabilitation.

Since this issue affects only HUD funded activities, we believe that HUD's views should be given great weight. Accordingly, this section has been revised to include language similar to that contained in § ____2(f)(2)(iii) of the common governmentwide rule. This would not preclude HUD from providing assistance to such persons in their various program regulations.

*Section 24.2(g)(2)(viii).* At the request of one Federal agency, we have changed the term "sells" to "conveys" in § 24.2(g)(2)(viii). Occasionally, Federal agencies acquire land through exchanges or other agreements that are not technically "sales."

*Section 24.2(k) Initiation of negotiations.* Several respondents commented on this section. Since it is not practical to try to identify what specifically constitutes the initiation of negotiations for each and every Federal, or federally assisted program, the definition must be somewhat generic. Nonetheless, the intent and purpose is reasonably clear. The prefatory paragraph addresses those situations in which specific Federal program regulations define the meaning of initiation of negotiations for that

VOL 54 ISS 40 MR 2 1989 UMI

program. For the bulk of the acquisition on Federal, or federally assisted programs, projects, or activities, the proposed definition is sufficient. We have added a definition of Notice of intent to acquire or notice of eligibility for relocation assistance, at § 24.2(o), which should help to clarify the meaning of initiation of negotiations and its relationship to entitlements under the Uniform Act. The two controlling points in this set of circumstances are the action or actions of the agency and the action of the displaced person. There must be a clear, legitimate and reasonable causal connection between the two. For example, a tenant moving on the basis of having learned his landlord had applied for a rehabilitation loan would not establish the tenant's eligibility for benefits.

*Section 24.2(l) Lead agency.* The definition of "lead agency" was inserted at this point in the definitions, and the following preamble discussion refers to the new section numbers for the definition in question.

*Section 24.2(n) Nonprofit organization.* The definition was revised to recognize that a non-profit organization must, in addition to having tax-exempt status under the Internal Revenue Code, be appropriately incorporated under the laws of a State as a non-profit organization.

*Section 24.2(o) Notice of intent to acquire or notice of eligibility for relocation assistance.* This added definition was discussed under § 24.2(k). The purpose of a notice of this nature is to clearly establish a displaced person's eligibility for relocation benefits. However, it should be understood that the absence of such a notice does not deprive the person of eligibility for relocation benefits. The Federal funding agency, within its own program or project requirements, should develop a procedure for the timely delivery of such notices to persons to be displaced, including those affected by activities undertaken prior to the commitment of Federal financial assistance to the activity.

*Section 24.2(p) Programs or projects.* In response to comments from two Federal agencies the definition of "project" has been revised. Because of the multiplicity of Federal and federally assisted programs and projects, a single definition must necessarily be extremely general. Each Federal agency will continue to have responsibility for identifying its programs and projects that are covered by the Uniform Act.

*Section 24.2(t) Small business.* A number of respondents commented on the definition of "small business." Specific comment on the 500 employee threshold was solicited and the responses ranged from one recommending a change to a dollar volume criterion; two recommending 20 employees; three recommending 50 employees; four recommending 100 employees; one recommending 250; one respondent recommended the threshold be eliminated and the payment be available to any and all businesses; two indicated concern, but had no threshold number; and ten indicated agreement with the 500 employee threshold. FHWA's use of a 500 employee threshold for a small business is in accordance with the Small Business Administration's current definition of small businesses. Since the purpose of the definition is to facilitate the application of the small business criterion to the eligibility requirements for business re-establishment payments, the definition remains unchanged except for the addition of the requirement that there must be at least one employee at the affected site.

*Section 24.2(y) Unlawful occupancy.* The definition of "unlawful occupancy" has been changed slightly to clarify its applicability. One commenter mentioned that local custom, type of tenancy and type of facility may dictate different practices in terms of dealing with unlawful occupants. This has been addressed in the modified language. The main point of the other substantive comments received on this definition actually dealt with the relationship of this provision to § 24.206, Eviction for cause. As these two provisions deal with basic eligibility issues, displacing agencies should be especially aware of the interrelationship. In response to comments, changes have been made in the eviction for cause provision which is discussed below at § 24.206. While the intent of this provision is to generally proscribe certain types of occupants, such as squatters, from eligibility for relocation payments, displacing agencies are permitted some discretion where specific circumstances may warrant a finding that the occupancy is lawful.

*Section 24.2(z) Utility costs.* There were eight comments on this paragraph, five recommended the addition of the cost of trash removal to utility costs. Due to the wide variance in local practices for trash removal ranging from "haul your own" to free government services, FHWA has not modified the definition of utility costs. All costs now included are generally furnished by public agencies.

*Section 24.4 Assurances, monitoring and corrective action*

*Section 24.4(a) Assurances.* Six comments were received on this section. One comment about the procedures for monitoring local public agencies conducting highway projects is more appropriately considered under the FHWA's program guidance. Two commenters were concerned about the effect of the regulatory language on their current procedures and practices. One agency also asked that the requirement for a "specific reference to any State law which the Agency believes provides an exception to section 301 or 302 of the Uniform Act" be deleted and, in its place, the lead agency request each State Attorney General to provide an opinion as to exceptions permissible under State law. This would, then, be provided to each State agency; presumably by the lead agency.

We believe the section on Assurances reflects the intent of sections 210 and 305 of the Uniform Act; provides reasonable uniformity for all Federal agencies; and should not impose any significant or time-consuming burden on those agencies with respect to the approval of a State agency's assurances. Neither the Uniform Act, nor this regulation, dictates the length (sentence, paragraph, or page) of a State agency's assurances. The Uniform Act requires that assurances be "satisfactory" and this regulation requires that assurances be "appropriate," and in accordance with sections 210 and 305, for displacing and acquiring agencies respectively. The Federal funding agency determines that the assurances meet these requirements.

Since it is likely that some State agencies may operate under statutes which could provide them with exceptions not available to other State agencies, we believe it necessary for the individual State agencies, on their own behalf, to identify any State law which provides them with an exception to section 301 or 302 of the Uniform Act.

One commenter may have misunderstood the relationship between the assurances and Subpart C, Certification, as well as the nature of the assurances. The assurances should not be viewed as an alternative to certification. If anything, it is the other way around and, even then, the certification must address the requirements of the Uniform Act covered by the assurances if the certifying State agency intends to assume those responsibilities. The assurances are, therefore, fundamental and it is anticipated that most State agencies will initially provide

assurances to ensure compliance with the Uniform Act rather than seek approval of a certification application. A State agency must provide these assurances, or obtain a certification, as set forth in both the Act and regulation, as a condition of receiving Federal financial assistance.

However, in response to a concern of the Department of Agriculture, agencies who acquire under the procedures for voluntary transactions, or persons without the power of eminent domain, will not be required to certify under section 305 of the Uniform Act. Any agency that displaces persons will have to provide assurances or be certified for compliance with section 210 of the Act.

The purpose for providing exceptions to the real property acquisition procedures in § 24.101(a) is to make it clear that not all acquisitions are subject to the requirements of Subpart B of this regulation. The section is intended to describe circumstances which would exclude specific acquisitions from the application of the regulation; it is not intended to provide the basis for the exclusion of an entire agency program.

*Section 24.5 Manner of Notice*

Two comments were received on this section, which is unchanged from previous requirements in both the Common and the Interim Final Rules. One comment approved of the requirement and the other comment suggested that the notice to the owner of the Agency's interest in acquiring property described in § 24.102(b) also be personally served or sent by certified or registered first class mail. No change has been made.

*Section 24.6 Administration of Jointly-funded Projects.*

Two comments were received on this section, which is essentially unchanged from previous requirements, except for the addition of the statutory responsibility of the lead agency to designate a cognizant agency in the absence of agreement between Federal agencies. Neither comment addressed this change and no further change has been made.

*Section 24.7 Federal Agency Waiver of Regulations*

Two comments were received which were specifically related to this section. One noted approval of the provisions as written, the second asked for some examples of a proper justification, or some basis upon which to make a decision. This section has already been discussed in general in connection with comments on § 24.1. Because of the great variety of situations which may make seeking a waiver advisable, we do not believe it practical to provide examples. Examples have a tendency to be both limiting and, conversely, to serve as unreliable justifications or precedents for expansive interpretations.

The primary concern is that the waiver of a non-statutory requirement in the regulation does not reduce *any* assistance or protection provided to an owner or displaced person under this part. There is little doubt that requirements imposed by the Uniform Act may, necessarily, create some delay and administrative burden. Therefore, it would be inappropriate to grant a waiver based on the general proposition of delay and administrative burden. The Waiver proposal must be specific and it must protect the rights of owners and displaced persons and not be designed to serve some convenience of the requesting agency.

The proper implementation of this provision of the regulation requires the exercise of good judgement, with proper concern for displaced persons.

*Section 24.8 Compliance with Other Laws and Regulations*

Two comments were received on this section. One said the list of authorities should include a statute which was already included. The second comment suggested the inclusion of Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights, and this has been done.

This section was also revised to emphasize that there may be other laws and regulations to be complied within implementing this regulation and the list provided is not necessarily all inclusive.

*Section 24.9 Recordkeeping and reports*

*Section 24.9(a) Records.* Four comments were received on this section. One appreciated the provision for confidentiality of records. Another asked for the "established requirements" for "adequate records." The adequacy of an agency's records is determined by the ability of those records to demonstrate compliance with this regulation regarding the agency's acquisition and displacement activities. Two comments were concerned with the 3-year retention period for records. One suggested an extension to 5 years, the other suggested a period of 3 years after the project is completed. There is nothing to prevent an Agency from retaining records for a period longer than 3 years after final payment to a property owner or displaced person. FHWA has amended the regulation to require retention of records for 3 years or in accordance with applicable regulations of the federal funding agency.

*Section 24.9(c) Reports.* Special consideration and comment was requested on the format and timing of this report. Four comments were favorable to both the format and timing of the report. One comment agreed with the format, but claimed the information was needed on an annual basis. Two comments approved of the timing, but wanted the format changed. The final respondent wanted both the timing and the format altered. With the exception of one suggested format change, to lump all non-residential displacements together, the proposed changes are clearly related to the specific program requirements of the respondents. As such, it would be inappropriate to address these concerns with revisions to a report intended to serve, with as little burden as possible, as source material for periodic reports to the Congress on the principal activities conducted under the Uniform Act. The report format and timing remain unchanged.

*Section 24.10 Appeals*

*Section 24.10(b) Actions which may be appealed.* Several comments were received on this section. The principal concern was that the appeal process seemed to extend to the question of just compensation. There are well established procedures in place in every State, and in the Federal government, to handle disagreements involving just compensation. These procedures typically begin with the offer of just compensation and conclude, where necessary, with litigation.

What is appealable is found in the Uniform Act and the regulation where they refer to the aggrieved person's "application." This refers to the application for the benefits of the Uniform Act. The intent of the Act and the regulation is to require that there be a procedure for appeals concerning the benefits or eligibility conferred by the Uniform Act. This provides an administrative remedy for persons aggrieved by an agency determination as to his or her benefits or eligibility. Normally this procedure would have to be completed before such person could seek judicial review.

*Section 24.10(c) Time limit for initiating appeal.* Two commenters suggested extending the time limit for initiating an appeal. The responsibility for setting the time limit rests with the Agency subject only to the constraint that it not be less than 60 days after the person receives written notification of

VOL 54 ISS 40 MR 2 1989 UMI

the Agency's determination regarding the person's application or claim.

*Section 24.10(h) Agency official to review appeal.* Several comments were received about agency appeal processes, the levels of review, and the official conducting the review, whether from the agency or another appropriate hearing officer.

The appeal process is an entirely internal process of an agency. The decisions by the agency about the process must only conform to these regulations and whatever other administrative rules which the agency must follow. However, as stated in the rule, agencies must advise the person of his or her right to seek judicial review after the administrative hearing procedure is exhausted.

Having considered the comments, FHWA has elected to retain § 24.10 as written.

Subpart B—Real Property Acquisition

*Section 24.101 Applicability of Acquisition Requirements*

*Section 24.101(a).* There were a large number of comments on this section which addresses the applicability of Subpart B and Title III of the Uniform Act. Most of the comments expressed a concern with limited scope of application, and several requested that the voluntary transaction criteria found in Appendix A of the December 17, 1987 interim final rule be included.

FHWA has substantially revised this section based on the comments. Voluntary transaction criteria have been included, and a provision has been added exempting from coverage certain real property transactions between cooperatives and their members. The presence of Federal financial assistance is the basic determinant for applicability, with exceptions provided for those acquisitions listed in § 24.101(a)(1)–(4).

Eminent domain authority is not a determining factor by itself, although any acquisition made under the threat of eminent domain is clearly subject to Subpart B requirements because such an acquisition cannot be a voluntary transaction.

Essential to the voluntary transaction process is the requirement that the owner must be informed in writing that the property will not be acquired unless amicable agreement can be reached. However, even though an acquisition may be excluded as a voluntary transaction, agencies may choose to follow the Subpart B process.

*Section 24.101 (b) and (c).* Certain clarifications have been made in these sections. The change in § 24.101(c), federally-assisted projects, is applicability "to the *greatest* extent practicable under State law" (emphasis supplied), which is the same wording as that found in section 305(a) of the Uniform Act. FHWA interprets this to mean an agency must comply if compliance is legally possible under State law. This should be taken into account in an agency's assurances pursuant to § 24.4(a).

*Utility companies as acquiring agencies.*—When the Congress amended the Uniform Act, it changed the definition of "State agency" to include "any person who has the authority to acquire property by eminent domain under State law." Utility companies are the most common example of non-governmental entities which are granted eminent domain authority. The effect of this change was, for the first time, to bring utility companies under Uniform Act coverage for certain of their projects.

Sixteen comments were submitted by or on behalf of utility companies, representing the views and concerns of many hundreds of individual entities through their associations, cooperatives, and law firms. Almost all of these comments concern the possible impact of Subpart B of these regulations upon rural electric cooperatives that may receive Federal financial assistance from the Rural Electrification Administration (REA) in the Department of Agriculture (USDA).

This section of the preamble is devoted to the comments and concerns of those entities. FHWA believes that compliance with the Uniform Act and these regulations will not be as burdensome as some of the commenters perceive it to be. In addition, as discussed further below, one suggestion, exempting from coverage certain transactions between cooperatives and their members, has been adopted.

Following are the substantive issues raised in the comments, with an FHWA reply.

1. The rule should be amended so it would not apply to electric cooperatives.

*Reply:* FHWA does not have authority to exempt any entity or group of entities from compliance. However, as described in some detail later, the regulations intentionally provide much latitude and discretion in how a particular objective may be accomplished.

2. It would appear that all of our projects and acquisitions are covered by the regulation.

*Reply:* There are certain conditions that must be present before a utility company must comply with Subpart B requirements. Most importantly, there must be Federal financial assistance as defined at § 24.2(j). If Federal involvement is solely the guarantee of a loan from non-Federal sources, for example, the Uniform Act is not applicable.

If an individual acquisition qualifies as a voluntary transaction under § 24.101(a)(1), Subpart B requirements do not apply. This may be important for non-site specific acquisitions.

It was stated in a comment that a condition of membership in a cooperative may include an obligation to contribute power line rights-of-way. A provision has been added in § 24.101(a)(3) to provide that Subpart B requirements do not apply if the contribution of real property to a cooperative is made by a member to meet the requirements of membership agreements, contracts or bylaws. FHWA believes that such cases, where members of cooperatives have agreed to provide real property to the cooperative as necessary to advance the common interest of the members, are similar to voluntary transactions rather than to normal Federal or federally funded acquisition.

3. This regulation appears to replace the State eminent domain law under which we operate.

*Reply:* Both section 305 of the Uniform Act and § 24.101(c) of this part make it clear that the real property acquisition policies in Title III of the Act and Subpart B of this part are applicable "to the greatest extent practicable under State law". This means that while compliance is required if it is not prohibited by State law, these provisions do not supercede or overrule any State law requirements. Accordingly, utility companies must continue to comply with the requirements of State eminent domain law. Section 24.4(a) of this part addresses the assurances of compliance that must be submitted (generally a one-time action) to the Federal agency providing financial assistance. Section 24.101(c) addresses the matter of exceptions to Subpart B provisions because of provisions of State law.

A utility company may wish to contact the highway agency in its State for assistance in preparing its assurances in those situations where the same State eminent domain law applies to both the highway agency and the utility company. The State highway agency should know whether the assurances of compliance need to be qualified because of State law.

4. We understand §§ 24.102(c)(2) and 24.103(a) to require an appraisal report containing all of the information listed in § 24.103(a) when the property value exceeds $2,500.

*Reply:* That is not the intent of these sections. Under the appraisal waiver provisions of § 24.102(c)(2), the utility company has the option of not making an appraisal if the value is estimated to be less than $2,500, and the valuation problem is simple and straight-forward. See the preamble discussion of that section for further information.

Under the appraisal standards in § 24.103(a), the utility company essentially determines its own appraisal documentation standards and policies, particularly with respect to acquisitions which do not require a detailed appraisal. The intent of this provision is to match the extent of the analysis and documentation to the complexity of the appraisal problem.

In difficult, complex valuation situations, § 24.103(a) requires preparation of a "detailed" appraisal, and specifies the minimum content of such appraisals. The minimum content specifications apply only to detailed appraisal reports. Several commenters missed this point.

Finally, there is no necessary connection between the $2,500 appraisal waiver ceiling, and the need to prepare a detailed appraisal report. The decision on when to secure a detailed appraisal lies primarily with the utility company, based on its assessment of the situation.

5. The regulation appears to require that we contract for the services of independent appraisers, even though we have well qualified appraisers on our staff.

*Reply:* This is incorrect. The use of staff or outside personnel for appraisal work is entirely at the discretion of the utility company. The only policy which addresses this issue is § 24.103(d), which essentially states the appraiser must be qualified to perform the work.

6. The regulation appears to require that we give the owner a copy of the appraisal, which will hinder negotiations.

*Reply:* The regulation does not require that the owner be given a copy of the appraisal. In some cases this is a matter of State law, but in the typical situation it is a negotiation policy decision at the discretion of the Agency.

In § 24.102(e), the owner is required to be given a written offer and summary statement which, in very brief terms, amounts to a description of what the offer is for. A utility company may wish to contact the State highway agency and obtain a copy of its summary statement form or format for use as a guide.

7. These regulations are not appropriate for use in acquiring substation sites. Generally there are many alternative locations available, and one of the owners will usually be happy to sell a satisfactory site.

*Reply:* It was this kind of situation FHWA contemplated when it developed the voluntary transaction policy and criteria found at § 24.101(a)(1). If an acquisition meets the criteria, Subpart B requirements do not apply.

8. Section 24.102(j) regarding a deposit with the court is in conflict with our State law on various points. State law specifies a different place for the deposit, and is likewise specific on how the amount of the deposit is to be determined.

*Reply:* The provision comes from section 301(4) of the Uniform Act, and, as noted above, is applicable to the greatest extent practicable under State law on federally assisted projects. If State law prescribes a different process there is no conflict because State eminent domain law prevails. See also § 24.4(a) regarding assurances.

9. Just compensation in our State is based on the before and after rule, rather than the take plus damage rule. If we were to appraise damages separately, as seems to be necessary under § 24.103(a)(5), the appraisal would not be admissable in court.

*Reply:* The language in section 301(3) of the Uniform Act recognizes the differences in State law on what constitutes just compensation. It was not FHWA intent to force a different appraisal process. This oversight has been corrected by the addition of "where appropriate" to § 24.103(a)(5).

10. The requirement for a review appraisal in § 24.104 should be deleted except for high value situations.

*Reply:* FHWA has not adopted this recommendation because of the importance we place on the appraisal review function.

The comment indicates there may be a misunderstanding. Section 24.104 does not require an appraisal by a reviewer (although the reviewer may choose to do so because of an inadequate appraisal report). Rather, this section is intended to require a review of the appraisal or appraisals on a property.

The review is an essential part of the process of establishing the amount of the offer of just compensation to be made to the owner. In simplistic terms, the reviewer checks for errors of fact, consistency of value from property to property, and general adequacy of the appraisal as a basis for the offer of just compensation.

Where there is only one appraisal, the reviewer is that critical second party involved in the process of setting the amount of the offer. The association with § 24.4(c) regarding prevention of fraud, waste, and mismanagement is readily apparent.

The reader is directed to the discussion under § 24.104 in Appendix A for further information. As stated there, in low value, uncomplicated situations a signature may suffice as the reviewer's statement.

The foregoing discussion of issues raised in the comments is intended to assist utility companies and others in the implementation of these regulations and to describe how the impact of these regulations on cooperatives will be limited. However, it is possible that there may be other questions that have not been answered. We encourage any further comments relating to the impact of this regulation on rural electric cooperatives. Any further comments on this subject will be considered and, if warranted the regulation will be amended and/or the discussion in the preamble will be supplemented.

Most, if not all, Federal financial assistance for utility companies comes through the REA of the USDA. FHWA intends to work closely with Departmental officials in effecting smooth implementation.

*Section 24.102 Basic Acquisition Policies*

*Section 24.102(c)(2).* This section addresses waiver of appraisals. One comment said agencies should have the latitude to decide not to obtain an appraisal where property may be donated without first obtaining a release from the owner.

The Agency has that discretion for the under $2,500 value category. A prior release is not necessary. However, the FHWA does not agree with extending that same policy to all donation situations. An owner may want an appraisal and an offer before making a decision to donate, and it is only fair to make the owner aware of this option.

On the matter of establishing the dollar threshold at $2,500, four stated it was too high, seven said it was too low, and ten stated $2,500 was acceptable. FHWA has decided to retain the proposed threshold.

A commenter raised the question of a review where no appraisal has been made. Other comments questioned how an Agency is going to know if an acquisition is worth less than $2,500 in the absence of an appraisal.

Section 24.102(c)(2) contemplates that an informed judgment will be made by a qualified person. While it is not a regulatory requirement, prudence suggests the value calculation be in writing, and be retained.

VOL 54 ISS 40 MR 2 1989 UMI

On the matter of a review: Under § 24.102(d), the Agency is required to make a written offer. Offer letters are generally signed by someone at the management level. It is general FHWA policy to have not less than two people involved in setting the amount of an offer of just compensation. This process would constitute a review where no appraisal is made. Precisely how such matters will be handled is within Agency discretion.

A few comments objected to waiving an appraisal for any reason. An Agency has no obligation to waive the appraisal of an acquisition if it prefers not to.

*Section 24.103 Criteria for Appraisals*

*Section 24.103(a).* One Agency described how it intended to integrate the appraisal waiver provision in § 24.102(c)(2) with this section on appraisal standards. Many other variations are also possible, but the comment is summarized here for purposes of illustration. In brief, negotiators will be instructed to clearly explain to the owner the right to have an appraisal made and in no way pressure the owner to sign a waiver; acquisitions valued between $500 and $2,500 are to be supported by sales in the project area, and will be approved by a review appraiser prior to negotiations. As described, this Agency intends to do more than the minimum: An appraisal would always be a property owner option; some value documentation will be a requirement; and a reviewer's approval is necessary in certain circumstances. This description is intended to illustrate the latitude an agency has in implementing the provisions of this Subpart.

*Section 24.103(a)(2).* One comment recommended the requirement for a 5-year sales history be cut back to two or three years. This recommendation was not adopted, primarily because it applies only when a detailed appraisal is necessary. When a detailed appraisal is not necessary, the agency may set a different standard.

*Section 24.103(a)(3).* A comment recommended that a statement be added to the effect that the appraiser must explain the absence of more recent sales data when the sales used are over 6 months old. This is viewed as a good business practice on the part of the appraiser, but not as an essential regulatory requirement.

*Section 24.103(e).* Three comments recommended an increase in the dollar threshold from $2,500 to $5,000 where the same person can both appraise and negotiate. The FHWA has not adopted this recommendation because support for the increase is not widespread.

*Section 24.104 Review of appraisals*

*Section 24.104(b).* In response to a comment, a minor editorial clarification has been made to this section regarding the role of the reviewing appraiser in establishment of the Agency's offer of just compensation.

*Section 24.105 Acquisition of Tenant-owned Improvements*

Four comments expressed a concern with the matter of adequately protecting the rights of a tenant owner of improvements. One of these comments recommended specific reference to tenant owners be made at many points within Subpart B.

FHWA has made no change because it believes tenant owner interests are adequately protected. The language of Subpart B is based on the premise that if a tenant can demonstrate an ownership interest in real property, that person is an owner of real property to be acquired for purposes of this regulation, and is to be treated as such.

*Section 24.105(c).* Five comments stated that contributory value or salvage value measures of compensation to a tenant-owner are not fair and equitable when the appraiser finds that all of the value is in the land, with no value attributable to the improvement. As a consequence, they recommended a "value in place" measure of compensation be added to this section.

FHWA appreciates the difficulty this circumstance presents, but the provisions of Section 302 of the Uniform Act do not permit it to accommodate the recommendation. Section 302 specifies contributory value, or value for removal (which has been implemented as salvage value) as the measures of compensation.

However, there is some latitude available under § 24.105(e). Payment under "other applicable law" could include provisions of State law and/or relocation assistance benefits. Also, contributory value can be viewed on a temporary basis in the valuation estimate process. FHWA believes the basic objective is payment of an amount of compensation which is just, reasonable, and fair.

Two comments were received from representatives of the outdoor advertising industry. Both comments focused on the way advertising signs are treated by §§ 24.2(q), 24.105, and 24.303(e) of the regulation. They suggested that, pursuant to section 302 of the Uniform Act, all advertising signs covered by the Uniform Act should be acquired as tenant owned improvements, and that the value of a sign in place before removal should be used in determining the owner's compensation. Neither of these suggestions have been adopted.

Specific language concerning advertising signs in section 101(7)(D) of the Uniform Act makes it clear that some, if not all, signowners should be entitled to moving and related expenses under section 202 of the Uniform Act, rather than to compensation for a sign's acquisition under section 302. Furthermore, that language in section 101(7)(D) was amended in the 1987 Amendments to broaden the benefits available to signowners under section 202. For many years, FHWA has reconciled the specific language in section 101(7)(D) of the Uniform Act and the more general language concerning tenant improvements in section 302 of the Act by providing that an advertising sign considered to be personal property under State law should receive the relocation benefits provided by section 202, and if considered to be real property, it should be acquired in accordance with section 302. FHWA believes this is the most reasonable interpretation of the provisions of the Uniform Act, and it continues to be reflected in this final rule.

When a sign is acquired under section 302, subsection 302(b)(1) provides that its owner should receive the greater of its contributory value to the real property or its "fair market value * * * for removal from the real property."

FHWA interprets this phrase to mean that removal of the sign must be taken into consideration in determining "fair market value for removal," and believes this is done in §§ 24.105 and 24.2(q) of the regulation.

Subpart C—General Relocation Requirements

*Section 24.203 Relocation Notices*

*Section 24.203(a).* A comment was received that the term "as soon as feasible" was not sufficiently specific. FHWA considers this term to mean "as soon as practical" and does not believe that any further elaboration is necessary. This comment and several other similar comments addressed to this section may have merit in individual situations, but do not necessitate changes in the regulations. Displacing agencies may wish to clarify particular matters that are of concern to them in their operating instructions.

*Section 24.203(b).* In response to one comment, a definition of "Notice of intent to acquire or notice of relocation eligibility" has been added at § 24.2(o).

*Section 24.205 Relocation Planning, Advisory Services, and Coordination*

*Section 24.205(a) Relocation planning.* There were 13 comments concerning relocation planning. Most were in favor of the planning concept, but were concerned about how relocation plans could hinder project development. The relocation planning required by this section should be a tool to assist in the orderly development of a project and should be considered in this light by both the displacing agency and the funding agency. FHWA believes that most displacing agencies are well aware of the program or project benefits which can be derived through early and sound relocation planning and many agencies currently use comprehensive planning techniques in project development. We do not view relocation planning as a complicated, time consuming activity. We see relocation planning as a process which provides meaningful information to program and project decision makers. It does not need to result in a detailed document containing unnecessary data and needless problem solving. Instead, it should be a process which is scoped to the complexity and nature of anticipated program or project relocation activity and should not require a burdensome commitment of Agency resources. Language emphasizing this has been added to this section. In response to several comments, there is no requirement that planning documents be submitted for approval to the funding agency at any stage of a project or program. Planning is the responsibility of the displacing agency.

*Section 24.205(c) Relocation assistance advisory services.* Several comments were received concerning relocation assistance advisory services. Three comments objected to the requirement to provide transportation to inspect housing in § 24.205(c)(2)(ii)(D). This provision is not new and has been a part of the common rule for implementation of the Uniform Act since that rule was first promulgated by DOT on March 5, 1985 (50 FR 8955 (1985)). It is the obligation of the displacing agency to assure that both owners and tenants are able to inspect the housing to which they are referred. There is no evidence to suggest that this service has been abused by displaced persons.

*Section 24.205(c)(2)(iii).* At the suggestion of one commenter, the words "comparable and" have been removed from this section. The emphasis is on the identification of suitable property locations for business and farm operations.

*Section 24.205(c)(2)(vi).* The provision of advisory services to a person who initially occupies property after it is acquired by the agency is required by the statute. Therefore, it cannot be deleted as recommended by several commenters. These persons are not displaced persons, but are eligible for advisory services.

*Section 24.206 Eviction for Cause*

In response to comments, this provision has been modified in several respects. HUD, in its program regulations dealing with displacements caused by other than State-agency acquisition, has long recognized eviction for cause as a basis for denying eligibility for relocation benefits. Now that the Uniform Act and these implementing regulations apply to this broader array of displacement activities, it is necessary that valid evictions continue to be recognized as a factor that can extinguish potential rights to relocation payments.

At the same time, it is important that otherwise entitled persons not be denied relocation payments by an eviction undertaken for the purpose of evading an obligation to make relocation assistance available, or for minor violations of a lease.

Accordingly, this final rule retains the major thrust of the eviction for cause section, which has been a part of the governmentwide common rule since 1986, that persons lawfully occupying property at the time of the initiation of negotiations will continue to have a presumptive entitlement to relocation payments.

However, modifications have been included to clarify that payments may be denied in certain circumstances. Thus, a person who is evicted for cause prior to the initiation of negotiations may be denied payment even if that person vacates the premises after the initiation of negotiations. In addition, persons who seriously or repeatedly violate material terms of the lease or occupancy agreement may be evicted even if the eviction proceeding is begun after the initiation of negotiations.

In either case, the Agency must assure itself that the eviction action is not undertaken to evade the protections of the Uniform Act. Such eviction for cause circumstances should arise only infrequently and Federal funding agencies will be expected to ensure that this provision is not misused.

*Section 24.207 General Requirements—Claims for Relocation Payments*

*Section 24.207 (f)* Deductions from relocation payments. This section has remained the same as was published as part of the common rule in the March 5, 1985 Federal Register. Section 24.207 continues to allow agencies to deduct a person's unpaid rent owed to the Agency from the person's relocation payment in cases where it will not prevent the person from obtaining a comparable replacement dwelling. Since the relocation payment is not to be considered income (§ 24.209) and is provided for the particular purpose of obtaining replacement housing for the displaced person, it cannot be released to other creditors without assurances that comparable decent, safe, and sanitary housing will be available to the displaced person.

Subpart D—Payments for Moving and Related Expenses

In addition to comments on proposed rule changes, a number of comments received on this subpart were requests for clarification. Ordinarily, such clarification would be provided by technical advisory guidance. However, to be responsive to the comments, we have summarized the answers to some of these below.

Section 24.306 in the NPRM has been renumbered as § 24.304 and § 24.304 has been renumbered as § 24.306 to provide a better grouping of topics. The numbers used below are those used in this final rule.

*Section 24.301 Payment for Actual Reasonable Moving and Related Expenses—Residential Moves*

Questions were received about payment for the storage of personal property covered in § 24.301(d). As with all other moving expenses, the Agency determines what storage costs are reasonable and necessary for a move to take place. If the Agency determines storage to be necessary, the costs of moving the personal property to and from storage would also be eligible for payment. Boarding of animals is not considered to be storage.

*Section 24.302 Fixed Payment for Moving Expenses— Residential Moves*

There were numerous comments concerning the $50 fixed payment for moving expenses provided in § 24.302. FHWA has clarified the language of this exception to apply only to persons with minimal personal possessions who are in occupancy of a dormitory-style room shared by two or more unrelated persons, or a person whose residential move is performed by an agency at no expense to the person. This language is also reflected in the moving expense schedule which is published by FHWA elsewhere in this Part II of today's Federal Register.

VOL 54 ISS 40 MR 2 1989 UMI

*Section 24.303 Payment for Actual Reasonable Moving and Related Expenses—Nonresidential Moves*

*Sections 24.303(a)(3) and 24.304(a)(4).* Four comments asked for clarification of the difference in treatment of utilities in these two sections. The expenses for providing utilities under § 24.303(a)(3) are those costs incurred to attach relocated personal property to utility service already provided on-site, such as electrical boxes, gas meters, and water meters. Modifications to the equipment or to the on-site utility service may also be eligible, if necessary. These costs must be necessary to reinstall personal property that has been moved from a displacement site or newly installed at such site and would generally only benefit the relocated business operation. Section 24.304(a)(4) provides for making electrical and other services available to the replacement site. These costs may be necessary to make the real property suitable for the business operation and could generally enhance the value of the real property. Costs under § 24.304(a)(4) are limited by statute to $10,000 for all reestablishment expenses. Costs under § 24.303(a)(3) are limited to what is necessary, without dollar limitation.

*Section 24.303(a)(9).* There were several comments about relettering of signs and replacing stationery made obsolete as a result of a move. This section covers those business items typically used by a business for the purpose of advising its customers and the public of the location of the business. If a displacing agency considers other items appropriate for this category, it may use the waiver procedures in § 24.7 on a case-by-case basis.

*Section 24.303(a)(10).* One commenter suggested that an acquiring agency could become responsible under the requirements of this section for abandoned personal property that could be considered hazardous material. This is not a Uniform Act issue, but an issue typically governed by Federal or State laws governing the proper disposal of hazardous material.

*Section 24.303(a)(13).* Two comments stated that the $1,000 limit on the cost of searching for a replacement location was not adequate for some business and farm operations. The displacing agency may use the waiver procedures in § 24.7 on a case-by-case basis if a displaced business or farm operation has unique requirements or circumstances.

*Section 24.303(c).* Questions were received about self-moves of business or farm operations. This section does not preclude actual cost self-moves supported by records and receipts of the costs incurred. The Agency may use moving costs findings prepared by qualified staff, estimates obtained by the Agency, or if acceptable to the Agency, estimates obtained by the business or farm operator. A single moving cost finding for a low cost or uncomplicated move prepared by qualified staff is a "single bid or estimate" for purposes of this section.

*Section 24.304 Reestablishment Expenses—Nonresidential Moves*

Twenty eight commenters provided comments on this section. While generally in agreement with the list of eligible expenses in § 24.304(a), the majority thought that the dollar limits should be removed from the three categories where limits are imposed. We have elected to retain the dollar limits which serve as cost controls for expenses which we believe to be most vulnerable to abuse. Since it is the Agency's prerogative to determine which reestablishment expenses are reasonable and necessary and since § 24.304(a)(13) allows the Agency to request a waiver from the Federal funding agency within the $10,000 statutory maximum, there is sufficient flexibility provided to the Agency. On the other hand, the stated limits of $5,000 for increased operating costs and $1,500 for exterior signing are considered to be reasonable in most cases, and may assist a business owner in making appropriate decisions about a new business site and the size and type of signing for the new business site. The inclusion of increased costs of operations as an eligible expense in § 24.304(a)(10) was also commented upon. The Uniform Act's legislative history supports the inclusion of these expenses. Since the costs of operation are legitimate reportable business expenses, the income tax records of most businesses should be adequate to provide a record of such costs prior to displacement. The costs at the new location can be established or estimated using such sources as the new leases, utility company projections for utility charges and taxing authority records for tax increases.

*Section 24.304(b)(6).* This section has been deleted. The 1987 Amendments exclude "a person whose sole business at the displacement dwelling is the rental of such property to others . . ." from qualifying for an "in lieu" payment (see § 24.306(a)(4)). This exclusion, however, does not extend to reestablishment expenses.

*Section 24.306 Fixed Payment for Moving Expenses—Nonresidential Moves*

Comments were received from 20 sources on this section. Recommendations were made to pay the fixed payment as an option to a business with no criteria or, conversely, to pay the fixed payment only if the business was discontinued. The additional criteria added in the NPRM were also commented upon. Several wanted to add additional criteria. One commenter wanted different criteria for farm operations than for businesses. A number of comments were received that would make the owners of residential property ineligible for this payment. Others thought that the owners of leased commercial property should also be ineligible.

FHWA has not changed this section. The fixed payment is an alternative to the payments for moving and reestablishing a business, farm, or nonprofit organization. The new criteria are added to either clarify eligibility, correct inequities, or implement new statutory exclusions as explained in the preamble of the NPRM. The displacing agency retains the flexibility to determine the basic eligibility based on the substantial loss of existing patronage criteria and gains criteria that can readily be explained to displaced persons.

There is no requirement now, nor has there ever been such a requirement, that a displaced business must be discontinued to receive this payment. Similarly, this payment has been and continues to be available to otherwise eligible businesses that do discontinue operations. There is also no requirement that a business be without a source of income as suggested by three commenters.

Establishing separate income and payment criteria for farm operations would not be appropriate at this time.

There were several comments concerning the perceived inequity of the ineligibility of owners of rental residential property for a fixed payment while owners of other rental property remained eligible. FHWA has corrected this inequity by, generally, excluding owners of rental property from eligibility for non-residential fixed payment.

*Section 24.306(d) Nonprofit organization.* There were a variety of comments concerning the minimal fixed payment of $2,500 in lieu of actual moving expenses. Most of them favored increasing the payment available to nonprofit organizations. In response, FHWA has revised the payment to nonprofit organizations to range from $1,000 to $20,000 based on criteria similar to businesses, i.e. the average annual revenue for 2 years minus operating expenses. This procedure will be more equitable for nonprofit organizations.

*Section 24.306(e) Average annual net earnings of a business or farm operation.* Several comments were received about the computation of average annual net earnings when business or farm operations suffer a net loss for any year. There are several ways to compute net losses. Some agencies have used "0" if the net earnings result in a net loss. Other agencies use the actual net loss figure. Either method is acceptable if used uniformly by a funding agency.

*Section 24.307 Discretionary Utility Relocation Payments*

A few respondents urged that the reimbursement of extraordinary expenses be made mandatory, while several others indicated the discretion given the displacing agency should be retained. The discretionary language, "the displacing agency may, at its option," has been retained because the 1987 Amendments and the Conference Report accompanying them are quite clear that this payment is intended to be at the discretion, or option, of the displacing agency. It would not be appropriate to make mandatory by regulation that which was left clearly permissive by statute.

*Section 24.307(a)(5).* A number of respondents objected to the language in the NPRM which requires that State or local reimbursement be "permitted by State statute." The principal thrust of the objections was that this language meant that unless there was a specific State statute permitting the payment, no payment could be considered. FHWA agrees that the proposed language could be subject to misinterpretation and have revised the subsection, to provide that reimbursement must be "in accordance with State law." This conforms to the clear intent of Congress, as expressed in the Conference Report that accompanied the 1987 Amendments.

*Section 24.307(b) Extraordinary expenses.* Six comments expressed concern with this section's definition of "extraordinary expenses." Three of the comments recommended changes which would permit certain expenses, even though ordinarily budgeted, to be considered as "not routine or predictable expenses" and, therefore, qualify as "extraordinary expenses." FHWA has not adopted these recommendations. It is the expressed intent of Congress, as found in the Conference Report, that "utilities would continue to pay those ordinary relocation costs within their reasonable contemplation as occupants of local rights-of-way * * *" FHWA believes the language of this section will allow a utility company to present its case for those expenses which it considers to be "not routine or predictable" and not ordinarily budgeted as operating expenses.

Four comments urged removal of the provision which would exclude from extraordinary expenses those expenses which the utility company has explicitly and knowingly agreed to bear as a condition for use of the right-of-way. Again the language of the rule represents the clear intent of Congress as expressed in the Conference Report accompanying the 1987 Amendments.

While we are cognizant of the concerns presented by the public utility industry, we believe this rule clearly expresses the intent of Congress, and, as a consequence, § 24.307(b) is unchanged.

**Subpart E—Replacement housing payments**

*Section 24.401 Replacement Housing Payment for 180-Day Homeowner-Occupants*

*Section 24.401(a)(2).* Several comments were received about the extension of eligibility for a replacement housing payment beyond one year for good cause. In response, the meaning of "for good cause" has been amplified in the appendix.

*Section 24.401(a)(2)(i).* Comments were received about the appropriate "start" date for the one-year eligibility for a replacement housing payment in the case of condemnation. In response FHWA has clarified that the one-year period starts when the full amount of estimated just compensation is deposited in the court. This may be the Agency's proffered amount or a commissioners' award, if appropriate. In either case, the Agency does not need to delay the one-year start date until final adjudication.

*Section 24.401(a)(2)(ii).* This section has been changed to conform with the amendments of section 203(a)(2) of the Uniform Act made by section 408(5) of the 1987 Amendments. Several comments were received about the differences between the criteria for eligibility for 180 day owner-occupants and 90 day owner-occupants and tenants. The change in criteria for 180 day owner-occupants is statutory. There is no requirement that changes be made in criteria for 90 day owner-occupants and tenants. The "date the displaced person moves" is a simpler criterion to use than the "date the displacing agency's obligation under § 24.204 is met" and has been retained where feasible.

*Section 24.401(d).* Thirty-one comments were received concerning the method for computing increased mortgage interest payments. The commenters were about evenly split between preference for the buydown method as presented in the body of the NPRM, and the buydown method presented in the preamble. A few wanted the option of using the former annuity or amortization method if it should prove less expensive for the Agency.

The discussions in favor of the simplified buydown method presented in the preamble emphasized the cost-savings and time-savings to the Agency, and the ability of a displaced person to plan his or her replacement housing purchase knowing the full amount of payments to which such person is entitled. The view of these commenters was that this would not create a windfall because the displaced person still had to acquire a decent, safe, and sanitary replacement dwelling to be eligible; only the financing terms were his or her choice. Several comments were also made that the displaced person could readily understand the concept that an interest rate at less than current market interest rates was an asset and the computed payment was related to this fact.

On the other hand, those comments that favored the language in the body of the NPRM were concerned that a windfall would be created if a person paid cash for the replacement dwelling or assumed an existing mortgage at a lower interest rate than the computed rate. There was also a question of the legality for the preamble alternate, and concern that making the payment available on terms other than those actually used in the purchase of a replacement dwelling would not satisfy the statutory language.

FHWA has elected to retain the procedure in the body of the NPRM. This procedure requires that an estimate of the amount of the payment be provided to the person. Such estimate shall be based on the current prevailing rate for fixed-rate mortgages and subsequent payment based on the actual mortgage terms obtained. This process will require advisory services to the displaced person to enable such person to be prudent in the financing of his or her replacement dwelling.

In response to comments received, FHWA has revised § 24.401(d)(2), by adopting the language in § ____401(d)(3)

VOL 54 ISS 40 MR 2 1989 UMI

of the common governmentwide rule, to provide that the payment shall be based on the remaining term of the mortgage on the displacement dwelling or the actual term of the new mortgage, whichever is less.

Many of the same commenters who preferred this method did not think that their agency could make the increased mortgage interest payments at the time of closing because of their payment procedures or the loan processing procedures of lending institutions. In response, the final rule has been revised to provide that the payments must be made "at or near" the time of closing. However, the implied purpose of the increased mortgage interest costs payment is to reduce the replacement mortgage; therefore this payment must be available to lower the amount of the mortgage in a timely manner, preferably at the time of the closing on the replacement property. This procedure does require close coordination with the closing agent, but is more cost-effective than the amortization method. The agencies who thought they would be most successful using the buy-down procedure were those who used escrow accounts to make funds available to displaced persons.

There were also several comments about home equity loans and the inclusion of these mortgages in the computation of the increased mortgage interest costs payment. Home equity loans are valid mortgage liens on residential real property regardless of how the proceeds from the loans are used. Therefore, they must be included in the computation.

In answer to another comment, the mortgage rate to be used to compute the increased mortgage interest costs payment when the property is secured with an adjustable rate mortgage is the interest rate that is current on the property as of the date of acquisition.

A sample computation of an increased mortgage interest costs payment is included in Appendix A, as requested by a number of commenters. An IBM PC compatible computer program and financial calculator instructions will be made available as technical guidance as soon as feasible.

*Section 24.402 Replacement Housing Payment for 90-Day Occupants*

*Section 24.402(a)(2)(ii)(A).* The change made in § 24.401(a)(2)(i), concerning the deposit of estimated just compensation, is made here also.

*Section 24.402(b) Rental assistance payment.* There were numerous comments about the changes made in this section.

The first issue was the inclusion of the cost of utilities in the computation of the rental assistance payment. The inclusion of utilities has been an ongoing issue since the Publication of the common rule in 1985. Since that time, utility services have been included in the computation of a rental assistance payment if they were included at the displacement dwelling and/or the comparable dwelling as a part of the rent. FHWA recognizes the concerns of the current 14 commenters about the increased administrative burden for securing information and the variables in utility usage due to differing user lifestyles. These concerns can be addressed in various ways. One commenter suggested that a schedule be devised for utility costs with the input of utility companies in the project area that will reflect actual, reasonable costs. Another agency suggested that if true comparables are used for payment determination, the utility costs should also be comparable and their inclusion should not increase the cost of replacement housing. Relocation from a substandard dwelling to a standard dwelling could, in fact, decrease the cost of utilities, especially the cost of heat unless a larger dwelling is used to meet the needs of a family, or if all utilities were not available in the displacement dwelling, as noted by another commenter.

Agencies may establish their own procedures to be used for determining the cost of utilities if the procedures are used uniformly.

FHWA is continuing to include utilities in the monthly base housing computation because utilities are considered to be an integral part of monthly housing costs and historically have been treated as such by several Federal programs including those administered by HUD as a standard practice. The existance of adequate utilities is a primary requirement for a dwelling to be decent, safe, and sanitary.

The 30 percent figure used in § 24.402(b)(2)(ii) to determine base monthly rental is considered a reasonable percentage of income to be applied to rental housing costs under current market and economic conditions, and is consistent with the percentage of income figures currently being used in other subsidized housing and related programs of HUD and other agencies. Several commenters stated that, in their experience, many tenants are now paying 40 percent or more of their incomes for housing costs. Our concern is that the 40 percent payments primarily reflect the lack of affordable rental housing in the current market. We do agree that some tenants voluntarily elect to spend more than 30 percent of their income for housing when more affordable housing is available. However, FHWA believes these lifestyle choices for convenience, prestige or other reasons to be the exceptions, not the rule. Consideration must also be given to the fact that private lending institution requirements set the limit on the monthly cost of housing after purchase of a dwelling at approximately the same level as the 30 percent of income criteria established for tenants.

The inclusion of a person's income in computing a base monthly rent figure was also opposed by several commenters. The biggest concern was a perceived difficulty in the verification of income and an implied reluctance to accept income information from some displaced persons. FHWA believes that accurate information concerning income can be obtained from most persons. If there is obvious evidence that a person has more income than reported, it is the Agency's prerogative to accept the income as reported, to request additional verification of income, including income tax returns, or to inform the person that there is reasonable doubt that the information is accurate. If the income information is not provided or amplified as requested, the Agency may take such action as it deems necessary to obtain income information under a uniform agency-wide or area-wide policy.

*Section 24.402(b)(3) Manner of disbursement.* Eleven comments were received concerning the vesting of the full amount of the rental assistance payment when the displaced tenant receives the first rental assistance payment, either in lump sum or as an installment. Most of the comments took exception to the idea of vesting.

The vesting of the full amount of the rental assistance payment is intended to establish at a definite point in time, the full amount of the payment for the 42 month period after displacement. Vesting eliminates the red-tape requirements of recordkeeping, re-inspection, and recertification of the replacement dwellings, and continued contacts with the displaced person and the person's landlord that would otherwise be necessary. It also eliminates the potential problem of additional project costs as rents are increased or new DSS dwellings need to be found for those who no longer live in standard housing. FHWA understands that the same commenters are concerned about the diversion of lump sum rental assistance payments for non-housing uses, and a subsequent return of

the displaced person to sub-standard housing. One way to effectively provide installment payments, either to the displaced person or to the person and the person's landlord, without continuing agency supervision, is to place the payment in an escrow account that will be disbursed according to a pre-determined schedule. This method could also serve for disbursement of housing of last resort payments, which are also vested. The method of disbursement remains the Agency's discretion.

It should be understood that, under vesting, the only times a rental assistance payment should change are during the one-year period described in § 24.402(a)(2), and then only if tenant elects to up-grade his or her housing to receive the full amount of the original computed rental assistance payment based on a comparable dwelling, or changes his or her status from tenant to owner and therefore becomes eligible for an additional payment (see § 24.403(e)).

*Section 24.402(c) Downpayment assistance payment.* Twenty-one comments were received concerning downpayment assistance. Only 4 of the 21 commenters believed that the amount available for downpayment assistance should be limited to the computed amount of the rental assistance payment for tenants. The majority stated that agencies should make downpayment assistance payments of up to $5,250, with most recommending that the payment be restricted to the amount necessary to obtain conventional loan financing for purchase of a replacement dwelling. The main concern expressed was that allowing each agency to select a procedure for computing the down payment assistance payment did not promote uniformity.

Since the legislation does not give the lead agency the authority to select a particular procedure, but reserves such authority to the displacing agencies, we have elected to retain the existing language. As several commenters suggested, displacing agencies may want to coordinate with other agencies within the State or jurisdiction where they are located to reach a consensus on the procedure to be followed in that State or jurisdiction. FHWA will appreciate being advised of the experience of the various agencies in the implementation of this procedure. If the experience indicates that a change is needed to affect a more uniform implementation, we will seek a legislative change.

Regardless of the procedure selected, a rental assistance payment will have to be initially computed for tenants. If the computed rental assistance payment is zero, then the downpayment assistance is zero unless the agency has elected to make downpayment assistance payments of up to $5,250. If their eligibility is greater than $5,250 for rental assistance, they will be eligible for housing of last resort for rental assistance or downpayment assistance. As is required by statute, eligibility for owners of more than 90 days but less than 180 days for downpayment assistance will be limited to the amount that would have been computed had they been 180 day owners.

*Section 24.403 Additional Rules Governing Replacement Housing Payments*

Several comments were received concerning the requirement in § 24.403(a)(1) that an adjustment be made to the asking price of any dwelling used to compute the replacement housing payment to the extent justified by local market data. This procedure has been a part of the governmentwide common rule since it was first published in March 1985. It requires that adjustments be made in the asking price of comparable dwellings to the extent that the market demonstrates that expected sale prices will be less than the asking prices. A clarification of the use of this procedure has been added to Appendix A.

In § 24.403(a)(2), for clarity and as suggested by several commenters, FHWA has separated the procedures for major exterior attributes and buildable residential lots into two paragraphs.

*Section 24.403(c)(6).* Several comments were received concerning the use of current fair market value for the acquisition price of a previously owned dwelling when it is used as the replacement dwelling. The current fair market value is used because (1) it is the amount that would have been paid if the dwelling were purchased on the current market as a replacement residence, (2) the displaced owner could have acquired any other dwelling as a replacement and (3) the use of the previously owned dwelling is the conversion of an existing asset to replacement housing purposes. This regulation operates the same whether the previously-owned dwelling is mortgaged or unencumbered. In response to one commenter, the cost of an appraisal of the previously owned dwelling is a reimbursable cost if the agency considers an appraisal to be appropriate and necessary.

*Section 24.404 Replacement Housing of Last Resort*

There were 13 comments on replacement housing of last resort. Several concerned the requirement that the use of housing of last resort be justified. Such justification is considered important for good program management and is consistent with the requirement, added by the 1987 Amendments, that any payment provided for housing of last resort that exceeds the maximum amounts provided to tenants and owners by §§ 24.401 and 24.402 must be justified. A slight modification was made to § 24.404(a)(2)(i) at the recommendation of one commenter to clarify that justification for last resort housing assistance may be for an entire project or program area, if appropriate, without additional case-by-case justification. A number of comments were received about the change in status of a displaced person from a tenant to an owner. FHWA has clarified that such a change in status must be with the concurrence of the displaced person. The concurrence of the displaced person should be received prior to the execution of any of the methods of providing for housing of last resort. Several general comments were received about the concept of replacement housing of last resort. Replacement housing of last resort is a legislatively authorized continuation of the replacement housing assistance provided by §§ 24.401 and 24.402 of this part, and provides for comparable replacement housing for displaced persons not adequately provided for under those sections, or who do not meet the eligibility requirements of those sections. Additional flexibility is provided to displacing agencies for the provision of housing of last resort so that housing needs are met for owners and tenants in the most cost-effective, yet equitable way.

Subpart F—Mobile Homes

*Section 24.502 Moving and Related Expenses—Mobile Homes*

Only one comment was received on this subpart. In response, § 24.502(a) has been modified to state more clearly that, even though an owner-occupant whose mobile home is not acquired may receive replacement housing under § 24.503(a)(3), and therefore is not eligible for payment for moving the mobile home, he may be eligible for payment for moving personal property from the mobile home. Also, the commenter thought that all mobile homes should be treated as real

BEST COPY AVAILABLE

VOL 54 ISS 40 MR 2 1989 UMI

property. This may be appropriate in areas where mobile homes are treated as real property under State law or where an agency has the option to consider mobile homes to be either real property or personal property. However, some State laws consider mobile homes to be personal property only, and, therefore, they may not be acquired as realty.

Subpart C—Certification

This subpart implements one of the most significant changes added by the 1987 Amendments. As such, FHWA has a special interest in its implementation and would appreciate receiving further information on its use and effectiveness.

Several respondents commented on Subpart C, however no single comment, or group of comments, was sufficiently persuasive to necessitate a change in the proposed text. However, one comment on § 24.603, Monitoring and corrective action, did draw our attention to the need for a substantive revision of § 24.603(b).

*Section 24.602 Certification Application*

Two commenters recommended that certification applications be made directly from the head of the State agency to the Federal agency providing financial assistance, rather than through the State governor, or the governor's designee. FHWA does not adopt this recommendation. There is a definite need for a focal point within each State for the receipt and screening of certification applications. Consistent with the principles of federalism, the Office of the Governor, as the Chief Executive Officer in any State, is the logical starting point for this process since the governor normally exercises executive authority over the State agencies that are recipients of Federal financial assistance or through which Federal financial assistance is channelled to sub-recipients at the local level, all of whom are subject to the Uniform Act and any of whom could make application for certification approval. The certification process does not alter the existing relationship between local sub-recipients and the State-level recipients of Federal financial assistance. It is expected that any certification application made by a sub-recipient will be made through the State-level agency to the governor, or the governor's designee. In those instances where the local level agency (city, county, etc.) is the direct recipient, and there is no State-level agency authorized to perform such functions, the certification application would be made directly to the governor, or the governor's designee.

The governor, or a State office or agency designated by the governor, will be able to standardize the process and develop an expertise in the processing of applications. Further, the governor or his or her designee will be more able to assess the capabilities of those State agencies seeking to assume Federal agency responsibilities through the certification process. A focal point of this nature will be particularly advantageous in processing certifications from a State agency seeking certification approval from more than one Federal agency.

Two commenters indicated some misunderstanding of the responsibilities of the Federal funding agency.

It is not intended that the Federal funding agency endorse an approved application received from the governor, or the governor's designee, if the Federal funding agency has appropriate indications revealing program deficiencies regarding the certifying State agency. The purpose of having the Federal funding agency accept the approved application without performing an independent review is threefold: first, it emphasizes the role of the governor, or the governor's designee, in evaluating the State agency certifications; second, it will bring into focus the current status of the Federal funding agency's oversight of its State agencies; third, unless there are pre-existing appropriate indications of deficiencies, the certification approval can be handled more expeditiously. The second of the three foregoing points is the basis for the written assessment of the State agency's capabilities to operate under certification which the Federal funding agency must provide when the certification application is transmitted to the Federal lead agency.

*Section 24.603 Monitoring and Corrective action*

One respondent objected to the permissive withholding of Federal financial assistance if a certified State agency failed to comply with applicable State law and regulation serving as the basis of its certification. The respondent perceived this to mean that the authority to withhold approval of Federal financial assistance is available to any Federal agency regardless of the source of the financial assistance. This, of course, is not the case. The authority and the responsibility regarding the withholding of Federal financial assistance rests with each Federal agency regarding its projects, programs, and activities. The respondent's comment did, however, lead us to the recognition of a possible inconsistency between the requirements of § 24.603(b) and the assurances required by § 24.4 and sections 210 and 305 of the Uniform Act. As a consequence, § 24.603(b) is revised and clarified to provide that if a State agency certifies, under State law and regulation, it can and will comply with the provisions of the Uniform Act which would otherwise be covered by the sections 210 and 305 assurances and, then, fails to comply, the Federal agency should withhold Federal financial assistance in that State agency's programs, projects, and activities affected by the Uniform Act.

The certification process does not diminish the State agency's fundamental responsibilities regarding compliance with the Uniform Act, particularly those provisions referred in the sections 210 and 305 assurances. It is clear, from the statute, that compliance with provisions which are the subject of the assurances is of paramount importance to the continued Federal financial assistance of programs, projects, and activities affected by the Uniform Act.

For example, if Uniform Act non-compliance occurred in connection with a federally assisted project the Federal agency should exercise its authority to withhold Federal financial assistance until the state agency is again performing in compliance with the certification.

In order to ensure coordination of information among Federal agencies that may have accepted a certification from the same state agency, language has been added to § 24.603 (b) and (c) to require that the lead agency be consulted by the Federal funding agency before any Federal funds are withheld from a certified state agency or the acceptance of a certification is revoked.

**Appendix A to Part 24—Additional Information**

The appendix has been modified and augmented to provide for better understanding of the sections of the regulations to which it pertains.

*Section 24.2(g)(2)*

*Persons not displaced.* "Permanently" has been added to the first sentence to clarify that some persons may be temporarily displaced but are not displaced persons because they have not been permanently displaced.

*Section 24.102(m)*

*Fair rental.* In response to several comments concerning short-term rent, the modifier, "generally," has been added to the last sentence.

*Section 24.305*

Fixed payment for moving expenses—non-residential moves. FHWA has added clarifying language in Appendix A for non-profit organizations treated under this section.

*Section 24.401*

Replacement housing payment for 180-day homeowner-occupants.

*Section 24.401(a)(2)*

A statement has been added to clarify the phrase "for good cause."

*Section 24.401(d)*

The computation of a "buydown" payment, the factors used in computation, and the agency's obligation to the displaced person are explained. Even though one commenter suggested that adjustment of the buydown payment, when a displaced person elects to mortgage the replacement dwelling for less than the remaining mortgage on the displacement dwelling, penalizes the displaced person for making a larger downpayment, we are retaining this provision. In addition, we have accepted a recommendation that the mortgage with the shortest term be used to compute the payment. FHWA has amended the procedures to reflect this adjustment.

The FHWA is interested in your experience with this new procedure for computing the mortgage interest differential payment.

**Appendix B to Part 24—Statistical Report Form**

The reformatted statistical report form includes a new line item for reporting payments for the statutory business reestablishment expense entitlement. (See line 7A). Several comments were received regarding the information required in Part B, column (A). More accurate statistical analyses can be obtained by changing the requirement for column (A) to displacements instead of number of claims since a displaced person may receive more than one claim in several categories. The heading for column (A) has been changed to number of displacements.

As required by Section 1320.21 of OMB's new paperwork clearance regulation that was published in the Federal Register on May 10, 1988, we have included an agency disclosure notice for public reporting on the STATISTICAL REPORT FORM.

A request was received from HUD to add new items to the statistical report form to collect race, sex, ethnicity, handicap and familial status data. These items were not included in the report form presented in the NPRM and, therefore, FHWA does not have the benefit of public comment on what, if any, paperwork burden such additional information collection would have on agencies or persons carrying out acquisition or displacement activities. Therefore, the report form format remains unchanged at this time except for the minor alteration referred to above.

**Regulatory Impact**

The FHWA has determined that this action does not constitute a major rule under Executive Order 12291 or a significant rule under the regulatory policies and procedures of the Department of Transportation. Executive Order 12291 requires that a regulatory impact analysis be prepared for "major" rules which are defined in the Order as any rule that has an annual effect on the national economy of $100 million or more, or has certain other specified effects.

The economic impacts of this final rule are primarily mandated by the provisions of the 1987 Amendments. However, since some of the statutory changes are administrative or procedural, savings to Federal, State, and local agencies should result in the administration of the Uniform Act. Other statutory changes, which alter benefit levels, and expand the Act's application to include certain private persons who receive Federal financial assistance, and persons displaced by certain nonacquisition activities, should result in a modest increase in amounts paid under the Uniform Act.

However, we do not believe that the proposed regulations will have an annual economic effect of $100 million or more, or the other effects listed in the Executive Order. For this reason, FHWA has determined that this regulation is not a major rule within the meaning of the Order.

Federal agencies administering direct Federal activities, as well as many states, currently have the necessary authority to comply with the additional provisions of the 1987 Amendments implemented in this rule. To delay the promulgation of the amendments made in this rule would deprive many parties of the protections and benefits intended by those provisions of the 1987 Amendments. Accordingly, the FHWA finds good cause to make this regulation effective without the 30-day delay in effective date under the Administrative Procedures Act, 5 U.S.C. 553(b).

**Regulatory Flexibility Act**

The Regulatory Flexibility Act (5 U.S.C. 605(b)) requires that for each rule with a "significant economic impact on a substantial number of small entities" an analysis be prepared describing the rules impact on small entities, and identifying any significant alternatives to the rule that would minimize the economic impacts on small entities.

The provisions of the Uniform Act that are implemented in this final rule have not changed substantially. The primary impact of the 1987 Amendments is expected to be an increase in benefits provided to small businesses, the elimination of unnecessary administrative requirements imposed on State and local agencies, and the consequent reduction of burden on those affected entities, and the expansion of the Act's application to those private entities that seek and receive Federal financial assistance.

In response to comments received from rural electric cooperatives FHWA has considered the impact that this rule would have on such cooperatives. Primarily for the reasons provided elsewhere in the preamble we have concluded that this regulation would not have a significant economic impact on a substantial number of small electric cooperatives.

Based on information available to FHWA at this time and under the criteria of the Regulatory Flexibility Act, the FHWA hereby certifies that this regulation will not have a significant economic impact on a substantial number of small entities.

**Paperwork Reduction Act Requirements**

Today's final rule makes one change to the Uniform Act Report form, which is contained in Appendix B of Part 24. A new item, 7A, is added to obtain information relating to the new business reestablishment payment added by the 1987 Amendments. Several minor editorial changes have also been made in this form. Federal funding agencies which elect to require a report on Uniform Act activities will submit the revised form to the Office of Management and Budget (OMB) for review under 44 U.S.C. 3504(h), the Paperwork Reduction Act, Pub. L. 96-511. Agencies may continue to use the previous report form until OMB approval is granted.

**Federalism Assessment**

As discussed in the Supplementary Information sections of this preamble, this final rule builds upon the positive Federalism accomplishments achieved in the promulgation of the governmentwide common rule on February 27, 1986 (51 FR 7000) which significantly reduced administrative burdens on States and local recipients of Federal financial assistance. The FHWA has determined that the Federalism accomplishments of the common rule are retained in today's rule and the changes which have been made are fully consistent with the principles and criteria contained in Executive Order 12612 and do not have sufficient further Federalism implications to warrant the preparation of a complete Federalism Assessment.

This final rule implements a provision of the 1987 Amendments that gives substantial additional discretion to the States. This is the *certification procedure* which provides an alternative whereby State agencies, with adequate

VOL 54 ISS 40 MR 2 1989 UMI

authority under State law, can comply with the Uniform Act with a minimum amount of Federal supervision or oversight. This certification procedure would give maximum authority and control to the State governor, or his or her designee, in managing and coordinating the certification procedure in each State.

**List of Subjects in 49 CFR Part 24**

Real property acquisition, Relocation assistance, Reporting and recordkeeping requirements, Transportation.

Accordingly, Title 49 of the Code of Federal Regulations is amended as set forth below.

Issued on: February 22, 1989.

**Robert E. Farris,**

*Federal Highway Administrator.*

Part 24 is revised to read as follows:

## PART 24—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION FOR FEDERAL AND FEDERALLY ASSISTED PROGRAMS

**Subpart A—General**

Sec.
24.1 Purpose.
24.2 Definitions.
24.3 No duplication of payments.
24.4 Assurances, monitoring and corrective action.
24.5 Manner of notices.
24.6 Administration of jointly-funded projects.
24.7 Federal agency waiver of regulations.
24.8 Compliance with other laws and regulations.
24.9 Recordkeeping and reports.
24.10 Appeals.

**Subpart B—Real Property Acquisition**

24.101 Applicability of acquisition requirements.
24.102 Basic acquisition policies.
24.103 Criteria for appraisals.
24.104 Review of appraisals.
24.105 Acquisition of tenant-owned improvements.
24.106 Expenses incidental to transfer of title to the Agency.
24.107 Certain litigation expenses.
24.108 Donations.

**Subpart C—General Relocation Requirements**

24.201 Purpose.
24.202 Applicability.
24.203 Relocation notices.
24.204 Availability of comparable replacement dwelling before displacement.
24.205 Relocation planning, advisory services, and coordination.
24.206 Eviction for cause.
24.207 General requirements—claims for relocation payments.
24.208 Relocation payments not considered as income.

**Subpart D—Payments for Moving and Related Expenses**

24.301 Payment for actual reasonable moving and related expenses—residential moves.
24.302 Fixed payment for moving expenses—residential moves.
24.303 Payment for actual reasonable moving and related expenses—nonresidential moves.
24.304 Reestablishment expenses—nonresidential moves.
24.305 Ineligible moving and related expenses.
24.306 Fixed payment for moving expenses—nonresidential moves.
24.307 Discretionary utility relocation payments.

**Subpart E—Replacement Housing Payments**

24.401 Replacement housing payment for 180-day homeowner-occupants.
24.402 Replacement housing payment for 90-day occupants.
24.403 Additional rules governing replacement housing payments.
24.404 Replacement housing of last resort.

**Subpart F—Mobile Homes**

24.501 Applicability.
24.502 Moving and related expenses—mobile homes.
24.503 Replacement housing payment for 180-day mobile homeowner-occupants.
24.504 Replacement housing payment for 90-day mobile home occupants.
24.505 Additional rules governing relocation payments to mobile home occupants.

**Subpart G—Certification**

24.601 Purpose.
24.602 Certification application.
24.603 Monitoring and corrective action.
Appendix A to Part 24—Additional Information
Appendix B to Part 24—Statistical Report Form

**Authority:** Section 213, Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 Pub. L. 91-646, 84 Stat. 1894 (42 U.S.C. 4601) as amended by the Surface Transportation and Uniform Relocation Assistance Act of 1987, Title IV of Pub. L. 100-17, 101 Stat. 246-256 (42 U.S.C. 4601 note); and 49 CFR 1.48(cc).

### Subpart A—General

**§ 24.1 Purpose.**

The purpose of this part is to promulgate rules to implement the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (42 U.S.C. 4601 *et seq.*), in accordance with the following objectives:

(a) To ensure that owners of real property to be acquired for Federal and federally-assisted projects are treated fairly and consistently, to encourage and expedite acquisition by agreements with such owners, to minimize litigation and relieve congestion in the courts, and to promote public confidence in Federal and federally-assisted land acquisition programs;

(b) To ensure that persons displaced as a direct result of Federal or federally-assisted projects are treated fairly, consistently, and equitably so that such personal will not suffer disproportionate injuries as a result of projects designed for the benefit of the public as a whole; and

(c) To ensure that Agencies implement these regulations in a manner that is efficient and cost effective.

**§ 24.2 Definitions.**

(a) *Agency.* The term "Agency" means the Federal agency, State, State agency, or person that acquires real property or displaces a person.

(1) *Acquiring agency.* The term "acquiring agency" means a State agency, as defined in paragraph (a)(2) of this section, which has the authority to acquire property by eminent domain under State law, and a State agency or person which does not have such authority. Any Agency or person solely acquiring property pursuant to the provisions of § 24.101(a) (1), (2), (3), or (4) need not provide the assurances required by § 24.4(a)(1) or (2).

(2) *Displacing agency.* The term "displacing agency" means any Federal agency carrying out a program or project, and any State, State agency, or person carrying out a program or project with Federal financial assistance, which causes a person to be a displaced person.

(3) *Federal agency.* The term "Federal agency" means any department, Agency, or instrumentality in the executive branch of the Government, any wholly owned Government corporation, the Architect of the Capitol, the Federal Reserve Banks and branches thereof, and any person who has the authority to acquire property by eminent domain under Federal law.

(4) *State agency.* The term "State agency" means any department, Agency or instrumentality of a State or of a political subdivision of a State, any department, Agency, or instrumentality of two or more States or of two or more political subdivisions of a State or States, and any person who has the authority to acquire property by eminent domain under State law.

(b) *Appraisal.* The term "appraisal" means a written statement independently and impartially prepared by a qualified appraiser setting forth an opinion of defined value of an adequately described property as of a specific date, supported by the presentation and analysis of relevant market information.

(c) *Business.* The term "business" means any lawful activity, except a farm operation, that is conducted:

(1) Primarily for the purchase, sale, lease and/or rental of personal and/or real property, and/or for the manufacture, processing, and/or marketing of products, commodities, and/or any other personal property; or

(2) Primarily for the sale of services to the public; or

(3) Primarily for outdoor advertising display purposes, when the display must be moved as a result of the project; or

(4) By a nonprofit organization that has established its nonprofit status under applicable Federal or State law.

(d) *Comparable replacement dwelling.* The term "comparable replacement dwelling" means a dwelling which is:

(1) Decent, safe and sanitary as described in paragraph (f) of this section;

(2) Functionally equivalent to the displacement dwelling. The term "functionally equivalent" means that it performs the same function, provides the same utility, and is capable of contributing to a comparable style of living. While a comparable replacement dwelling need not possess every feature of the displacement dwelling, the principal features must be present. Generally, functional equivalency is an objective standard, reflecting the range of purposes for which the various physical features of a dwelling may be used. However, in determining whether a replacement dwelling is functionally equivalent to the displacement dwelling, the Agency may consider reasonable trade-offs for specific features when the replacement unit is "equal to or better than" the displacement dwelling. (See Appendix A of this part);

(3) Adequate in size to accommodate the occupants;

(4) In an area not subject to unreasonable adverse environmental conditions;

(5) In a location generally not less desirable than the location of the displaced person's dwelling with respect to public utilities and commercial and public facilities, and reasonably accessible to the person's place of employment;

(6) On a site that is typical in size for residential development with normal site improvements, including customary landscaping. The site need not include special improvements such as outbuildings, swimming pools, or greenhouses. (See also § 24.403(a)(2).);

(7) Currently available to the displaced person on the private market. However, a comparable replacement dwelling for a person receiving government housing assistance before displacement may reflect similar government housing assistance. (See Appendix A of this part.); and

(8) Within the financial means of the displaced person.

(i) A replacement dwelling purchased by a homeowner in occupancy at the displacement dwelling for at least 180 days prior to initiation of negotiations (180-day homeowner) is considered to be within the homeowner's financial means if the homeowner will receive the full price differential as described in § 24.401(c), all increased mortgage interest costs as described at § 24.401(d) and all incidental expenses as described at § 24.401(e), plus any additional amount required to be paid under § 24.404, Replacement housing of last resort.

(ii) A replacement dwelling rented by an eligible displaced person is considered to be within his or her financial means if, after receiving rental assistance under this part, the person's monthly rent and estimated average monthly utility costs for the replacement dwelling do not exceed the person's base monthly rental for the displacement dwelling as described at § 24.402(b)(2).

(iii) For a displaced person who is not eligible to receive a replacement housing payment because of the person's failure to meet length-of-occupancy requirements, comparable replacement rental housing is considered to be within the person's financial means if an Agency pays that portion of the monthly housing costs of a replacement dwelling which exceeds 30 percent of such person's gross monthly household income or, if receiving a welfare assistance payment from a program that designates amounts for shelter and utilities, the total of the amounts designated for shelter and utilities. Such rental assistance must be paid under § 24.404, Replacement housing of last resort.

(e) *Contribute materially.* The term "contribute materially" means that during the 2 taxable years prior to the taxable year in which displacement occurs, or during such other period as the Agency determines to be more equitable, a business or farm operation:

(1) Had average annual gross receipts of at least $5000; or

(2) Had average annual net earnings of at least $1000; or

(3) Contributed at least 33⅓ percent of the owner's or operator's average annual gross income from all sources.

(4) If the application of the above criteria creates an inequity or hardship in any given case, the Agency may approve the use of other criteria as determined appropriate.

(f) *Decent, safe, and sanitary dwelling.* The term "decent, safe, and sanitary dwelling" means a dwelling which meets applicable housing and occupancy codes. However, any of the following standards which are not met by an applicable code shall apply unless waived for good cause by the Federal agency funding the project. The dwelling shall:

(1) Be structurally sound, weathertight, and in good repair.

(2) Contain a safe electrical wiring system adequate for lighting and other devices.

(3) Contain a heating system capable of sustaining a healthful temperature (of approximately 70 degrees) for a displaced person, except in those areas where local climatic conditions do not require such a system.

(4) Be adequate in size with respect to the number of rooms and area of living space needed to accommodate the displaced person. There shall be a separate, well lighted and ventilated bathroom that provides privacy to the user and contains a sink, bathtub or shower stall, and a toilet, all in good working order and properly connected to appropriate sources of water and to a sewage drainage system. In the case of a housekeeping dwelling, there shall be a kitchen area that contains a fully usable sink, properly connected to potable hot and cold water and to a sewage drainage system, and adequate space and utility service connections for a stove and refrigerator.

(5) Contains unobstructed egress to safe, open space at ground level. If the replacement dwelling unit is on the second story or above, with access directly from or through a common corridor, the common corridor must have at least two means of egress.

(6) For a displaced person who is handicapped, be free of any barriers which would preclude reasonable ingress, egress, or use of the dwelling by such displaced person.

(g) *Displaced person*— (1) *General.* The term "displaced person" means any person who moves from the real property or moves his or her personal property from the real property: [This includes a person who occupies the real property prior to its acquisition, but who does not meet the length of occupancy requirements of the Uniform Act as described at § 24.401(a) and 24.402(a)):

(i) As a direct result of a written notice of intent to acquire, the initiation of negotiations for, or the acquisition of, such real property in whole or in part for a project.

VOL 54 ISS 40 MR 2 1989 UMI

(ii) As a direct result of rehabilitation or demolition for a project; or

(iii) As a direct result of a written notice of intent to acquire, or the acquisition, rehabilitation or demolition of, in whole or in part, other real property on which the person conducts a business or farm operation, for a project. However, eligibility for such person under this paragraph applies only for purposes of obtaining relocation assistance advisory services under § 24.205(c), and moving expenses under § 24.301, § 24.302 or § 24.303.

(2) *Persons not displaced.* The following is a nonexclusive listing of persons who do not qualify as displaced persons under this part:

(i) A person who moves before the initiation of negotiations (see also § 24.403(e)), unless the Agency determines that the person was displaced as a direct result of the program or project; or

(ii) A person who initially enters into occupancy of the property after the date of its acquisition for the project; or

(iii) A person who has occupied the property for the purpose of obtaining assistance under the Uniform Act;

(iv) A person who is not required to relocate permanently as a direct result of a project. Such determination shall be made by the Agency in accordance with any guidelines established by the Federal agency funding the project (see Also Appendix A of this part); or

(v) An owner-occupant who moves as a result of an acquisition as described at §§ 24.101(a) (1) and (2), or as a result of the rehabilitation or demolition of the real property. (However, the displacement of a tenant as a direct result of any acquisition, rehabilitation or demolition for a Federal or federally-assisted project is subject to this part.); or

(vi) A person whom the Agency determines is not displaced as a direct result of a partial acquisition; or

(vii) A person who, after receiving a notice of relocation eligibility (described at § 24.203(b)), is notified in writing that he or she will not be displaced for a project. Such notice shall not be issued unless the person has not moved and the Agency agrees to reimburse the person for any expenses incurred to satisfy any binding contractual relocation obligations entered into after the effective date of the notice of relocation eligibility; or

(viii) An owner-occupant who voluntarily conveys his or her property, as described at § 24.101(a) (1) and (2), after being informed in writing that if a mutually satisfactory agreement on terms of the conveyance cannot be reached, the Agency will not acquire the property. In such cases, however, any resulting displacement of a tenant is subject to the regulations in this part; or

(ix) A person who retains the right of use and occupancy of the real property for life following its acquisition by the Agency; or

(x) A person who retains the right of use and occupancy of the real property for a fixed term after its acquisition by the Department of Interior under Pub. L. 93-477 or Pub. L. 93-303; or

(xi) A person who is determined to be in unlawful occupancy prior to the initiation of negotiations (see paragraph (y) of this section), or a person who has been evicted for cause, under applicable law, as provided for in § 24.206.

(h) *Dwelling.* The term "dwelling" means the place of permanent or customary and usual residence of a person, according to local custom or law, including a single family house; a single family unit in a two-family, multi-family, or multi-purpose property; a unit of a condominium or cooperative housing project; a non-housekeeping unit; a mobile home; or any other residential unit.

(i) *Farm operation.* The term "farm operation" means any activity conducted solely or primarily for the production of one or more agricultural products or commodities, including timber, for sale or home use, and customarily producing such products or commodities in sufficient quantity to be capable of contributing materially to the operator's support.

(j) *Federal financial assistance.* The term "Federal financial assistance" means a grant, loan, or contribution provided by the United States, except any Federal guarantee or insurance and any interest reduction payment to an individual in connection with the purchase and occupancy of a residence by that individual.

(k) *Initiation of negotiations.* Unless a different action is specified in applicable Federal program regulations, the term "initiation of negotiations" means the following:

(1) Whenever the displacement results from the acquisition of the real property by a Federal agency or State agency, the "initiation of negotiations" means the delivery of the initial written offer of just compensation by the Agency to the owner or the owner's representative to purchase the real property for the project. However, if the Federal agency or State agency issues a notice of its intent to acquire the real property, and a person moves after that notice, but before delivery to the initial written purchase offer, the "initiation of negotiations" means the actual move of the person from the property.

(2) Whenever the displacement is caused by rehabilitation, demolition or privately undertaken acquisition of the real property (and there is no related acquisition by a Federal agency or a State agency), the "initiation of negotiations" means the notice to the person that he or she will be displaced by the project or, if there is no notice, the actual move of the person from the property.

(3) In the case of a permanent relocation to protect the public health and welfare, under the Comprehensive Environmental Response Compensation and Liability Act of 1980 (Pub. L. 96-510, or "Superfund") the "initiation of negotiations" means the formal announcement of such relocation or the Federal or federally-coordinated health advisory where the Federal Government later decides to conduct a permanent relocation.

(l) *Lead agency.* The term "lead agency" means the Department of Transportation acting through the Federal Highway Administration.

(m) *Mortgage.* The term "mortgage" means such classes of liens as are commonly given to secure advances on, or the unpaid purchase price of, real property, under the laws of the State in which the real property is located, together with the credit instruments, if any, secured thereby.

(n) *Nonprofit organization.* The term "nonprofit organization" means an organization that is incorporated under the applicable laws of a State as a non-profit organization, and exempt from paying Federal income taxes under section 501 of the Internal Revenue Code (26 U.S.C. 501).

(o) *Notice of intent to acquire or notice of eligibility for relocation assistance.* Written notice furnished to a person to be displaced, including those to be displaced by rehabilitation or demolition activities from property acquired prior to the commitment of Federal financial assistance to the activity, that establishes eligibility for relocation benefits prior to the initiation of negotiation and/or prior to the commitment of Federal financial assistance.

(p) *Owner of a dwelling.* A person is considered to have met the requirement to own a dwelling if the person purchases or holds any of the following interests in real property:

(1) Fee title, a life estate, a land contract, a 99-year lease, or a lease including any options for extension with at least 50 years to run from the date of acquisition; or

(2) An interest in a cooperative housing project which includes the right to occupy a dwelling; or

(3) A contract to purchase any of the interests or estates described in paragraphs (p) (1) or (2) of this section, or

(4) Any other interest, including a partial interest, which in the judgment of the Agency warrants consideration as ownership.

(q) *Person.* The term "person" means any individual, family, partnership, corporation, or association.

(r) *Program or project.* The phrase "program or project" means any activity or series of activities undertaken by a Federal agency or with Federal financial assistance received or anticipated in any phase of an undertaking in accordance with the Federal funding agency guidelines.

(s) *Salvage value.* The term "salvage value" means the probable sale price of an item, if offered for sale on the condition that it will be removed from the property at the buyer's expense, allowing a reasonable period of time to find a person buying with knowledge of the uses and purposes for which it is adaptable and capable of being used, including separate use of serviceable components and scrap when there is no reasonable prospect of sale except on that basis.

(t) *Small business.* A business having at least one, but not more than 500 employees working at the site being acquired or displaced by a program or project.

(u) *State.* Any of the several States of the United States or the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, the Trust Territories of the Pacific Islands or a political subdivision of any of these jurisdictions.

(v) *Tenant.* The term "tenant" means a person who has the temporary use and occupancy of real property owned by another.

(w) *Uneconomic remnant.* The term "uneconomic remnant" means a parcel of real property in which the owner is left with an interest after the partial acquisition of the owner's property, and which the acquiring agency has determined has little or no value or utility to the owner.

(x) *Uniform Act.* The term "Uniform Act" means the Uniform Relocation Assistance and Real Property Acquisition Policy Act of 1970 (84 Stat. 1894; 42 U.S.C. 4601 *et seq.*; Pub. L. 91-646), and amendments thereto.

(y) *Unlawful occupancy.* A person is considered to be in unlawful occupancy if the person has been ordered to move by a court of competent jurisdiction prior to the initiation of negotiations or is determined by the Agency to be a squatter who is occupying the real property without the permission of the owner and otherwise has no legal right to occupy the property under State law. A displacing agency may, at its discretion, consider such a squatter to be in lawful occupancy.

(z) *Utility costs.* The term "utility costs" means expenses for heat, lights, water and sewer.

(aa) *Utility facility.* The term "utility facility" means any electric, gas, water, steampower, or materials transmission or distribution system; any transportation system; any communications system, including cable television; and any fixtures, equipment, or other property associated with the operation, maintenance, or repair of any such system. A utility facility may be publicly, privately, or cooperatively owned.

(bb) *Utility relocation.* The term "utility relocation" means the adjustment of a utility facility required by the program or project undertaken by the displacing agency. It includes removing and reinstalling the facility, including necessary temporary facilities; acquiring necessary right-of-way on new location; moving, rearranging or changing the type of existing facilities; and taking any necessary safety and protective measures. It shall also mean constructing a replacement facility that has the functional equivalency of the existing facility and is necessary for the continued operation of the utility service, the project economy, or sequence of project construction.

### § 24.3 No duplication of payments.

No person shall receive any payment under this part if that person receives a payment under Federal, State, or local law which is determined by the Agency to have the same purpose and effect as such payment under this part. (See Appendix A of this part, § 24.3.)

### § 24.4 Assurances, monitoring and corrective action.

(a) *Assurances*—(1) Before a Federal agency may approve any grant to, or contract, or agreement with, a State agency under which Federal financial assistance will be made available for a project which results in real property acquisition or displacement that is subject to the Uniform Act, the State agency must provide appropriate assurances that it will comply with the Uniform Act and this part. A displacing agency's assurances shall be in accordance with section 210 of the Uniform Act. An acquiring agency's assurances shall be in accordance with section 305 of the Uniform Act and must contain specific reference to any State law which the Agency believes provides an exception to section 301 or 302 of the Uniform Act. If, in the judgment of the Federal agency, Uniform Act compliance will be served, a State agency may provide these assurances at one time to cover all subsequent federally-assisted programs or projects. An Agency which both acquires real property and displaces persons may combine its section 210 and section 305 assurances in one document.

(2) If a Federal agency or State agency provides Federal financial assistance to a "person" causing displacement, such Federal or State agency is responsible for ensuring compliance with the requirements of this part, notwithstanding the person's contractual obligation to the grantee to comply.

(3) As an alternative to the assurance requirement described in paragraph (a)(1) of this section, a Federal agency may provide Federal financial assistance to a State agency after it has accepted a certification by such State agency in accordance with the requirements in Subpart G of this part.

(b) *Monitoring and corrective action.* The Federal agency will monitor compliance with this part, and the State agency shall take whatever corrective action is necessary to comply with the Uniform Act and this part. The Federal agency may also apply sanctions in accordance with applicable program regulations. (Also see § 24.603, Subpart G.)

(c) *Prevention of fraud, waste, and mismanagement.* The Agency shall take appropriate measures to carry out this part in a manner that minimizes fraud, waste, and mismanagement.

### § 24.5 Manner of notices.

Each notice which the Agency is required to provide to a property owner or occupant under this part, except the notice described at § 24.102(b), shall be personally served or sent by certified or registered first-class mail, return receipt requested, and documented in Agency files. Each notice shall be written in plain, understandable language. Persons who are unable to read and understand the notice must be provided with appropriate translation and counseling. Each notice shall indicate the name and telephone number of a person who may be contacted for answers to questions or other needed help.

**§ 24.6 Administration of jointly-funded projects.**

Whenever two or more Federal agencies provide financial assistance to an Agency or Agencies, other than a Federal agency, to carry out functionally or geographically related activities which will result in the acquisition of property or the displacement of a person, the Federal agencies may by agreement designate one such agency as the cognizant Federal agency. In the unlikely event that agreement among the Agencies cannot be reached as to which agency shall be the cognizant Federal agency, then the lead agency shall designate one of such agencies to assume the cognizant role. At a minimum, the agreement shall set forth the federally assisted activities which are subject to its terms and cite any policies and procedures, in addition to this part, that are applicable to the activities under the agreement. Under the agreement, the cognizant Federal agency shall assure that the project is in compliance with the provisions of the Uniform Act and this part. All federally assisted activities under the agreement shall be deemed a project for the purposes of this part.

**§ 24.7 Federal agency waiver of regulations.**

The Federal agency funding the project may waive any requirement in this part not required by law if it determines that the waiver does not reduce any assistance or protection provided to an owner or displaced person under this part. Any request for a waiver shall be justified on a case-by-case basis.

**§ 24.8 Compliance with other laws and regulations.**

The implementation of this part must be in compliance with other applicable Federal laws and implementing regulations, including, but not limited to, the following:

(a) Section I of the Civil Rights Act of 1866 (42 U.S.C. 1982 *et seq.*).

(b) Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d *et seq.*).

(c) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3601 *et seq.*), as amended.

(d) The National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*).

(e) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 790 *et seq.*).

(f) The Flood Disaster Protection Act of 1973 (Pub. L. 93–234).

(g) The Age Discrimination Act of 1975 (42 U.S.C. 6101 *et seq.*).

(h) Executive Order 11063—Equal Opportunity and Housing, as amended by Executive Order 12259.

(i) Executive Order 11246—Equal Employment Opportunity.

(j) Executive Order 11625—Minority Business Enterprise.

(k) Executive Orders 11988, Floodplain Management, and 11990, Protection of Wetlands.

(l) Executive Order 12250—Leadership and Coordination of Non-Discrimination Laws.

(m) Executive Order 12259—Leadership and Coordination of Fair Housing in Federal Programs.

(n) Executive Order 12630—Governmental Actions and Interference with Constitutionally Protected Property Rights.

**§ 24.9 Recordkeeping and reports.**

(a) *Records.* The Agency shall maintain adequate records of its acquisition and displacement activities in sufficient detail to demonstrate compliance with this part. These records shall be retained for at least 3 years after each owner of a property and each person displaced from the property receives the final payment to which he or she is entitled under this part, or in accordance with the applicable regulations of the Federal funding agency, whichever is later.

(b) *Confidentiality of records.* Records maintained by an Agency in accordance with this part are confidential regarding their use as public information, unless applicable law provides otherwise.

(c) *Reports.* The Agency shall submit a report of its real property acquisition and displacement activities under this part if required by the Federal agency funding the project. A report will not be required more frequently than every 3 years, or as the Uniform Act provides, unless the Federal funding agency shows good cause. The report shall be prepared and submitted in the format contained in Appendix B of this part.

**§ 24.10 Appeals.**

(a) *General.* The Agency shall promptly review appeals in accordance with the requirements of applicable law and this part.

(b) *Actions which may be appealed.* Any aggrieved person may file a written appeal with the Agency in any case in which the person believes that the Agency has failed to properly consider the person's application for assistance under this part. Such assistance may include, but is not limited to, the person's eligibility for, or the amount of, a payment required under § 24.106 or § 24.107, or a relocation payment required under this part. The Agency shall consider a written appeal regardless of form.

(c) *Time limit for initiating appeal.* The Agency may set a reasonable time limit for a person to file an appeal. The time limit shall not be less than 60 days after the person receives written notification of the Agency's determination on the person's claim.

(d) *Right to representation.* A person has a right to be represented by legal counsel or other representative in connection with his or her appeal, but solely at the person's own expense.

(e) *Review of files by person making appeal.* The Agency shall permit a person to inspect and copy all materials pertinent to his or her appeal, except materials which are classified as confidential by the Agency. The Agency may, however, impose reasonable conditions on the person's right to inspect, consistent with applicable laws.

(f) *Scope of review of appeal.* In deciding an appeal, the Agency shall consider all pertinent justification and other material submitted by the person, and all other available information that is needed to ensure a fair and full review of the appeal.

(g) *Determination and notification after appeal.* Promptly after receipt of all information submitted by a person in support of an appeal, the Agency shall make a written determination on the appeal, including an explanation of the basis on which the decision was made, and furnish the person a copy. If the full relief requested is not granted, the Agency shall advise the person of his or her right to seek judicial review.

(h) *Agency official to review appeal.* The Agency official conducting the review of the appeal shall be either the head of the Agency or his or her authorized designee. However, the official shall not have been directly involved in the action appealed.

## Subpart B—Real Property Acquisition

**§ 24.101 Applicability of acquisition requirements.**

(a) *General.* The requirements of this subpart apply to any acquisition of real property for a Federal program or project, and to programs and projects where there is Federal financial assistance in any part of project costs except for:

(1) Voluntary transactions that meet all of the following conditions:

(i) No specific site or property needs to be acquired, although the Agency may limit its search for alternative sites to a general geographic area. Where an Agency wishes to purchase more than one site within a geographic area on this basis, all owners are to be treated similarly.

(ii) The property to be acquired is not part of an intended, planned, or designated project area where all or substantially all of the property within the area is to be acquired within specific time limits.

(iii) The Agency will not acquire the property in the event negotiations fail to result in an amicable agreement, and the owner is so informed in writing.

(iv) The Agency will inform the owner of what it believes to be the fair market value of the property.

(2) Acquisitions for programs or projects undertaken by an agency or person that receives Federal financial assistance but does not have authority to acquire property by eminent domain, provided that such Agency or person shall:

(i) Prior to making an offer for the property, clearly advise the owner that it is unable to acquire the property in the event negotiations fail to result in an amicable agreement; and

(ii) Inform the owner of what it believes to be fair market value of the property.

(3) The acquisition of real property from a Federal agency, State, or State agency, if the Agency desiring to make the purchase does not have authority to acquire the property through condemnation.

(4) The acquisition of real property by a cooperative from a person who, as a condition of membership in the cooperative, has agreed to provide without charge any real property that is needed by the cooperative.

(b) *Less-than-full-fee interest in real property.* In addition to fee simple title, the provisions of this subpart apply when acquiring fee title subject to retention of a life estate or a life use; to acquisition by leasing where the lease term, including option(s) for extension, is 50 years or more; and to the acquisition of permanent easements. (See Appendix A of this part, § 24.101(b).)

(c) *Federally-assisted projects.* For projects receiving Federal financial assistance, the provisions of §§ 24.102, 24.103, 24.104, and 24.105 apply to the greatest extent practicable under State law. (See § 24.4(a).)

**§ 24.102 Basic acquisition policies.**

(a) *Expeditious acquisition.* The Agency shall make every reasonable effort to acquire the real property expeditiously by negotiation.

(b) *Notice to owner.* As soon as feasible, the owner shall be notified of the Agency's interest in acquiring the real property and the basic protections, including the agency's obligation to secure an appraisal, provided to the owner by law and this part. (See also § 24.203.)

(c) *Appraisal, waiver thereof, and invitation to owner.* (1) Before the initiation of negotiations the real property to be acquired shall be appraised, except as provided in § 24.102(c)(2), and the owner, or the owner's designated representative, shall be given an opportunity to accompany the appraiser during the appraiser's inspection of the property.

(2) An appraisal is not required if the owner is donating the property and releases the Agency from this obligation, or the Agency determines that an appraisal is unnecessary because the valuation problem is uncomplicated and the fair market value is estimated at $2,500 or less, based on a review of available data.

(d) *Establishment and offer of just compensation.* Before the initiation of negotiations, the Agency shall establish an amount which it believes is just compensation for the real property. The amount shall not be less than the approved appraisal of the fair market value of the property, taking into account the value of allowable damages or benefits to any remaining property. (See also § 24.104.) Promptly thereafter, the Agency shall make a written offer to the owner to acquire the property for the full amount believed to be just compensation.

(e) *Summary statement.* Along with the initial written purchase offer, the owner shall be given a written statement of the basis for the offer of just compensation, which shall include:

(1) A statement of the amount offered as just compensation. In the case of a partial acquisition, the compensation for the real property to be acquired and the compensation for damages, if any, to the remaining real property shall be separately stated.

(2) A description and location identification of the real property and the interest in the real property to be acquired.

(3) An identification of the buildings, structures, and other improvements (including removable building equipment and trade fixtures) which are considered to be part of the real property for which the offer of just compensation is made. Where appropriate, the statement shall identify any separately held ownership interest in the property, e.g., a tenant-owned improvement, and indicate that such interest is not covered by the offer.

(f) *Basic negotiation procedures.* The Agency shall make reasonable efforts to contact the owner or the owner's representative and discuss its offer to purchase the property, including the basis for the offer of just compensation; and, explain its acquisition policies and procedures, including its payment of incidental expenses in accordance with § 24.106. The owner shall be given reasonable opportunity to consider the offer and present material which the owner believes is relevant to determining the value of the property and to suggest modification in the proposed terms and conditions of the purchase. The Agency shall consider the owner's presentation.

(g) *Updating offer of just compensation.* If the information presented by the owner, or a material change in the character or condition of the property, indicates the need for new appraisal information, or if a significant delay has occurred since the time of the appraisal(s) of the property, the Agency shall have the appraisal(s) updated or obtain a new appraisal(s). If the latest appraisal information indicates that a change in the purchase offer is warranted, the Agency shall promptly reestablish just compensation and offer that amount to the owner in writing.

(h) *Coercive action.* The Agency shall not advance the time of condemnation, or defer negotiations or condemnation or the deposit of funds with the court, or take any other coercive action in order to induce an agreement on the price to be paid for the property.

(i) *Administrative settlement.* The purchase price for the property may exceed the amount offered as just compensation when reasonable efforts to negotiate an agreement at that amount have failed and an authorized Agency official approves such administrative settlement as being reasonable, prudent, and in the public interest. When Federal funds pay for or participate in acquisition costs, a written justification shall be prepared which indicates that available information (e.g., appraisals, recent court awards, estimated trial costs, or valuation problems) supports such a settlement.

(j) *Payment before taking possession.* Before requiring the owner to surrender possession of the real property, the Agency shall pay the agreed purchase price to the owner, or in the case of a condemnation, deposit with the court, for the benefit of the owner, an amount not less than the Agency's approved appraisal of the fair market value of such property, or the court award of compensation in the condemnation proceeding for the property. In exceptional circumstances, with the prior approval of the owner, the Agency may obtain a right-of-entry for

VOL 54 ISS 40 MR 2 1989 UMI

construction purposes before making payment available to an owner.

(k) *Uneconomic remnant.* If the acquisition of only a portion of a property would leave the owner with an uneconomic remnant, the Agency shall offer to acquire the uneconomic remnant along with the portion of the property needed for the project. (See § 24.2(w).)

(l) *Inverse condemnation.* If the Agency intends to acquire any interest in real property by exercise of the power of eminent domain, it shall institute formal condemnation proceedings and not intentionally make it necessary for the owner to institute legal proceedings to prove the fact of the taking of the real property.

(m) *Fair rental.* If the Agency permits a former owner or tenant to occupy the real property after acquisition for a short term or a period subject to termination by the Agency on short notice, the rent shall not exceed the fair market rent for such occupancy.

**§ 24.103 Criteria for appraisals.**

(a) *Standards of appraisal.* The format and level of documentation for an appraisal depend on the complexity of the appraisal problem. The Agency shall develop minimum standards for appraisals consistent with established and commonly accepted appraisal practice for those acquisitions which, by virtue of their low value or simplicity, do not require the in-depth analysis and presentation necessary in a detailed appraisal. A detailed appraisal shall be prepared for all other acquisitions. A detailed appraisal shall reflect nationally recognized appraisal standards, including, to the extent appropriate, the Uniform Appraisal Standards for Federal Land Acquisition. An appraisal must contain sufficient documentation, including valuation data and the appraiser's analysis of that data, to support his or her opinion of value. At a minimum, a detailed appraisal shall contain the following items:

(1) The purpose and/or the function of the appraisal, a definition of the estate being appraised, and a statement of the assumptions and limiting conditions affecting the appraisal.

(2) An adequate description of the physical characteristics of the property being appraised (and, in the case of a partial acquisition, an adequate description of the remaining property), a statement of the known and observed encumbrances, if any, title information, location, zoning, present use, an analysis of highest and best use, and at least a 5-year sales history of the property.

(3) All relevant and reliable approaches to value consistent with commonly accepted professional appraisal practices. When sufficient market sales data are available to reliably support the fair market value for the specific appraisal problem encountered, the Agency, at its discretion, may require only the market approach. If more than one approach is utilized, there shall be an analysis and reconciliation of approaches to value that are sufficient to support the appraiser's opinion of value.

(4) A description of comparable sales, including a description of all relevant physical, legal, and economic factors such as parties to the transaction, source and method of financing, and verification by a party involved in the transaction.

(5) A statement of the value of the real property to be acquired and, for a partial acquisition, a statement of the value of the damages and benefits, if any, to the remaining real property, where appropriate.

(6) The effective date of valuation, date of appraisal, signature, and certification of the appraiser.

(b) *Influence of the project on just compensation.* To the extent permitted by applicable law, the appraiser shall disregard any decrease or increase in the fair market value of the real property caused by the project for which the property is to be acquired, or by the likelihood that the property would be acquired for the project, other than that due to physical deterioration within the reasonable control of the owner.

(c) *Owner retention of improvements.* If the owner of a real property improvement is permitted to retain it for removal from the project site, the amount to be offered for the interest in the real property to be acquired shall be not less than the difference between the amount determined to be just compensation for the owner's entire interest in the real property and the salvage value (defined at § 24.2(s)) of the retained improvement.

(d) *Qualifications of appraisers.* The Agency shall establish criteria for determining the minimum qualifications of appraisers. Appraiser qualifications shall be consistent with the level of difficulty of the appraisal assignment. The Agency shall review the experience, education, training, and other qualifications of appraisers, including review appraisers, and utilize only those determined to be qualified.

(e) *Conflict of interest.* No appraiser or review appraiser shall have any interest, direct or indirect, in the real property being appraised for the Agency that would in any way conflict with the preparation or review of the appraisal. Compensation for making an appraisal shall not be based on the amount of the valuation. No appraiser shall act as a negotiator for real property which that person has appraised, except that the Agency may permit the same person to both appraise and negotiate an acquisition where the value of the acquisition is $2,500, or less.

**§ 24.104 Review of appraisals.**

The Agency shall have an appraisal review process and, at a minimum:

(a) A qualified reviewing appraiser shall examine all appraisals to assure that they meet applicable appraisal requirements and shall, prior to acceptance, seek necessary corrections or revisions.

(b) If the reviewing appraiser is unable to approve or recommend approval of an appraisal as an adequate basis for the establishment of the offer of just compensation, and it is determined that it is not practical to obtain an additional appraisal, the reviewing appraiser may develop appraisal documentation in accordance with § 24.103 to support an approved or recommended value.

(c) The review appraiser's certification of the recommended or approved value of the property shall be set forth in a signed statement which identifies the appraisal reports reviewed and explains the basis for such recommendation or approval. Any damages or benefits to any remaining property shall also be identified in the statement.

**§ 24.105 Acquisition of tenant-owned improvements.**

(a) *Acquisition of improvements.* When acquiring any interest in real property, the Agency shall offer to acquire at least an equal interest in all buildings, structures, or other improvements located upon the real property to be acquired, which it requires to be removed or which it determines will be adversely affected by the use to which such real property will be put. This shall include any improvement of a tenant-owner who has the right or obligation to remove the improvement at the expiration of the lease term.

(b) *Improvements considered to be real property.* Any building, structure, or other improvement, which would be considered to be real property if owned by the owner of the real property on which it is located, shall be considered to be real property for purposes of this Subpart.

(c) *Appraisal and establishment of just compensation for tenant-owned improvements.* Just compensation for a tenant-owned improvement is the amount which the improvement contributes to the fair market value of the whole Property or its salvage value, whichever is greater. (Salvage value is defined at § 24.2(s).)

(d) *Special conditions.* No payment shall be made to a tenant-owner for any real property improvement unless:

(1) The tenant-owner, in consideration for the payment, assigns, transfers, and releases to the Agency all of the tenant-owner's right, title, and interest in the improvement; and

(2) The owner of the real Property on which the improvement is located disclaims all interest in the improvement; and

(3) The payment does not result in the duplication of any compensation otherwise authorized by law.

(e) *Alternative compensation.* Nothing in this Subpart shall be construed to deprive the tenant-owner of any right to reject payment under this Subpart and to obtain payment for such property interests in accordance with other applicable law.

**§ 24.106 Expenses incidental to transfer of title to the Agency.**

(a) The owner of the real property shall be reimbursed for all reasonable expenses the owner necessarily incurred for:

(1) Recording fees, transfer taxes, documentary stamps, evidence of title, boundary surveys, legal descriptions of the real property, and similar expenses incidental to conveying the real property to the Agency. However, the Agency is not required to pay costs solely required to perfect the owner's title to the real property; and

(2) Penalty costs and other charges for prepayment of any preexisting recorded mortgage entered into in good faith encumbering the real property; and

(3) The pro rata portion of any prepaid real property taxes which are allocable to the period after the Agency obtains title to the property or effective possession of it, whichever is earlier.

(b) Whenever feasible, the Agency shall pay these costs directly so that the owner will not have to pay such costs and then seek reimbursement from the Agency.

**§ 24.107 Certain litigation expenses.**

The owner of the real property shall be reimbursed for any reasonable expenses, including reasonable attorney, appraisal, and engineering fees, which the owner actually incurred because of a condemnation proceeding, if:

(a) The final judgment of the court is that the Agency cannot acquire the real property by condemnation; or

(b) The condemnation proceeding is abandoned by the Agency other than under an agreed-upon settlement; or

(c) The court having jurisdiction renders a judgment in favor of the owner in an inverse condemnation proceeding or the Agency effects a settlement of such proceeding.

**§ 24.108 Donations.**

An owner whose real property is being acquired may, after being fully informed by the Agency of the right to receive just compensation for such property, donate such property or any part thereof, any interest therein, or any compensation paid therefor, to the Agency as such owner shall determine. The Agency is responsible for assuring that an appraisal of the real property is obtained unless the owner releases the Agency from such obligation, except as provided in § 24.102(c)(2).

## Subpart C—General Relocation Requirements

**§ 24.201 Purpose.**

This Subpart prescribes general requirements governing the provision of relocation payments and other relocation assistance in this part.

**§ 24.202 Applicability.**

These requirements apply to the relocation of any displaced person as defined at § 24.2(g).

**§ 24.203 Relocation notices.**

(a) *General information notice.* As soon as feasible, a person scheduled to be displaced shall be furnished with a general written description of the displacing agency's relocation program which does at least the following:

(1) Informs the person that he or she may be displaced for the project and generally describes the relocation payment(s) for which the person may be eligible, the basic conditions of eligibility, and the procedures for obtaining the payment(s).

(2) Informs the person that he or she will be given reasonable relocation advisory services, including referrals to replacement properties, help in filing payment claims, and other necessary assistance to help the person successfully relocate.

(3) Informs the person that he or she will not be required to move without at least 90 days' advance written notice (see paragraph (c) of this section), and informs any person to be displaced from a dwelling that he or she cannot be required to move permanently unless at least one comparable replacement dwelling has been made available.

(4) Describes the person's right to appeal the Agency's determination as to a person's application for assistance for which a person may be eligible under this part.

(b) *Notice of relocation eligibility.* Eligibility for relocation assistance shall begin on the date of initiation of negotiations (defined in § 24.2(k)) for the occupied property. When this occurs, the Agency shall promptly notify all occupants in writing of their eligibility for applicable relocation assistance.

(c) *Ninety-day notice—(1) General.* No lawful occupant shall be required to move unless he or she has received at least 90 days advance written notice of the earliest date by which he or she may be required to move.

(2) *Timing of notice.* The displacing agency may issue the notice 90 days before it expects the person to be displaced or earlier.

(3) *Content of notice.* The 90-day notice shall either state a specific date as the earliest date by which the occupant may be required to move, or state that the occupant will receive a further notice indicating, at least 30 days in advance, the specific date by which he or she must move. If the 90-day notice is issued before a comparable replacement dwelling is made available, the notice must state clearly that the occupant will not have to move earlier than 90 days after such a dwelling is made available. (See § 24.204(a).)

(4) *Urgent need.* In unusual circumstances, an occupant may be required to vacate the property on less than 90 days advance written notice if the displacing agency determines that a 90-day notice is impracticable, such as when the person's continued occupancy of the property would constitute a substantial danger to health or safety. A copy of the Agency's determination shall be included in the applicable case file.

**§ 24.204 Availability of comparable replacement dwelling before displacement.**

(a) *General.* No person to be displaced shall be required to move from his or her dwelling unless at least one comparable replacement dwelling (defined at § 24.2(d)) has been made available to the person. Where possible, three or more comparable replacement dwellings shall be made available. A comparable replacement dwelling will be considered to have been made available to a person, if:

(1) The person is informed of its location; and

(2) The person has sufficient time to negotiate and enter into a purchase agreement or lease for the property; and

(3) Subject to reasonable safeguards, the person is assured of receiving the

VOL 54 ISS 40 MR 2 1989 UMI

relocation assistance and acquisition payment to which the person is entitled in sufficient time to complete the purchase or lease of the property.

(b) *Circumstances permitting waiver.* The Federal agency funding the project may grant a waiver of the policy in paragraph (a) of this section in any case where it is demonstrated that a person must move because of:

(1) A major disaster as defined in section 102(c) of the Disaster Relief Act of 1974 (42 U.S.C. 5121); or

(2) A presidentially declared national emergency; or

(3) Another emergency which requires immediate vacation of the real property, such as when continued occupancy of the displacement dwelling constitutes a substantial danger to the health or safety of the occupants or the public.

(c) *Basic conditions of emergency move.* Whenever a person is required to relocate for a temporary period because of an emergency as described in paragraph (b) of this section, the Agency shall:

(1) Take whatever steps are necessary to assure that the person is temporarily relocated to a decent, safe, and sanitary dwelling; and

(2) Pay the actual reasonable out-of-pocket moving expenses and any reasonable increase in rent and utility costs incurred in connection with the temporary relocation; and

(3) Make available to the displaced person as soon as feasible, at least one comparable replacement dwelling. (For purposes of filing a claim and meeting the eligibility requirements for a relocation payment, the date of displacement is the date the person moves from the temporarily occupied dwelling.)

**§ 24.205 Relocation planning, advisory services, and coordination.**

(a) *Relocation planning.* During the early stages of development, Federal and Federal-aid programs or projects shall be planned in such a manner that the problems associated with the displacement of individuals, families, businesses, farms, and nonprofit organizations are recognized and solutions are developed to minimize the adverse impacts of displacement. Such planning, where appropriate, shall precede any action by an Agency which will cause displacement, and should be scoped to the complexity and nature of the anticipated displacing activity including an evaluation of program resources available to carry out timely and orderly relocations. Planning may involve a relocation survey or study which may include the following:

(1) An estimate of the number of households to be displaced including information such as owner/tenant status, estimated value and rental rates of properties to be acquired, family characteristics, and special consideration of the impacts on minorities, the elderly, large families, and the handicapped when applicable.

(2) An estimate of the number of comparable replacement dwellings in the area (including price ranges and rental rates) that are expected to be available to fulfill the needs of those households displaced. When an adequate supply of comparable housing is not expected to be available, consideration of housing of last resort actions should be instituted.

(3) An estimate of the number, type and size of the businesses, farms, and nonprofit organizations to be displaced and the approximate number of employees that may be affected.

(4) Consideration of any special relocation advisory services that may be necessary from the displacing agency and other cooperating agencies.

(b) *Loans for planning and preliminary expenses.* In the event that an Agency elects to consider using the duplicative provision in section 215 of the Uniform Act which permits the use of project funds for loans to cover planning and other preliminary expenses for the development of additional housing, the lead agency will establish criteria and procedures for such use upon the request of the Federal agency funding the program or project.

(c) *Relocation assistance advisory services*—(1) *General.* The Agency shall carry out a relocation assistance advisory program which satisfies the requirements of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d *et seq.*), Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3601 *et seq.*), and Executive Order 11063 (27 FR 11527, November 24, 1962), and offers the services described in paragraph (c)(2) of this section. If the Agency determines that a person occupying property adjacent to the real property acquired for the project is caused substantial economic injury because of such acquisition, it may offer advisory services to such person.

(2) *Services to be provided.* The advisory program shall include such measures, facilities, and services as may be necessary or appropriate in order to:

(i) Determine the relocation needs and preferences of each person to be displaced and explain the relocation payments and other assistance for which the person may be eligible, the related eligibility requirements, and the procedures for obtaining such assistance. This shall include a personal interview with each person.

(ii) Provide current and continuing information on the availability, purchase prices, and rental costs of comparable replacement dwellings, and explain that the person cannot be required to move unless at least one comparable replacement dwelling is made available as set forth in § 24.204(a).

(A) As soon as feasible, the Agency shall inform the person in writing of the specific comparable replacement dwelling and the price or rent used for establishing the upper limit of the replacement housing payment (see § 24.403 (a) and (b)) and the basis for the determination, so that the person is aware of the maximum replacement housing payment for which he or she may qualify.

(B) Where feasible, housing shall be inspected prior to being made available to assure that it meets applicable standards. (See § 24.2 (d) and (f).) If such an inspection is not made, the person to be displaced shall be notified that a replacement housing payment may not be made unless the replacement dwelling is subsequently inspected and determined to be decent, safe, and sanitary.

(C) Whenever possible, minority persons shall be given reasonable opportunities to relocate to decent, safe, and sanitary replacement dwellings, not located in an area of minority concentration, that are within their financial means. This policy, however, does not require an Agency to provide a person a larger payment than is necessary to enable a person to relocate to a comparable replacement dwelling.

(D) All persons, especially the elderly and handicapped, shall be offered transportation to inspect housing to which they are referred.

(iii) Provide current and continuing information on the availability, purchase prices, and rental costs of suitable commercial and farm properties and locations. Assist any person displaced from a business or farm operation to obtain and become established in a suitable replacement location.

(iv) Minimize hardships to persons in adjusting to relocation by providing counseling, advice as to other sources of assistance that may be available, and such other help as may be appropriate.

(v) Supply persons to be displaced with appropriate information concerning Federal and State housing programs, disaster loan and other programs administered by the Small Business Administration, and other Federal and State programs offering assistance to displaced persons, and technical help to persons applying for such assistance.

(vi) Any person who occupies property acquired by an Agency, when such occupancy began subsequent to the acquisition of the property, and the occupancy is permitted by a short term rental agreement or an agreement subject to termination when the property is needed for a program or project, shall be eligible for advisory services, as determined by the Agency.

(d) *Coordination of relocation activities.* Relocation activities shall be coordinated with project work and other displacement-causing activities to ensure that, to the extent feasible, persons displaced receive consistent treatment and the duplication of functions is minimized. (Also see § 24.8, Subpart A.)

**§ 24.206 Eviction for cause.**

Eviction for cause must conform to applicable state and local law. Any person who occupies the real property and is not in unlawful occupancy on the date of the initiation of negotiations, is presumed to be entitled to relocation payments and other assistance set forth in this part unless the Agency determines that:

(a) The person received an eviction notice prior to the initiation of negotiations and, as a result of that notice is later evicted; or

(b) The person is evicted after the initation of negotiations for serious or repeated violation of material terms of the lease or occupancy agreement; and

(c) In either case the eviction was not undertaken for the purpose of evading the obligation to make available the payments and other assistance set forth in this part.

For purposes of determining eligibility for relocation payments, the date of displacement is the date the person moves, or if later, the date a comparable replacement dwelling is made available. This section applies only to persons who would otherwise have been displaced by the project.

**§ 24.207 General requirements—claims for relocation payments.**

(a) *Documentation.* Any claim for a relocation payment shall be supported by such documentation as may be reasonably required to support expenses incurred, such as bills, certified prices, appraisals, or other evidence of such expenses. A displaced person must be provided reasonable assistance necessary to complete and file any required claim for payment.

(b) *Expeditious payments.* The Agency shall review claims in an expeditious manner. The claimant shall be promptly notified as to any additional documentation that is required to support the claim. Payment for a claim shall be made as soon as feasible following receipt of sufficient documentation to support the claim.

(c) *Advance payments.* If a person demonstrates the need for an advance relocation payment in order to avoid or reduce a hardship, the Agency shall issue the payment, subject to such safeguards as are appropriate to ensure that the objective of the payment is accomplished.

(d) *Time for filing*—(1) All claims for a relocation payment shall be filed with the Agency within 18 months after:

(i) For tenants, the date of displacement;

(ii) For owners, the date of displacement or the date of the final payment for the acquisition of the real property, whichever is later.

(2) This time period shall be waived by the Agency for good cause.

(e) *Multiple occupants of one displacement dwelling.* If two or more occupants of the displacement dwelling move to separate replacement dwellings, each occupant is entitled to a reasonable prorated share, as determined by the Agency, of any relocation payments that would have been made if the occupants moved together to a comparable replacement dwelling. However, if the Agency determines that two or more occupants maintained separate households within the same dwelling, such occupants have separate entitlements to relocation payments.

(f) *Deductions from relocation payments.* An Agency shall deduct the amount of any advance relocation payment from the relocation payment(s) to which a displaced person is otherwise entitled. Similarly, a Federal agency shall, and a State agency may, deduct from relocation payments any rent that the displaced person owes the Agency; provided that no deduction shall be made if it would prevent the displaced person from obtaining a comparable replacement dwelling as required by § 24.204. The Agency shall not withhold any part of a relocation payment to a displaced person to satisfy an obligation to any other creditor.

(g) *Notice of denial of claim.* If the Agency disapproves all or part of a payment claimed or refuses to consider the claim on its merits because of untimely filing or other grounds, it shall promptly notify the claimant in writing of its determination, the basis for its determination, and the procedures for appealing that determination.

**§ 24.208 Relocation payments not considered as income.**

No relocation payment received by a displaced person under this part shall be considered as income for the purpose of the Internal Revenue Code of 1954, which has been redesignated as the Internal Revenue Code of 1986 or for the purpose of determining the eligibility or the extent of eligibility of any person for assistance under the Social Security Act or any other Federal law, except for any Federal law providing low-income housing assistance.

## Subpart D—Payments for Moving and Related Expenses

**§ 24.301 Payment for actual reasonable moving and related expenses—residential moves.**

Any displaced owner-occupant or tenant of a dwelling who qualifies as a displaced person (defined at § 24.2(g)) is entitled to payment of his or her actual moving and related expenses, as the Agency determines to be reasonable and necessary, including expenses for:

(a) Transportation of the displaced person and personal property. Transportation costs for a distance beyond 50 miles are not eligible, unless the Agency determines that relocation beyond 50 miles is justified.

(b) Packing, crating, unpacking, and uncrating of the personal property.

(c) Disconnecting, dismantling, removing, reassembling, and reinstalling relocated household appliances, and other personal property.

(d) Storage of the personal property for a period not to exceed 12 months, unless the Agency determines that a longer period is necessary.

(e) Insurance for the replacement value of the property in connection with the move and necessary storage.

(f) The replacement value of property lost, stolen, or damaged in the process of moving (not through the fault or negligence of the displaced person, his or her agent, or employee) where insurance covering such loss, theft, or damage is not reasonably available.

(g) Other moving-related expenses that are not listed as ineligible under § 24.305, as the Agency determines to be reasonable and necessary.

**§ 24.302 Fixed payment for moving expenses—residential moves.**

Any person displaced from a dwelling or a seasonal residence is entitled to receive an expense and dislocation allowance as an alternative to a payment for actual moving and related expenses under § 24.301. This allowance shall be determined according to the applicable schedule approved by the

VOL 54 ISS 40 MR 2 1989 UMI

Federal Highway Administration. This includes a provision that the expense and dislocation allowance to a person with minimal personal possessions who is in occupancy of a dormitory style room shared by two or more other unrelated persons or a person whose residential move is performed by an agency at no cost to the person shall be limited to $50.

**§ 24.303 Payment for actual reasonable moving and related expenses—nonresidential moves.**

*(a) Eligible costs.* Any business or farm operation which qualifies as a displaced person (defined at § 24.2(g)) is entitled to payment for such actual moving and related expenses, as the Agency determines to be reasonable and necessary, including expenses for:

(1) Transportation of personal property. Transportation costs for a distance beyond 50 miles are not eligible, unless the Agency determines that relocation beyond 50 miles is justified.

(2) Packing, crating, unpacking, and uncrating of the personal property.

(3) Disconnecting, dismantling, removing, reassembling, and reinstalling relocated machinery, equipment, and other personal property, including substitute personal property described at § 24.303(a)(12). This includes connection to utilities available nearby. It also includes modifications to the personal property necessary to adapt it to the replacement structure, the replacement site, or the utilities at the replacement site, and modifications necessary to adapt the utilities at the replacement site to the personal property. (Expenses for providing utilities from the right-of-way to the building or improvement are excluded.)

(4) Storage of the personal property for a period not to exceed 12 months, unless the Agency determines that a longer period is necessary.

(5) Insurance for the replacement value of the personal property in connection with the move and necessary storage.

(6) Any license, permit, or certification required of the displaced person at the replacement location. However, the payment may be based on the remaining useful life of the existing license, permit, or certification.

(7) The replacement value of property lost, stolen, or damaged in the process of moving (not through the fault or negligence of the displaced person, his or her agent, or employee) where insurance covering such loss, theft, or damage is not reasonably available.

(8) Professional services necessary for:

(i) Planning the move of the personal property,

(ii) Moving the personal property, and

(iii) Installing the relocated personal property at the replacement location.

(9) Relettering signs and replacing stationery on hand at the time of displacement that are made obsolete as a result of the move.

(10) Actual direct loss of tangible personal property incurred as a result of moving or discontinuing the business or farm operation. The payment shall consist of the lesser of:

(i) The fair market value of the item for continued use at the displacement site, less the proceeds from its sale. (To be eligible for payment, the claimant must make a good faith effort to sell the personal property, unless the Agency determines that such effort is not necessary. When payment for property loss is claimed for goods held for sale, the fair market value shall be based on the cost of the goods to the business, not the potential selling price.); or

(ii) The estimated cost of moving the item, but with no allowance for storage. (If the business or farm operation is discontinued, the estimated cost shall be based on a moving distance of 50 miles.)

(11) The reasonable cost incurred in attempting to sell an item that is not to be relocated.

(12) Purchase of substitute personal property. If an item of personal property which is used as part of a business or farm operation is not moved but is promptly replaced with a substitute item that performs a comparable function at the replacement site, the displaced person is entitled to payment of the lesser of:

(i) The cost of the substitute item, including installation costs at the replacement site, minus any proceeds from the sale or trade-in of the replaced item; or

(ii) The estimated cost of moving and reinstalling the replaced item but with no allowance for storage. At the Agency's discretion, the estimated cost for a low cost or uncomplicated move may be based on a single bid or estimate.

(13) Searching for a replacement location. A displaced business or farm operation is entitled to reimbursement for actual expenses, not to exceed $1,000, as the Agency determines to be reasonable, which are incurred in searching for a replacement location, including:

(i) Transportation.

(ii) Meals and lodging away from home.

(iii) Time spent searching, based on reasonable salary or earnings.

(iv) Fees paid to a real estate agent or broker to locate a replacement site, exclusive of any fees or commissions related to the purchase of such site.

(14) Other moving-related expenses that are not listed as ineligible under § 24.305, as the Agency determines to be reasonable and necessary.

(b) *Notification and inspection.* The following requirements apply to payments under this section:

(1) The Agency shall inform the displaced person, in writing, of the requirements of paragraphs (b) (2) and (3) of this section as soon as possible after the initiation of negotiations. This information may be included in the relocation information provided to the displaced person as set forth in § 24.203.

(2) The displaced person must provide the Agency reasonable advance written notice of the approximate date of the start of the move or disposition of the personal property and a list of the items to be moved. However, the Agency may waive this notice requirement after documenting its file accordingly.

(3) The displaced person must permit the Agency to make reasonable and timely inspections of the personal property at both the displacement and replacement sites and to monitor the move.

(c) *Self moves.* If the displaced person elects to take full responsibility for the move of the business or farm operation, the Agency may make a payment for the person's moving expenses in an amount not to exceed the lower of two acceptable bids or estimates obtained by the Agency or prepared by qualified staff. At the Agency's discretion, a payment for a low cost or uncomplicated move may be based on a single bid or estimate.

(d) *Transfer of ownership.* Upon request and in accordance with applicable law, the claimant shall transfer to the Agency ownership of any personal property that has not been moved, sold, or traded in.

(e) *Advertising signs.* The amount of a payment for direct loss of an advertising sign which is personal property shall be the lesser of:

(1) The depreciated reproduction cost of the sign, as determined by the Agency, less the proceeds from its sale; or

(2) The estimated cost of moving the sign, but with no allowance for storage.

**§ 24.304 Reestablishment expenses—nonresidential moves.**

In addition to the payments available under § 24.303 of this subpart, a small business, as defined in § 24.2(t), farm or nonprofit organization may be eligible to

receive a payment, not to exceed $10,000, for expenses actually incurred in relocating and reestablishing such small business, farm or nonprofit organization at a replacement site.

(a) *Eligible expenses.* Reestablishment expenses must be reasonable and necessary, as determined by the Agency. They may include, but are not limited to, the following:

(1) Repairs or improvements to the replacement real property as required by Federal, State or local law, code or ordinance.

(2) Modifications to the replacement property to accommodate the business operation or make replacement structures suitable for conducting the business.

(3) Construction and installation costs, not to exceed $1,500 for exterior signing to advertise the business.

(4) Provision of utilities from right-of-way to improvements on the replacement site.

(5) Redecoration or replacement of soiled or worn surfaces at the replacement site, such as paint, panelling, or carpeting.

(6) Licenses, fees and permits when not paid as part of moving expenses.

(7) Feasibility surveys, soil testing and marketing studies.

(8) Advertisement of replacement location, not to exceed $1,500.

(9) Professional services in connection with the purchase or lease of a replacement site.

(10) Estimated increased costs of operation during the first 2 years at the replacement site, not to exceed $5,000, for such items as:

(i) Lease or rental charges,

(ii) Personal or real property taxes,

(iii) Insurance premiums, and

(iv) Utility charges, excluding impact fees.

(11) Impact fees or one-time assessments for anticipated heavy utility usage.

(12) Other items that the Agency considers essential to the reestablishment of the business.

(13) Expenses in excess of the regulatory maximums set forth in paragraphs (a) (3), (8) and (10) of this section may be considered eligible if large and legitimate disparities exist between costs of operation at the displacement site and costs of operation at an otherwise similar replacement site. In such cases the regulatory limitation for reimbursement of such costs may, at the request of the Agency, be waived by the Federal agency funding the program or project, but in no event shall total costs payable under this section exceed the $10,000 statutory maximum.

(b) *Ineligible expenses.* The following is a nonexclusive listing of reestablishment expenditures not considered to be reasonable, necessary, or otherwise eligible:

(1) Purchase of capital assets, such as, office furniture, filing cabinets, machinery, or trade fixtures.

(2) Purchase of manufacturing materials, production supplies, product inventory, or other items used in the normal course of the business operation.

(3) Interior or exterior refurbishments at the replacement site which are for aesthetic purposes, except as provided in paragraph (a)(5) of this section.

(4) Interest on money borrowed to make the move or purchase the replacement property.

(5) Payment to a part-time business in the home which does not contribute materially to the household income.

**§ 24.305 Ineligible moving and related expenses.**

A displaced person is not entitled to payment for:

(a) The cost of moving any structure or other real property improvement in which the displaced person reserved ownership. However, this part does not preclude the computation under § 24.401(c)(4)(iii); or

(b) Interest on a loan to cover moving expenses; or

(c) Loss of goodwill; or

(d) Loss of profits; or

(e) Loss of trained employees; or

(f) Any additional operating expenses of a business or farm operation incurred because of operating in a new location except as provided in § 24.304(a)(10); or

(g) Personal injury; or

(h) Any legal fee or other cost for preparing a claim for a relocation payment or for representing the claimant before the Agency; or

(i) Expenses for searching for a replacement dwelling; or

(j) Physical changes to the real property at the replacement location of a business or farm operation except as provided in §§ 24.303(a)(3) and § 24.304(a); or

(k) Costs for storage of personal property on real property already owned or leased by the displaced person.

**§ 24.306 Fixed payment for moving expenses—nonresidential moves.**

(a) *Business.* A displaced business may be eligible to choose a fixed payment in lieu of the payments for actual moving and related expenses, and actual reasonable reestablishment expenses provided by §§ 24.303 and 24.304. Such fixed payment, except for payment to a nonprofit organization, shall equal the average annual net earnings of the business, as computed in accordance with paragraph (e) of this section, but not less than $1,000 nor more than $20,000. The displaced business is eligible for the payment if the Agency determines that:

(1) The business owns or rents personal property which must be moved in connection with such displacement and for which an expense would be incurred in such move; and, the business vacates or relocates from its displacement site.

(2) The business cannot be relocated without a substantial loss of its existing patronage (clientele or net earnings). A business is assumed to meet this test unless the Agency determines that it will not suffer a substantial loss of its existing patronage; and

(3) The business is not part of a commercial enterprise having more than three other entities which are not being acquired by the Agency, and which are under the same ownership and engaged in the same or similar business activities.

(4) The business is not operated at a displacement dwelling solely for the purpose of renting such dwelling to others.

(5) The business is not operated at the displacement site solely for the purpose of renting the site to others.

(6) The business contributed materially to the income of the displaced person during the 2 taxable years prior to displacement (see § 24.2(e)).

(b) *Determining the number of businesses.* In determining whether two or more displaced legal entities constitute a single business which is entitled to only one fixed payment, all pertinent factors shall be considered, including the extent to which:

(1) The same premises and equipment are shared;

(2) Substantially identical or interrelated business functions are carried out and business and financial affairs are commingled;

(3) The entities are held out to the public, and to those customarily dealing with them, as one business; and

(4) The same person or closely related persons own, control, or manage the affairs of the entities.

(c) *Farm operation.* A displaced farm operation (defined at § 24.2(i)) may choose a fixed payment, in lieu of the payments for actual moving and related expenses and actual reasonable reestablishment expenses, in an amount equal to its average annual net earnings

VOL 54 ISS 40 MR 2 1989 UMI

as computed in accordance with paragraph (e) of this section, but not less than $1,000 nor more than $20,000. In the case of a partial acquisition of land which was a farm operation before the acquisition, the fixed payment shall be made only if the Agency determines that:

(1) The acquisition of part of the land caused the operator to be displaced from the farm operation on the remaining land; or

(2) The partial acquisition caused a substantial change in the nature of the farm operation.

(d) *Nonprofit organization.* A displaced nonprofit organization may choose a fixed payment of $1,000 to $20,000, in lieu of the payments for actual moving and related expenses and actual reasonable reestablishment expenses, if the Agency determines that it cannot be relocated without a substantial loss of existing patronage (membership or clientele). A nonprofit organization is assumed to meet this test, unless the Agency demonstrates otherwise. Any payment in excess of $1,000 must be supported with financial statements for the two 12-month periods prior to the acquisition. The amount to be used for the payment is the average of 2 years annual gross revenues less administrative expenses. (See Appendix A of this part).

(e) *Average annual net earnings of a business or farm operation.* The average annual net earnings of a business or farm operation are one-half of its net earnings before Federal, State, and local income taxes during the 2 taxable years immediately prior to the taxable year in which it was displaced. If the business or farm was not in operation for the full 2 taxable years prior to displacement, net earnings shall be based on the actual period of operation at the displacement site during the 2 taxable years prior to displacement, projected to an annual rate. Average annual net earnings may be based upon a different period of time when the Agency determines it to be more equitable. Net earnings include any compensation obtained from the business or farm operation by its owner, the owner's spouse, and dependents. The displaced person shall furnish the Agency proof of net earnings through income tax returns, certified financial statements, or other reasonable evidence which the Agency determines is satisfactory.

**§ 24.307 Discretionary utility relocation payments.**

(a) Whenever a program or project undertaken by a displacing agency causes the relocation of a utility facility (see §§ 24.2 (aa) and (bb)) and the relocation of the facility creates extraordinary expenses for its owner, the displacing agency may, at its option, make a relocation payment to the owner for all or part of such expenses, if the following criteria are met:

(1) The utility facility legally occupies State or local government property, or property over which the State or local government has an easement or right-of-way; and

(2) The utility facility's right of occupancy thereon is pursuant to State law or local ordinance specifically authorizing such use, or where such use and occupancy has been granted through a franchise, use and occupancy permit, or other similar agreement; and

(3) Relocation of the utility facility is required by and is incidental to the primary purpose of the project or program undertaken by the displacing agency; and

(4) There is no Federal law, other than the Uniform Act, which clearly establishes a policy for the payment of utility moving costs that is applicable to the displacing agency's program or project; and

(5) State or local government reimbursement for utility moving costs or payment of such costs by the displacing agency is in accordance with State law.

(b) For the purposes of this section, the term "extraordinary expenses" means those expenses which, in the opinion of the displacing agency, are not routine or predictable expenses relating to the utility's occupancy of rights-of-way, and are not ordinarily budgeted as operating expenses, unless the owner of the utility facility has explicitly and knowingly agreed to bear such expenses as a condition for use of the property, or has voluntarily agreed to be responsible for such expenses.

(c) A relocation payment to a utility facility owner for moving costs under this section may not exceed the cost to functionally restore the service disrupted by the federally assisted program or project, less any increase in value of the new facility and salvage value of the old facility. The displacing agency and the utility facility owner shall reach prior agreement on the nature of the utility relocation work to be accomplished, the eligibility of the work for reimbursement, the responsibilities for financing and accomplishing the work, and the method of accumulating costs and making payment. (See Appendix A, of this part, § 24.307.)

## Subpart E—Replacement Housing Payments

**§ 24.401 Replacement housing payment for 180-day homeowner-occupants.**

(a) *Eligibility.* A displaced person is eligible for the replacement housing payment for a 180-day homeowner-occupant if the person:

(1) Has actually owned and occupied the displacement dwelling for not less than 180 days immediately prior to the initiation of negotiations; and

(2) Purchases and occupies a decent, safe, and sanitary replacement dwelling within one year after the later of the following dates (except that the Agency may extend such one year period for good cause):

(i) The date the person receives final payment for the displacement dwelling or, in the case of condemnation, the date the full amount of the estimate of just compensation is deposited in the court, or

(ii) The date the displacing agency's obligation under § 24.204 is met.

(b) *Amount of payment.* The replacement housing payment for an eligible 180-day homeowner-occupant may not exceed $22,500. (See also § 24.404.) The payment under this subpart is limited to the amount necessary to relocate to a comparable replacement dwelling within one year from the date the displaced homeowner-occupant is paid for the displacement dwelling, or the date a comparable replacement dwelling is made available to such person, whichever is later. The payment shall be the sum of:

(1) The amount by which the cost of a replacement dwelling exceeds the acquisition cost of the displacement dwelling, as determined in accordance with paragraph (c) of this section; and

(2) The increased interest costs and other debt service costs which are incurred in connection with the mortgage(s) on the replacement dwelling, as determined in accordance with paragraph (d) of this section; and

(3) The reasonable expenses incidental to the purchase of the replacement dwelling, as determined in accordance with paragraph (e) of this section.

(c) *Price differential*—(1) *Basic computation.* The price differential to be paid under paragraph (b)(1) of this section is the amount which must be added to the acquisition cost of the displacement dwelling to provide a total amount equal to the lesser of:

(i) The reasonable cost of a comparable replacement dwelling as determined in accordance with § 24.403(a); or

(ii) The purchase price of the decent, safe, and sanitary replacement dwelling actually purchased and occupied by the displaced person.

(2) *Mixed-use and multifamily properties.* If the displacement dwelling was part of a property that contained another dwelling unit and/or space used for non-residential purposes, and/or is located on a lot larger than typical for residential purposes, only that portion of the acquisition payment which is actually attributable to the displacement dwelling shall be considered its acquisition cost when computing the price differential.

(3) *Insurance proceeds.* To the extent necessary to avoid duplicate compensation, the amount of any insurance proceeds received by a person in connection with a loss to the displacement dwelling due to a catastrophic occurrence (fire, flood, etc.) shall be included in the acquisition cost of the displacement dwelling when computing the price differential. (Also see § 24.3.)

(4) *Owner retention of displacement dwelling.* If the owner retains ownership of his or her dwelling, moves it from the displacement site, and reoccupies it on a replacement site, the purchase price of the replacement dwelling shall be the sum of:

(i) The cost of moving and restoring the dwelling to a condition comparable to that prior to the move; and

(ii) The cost of making the unit a decent, safe, and sanitary replacement dwelling (defined at § 24.2(f)); and

(iii) The current fair market value for residential use of the replacement site (see Appendix A of this part, § 24.401(c)(4)(iii)), unless the claimant rented the displacement site and there is a reasonable opportunity for the claimant to rent a suitable replacement site; and

(iv) The retention value of the dwelling, if such retention value is reflected in the "acquisition cost" used when computing the replacement housing payment.

(d) *Increased mortgage interest costs.* The displacing agency shall determine the factors to be used in computing the amount to be paid to a displaced person under paragraph (b)(2) of this section. The payment for increased mortgage interest cost shall be the amount which will reduce the mortgage balance on a new mortgage to an amount which could be amortized with the same monthly payment for principal and interest as that for the mortgage(s) on the displacement dwelling. In addition, payments shall include other debt service costs, if not paid as incidental costs, and shall be based only on bona fide mortgages that were valid liens on the displacement dwelling for at least 180 days prior to the initiation of negotiations. Paragraphs (d) (1) through (5) of this section shall apply to the computation of the increased mortgage interest costs payment, which payment shall be contingent upon a mortgage being placed on the replacement dwelling.

(1) The payment shall be based on the unpaid mortgage balance(s) on the displacement dwelling; however, in the event the person obtains a smaller mortgage than the mortgage balance(s) computed in the buydown determination the payment will be prorated and reduced accordingly. (See Appendix A of this part.) In the case of a home equity loan the unpaid balance shall be that balance which existed 180 days prior to the initiation of negotiations or the balance on the date of acquisition, whichever is less.

(2) The payment shall be based on the remaining term of the mortgage(s) on the displacement dwelling or the term of the new mortgage, whichever is shorter.

(3) The interest rate on the new mortgage used in determining the amount of the payment shall not exceed the prevailing fixed interest rate for conventional mortgages currently charged by mortgage lending institutions in the area in which the replacement dwelling is located.

(4) Purchaser's points and loan origination or assumption fees, but not seller's points, shall be paid to the extent:

(i) They are not paid as incidental expenses;

(ii) They do not exceed rates normal to similar real estate transactions in the area;

(iii) The Agency determines them to be necessary; and

(iv) The computation of such points and fees shall be based on the unpaid mortgage balance on the displacement dwelling, less the amount determined for the reduction of such mortgage balance under this section.

(5) The displaced person shall be advised of the approximate amount of this payment and the conditions that must be met to receive the payment as soon as the facts relative to the person's current mortgage (s) are known and the payment shall be made available at or near the time of closing on the replacement dwelling in order to reduce the new mortgage as intended.

(e) *Incidental expenses.* The incidental expenses to be paid under paragraph (b)(3) of this section or § 24.402(c)(1) are those necessary and reasonable costs actually incurred by the displaced person incident to the purchase of a replacement dwelling, and customarily paid by the buyer, including:

(1) Legal, closing, and related costs, including those for title search, preparing conveyance instruments, notary fees, preparing surveys and plats, and recording fees.

(2) Lender, FHA, or VA application and appraisal fees.

(3) Loan origination or assumption fees that do not represent prepaid interest.

(4) Certification of structural soundness and termite inspection when required.

(5) Credit report.

(6) Owner's and mortgagee's evidence of title, e.g., title insurance, not to exceed the costs for a comparable replacement dwelling.

(7) Escrow agent's fee.

(8) State revenue or documentary stamps, sales or transfer taxes (not to exceed the costs for a comparable replacement dwelling).

(9) Such other costs as the Agency determines to be incidental to the purchase.

(f) *Rental assistance payment for 180-day homeowner.* A 180-day homeowner-occupant, who could be eligible for a replacement housing payment under paragraph (a) of this section but elects to rent a replacement dwelling, is eligible for a rental assistance payment not to exceed $5,250, computed and disbursed in accordance with § 24.402(b).

**§ 24.402 Replacement housing payment for 90-day occupants.**

(a) *Eligibility.* A tenant or owner-occupant displaced from a dwelling is entitled to a payment not to exceed $5,250 for rental assistance, as computed in accordance with paragraph (b) of this section, or downpayment assistance, as computed in accordance with paragraph (c) of this section, if such displaced person:

(1) Has actually and lawfully occupied the displacement dwelling for at least 90 days immediately prior to the initiation of negotiations; and

(2) Has rented, or purchased, and occupied a decent, safe, and sanitary replacement dwelling within 1 year (unless the Agency extends this period for good cause) after:

(i) For a tenant, the date he or she moves from the displacement dwelling, or

(ii) For an owner-occupant, the later of:

(A) The date he or she receives final payment for the displacement dwelling, or in the case of condemnation, the date

VOL 54 ISS 40 MR 2 1989 UMI

the full amount of the estimate of just compensation is deposited with the court; or

(B) The date he or she moves from the displacement dwelling.

(b) *Rental assistance payment*—(1) *Amount of payment.* An eligible displaced person who rents a replacement dwelling is entitled to a payment not to exceed $5,250 for rental assistance. (See also § 24.404.) Such payment shall be 42 times the amount obtained by subtracting the base monthly rental for the displacement dwelling from the lesser of:

(i) The monthly rent and estimated average monthly cost of utilities for a comparable replacement dwelling; or

(ii) The monthly rent and estimated average monthly cost of utilities for the decent, safe, and sanitary replacement dwelling actually occupied by the displaced person.

(2) *Base monthly rental for displacement dwelling.* The base monthly rental for the displacement dwelling is the lesser of:

(i) The average monthly cost for rent and utilities at the displacement dwelling for a reasonable period prior to displacement, as determined by the Agency. (For an owner-occupant, use the fair market rent for the displacement dwelling. For a tenant who paid little or no rent for the displacement dwelling, use the fair market rent, unless its use would result in a hardship because of the person's income or other circumstances); or

(ii) Thirty (30) percent of the person's average gross household income. (If the person refuses to provide appropriate evidence of income or is a dependent, the base monthly rental shall be established solely on the criteria in paragraph (b)(2)(i) of this section. A full time student or resident of an institution may be assumed to be a dependent, unless the person demonstrates otherwise.); or

(iii) The total of the amounts designated for shelter and utilities if receiving a welfare assistance payment from a program that designates the amounts for shelter and utilities.

(3) *Manner of disbursement.* A rental assistance payment may, at the Agency's discretion, be disbursed in either a lump sum or in installments. However, except as limited by § 24.403(f), the full amount vests immediately, whether or not there is any later change in the person's income or rent, or in the condition or location of the person's housing.

(c) *Downpayment assistance payment*—(1) *Amount of payment.* An eligible displaced person who purchases a replacement dwelling is entitled to a downpayment assistance payment in the amount the person would receive under paragraph (b) of this section if the person rented a comparable replacement dwelling. At the discretion of the Agency, a downpayment assistance payment may be increased to any amount not to exceed $5,250. However, the payment to a displaced homeowner shall not exceed the amount the owner would receive under § 24.401(b) if he or she met the 180-day occupancy requirement. An Agency's discretion to provide the maximum payment shall be exercised in a uniform and consistent manner, so that eligible displaced persons in like circumstances are treated equally. A displaced person eligible to receive a payment as a 180-day owner-occupant under § 24.401(a) is not eligible for this payment. (See also Appendix A of this part, § 24.402(c).)

(2) *Application of payment.* The full amount of the replacement housing payment for downpayment assistance must be applied to the purchase price of the replacement dwelling and related incidental expenses.

**§ 24.403 Additional rules governing replacement housing payments.**

(a) *Determining cost of comparable replacement dwelling.* The upper limit of a replacement housing payment shall be based on the cost of a comparable replacement dwelling (defined at § 24.2(d)).

(1) If available, at least three comparable replacement dwellings shall be examined and the payment computed on the basis of the dwelling most nearly representative of, and equal to, or better than, the displacement dwelling. An adjustment shall be made to the asking price of any dwelling, to the extent justified by local market data (see also § 24.205(a)(2) and Appendix A of this part). An obviously overpriced dwelling may be ignored.

(2) If the site of the comparable replacement dwelling lacks a major exterior attribute of the displacement dwelling site, (e.g., the site is significantly smaller or does not contain a swimming pool), the value of such attribute shall be subtracted from the acquisition cost of the displacement dwelling for purposes of computing the payment.

(3) If the acquisition of a portion of a typical residential property causes the displacement of the owner from the dwelling and the remainder is a buildable residential lot, the Agency may offer to purchase the entire property. If the owner refuses to sell the remainder to the Agency, the fair market value of the remainder may be added to the acquisition cost of the displacement dwelling for purposes of computing the replacement housing payment.

(4) To the extent feasible, comparable replacement dwellings shall be selected from the neighborhood in which the displacement dwelling was located or, if that is not possible, in nearby or similar neighborhoods where housing costs are generally the same or higher.

(b) *Inspection of replacement dwelling.* Before making a replacement housing payment or releasing a payment from escrow, the Agency or its designated representative shall inspect the replacement dwelling and determine whether it is a decent, safe, and sanitary dwelling as defined at § 24.2(f).

(c) *Purchase of replacement dwelling.* A displaced person is considered to have met the requirement to purchase a replacement dwelling, if the person:

(1) Purchases a dwelling; or

(2) Purchases and rehabilitates a substandard dwelling; or

(3) Relocates a dwelling which he or she owns or purchases; or

(4) Constructs a dwelling on a site he or she owns or purchases; or

(5) Contracts for the purchase or construction of a dwelling on a site provided by a builder or on a site the person owns or purchases.

(6) Currently owns a previously purchased dwelling and site, valuation of which shall be on the basis of current fair market value.

(d) *Occupancy requirements for displacement or replacement dwelling.* No person shall be denied eligibility for a replacement housing payment solely because the person is unable to meet the occupancy requirements set forth in these regulations for a reason beyond his or her control, including:

(1) A disaster, an emergency, or an imminent threat to the public health or welfare, as determined by the President, the Federal agency funding the project, or the displacing agency; or

(2) Another reason, such as a delay in the construction of the replacement dwelling, military reserve duty, or hospital stay, as determined by the Agency.

(e) *Conversion of payment.* A displaced person who initially rents a replacement dwelling and receives a rental assistance payment under § 24.402(b) is eligible to receive a payment under § 24.401 or § 24.402(c) if he or she meets the eligibility criteria for such payments, including purchase and occupancy within the prescribed 1-year period. Any portion of the rental assistance payment that has been disbursed shall be deducted from the payment computed under § 24.401 or § 24.402(c).

(f) *Payment after death.* A replacement housing payment is personal to the displaced person and upon his or her death the undisbursed portion of any such payment shall not be paid to the heirs or assigns, except that:

(1) The amount attributable to the displaced person's period of actual occupancy of the replacement housing shall be paid.

(2) The full payment shall be disbursed in any case in which a member of a displaced family dies and the other family member(s) continue to occupy a decent, safe, and sanitary replacement dwelling.

(3) Any portion of a replacement housing payment necessary to satisfy the legal obligation of an estate in connection with the selection of a replacement dwelling by or on behalf of a deceased person shall be disbursed to the estate.

**§ 24.404 Replacement housing of last resort.**

(a) *Determination to provide replacement housing of last resort.* Whenever a program or project cannot proceed on a timely basis because comparable replacement dwellings are not available within the monetary limits for owners or tenants, as specified in § 24.401 or § 24.402, as appropriate, the Agency shall provide additional or alternative assistance under the provisions of this subpart. Any decision to provide last resort housing assistance must be adequately justified either:

(1) On a case-by-case basis, for good cause, which means that appropriate consideration has been given to:

(i) The availability of comparable replacement housing in the program or project area; and

(ii) The resources available to provide comparable replacement housing; and

(iii) The individual circumstances of the displaced person; or

(2) By a determination that:

(i) There is little, if any, comparable replacement housing available to displaced persons within an entire program or project area; and, therefore, last resort housing assistance is necessary for the area as a whole; and

(ii) A program or project cannot be advanced to completion in a timely manner without last resort housing assistance; and

(iii) The method selected for providing last resort housing assistance is cost effective, considering all elements which contribute to total program or project costs. (Will project delay justify waiting for less expensive comparable replacement housing to become available?)

(b) *Basic rights of persons to be displaced.* Notwithstanding any provision of this subpart, no person shall be required to move from a displacement dwelling unless comparable replacement housing is available to such person. No person may be deprived of any rights the person may have under the Uniform Act or this part. The Agency shall not require any displaced person to accept a dwelling provided by the Agency under these procedures (unless the Agency and the displaced person have entered into a contract to do so) in lieu of any acquisition payment or any relocation payment for which the person may otherwise be eligible.

(c) *Methods of providing comparable replacement housing.* Agencies shall have broad latitude in implementing this subpart, but implementation shall be for reasonable cost, on a case-by-case basis unless an exception to case-by-case analysis is justified for an entire project.

(1) The methods of providing replacement housing of last resort include, but are not limited to:

(i) A replacement housing payment in excess of the limits set forth in § 24.401 or § 24.402. A rental assistance subsidy under this section may be provided in installments or in a lump sum at the Agency's discretion.

(ii) Rehabilitation of and/or additions to an existing replacement dwelling.

(iii) The construction of a new replacement dwelling.

(iv) The provision of a direct loan, which requires regular amortization or deferred repayment. The loan may be unsecured or secured by the real property. The loan may bear interest or be interest-free.

(v) The relocation and, if necessary, rehabilitation of a dwelling.

(vi) The purchase of land and/or a replacement dwelling by the displacing agency and subsequent sale or lease to, or exchange with a displaced person.

(vii) The removal of barriers to the handicapped.

(viii) The change in status of the displaced person with his or her concurrence from tenant to homeowner when it is more cost effective to do so, as in cases where a downpayment may be less expensive than a last resort rental assistance payment.

(2) Under special circumstances, consistent with the definition of a comparable replacement dwelling, modified methods of providing replacement housing of last resort permit consideration of replacement housing based on space and physical characteristics different from those in the displacement dwelling (see Appendix A, of this part, § 24.404), including upgraded, but smaller replacement housing that is decent, safe, and sanitary and adequate to accommodate individuals or families displaced from marginal or substandard housing with probable functional obsolescence. In no event, however, shall a displaced person be required to move into a dwelling that is not functionally equivalent in accordance with § 24.2(d)(2).

(3) The agency shall provide assistance under this subpart to a displaced person who is not eligible to receive a replacement housing payment under §§ 24.401 and 24.402 because of failure to meet the length of occupancy requirement when comparable replacement rental housing is not available at rental rates within the person's financial means, which is 30 percent of the person's gross monthly household income. Such assistance shall cover a period of 42 months.

**Subpart F—Mobile Homes**

**§ 24.501 Applicability.**

This subpart describes the requirements governing the provision of relocation payments to a person displaced from a mobile home and/or mobile home site who meets the basic eligibility requirements of this part. Except as modified by this subpart, such a displaced person is entitled to a moving expense payment in accordance with Subpart D and a replacement housing payment in accordance with Subpart E to the same extent and subject to the same requirements as persons displaced from conventional dwellings.

**§ 24.502 Moving and related expenses—mobile homes.**

(a) A homeowner-occupant displaced from a mobile home or mobile homesite is entitled to a payment for the cost of moving his or her mobile home on an actual cost basis in accordance with § 24.301. A non-occupant owner of a rented mobile home is eligible for actual cost reimbursement under § 24.303. However, if the mobile home is not acquired, but the homeowner-occupant obtains a replacement housing payment under one of the circumstances described at § 24.503(a)(3), the owner is not eligible for payment for moving the mobile home, but may be eligible for a payment for moving personal property from the mobile home.

(b) The following rules apply to payments for actual moving expenses under § 24.301:

(1) A displaced mobile homeowner, who moves the mobile home to a

VOL 54 ISS 40 MR 2 1989 UMI

replacement site, is eligible for the reasonable cost of disassembling, moving, and reassembling any attached appurtenances, such as porches, decks, skirting, and awnings, which were not acquired, anchoring of the unit, and utility "hook-up" charges.

(2) If a mobile home requires repairs and/or modifications so that it can be moved and/or made decent, safe, and sanitary, and the Agency determines that it would be economically feasible to incur the additional expense, the reasonable cost of such repairs and/or modifications is reimbursable.

(3) A nonreturnable mobile home park entrance fee is reimbursable to the extent it does not exceed the fee at a comparable mobile home park, if the person is displaced from a mobile home park or the Agency determines that payment of the fee is necessary to effect relocation.

**§ 24.503 Replacement housing payment for 180-day mobile homeowner-occupants.**

(a) A displaced owner-occupant of a mobile home is entitled to a replacement housing payment, not to exceed $22,500, under § 24.401 if:

(1) The person both owned the displacement mobile home and occupied it on the displacement site for at least 180 days immediately prior to the initiation of negotiations;

(2) The person meets the other basic eligibility requirements at § 24.401(a); and

(3) The Agency acquires the mobile home and/or mobile home site, or the mobile home is not acquired by the Agency but the owner is displaced from the mobile home because the Agency determines that the mobile home:

(i) Is not and cannot economically be made decent, safe, and sanitary; or

(ii) Cannot be relocated without substantial damage or unreasonable cost; or

(iii) Cannot be relocated because there is no available comparable replacement site; or

(iv) Cannot be relocated because it does not meet mobile home park entrance requirements.

(b) If the mobile home is not acquired, and the Agency determines that it is not practical to relocate it, the acquisition cost of the displacement dwelling used when computing the price differential amount, described at § 24.401(c), shall include the salvage value or trade-in value of the mobile home, whichever is higher.

**§ 24.504 Replacement housing payment for 90-day mobile home occupants.**

A displaced tenant or owner-occupant of a mobile home is eligible for a replacement housing payment, not to exceed $5,250, under § 24.402 if:

(a) The person actually occupied the displacement mobile home on the displacement site for at least 90 days immediately prior to the initiation of negotiations;

(b) The person meets the other basic eligibility requirements at § 24.402(a); and

(c) The Agency acquires the mobile home and/or mobile home site, or the mobile home is not acquired by the Agency but the owner or tenant is displaced from the mobile home because of one of the circumstances described at § 24.503(a)(3).

**§ 24.505 Additional rules governing relocation payments to mobile home occupants.**

(a) *Replacement housing payment based on dwelling and site.* Both the mobile home and mobile home site must be considered when computing a replacement housing payment. For example, a displaced mobile home occupant may have owned the displacement mobile home and rented the site or may have rented the displacement mobile home and owned the site. Also, a person may elect to purchase a replacement mobile home and rent a replacement site, or rent a replacement mobile home and purchase a replacement site. In such cases, the total replacement housing payment shall consist of a payment for a dwelling and a payment for a site, each computed under the applicable section in Subpart E. However, the total replacement housing payment under Subpart E shall not exceed the maximum payment (either $22,500 or $5,250) permitted under the section that governs the computation for the dwelling. (See also § 24.403(b).)

(b) *Cost of comparable replacement dwelling*—(1) If a comparable replacement mobile home is not available, the replacement housing payment shall be computed on the basis of the reasonable cost of a conventional comparable replacement dwelling.

(2) If the Agency determines that it would be practical to relocate the mobile home, but the owner-occupant elects not to do so, the Agency may determine that, for purposes of computing the price differential under § 24.401(c), the cost of a comparable replacement dwelling is the sum of:

(i) The value of the mobile home,

(ii) The cost of any necessary repairs or modifications, and

(iii) The estimated cost of moving the mobile home to a replacement site.

(c) *Initiation of negotiations.* If the mobile home is not actually acquired, but the occupant is considered displaced under this part, the "initiation of negotiations" is the initiation of negotiations to acquire the land, or, if the land is not acquired, the written notification that he or she is a displaced person under this part.

(d) *Person moves mobile home.* If the owner is reimbursed for the cost of moving the mobile home under this part, he or she is not eligible to receive a replacement housing payment to assist in purchasing or renting a replacement mobile home. The person may, however, be eligible for assistance in purchasing or renting a replacement site.

(e) *Partial acquisition of mobile home park.* The acquisition of a portion of a mobile home park property may leave a remaining part of the property that is not adequate to continue the operation of the park. If the Agency determines that a mobile home located in the remaining part of the property must be moved as a direct result of the project, the owner and any tenant shall be considered a displaced person who is entitled to relocation payments and other assistance under this part.

## Subpart G—Certification

**§ 24.601 Purpose.**

This subpart permits a State Agency to fulfill its responsibilities under the Uniform Act by certifying that it shall operate in accordance with State laws and regulations which shall accomplish the purpose and effect of the Uniform Act, in lieu of providing the assurances required by § 24.4 of this part.

**§ 24.602 Certification application.**

(a) *General.* (1) The State governor, or his or her designee, on behalf of any State agency or agencies may apply for certification in accordance with this section.

(2) The governor may designate a lead agency to administer certification in accordance with this section.

(b) *Responsibilities of State agency*—(1) The State agency's application shall be submitted to the governor, or his or her designee, for approval or disapproval.

(2) The State agency application shall contain a statement that the State agency shall carry out the responsibilities imposed by the Uniform Act. The State agency application shall include a copy of the State laws and regulations which shall accomplish the purpose and effect of the Uniform Act.

(c) *Responsibilities of governor or his or her designee.* (1) The governor, or his or her designee, shall approve or disapprove the State agency's application.

(2) The governor, or his or her designee, shall have discretion to disapprove any State agency application.

(3) The governor, or his or her designee, shall analyze State law and regulations and shall certify that they accomplish the purpose and effect of the Uniform Act.

(4) The governor, or his or her designee, shall determine in writing whether the State agency's professional staffing is adequate to fully implement the State law and regulations.

(5) If the State agency's application is approved by the governor, or his or her designee, it shall be transmitted to the Federal agency providing financial assistance to the State agency, with an information copy to the Federal lead agency.

(6) When a determination is received from the Federal funding agency, the governor, or his or her designee, shall notify the State agency.

(d) *Responsibilities of Federal funding agency.* (1) The Federal funding agency shall accept the approved application for certification provided by the governor or his or her designee and shall not conduct an independent review unless or until future monitoring or other appropriate indicators reveal program deficiencies originating therefrom.

(2) The Federal funding agency shall transmit all complete, approved applications, for certification to the Federal lead agency.

(3) At the same time as transmission to the Federal lead agency or during the public comment period, the Federal funding agency shall provide to the lead agency its written assessment of the State agency's capabilities to operate under certification.

(4) The Federal funding agency shall promptly notify the governor, or his or her designee, of the Federal lead agency's determination described in paragraph (e)(2) of this section.

(5) The Federal funding agency shall recognize the State agency's certification within 30 days of the Federal lead agency's finding.

(e) *Responsibilities of Federal lead agency.* (1) The lead agency shall:

(i) Accept the approval provided by the governor, or his or her designee, and shall not conduct an independent review, except as provided for in paragraphs (e)(1)(ii), (iii) and (iv) of this section, unless future monitoring or other appropriate indicators reveal program deficiencies originating therefrom;

(ii) Analyze the extent to which the provisions of the applicable State laws and regulations accomplish the purpose and effect of the Uniform Act, with particular emphasis on the definition of a displaced person, the categories of assistance required, and the levels of assistance provided to persons in such categories;

(iii) Provide a 60-day period of public review and comment, and solicit and consider the views of interested general purpose local governments within the State, as well as the views of interested Federal and State agencies and consider all comments received as a result; and

(iv) Consider any extraordinary information it believes to be relevant.

(2) After considering all the information provided, the lead agency shall either make a finding that the State agency will carry out the Federal agency's Uniform Act responsibility in accordance with State laws and regulations which shall accomplish the same purpose and effect as the Uniform Act, or shall make a determination that a finding cannot be made; and shall so inform the Federal funding agency.

**§ 24.603 Monitoring and corrective action.**

(a) The Federal lead agency shall, in coordination with other Federal agencies, monitor from time to time State agency implementation of programs or projects conducted under the certification process and the State agency shall make available any information required for this purpose.

(b) A Federal agency that has accepted a State Agency's certification pursuant to this subpart should withhold its approval of any of its Federal financial assistance to any project, program, or activity, in progress or to be undertaken by such State agency, if it is found by the Federal agency that the State agency has failed to comply with the applicable State law and regulations implementing those provisions of the Uniform Act for which the State agency would otherwise have provided the assurances required by sections 210 and 305 of the Uniform Act. The Federal agency may withhold Federal financial assistance if the certifying State agency fails to comply with the applicable State law and regulations implementing other provisions of the Uniform Act. The Federal agency shall notify the lead agency at least 15 days prior to any decision to withhold funds under this subpart. The lead agency may consult with the Federal agency upon receiving such notification. The lead agency will also inform other Federal agencies which have accepted certification under this subpart from the same State agency of the pending action.

(c) A Federal agency may, after consultation with the lead agency, and notice to and consultation with the governor, or his or her designee, rescind any previous approval provided under this subpart if the certifying State agency fails to comply with its certification or with applicable State law and regulations. The Federal agency shall initiate consultation with the lead agency at least 30 days prior to any decision to rescind approval of a certification under this subpart. The lead agency will also inform other Federal agencies which have accepted a certification under this subpart from the same State agency, and will take whatever other action that may be appropriate.

(d) Section 103(b)(2) of the Uniform Act, as amended, requires that the head of the lead agency report biennially to the Congress on State agency implementation of section 103. To enable adequate preparation of the prescribed biennial report, the lead agency may require periodic information or data from affected Federal or State agencies.

## Appendix A to Part 24—Additional Information

This appendix provides additional information to explain the intent of certain provisions of this part.

### Subpart A—General

*Section 24.2 Definitions*

*Section 24.2(d)(2) Definition of comparable replacement dwelling.* The requirement in § 24.2(d)(2) that a comparable replacement dwelling be "functionally equivalent" to the displacement dwelling means that it must perform the same function, provide the same utility, and be capable of contributing to a comparable style of living as the displacement dwelling. While it need not possess every feature of the displacement dwelling, the principal features must be present.

For example, if the displacement dwelling contains a pantry and a similar dwelling is not available, a replacement dwelling with ample kitchen cupboards may be acceptable. Insulated and heated space in a garage might prove an adequate substitute for basement workshop space. A dining area may substitute for a separate dining room. Under some circumstances, attic space could substitute for basement space for storage purposes, and vice versa.

Only in unusual circumstances may a comparable replacement dwelling contain fewer rooms or, consequentially, less living space than the displacement dwelling. Such may be the case when a decent, safe, and sanitary replacement

BEST COPY AVAILABLE

VOL 54 ISS 40 MR 2 1989 UMI

dwelling (which by definition is "adequate to accommodate" the displaced person) may be found to be "functionally equivalent" to a larger but very run-down substandard displacement dwelling.

Section 24.2(d)(7) requires that a comparable replacement dwelling for a person who is not receiving assistance under any government housing program before displacement must be currently available on the private market without any subsidy under a government housing program.

A public housing unit may qualify as a comparable replacement dwelling only for a person displaced from a public housing unit; a privately-owned dwelling with a housing program subsidy tied to the unit may qualify as a comparable replacement dwelling only for a person displaced from a similarly subsidized unit or public housing; a housing program subsidy to a person (not tied to the building), such as a HU Section 8 Existing Housing Program Certificate or a Housing Voucher, may be reflected in an offer of a comparable replacement dwelling to a person receiving a similar subsidy or occupying a privately-owned subsidized unit or public housing unit before displacement.

However, nothing in this part prohibits an Agency from offering, or precludes a person from accepting, assistance under a government housing program, even if the person did not receive similar assistance before displacement. However, the Agency is obligated to inform the person of his or her options under this part. (If a person accepts assistance under a government housing program, the rental assistance payment under § 24.402 would be computed on the basis of the person's actual out-of-pocket cost for the replacement housing.)

*Section 24.2(g)(2) Persons not displaced.* Section 24.2(g)(2)(iv) recognizes that there are circumstances where the acquisition of real property takes place without the intent or necessity that an occupant of the property be permanently displaced. Because such occupants are not considered "displaced persons" under this part, great care must be exercised to ensure that they are treated fairly and equitably. For example, if the tenant-occupant of a dwelling will not be displaced, but is required to relocate temporarily in connection with the project, the temporarily-occupied housing must be decent, safe, and sanitary and the tenant must be reimbursed for all reasonable out-of-pocket expenses incurred in connection with the temporary relocation, including moving expenses and increased housing costs during the temporary relocation.

It is also noted that any person who disagrees with the Agency's determination that he or she is not a displaced person under this part may file an appeal in accordance with § 24.10.

*Section 24.2(k) Initiation of negotiations.* This section of the part; provides a special definition for acquisitions and displacements under Pub. L. 96-510 or Superfund. These activities differ under Superfund in that relocation may precede acquisition, the reverse of the normal sequence. Superfund is a program designed to clean up hazardous waste sites. When such a site is discovered, it may be necessary, in certain limited circumstances, to alert the public to the danger and to the advisability of moving immediately. If a decision is made later to permanently relocate such persons, those who had moved earlier would no longer be on site when a formal, written offer to acquire the property was made and thus would lose their eligibility for a replacement housing payment. In order to prevent this unfair outcome, we have provided a definition which is based on the public health advisory or announcement of permanent relocation.

*Section 24.3 No Duplication of Payments*

This section prohibits an Agency from making a payment to a person under these regulations that would duplicate another payment the person receives under Federal, State, or local law. The Agency is not required to conduct an exhaustive search for such other payments; it is only required to avoid creating a duplication based on the Agency's knowledge at the time a payment under these regulations is computed.

*Section 24.9 Recordkeeping and Reports*

*Section 24.9(c) Reports.* This paragraph allows Federal agencies to require the submission of a report on activities under the Uniform Act no more frequently than once every three years. The report, if required, will cover activities during the Federal fiscal year immediately prior to the submission date. In order to minimize the administrative burden on Agencies implementing this part, a basic report form (see Appendix B of this part) has been developed which, with only minor modifications, would be used in all Federal and federally-assisted programs or projects.

Subpart B—Real Property Acquisition

*Section 24.101 Applicability of Acquisition Requirements*

*Section 24.101(b) Less-than-full-fee interest in real property.* This provision provides a benchmark beyond which the requirements of the subpart clearly apply to leases. However, the Agency may apply the regulations to any less-than-full-fee acquisition which is short of 50 years but which in its judgment should be covered.

*Section 24.102 Basic Acquisition Policies*

*Section 24.102(d) Establishment of offer of just compensation.* The initial offer to the property owner may not be less than the amount of the Agency's approved appraisal, but may exceed that amount if the Agency determines that a greater amount reflects just compensation for the property.

*Section 24.102(f) Basic negotiation procedures.* It is intended that an offer to an owner be adequately presented, and that the owner be properly informed. Personal, face-to-face contact should take place, if feasible, but this section is not intended to require such contact in all cases.

*Section 24.102(i) Administrative settlement.* This section provides guidance on administrative settlement as an alternative to judicial resolution of a difference of opinion on the value of a property, in order to avoid unnecessary litigation and congestion in the courts.

All relevant facts and circumstances should be considered by an Agency official delegated this authority. Appraisers, including reviewing appraisers, must not be pressured to adjust their estimate of value for the purpose of justifying such settlements. Such action would invalidate the appraisal process.

*Section 24.102(j) Payment before taking possession.* It is intended that a right-of-entry for construction purposes be obtained only in the exceptional case, such as an emergency project, when there is no time to make an appraisal and purchase offer and the property owner is agreeable to the process.

*Section 24.102(m) Fair rental.* Section 301(6) of the Uniform Act limits what an Agency may charge when a former owner or previous occupant of a property is permitted to rent the property for a short term or when occupancy is subject to termination by the Agency on short notice. Such rent may not exceed "the fair rental value * * * to a short-term occupier." Generally, the Agency's right to terminate occupancy on short notice (whether or not the renter also has that right) supports the establishment of a lesser rental than might be found in a longer, fixed-term situation.

*Section 24.103 Criteria for Appraisals*

*Section 24.103(a) Standards of appraisal.* In paragraph (a)(3) of this section, it is intended that all relevant and reliable approaches to value be utilized. However, where an Agency determines that the market approach will be adequate by itself because of the type of property being appraised and the availability of sales data, it may limit the appraisal assignment to the market approach.

*Section 24.103(b) Influence of the project on just compensation.* As used in this section, the term "project" is intended to mean an undertaking which is planned, designed, and intended to operate as a unit.

Because of the public knowledge of the proposed project, property values may be affected. A property owner should not be penalized because of a decrease in value caused by the proposed project nor reap a windfall at public expense because of increased value created by the proposed project.

*Section 24.103(e) Conflict of interest.* The overall objective is to minimize the risk of fraud and mismanagement and to promote public confidence in Federal and federally-assisted land acquisition practices. Recognizing that the costs may outweigh the benefits in some circumstances, § 24.103(e) provides that the same person may both appraise and negotiate an acquisition, if the value is $2,500 or less. However, it should be noted that all appraisals must be reviewed in accordance with § 24.104. This includes appraisals of real property valued at $2,500, or less.

*Section 24.104 Review of appraisals*

This section recognizes that Agencies differ in the authority delegated to the review appraiser. In some cases the reviewer establishes the amount of the offer to the owner and in other cases the reviewer makes a recommendation which is acted on at a higher level. It is also within Agency discretion to decide whether a second review is needed if the first review appraiser establishes a value different from that in the appraisal report or reports on a property.

Before acceptance of an appraisal, the review appraiser must determine that the appraiser's documentation, including valuation data and the analyses of that data, demonstrates the soundness of the appraiser's opinion of value. The qualifications of the review appraiser and the level of explanation of the basis for the reviewer's recommended or approved value depend on the complexity of the appraisal problem. For a low value property requiring an uncomplicated valuation process, the reviewer's approval, endorsing the appraiser's report, may satisfy the requirement for the reviewer's statement.

*Section 24.106 Expenses Incidental to Transfer of Title to the Agency*

Generally, the Agency is able to pay such incidental costs directly and, where feasible, is required to do so. In order to prevent the property owner from making unnecessary out-of-pocket expenditures and to avoid duplication of expenses, the property owner should be informed early in the acquisition process of the Agency's intent to make such arrangements. In addition, it is emphasized that such expenses must be reasonable and necessary.

Subpart C—General Relocation Requirements

*Section 24.204 Availability of Comparable Replacement Dwelling Before Displacement*

*Section 24.204 (a) General.* This provision requires that no one may be required to move from a dwelling without one comparable replacement dwelling having been made available. In addition, § 24.204(a) requires that, "Where possible, three or more comparable replacement dwellings shall be made available." Thus the basic standard for the number of referrals required under this section is three. Only in situations where three comparable replacement dwellings are not available (e.g., when the local housing market does not contain three comparable dwellings) may the Agency make fewer than three referrals.

*Section 24.205 Relocation Assistance Advisory Services*

Section 24.205(c)(2)(ii)(C) is intended to emphasize that if the comparable replacement dwellings are located in areas of minority concentration, minority persons should, if possible, also be given opportunities to relocate to replacement dwellings not located in such areas.

*Section 24.207 General Requirements—Claims for Relocation Payments*

Section 24.207(a) allows an Agency to make a payment for low cost or uncomplicated moves without additional documentation, as long as the payment is limited to the amount of the lowest acceptable bid or estimate, as provided for in § 24.303(c).

Subpart D—Payment for Moving and Related Expenses

*Section 24.306 Fixed Payment for Moving Expenses—Nonresidential Moves*

*Section 24.306(d) Nonprofit organizations.* Gross revenues may include membership fees, class fees, cash donations, tithes, receipts from sales or other forms of fund collection that enables the non-profit organization to operate. Administrative expenses are those for administrative support such as rent, utilities, salaries, advertising and other like items as well as fund raising expenses. Operating expenses for carrying out the purposes of the non-profit organization are not included in administrative expenses. The monetary receipts and expense amounts may be verified with certified financial statements or financial documents required by public agencies.

*Section 24.307 Discretionary Utility Relocation Payments*

Section 24.307(c) describes the issues which must be agreed to between the displacing agency and the utility facility owner in determining the amount of the relocation payment. To facilitate and aid in reaching such agreement, the practices in the Federal Highway Administration regulation, 23 CFR 645, Subpart A, Utility Relocations, Adjustments and Reimbursement, should be followed.

Subpart E—Replacement Housing Payments

*Section 24.401 Replacement Housing Payment for 180-Day Homeowner-Occupants*

*Section 24.401(a)(2).* The provision for extending eligibility for a replacement housing payment beyond the one year period for good cause means that an extension may be granted if some event beyond the control of the displaced person such as acute or life threatening illness, bad weather preventing the completion of construction of a replacement dwelling or other like circumstances should cause delays in occupying a decent, safe, and sanitary replacement dwelling.

*Section 24.401(c)* Price differential. The provision in § 24.401(c)(4)(iii) to use the current fair market value for residential use does not mean the Agency must have the property appraised. Any reasonable method for arriving at the fair market value may be used.

VOL 54 ISS 40 MR 2 1989 UMI

*Section 24.401(d) Increased mortgage interest costs.* The provision in § 24.401(d) set forth the factors to be used in computing the payment that will be required to reduce a person's replacement mortgage (added to the downpayment) to an amount which can be amortized at the same monthly payment for principal and interest over the same period of time as the remaining term on the displacement mortgages. This payment is commonly known as the "buydown."

The remaining principal balance, the interest rate, and monthly principal and interest payments for the old mortgage aa well as the interest rate, points and term for the new mortgage must be known to compute the increased mortgage interest costs. If the combination of interest and points for the new mortgage exceeds the current prevailing fixed interest rate and points for conventional mortgages and there is no justification for the excessive rate, then the current prevailing fixed interest rate and points shall be used in the computations. Justification may be the unavailability of the current prevailing rate due to the amount of the new mortgage, credit difficulties, or other similar reasons.

**Sample Computation**

| | |
|---|---|
| Old Mortgage: | |
| Remaining Principal Balance | $50,000 |
| Monthly Payment (principal and interest) | 458.22 |
| Interest rate (percent) | 7 |
| New Mortgage: | |
| Interest rate (percent) | 10 |
| Points | 3 |
| Term (years) | 15 |

Remaining term of the old mortgage is determined to be 174 months. (Determining, or computing, the actual remaining term is more reliable than using the data supplied by the mortgagee). However, if it is shorter, use the term of the new mortgage and compute the needed monthly payment.

Amount to be financed to maintain monthly payments of $458.22 at 10%—$42,010.18

| | |
|---|---|
| | $50,000.00 |
| | −42,010.18 |
| Increased mortgage interest costs | 7,989.82 |
| 3 points on $42,010.50 | 1,260.31 |
| Total buydown necessary to maintain payments at $458.22/month | 9,250.13 |

If the new mortgage actually obtained is less than the computed amount for a new mortgage ($42,010.18), the buydown shall be prorated accordingly. If the actual mortgage obtained in our example were $35,000, the buydown payment would be $7,706.57 ($35,000 ÷ by $42,010.18 = .83 $9,250.13 × .83 = $7,706.57).

The Agency is obligated to inform the person of the approximate amount of this payment and that he or she must obtain a mortgage of at least the same amount as the old mortgage and for at least the same term in order to receive the full amount of this payment. The displacee is also to be advised of the interest rate and points used to calculate the payment.

*Section 24.402 Replacement Housing Payment for 90-Day Occupants*

The downpayment assistance provisions in § 24.402(c) are intended to limit such assistance to the amount of the computed rental assistance payment for a tenant or an eligible homeowner. It does, however, provide the latitude for Agency discretion in offering downpayment assistance which exceeds the computed rental assistance payment, up to the $5,250 statutory maximum. This does not mean, however, that such Agency discretion may be exercised in a selective or discriminatory fashion. The displacing agency should develop a policy which affords equal treatment for persons in like circumstances and this policy should be applied uniformly throughout the Agency's programs or projects. It is recommended that displacing agencies coordinate with each other to reach a consensus on a uniform procedure for the State and/or the local jurisdiction.

For purposes of this section, the term downpayment means the downpayment ordinarily required to obtain conventional loan financing for the decent, safe, and sanitary dwelling actually purchased and occupied. However, if the downpayment actually required of a displaced person for the purchase of the replacement dwelling exceeds the amount ordinarily required, the amount of the downpayment may be the amount which the Agency determines is necessary.

*Section 24.403 Additional Rules Governing Replacement Housing Payments*

*Section 24.403(a)(1).* The procedure for adjusting the asking price of comparable replacement dwellings requires that the agency provide advisory assistance to the displaced person concerning negotiations so that he or she may enter the market as a knowledgeable buyer. If a displaced person elects to buy one of the selected comparables, but cannot acquire the property for the adjusted price, it is appropriate to increase the replacement housing payment to the actual purchase amount.

*Section 24.404 Replacement Housing of Last Resort*

*Section 24.404(b) Basic rights of persons to be displaced.* This paragraph affirms the right of a 180-day homeowner-occupant, who is eligible for a replacement housing payment under § 24.401, to a reasonable opportunity to purchase a comparable replacement dwelling. However, it should be read in conjunction with the definition of "owner of a dwelling" at § 24.2(p). The Agency is not required to provide persons owning only a fractional interest in the displacement dwelling a greater level of assistance to purchase a replacement dwelling than the Agency would be required to provide such persons if they owned fee simple title to the displacement dwelling. If such assistance is not sufficient to buy a replacement dwelling, the Agency may provide additional purchase assistance or rental assistance.

*Section 24.404(c) Methods of providing comparable replacement housing.* The use of cost effective means of providing comparable replacement housing is implied throughout the subpart. The term "reasonable cost" is used here to underline the fact that while innovative means to provide housing are encouraged, they should be cost-effective.

Section 24.404(c)(2) permits the use of last resort housing, in special cases, which may involve variations from the usual methods of obtaining comparability. However, it should be specially noted that such variation should never result in a lowering of housing standards nor should it ever result in a lower quality of living style for the displaced person. The physical characteristics of the comparable replacement dwelling may be dissimilar to those of the displacement dwelling but they may never be inferior.

One example might be the use of a new mobile home to replace a very substandard conventional dwelling in an area where comparable conventional dwellings are not available.

Another example could be the use of a superior, but smaller decent, safe and sanitary dwelling to replace a large, old substandard dwelling, only a portion of which is being used as living quarters by the occupants and no other large comparable dwellings are available in the area.

**Subpart F—Mobile Homes**

*Section 24.503 Replacement Housing Payment for 180-Day Mobile Homeowner-Occupants*

A 180-day owner-occupant who is displaced from a mobile home on a rented site may be eligible for a replacement housing payment for a dwelling computed under § 24.401 and a replacement housing payment for a site computed under § 24.402. A 180-day owner-occupant of both the mobile home and the site, who relocates the mobile home, may be eligible for a replacement housing payment under § 24.401 to assist in the purchase of a replacement site or, under § 24.402, to assist in renting a replacement site.

**Appendix B to Part 24—Statistical Report Form**

This appendix sets forth the statistical information collected from Agencies in accordance with § 24.9(c).

*General*

1. *Report coverage.* This report covers all relocation and real property acquisition activities under a Federal or a federally assisted project or program subject to the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended by Pub. L. 100-17, 101 Stat. 132.

2. *Report period.* Activities shall be reported on a Federal Fiscal Year basis, i.e., October 1 through September 30.

3. *Where and when to submit report.* Submit an original and two copies of this report to (*Name and Address of Federal Agency*) as soon as possible after September 30, but NOT LATER THAN NOVEMBER 15.

4. *How to report relocation payments.* The full amount of a relocation payment shall be reported as if disbursed in the year during which the claim was approved, regardless of whether the payment is to be paid in installments.

5. *How to report dollar amounts.* Round off all money entries in Parts B and C to the nearest dollar.

6. *Statutory references.* The references in Part B indicate the section of the Uniform Act that authorizes the cost.

*Part A. Persons displaced*

Report in Part A the number of persons ("households," "businesses, including nonprofit organizations," and "farms") who were permanently displaced during the fiscal year by project or program activities and moved to their replacement dwelling or location. This includes businesses, nonprofit organizations and farms which, upon displacement, discontinued operations. The category "households" includes all families and individuals. A family shall be reported as "one" household, *not* by the number of people in the family unit. Persons shall be reported according to their status as "owners" or "tenants" of the property from which displaced.

*Part B. Relocation payments and expenses*

*Columns (A) and (B).* Report in Column (A) the number of displacements during the report year. Report in Column (B) the total amount represented by the displacements reported in Column (A).

*Line 7A* is a new line item for reporting the business reestablishment expense payment.

*Lines 7A and 8, Column (B).* Report in Column (B) the amount of costs that were included in the total amount approved on Lines 6 and 8, Column (B).

*Lines 12 A and B.* Report in Column (A) the number of households displaced by project or program activities which were provided assistance in accordance with section 206(a) of the Uniform Act. Report in Column (B) the total financial assistance under section 20; (a) allocable to the households reported in Column (A). (If a household received financial assistance under section 203 or section 204 as well as under section 20; (a) of the Uniform Act, report the household as a displacement in Column (A), but in Column (B) report *only* the amount of financial assistance allocable to section 206(a). For example, if a tenant-household receives a payment of $7,000 to rent a replacement dwelling, the sum of $5,250 shall be included on Line 10, Column (B), and $1,750 shall be included on Line 12B, Column (B).)

*Line 13.* Report on Line 13 all administrative costs incurred during the report year in connection with providing relocation advisory assistance and services under section 205 of the Uniform Act.

*Line 15.* Report on Line 15 the total number of relocation appeals filed during the fiscal year by aggrieved persons.

*Part C. Real property acquisition subject to Uniform Act*

*Line 16, Columns (A) and (B).* Report in Column (A) all parcels acquired during the report year where title or possession was vested in the acquiring agency during the reporting period. (Include parcels acquired without Federal financial assistance, if there was or will be Federal financial assistance in other phases of the project or program.) Report in Column (B) the total of the amounts paid, deposited in court, or otherwise made available to a property owner pursuant to applicable law in order to vest title or possession in the acquiring agency.

*Line 17.* Report on Line 17 the number of parcels reported on Line 16 that were acquired by condemnation where price disagreement was involved.

## DEPARTMENT OF TRANSPORTATION

### Federal Highway Administration

### Uniform Relocation and Real Property Acquisition for Federal and Federally-Assisted Programs; Fixed Payment for Moving Expenses; Residential Moves

**AGENCY:** Federal Highway Administration (FHWA), DOT.

**ACTION:** Notice.

**SUMMARY:** The purpose of this notice is to publish the alternative moving expense and dislocation allowance schedule for persons displaced from dwellings in each State, the District of Columbia, Puerto Rico, and the Virgin Islands as required by section 405(b) of the Surface Transportation and Uniform Relocation Assistance Act of 1987, Pub. L. 100-17, 101 Stat. 132 (1987 Amendments).

**EFFECTIVE DATE:** The provisions of this Notice are effective March 2, 1989. For further information about implementation dates, see the discussion in the supplementary information section below.

**FOR FURTHER INFORMATION CONTACT:** Barbara J. Satorius, Policy Development Branch, Office of Right-of-Way (202-366-2043); or Reid Alsop, Office of the Chief Counsel (202-366-1371), Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. Office hours, Monday-Friday are from 7:30 a.m. to 4:00 p.m., e.t.

**SUPPLEMENTARY INFORMATION:** Section 202(b) of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91-646, 84 Stat. 1894 (Uniform Act), as amended by section 405(b) of the 1987 Amendments, provides that a displaced individual or family may elect to be paid for moving expenses on the basis of a moving expense and dislocation allowance schedule established by the head of the lead agency as an alternative to being paid for moving and related expenses actually incurred. Section 405(b) eliminated statutory limitations on the amounts that could be paid pursuant to such a schedule. Implementing regulations at 49 CFR 24.302 provide that the FHWA will develop and approve this schedule.

The purpose of this notice is to publish the schedule approved by the FHWA for use in payment determinations by all Federal, State and local governments, and persons affected by the Uniform Act, as amended. It has been developed from data provided by State highway agencies, and incorporates the dislocation allowance within the schedule's payment amounts. The exceptions and limitations are as follows:

1. The expense and dislocation allowance to a person whose residential move is performed by an agency at no cost to the person shall be limited to $50.00.

2. An occupant will be paid on an actual cost basis for moving his or her mobile home from the displacement site. In addition, a reasonable payment to the occupant for packing and securing personal property for the move may be paid at the agency's discretion.

3. The expense and dislocation allowance to a person with minimal personal possessions who is in occupancy of a dormitory style room shared by two or more other unrelated persons shall be limited to $50.00.

An occupant who moves from a mobile home may be paid for the removal of personal property from the mobile home in accordance with the moving and dislocation allowance payment schedule.

Any government, agency or person that is in compliance with 49 CFR Part 24 may implement the schedule being published today. Any government, agency or person that is unable to comply with 49 CFR Part 24 at this time may continue to use the moving expense schedule published in the **Federal Register** on December 30, 1986, until the schedule published here becomes mandatory on April 2, 1989, the date that the 1987 Amendments and 49 CFR Part 24 become fully applicable.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

(42 U.S.C. 4601; 49 CFR 24.302(a)).

Issued on February 24, 1989.

## National Institute on Drug Abuse; Methadone in Maintenance and Detoxification; Joint Revision of Conditions for Use

**AGENCIES:** Food and Drug Administration and National Institute on Drug Abuse.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) and the National Institute on Drug Abuse (NIDA) are issuing a final rule to revise the conditions for the use of methadone in maintenance and detoxification treatment. Among other changes, the rule provides standards for long-term detoxification, as required by Pub. L. 98-509, which revised the statutory definition of detoxification treatment from 21 days to 180 days. Other revisions are designed to streamline the regulation, to delete the requirement that treatment programs using methadone submit annual reports to FDA, and to promote more efficient operation of narcotic treatment programs.

**EFFECTIVE DATE:** April 3, 1989.

**FOR FURTHER INFORMATION CONTACT:** Robert J. Meyer, or Wayne H. Mitchell, Center for Drug Evaluation and Research (HFD-362), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8046.

**SUPPLEMENTARY INFORMATION:**

### Introduction

The conditions for the use of methadone in the maintenance and detoxification treatment of narcotic addicts are provided for in 21 CFR Part 291 (the methadone regulation). The methadone regulation also delineates the appropriate methods of professional practice for medical treatment of the narcotic addiction of various categories of addicts. (See 21 CFR 291.505.)

In the **Federal Register** of October 2, 1987 (52 FR 37046), FDA and NIDA jointly published a proposed regulation to revise the conditions for the use of methadone in maintenance and detoxification treatment. The proposal was generally based upon the comments received in response to a notice of intent to propose revisions to the methadone regulation published in the **Federal Register** of September 13, 1983 (48 FR 41049). As discussed in the preamble to the proposal, most comments received on the September 1983 notice argued that the methadone regulation not be substantially revised and that the requirements of the methadone regulation are generally neither unreasonable nor burdensome. FDA and NIDA agreed with these comments and proposed revisions that did not involve major substantive changes, but instead were designed to streamline the regulation and to promote more efficient operation of narcotic treatment programs. The most significant of the proposed revisions would allow for extended detoxification treatment, up to 180 days, to conform to a recent amendment to the Controlled Substances Act (CSA) (21 U.S.C. 801 *et seq.*) and proposed the development of a separate guideline consisting of those provisions of the methadone regulation that were not legal requirements. Elsewhere in this issue of the **Federal Register**, FDA and NIDA are publishing a notice of the availability of a separate guidance document consisting of recommended practices in the maintenance and detoxification treatment of narcotic addicts. As was proposed in the October 2, 1987, **Federal Register**, this guidance document is based upon those provisions of the prior methadone regulation that were not legal requirements.

Also in this issue of the **Federal Register**, FDA and NIDA are publishing a proposed rule to provide minimum service maintenance treatment to patients awaiting placement in comprehensive maintenance treatment. The proposal is in response to the human immunodeficiency virus (HIV) epidemic and is intended to allow programs additional flexibility to admit more narcotic addicts into treatment as quickly as possible and to assure the availability of counseling on avoiding transmission of the HIV.

In addition, elsewhere in this issue of the **Federal Register**, FDA and NIDA are publishing an advance notice of proposed rulemaking soliciting comments on a pilot study designed to help identify improved measures of methadone program performance and thus enhance the quality of treatment.

### Comments

In response to the proposal, FDA and NIDA received 42 comments. These comments represented many interests—concerned citizens; members of Congress; Federal, State, and local government authorities; narcotic treatment programs and counseling services; the medical community as represented by the American Medical Association and the American Psychiatric Association; a pharmaceutical manufacturer; and a drug testing laboratory. A section-by-section analysis of the comments and the agencies' responses to them are set out below.

*Definitions*

1. One comment questioned why the proposed definition of "maintenance treatment" under § 291.505(a)(2) did not specifically state that it was longer than 180 days. Another comment characterized the proposed definition as inadequate because it lacks the concepts of dosage stabilization, rehabilitative services, and a treatment goal of an eventual drug-free state.

In the preamble to the proposed rule (52 FR 37046), FDA and NIDA stated that it had as one of its goals the streamlining of the current regulation. The agencies believe that including the concepts stated by the comments and a time in treatment period is not appropriate for definitional purposes because the definition of "maintenance treatment" is not dependent upon or limited by such concepts or time period. The agencies note, however, that for the purpose of establishing the conditions for use of narcotic drugs in hospitals for detoxification treatment (see § 291.505(f)(2) of the final rule), if a narcotic drug is administered to a patient for treatment of narcotic dependence for more than 180 days, the procedure is no longer considered detoxification but is, instead, considered maintenance treatment.

2. One comment read the proposed definition of "medication unit" under § 291.505(a)(4)(ii) as authorizing private practitioners and local pharmacists to conduct drug testing or analyses. The comment recommended that only approved analytical laboratories be authorized to conduct drug testing or analyses.

FDA and NIDA agree that the wording of proposed § 291.505(a)(4)(ii) could be construed as the comment has suggested. As set forth in § 291.505(d)(2)(i) of the final rule, each testing laboratory selected by a program that performs the testing required under this regulation must be in compliance with all applicable Federal proficiency testing and licensing standards and applicable State standards. It is not the agencies' intention to authorize, without an application for separate approval, licensed private practitioners and community pharmacists to provide services at medication units other than administering or dispensing methadone and collecting samples for drug testing or analysis for narcotic drugs. (See § 291.505(b)(3)(v) of the final rule.) Thus, for the sake of clarity, the definition in § 291.505(a)(4)(ii) of the final rule states that a medication unit is a facility from which licensed private practitioners and community pharmacists are authorized to collect samples for drug testing or analysis for narcotic drugs.

3. One comment disagreed with the proposed rule's definition of "narcotic treatment program" under § 291.505(a)(6) in that it does not incorporate concepts of counseling and medical treatment.

FDA and NIDA disagree with this comment. The definition states that a "narcotic treatment program" must provide, when appropriate or necessary, a comprehensive range of medical and rehabilitative services.

*Minimum Testing or Analysis for Drugs: Uses and Frequency*

4. One comment stated that the proposed probation scheme under § 291.505(d)(6)(v)(B)(*2*) seemingly places too strong a reliance on the accuracy and utility of urine testing to ensure that take-home patients were ingesting their methadone. The comment noted that some sensitive drug testing methods can detect methadone several days after consumption while some drug screening methods do not always indicate the presence of methadone 24 hours after supervised administration. It suggested that a negative result on a drug test for the presence of methadone not result in automatic action being taken in regards to probation, but that the program physician be given flexibility in interpreting the result.

FDA and NIDA recognize that test methods utilized for drug screening tests or analyses (e.g., immunoassay) do not, in general, provide the same level of analytical accuracy as would be obtained with test methods used for confirmation tests or analyses (e.g., gas chromatography/mass spectrometry). Thus, under the probationary scheme for take-home medication, a drug test result utilized by a program physician as the sole basis for placing a patient on probation is required to be a confirmed test result. FDA and NIDA believe that confirmed test results are accurate and reliable indicators of a patient's drug use and that a program physician can rely on them for probationary purposes. Also, the probation scheme does not preclude a program physician from placing a patient on probation based solely upon his or her clinical judgment (see § 291.505(d)(6)(v) of the final rule).

5. One comment said that including amphetamines and barbiturates in the list of mandatorily tested drugs under proposed § 291.505(d)(2) does not reflect the current patterns of illicit drug use. The comment stated that benzodiazepines have now largely replaced barbiturates as drugs of abuse, and that amphetamine abuse is now rare in many parts of the country. In order to provide for the most efficient allocation of resources, the comment suggested that opiates, methadone, and cocaine continue to be retained in the list of mandatorily tested drugs as well as two or three other drugs that would be most likely to be abused in a program's locality.

The current list of mandatorily tested drugs was adopted based on evidence of increased abuse of the listed drugs in the addict population. Screening for the listed drugs was intended to help the program physician to qualitatively distinguish the listed drugs of abuse and to confirm his or her clinical impression of a patient. Current information available to the agencies regarding the patterns of illicit drug use of amphetamines and barbiturates demonstrates a significant increase in the manufacture of illicit amphetamines and a continued, albeit sporadic, use of barbiturates. Thus, the agencies are not persuaded that any of the listed drugs should be deleted at this time. Because of this comment and other anecdotal reports regarding changing patterns of illicit drug use, the agencies are soliciting information and supportive data concerning the need to maintain or revise the list of mandatorily tested drugs in an advance notice of proposed rulemaking published elsewhere in this issue of the **Federal Register**.

FDA and NIDA agree that there may be drugs of abuse in addition to those listed and that drugs that would be most likely to be abused in a program's locality should also be tested for. Accordingly, § 291.505(d)(2)(i) of the final rule states that if any other drug or drugs have been determined by a program to be abused in that program's locality, or as otherwise indicated, each test or analysis must be analyzed for any of those drugs as well.

6. Two comments expressed concern that the laboratory standards for methadone testing under proposed § 291.505(d)(2) would be confused with laboratory standards for employee drug testing for Federal employees set forth in "Mandatory Guidelines for Federal Workplace Drug Testing Programs" published in the **Federal Register** of April 11, 1988 (53 FR 11970). The comments recommended that the regulation should clearly differentiate between the two laboratory standards.

The mandatory guidelines referenced in the comment were developed to establish comprehensive standards for all aspects of laboratory drug testing and laboratory procedures to be applied in carrying out Executive Order (E.O.) 12564 dated September 15, 1986, and section 503 of Pub. L. 100-71, the Supplemental Appropriations Act for fiscal year 1987 dated July 11, 1987. In section 1-1 entitled "Applicability" under Subpart A of these guidelines, it clearly states that they only apply to any laboratory that has or seeks a contract to perform, or otherwise performs urine drug testing for Federal agencies under a drug testing program conducted under E.O. 12564. Therefore, because these guidelines make clear that they do not apply to drug testing under any legal authority other than E.O. 12564, FDA and NIDA do not believe that it is necessary to revise the regulation as recommended.

7. One comment noted that the proposed laboratory examination for the serological test for syphilis under § 291.505(d)(3)(i) did not take into account the severely damaged state of some patients' veins. The comment recommended that the final rule allow program physicians some latitude in dealing with patients from whom it is impractical to draw blood. The comment noted that this revision would relieve the agency of the paperwork burden in granting individual exceptions to this requirement.

FDA and NIDA agree with this comment. Accordingly, § 291.505(d)(3)(i) of the final rule states that if, in the reasonable clinical judgment of the program physician, a patient's subcutaneous veins are severely damaged to the extent that a blood specimen cannot be obtained, the serological test for syphilis may be omitted. As with all findings from the admission medical evaluation, this finding must be recorded in the patient's record. (See § 291.505(d)(3)(ii) of the final rule.)

*Minimum Staffing Patterns*

8. Many comments supported the proposed elimination of minimum staffing ratio of 1 counselor to 50 patients. (See § 291.505(d)(7)(iii) of the former regulation.) The comments argued that many methadone clinics are fully enrolled and many narcotic addicts desiring treatment are currently placed on lengthy waiting lists because the current minimum staffing requirement requires a program to add a counselor in order to expand its capacity. One comment stated that the minimum staffing requirement should be included in the guideline and left up to States to enforce. In contrast, many comments objected to the elimination of this

VOL 54 ISS 40 MR 2 1989 UMI

minimum staffing requirement. One comment asserted that the current minimum counselor/patient ratio is already too low to ensure effective counseling. The general consensus of these comments was that inadequate staffing would compromise both treatment and patient care.

FDA and NIDA believe that it is inappropriate for this regulation to prescribe a minimum counselor/patient ratio that cannot take into account the specific needs of an individual program's patient population. Such an inflexible ratio could lead to misallocation of scarce treatment resources. The agencies recognize that a large number of programs require more than 1 counselor for every 50 patients to provide adequate care for their patients, and these programs will, under the requirement of § 291.505(d)(5) of the final rule, continue to find it necessary to have more than 1 counselor for every 50 patients. The former mandatory counselor/patient ratio of 1:50 is now stated as a recommended practice in the FDA and NIDA guidance document to reflect the agencies' belief that for a program with a patient population with typical counseling needs, a 1:50 counselor/patient ratio represents a minimum appropriate ratio to provide adequate counseling services. However, it would be a disservice to require programs to expend scarce resources to meet inflexible Federal requirements that do not take into account their individual patient population needs.

9. One comment objected to the proposed deletion of the former requirement (see § 291.505(b)(2)(i) of the former regulation) that the number of patients treated as a narcotic treatment medication unit not exceed 30 patients. The comment argued that without a numerical basis for the medication unit, there could be potential problems regarding treatment efficiency and recordkeeping.

The agencies believe that the maximum number of patients to be treated at a medication unit is an issue that is properly left to the judgment of the program. However, local health and planning agencies may wish to limit enrollment in the program, prescribe locations of medication units to ensure the availability of services throughout an area, and limit the environmental impact which such units may have on a community. Decisions about the size of a medication unit should be made on a case-by-case basis, taking into account many factors of a peculiarly local nature, and are, therefore, properly decided at a State or local level rather than by the Federal government. Whatever the enrollment at a medication unit, it will still be required to be adequately staffed to comply with all recordkeeping and other requirements of this regulation.

*Rehabilitative Services*

10. Three comments objected to the wording of the requirement under proposed § 291.505(b)(2)(iii) in that it did not incorporate the phrase "are being utilized." (See § 291.505(b)(1)(ii) of the former regulation.) The comments stated that the elimination of the former requirement that rehabilitative services must be utilized will de-emphasize the importance of rehabilitative services in narcotic treatment programs. One comment objected to the absence of minimum counseling and rehabilitative requirements and suggested that proposed § 291.55(d)(3)(iv)(A)(*1*) be amended to require that counseling and rehabilitative services be provided at least monthly during the first 2 years of treatment.

FDA and NIDA continue to believe that rehabilitative services are of key importance in the treatment of individuals for drug dependence and the final regulation requires that these services be made available. However, the agencies also believe that a program's staff is in the best position to determine what services are needed. The agencies recognize that in some cases a patient may not be ready for some rehabilitative services when he or she first enters treatment and other patients need for rehabilitative services may decrease the longer they are in a program. Therefore, the agencies believe that any attempt to mandate use of rehabilitative services is counter-productive and in certain situations could result in misallocation of treatment resources.

11. Two comments objected to changing from mandatory to suggestive the language in proposed § 291.505(d)(4)(iv)(B) regarding evaluation and recording of patients' needs and readiness for vocational counseling, education, and employment. The comments stated that without such evaluations, appropriate treatment plans cannot be developed and updated.

The agencies agree that a patient's needs for education, vocational rehabilitation, and employment need to be considered in preparing and updating a treatment plan. However, the agencies recognize that these needs vary on a case-by-case basis and want to ensure that this requirement is not perceived as a significant paperwork burden. If a particular patient's circumstance does not warrant certain rehabilitative services a simple notation will satisfy the assessment requirement. For example, if a patient is gainfully employed a note of that fact would suffice for the initial employment assessment. The agencies also believe that describing the contents of the initial treatment plan in two separate paragraphs in the regulation may be confusing. Accordingly, the agencies are deleting proposed paragraph (d)(4)(iv)(B), redesignating proposed paragraph (d)(4)(iv)(A) as paragraph (d)(4)(iv), and amending paragraph (d)(3)(iv)(A)(*1*) to remove any ambiguities that may exist.

12. One comment stated that the word "physician" is used in the proposed regulation in contexts that often imply physician responsibility for counseling and other nonmedical functions. The comment suggested that appropriate language be used in the regulation to delineate clearly the areas of responsibility for physicians, counseling directors, and counselors.

The purpose of this regulation, as described by the statute, is to develop "appropriate methods of professional practice in the *medical* treatment of * * * narcotic addiction" (emphasis added). (Section 4 of the Comprehensive Drug Abuse Prevention and Control Act of 1970, Pub. L. 91-513.) Narcotic drug addiction is a condition with physiological, psychological, and other behavioral aspects. The physician bears primary responsibility for the medical treatment of this condition in his or her patient. Counseling and rehabilitative services are component parts of the medical treatment and are generally necessary for the most effective treatment of narcotic addiction. Although these services are normally provided by health-care professionals, a physician may not ignore these areas of treatment nor divest himself or herself of responsibility for them. The agencies believe that it would be a mistake to conceive of this treatment as being somehow divisible into drug therapy for which the physician is responsible and other areas of treatment for which other individuals have exclusive responsibility. Therefore, the agencies feel that any changes from the proposed regulation in this area would be inappropriate.

13. Two comments stated that proposed § 291.505(d)(3)(v)(D) did not include the revision to the current requirements as discussed in comment 8 in the preamble to the proposal; i.e., that rehabilitation services would be discretionary for patients who are not ready for such services or who show substantial progress in rehabilitation based upon the discretion of the

program's physician. The comments recommended that this revision be clearly stated in the regulation.

The general requirement that counseling and rehabilitative services be made available to all patients, but that programs not be required to provide every patient with a set minimum amount of counseling or rehabilitative services, is contained in several places in the methadone regulation. (See § 291.505 (b)(2)(iii), (d)(3)(iv)(B), (d)(4)(i)(A), and (d)(4)(iv) of the final rule.) The agencies believe that these provisions sufficiently delineate the requirement.

*Pregnant Patients*

14. Several comments addressed the proposed provisions on prenatal care (see § 291.505(d) (1)(iii)(B) and (4)(i)(A) of the proposed regulation). One comment noted inconsistent terminology between these provisions and asked if a treatment program is required to establish a system for "informing" or for "referring" a pregnant patient to outside prenatal services. Another comment recommended that the prenatal care provision under proposed § 291.505(d)(1)(iii)(B)(*2*) be revised to state that a treatment program is responsible for coordinating prenatal care whether it is provided directly or by referral to outside prenatal services.

FDA and NIDA do not see any inconsistency between "informing that patients of publicly or privately funded prenatal care opportunities available" and "referring" a patient to those prenatal care providers. A referral in normal medical practice entails the practitioner giving his or her patient the name of a second practitioner who is able to provide desired services. Coordination of prenatal care is provided for in § 291.505 (d)(1)(iii)(B)(*3*) and (d)(4)(i)(B) of the final rule.

15. One comment recommended that the proposed requirement under § 291.505(d)(4)(iii) retain the former requirement (see 21 CFR 291.505(d)(6)(iii)(*c*) of the former regulation) that the admitting program physician date and sign the comments and evaluations made by the health-care professional in a pregnant patient's record within 72 hours of administration of the initial methadone dose.

This former requirement was inadvertently omitted from the proposed rule. Accordingly, § 291.505(d)(1)(iii)(B) of the final rule requires that the physician review, sign, and date records made by a health-care professional within 72 hours of the administration of the initial dose of methadone given a pregnant patient. This makes the regulation consistent with other special categories of patients (see § 291.505(d)(1)(iii) (A) and (C) of the final rule) and provides protection for the health of pregnant patients.

In addition, the informational requirement to explain the possible risks of a narcotic drug administered or dispensed by the program to a pregnant woman and her unborn child under § 291.505(d) (1)(iii)(B)(*5*) and (4)(i)(B)(*3*) has been revised to also include a requirement to explain the possible risks from continued used of illicit drugs and of withdrawal from the narcotic drug administered or dispensed by the program. This amendment makes the regulation more closely consistent with the informational statement for female patients of child-bearing age contained in Form FDA-2835 "Consent to Methadone Treatment."

16. One comment contended that the health care needs of female patients are not adequately addressed in the proposed rule. The comment suggested that a system for screening for pregnancy be established so that prenatal services can be provided to female patients as early as possible. This comment also suggested that (1) addicted pregnant women be given the highest priority in admission to both drug treatment programs and prenatal care programs; (2) the initial medical evaluation include a Pap test and tests for sexually transmitted diseases, namely syphilis, gonorrhea, and chlamydia; and (3) the physical examination be given annually for long-term female patients.

The agencies do not agree with the basic premise of this comment. This final rule specifies minimum requirements specifically tailored to the needs of female patients in general and pregnant patients in particular, and its companion guidance document now covers many of the specific points raised in this comment. For example, the final regulation requires the serological test for syphilis, while the guidance document recommends a Pap test and pregnancy testing, where appropriate. The guidance document also states that other tests should be given as clinically indicated. Although this regulation does delineate appropriate minimum standards for the medical treatment of narcotic addiction, it is not intended to set general standards of care for the medical profession for specific classes of patients. That is left to State governments, which regulate medical practices, noting standards developed by the profession and stated by professional societies.

17. One comment recommended that the provisions in the regulation regarding pregnant patients be revised to reflect a recent World Health Organization methadone study group's opinion that pregnant patients be withdrawn from methadone in the weeks prior to birth so that the infant does not go into sudden withdrawal shortly after birth. This comment also stated that the proposed rule provides no guidance regarding methadone patients who are nursing mothers.

The agencies are unable to evaluate this comment properly because it did not provide either a citation for or a copy of the study referred to in the comment. Requests made by FDA to the commentor for more information on the study were unsuccessful. Because there is no evidence to support requiring detoxification in this instance, FDA and NIDA cannot respond to this comment, except to note that FDA Form FDA-2835 "Consent to Methadone Treatment" advises mothers not to nurse their babies while taking methadone.

*Admission and Readmission Requirements*

18. One comment objected to the proposed provision in §291.505(d)(7)(ii) and (d)(8)(ii) requiring a 7-day waiting period between concluding a short-term or long-term detoxification episode and beginning another. The comment stated that this requirement could increase the likelihood of a patient returning to illicit drug use during this waiting period with the concomitant risk of HIV infection. The comment recommended that detoxification treatment be extended if it is determined to be necessary in the judgment of the program physician.

The regulation as written affords clinicians the flexibility necessary to adapt repeated detoxification treatment to a particular patient's needs. At the same time, it establishes a minimum standard to preclude removing all the incentive to succeed in detoxification treatment that a waiting period of less than a week would involve. Further, the agencies believe that to allow programs to offer and unlimited number of detoxification attempts with no break between attempts would result in detoxification treatment being indistinguishable from maintenance treatment. However, programs are free to offer treatment, which medically might be considered detoxification treatment but legally would be defined as maintenance treatment, as long as the patient meets the maintenance treatment criteria. An example of that situation would be a "detoxification" treatment lasting 1 year, which under the statute and under the regulation would be considered maintenance treatment. The agencies recommend that

VOL 54 ISS 40 MR 2 1989 UMI

a patient who requires continuous and repeated detoxification should be given a treatment plan that meets the requirements of maintenance treatment.

19. Several comments stated that the maintenance treatment admission criteria under proposed § 291.505(d)(1)(i)(A) regarding a person's history of addiction and current physiologic dependence are overly restrictive. One comment suggested that any physiologically dependent person who is not suitable for detoxification treatment may be admitted to maintenance treatment. Another comment suggested that any person with a long history of heroin addiction and/or methadone treatment be allowed into maintenance treatment without a showing of current physiological dependency. The comments expressed concerns that overly restrictive admission criteria could possibly force persons to continue to seek illegal drugs for a period of time to be eligible for admission into maintenance treatment.

The agencies do not agree that the admission criteria are too strict. The minimum standards for maintenance treatment admission (including the 1-year history and current dependence requirements) and the exceptions to the minimum admission criteria taken together are flexible enough not to unduly restrict a physician's clinical judgment. The agencies advise that individuals who do not meet the 1-year history requirement should not be presumed to be incapable of attaining a drug-free state in a relatively short period of time. The self-destructive behavior patterns that characterize the narcotic addict's life have not been reinforced to the same degree as in a patient who has a 1-year history of dependence. Long-term and short-term detoxification are available to patients without a history of 1-year physiological dependence. In addition, FDA and NIDA strongly disagree with the suggestion that current physiological dependence should not be a prerequisite for methadone treatment. In the setting of drug abuse treatment, it would be highly inappropriate to place an individual who is not currently physiologically dependent on a course of drug therapy that could easily lead to that individual becoming physiologically dependent on methadone.

20. One comment recommended that the final rule make eligible for maintenance treatment only persons who have had at least two documented attempts at short-term detoxification or drug-free treatment. Another comment expressed a similar, but less specific, recommendation that all persons be able to document previous drug-free treatment initiatives to be eligible for maintenance treatment.

The regulation does not preclude a program from requiring these attempts for patients who satisfy the minimum standards for admission to maintenance treatment but who would benefit more from other kinds of treatment. Thus, for patients who could detoxify easily and patients who are not truly addicted, treatment other than maintenance treatment may and should be employed. While FDA and NIDA agree that detoxification or drug-free treatment is generally preferable to maintenance treatment, the agencies cannot state that detoxification or drug-free treatment is for all patients and that maintenance treatment should only be considered a fallback treatment in all cases. Some patients may not be suitable for detoxification or drug-free treatment. Such a patient may require medical treatment and vocational and educational assistance in order to become a more highly motivated patient for whom any treatment has the highest probability of success. FDA and NIDA are unable to conclude that maintenance treatment is never an appropriate first-line treatment.

21. One comment stated that the proposed 2-year interval before a patient in maintenance treatment could have his or her clinic attendance for observation decreased from 3 days to 2 days is excessive. The comment recommended that the program physician should be allowed more discretion in determining the clinic attendance schedule.

FDA and NIDA must be concerned about problems of drug diversion as well as the effective medical treatment of drug addiction. While the agencies recognize that a burden is being placed on a patient who cannot obtain additional take-home privileges, that burden is outweighed by the decrease in the opportunity for diversion. In extraordinary circumstances, programs may ask for an exemption from the required clinic attendance schedule for a patient (see § 291.505(d)(11) of the final rule).

22. One comment observed that the proposed rule makes no specific provision for official holidays and recommended that all patients be allowed one take-home dose of medication on official Federal and State holidays.

FDA and NIDA agree with the basic principles of this comment and have implemented it in § 291.505(d)(6)(vii) of the final rule. The new provision is limited to State holidays, based on the presumption that a significant number of program employees are State or municipal employees, and would normally be entitled to a day off on State holidays. Federal holidays were not included in the regulation because they could permit programs to be closed for two observances of the same holiday. However, programs which would normally close on a Federal holiday could apply for an exemption under § 291.505(d)(11) of the final rule.

*Receipt of Narcotic Drugs*

23. One comment objected to proposed § 291.505(j)(3), which would permit only a licensed practitioner employed at the facility receiving shipment to accept delivery of narcotic drugs for narcotic addiction treatment. The comment recommended that the requirement also include the program pharmacist because he or she will be the ultimate custodian.

FDA and NIDA agree with this comment and have incorporated the recommendation in § 291.505(j)(3) of the final rule.

*Detoxification Treatment*

24. The agencies' proposed revision to provide for short-term and long-term detoxification treatment under § 291.505(d) (7) and (8) was uniformly commented upon favorably. However, several comments expressed concerns about how the availability of public funding could affect which detoxification treatment program a patient would be assigned to. One comment stated that no criteria were given to govern admission to either detoxification program.

FDA and NIDA do not have the authority to prescribe the allocation of resources to individual programs. In addition, the agencies have not established any differential admission criteria for short-term or long-term detoxification treatment because the decision as to the treatment course must be left to the clinical judgment of the treating program physician.

*Methadone Dosage Levels*

25. One comment recommended that the medical director approve those patients who are to receive daily doses of methadone greater than 100 milligrams. This comment stated that a requirement for a de facto second opinion would be advisable because a possibility of overdosage exists if methadone is taken in conjunction with illicit drugs.

The agencies believe that the provisions of § 291.505(d)(6)(i)(A) of the final rule, which allow only a 30-milligram initial dose and a total dose of not more than 40 milligrams the first day (unless the medical director documents the need for a larger dose), provide adequate protection against overdosage. FDA and NIDA also believe that the provision of § 291.505(d)(6)(i)(C) of the final rule, which requires a physician to justify in the patient's record a daily dose of over 100 milligrams, provides adequate protection against overdosage, while at the same time requiring only minimal interference with the professional judgment of the physician.

26. Several comments opposed the proposed requirement under § 291.505(d)(6)(v)(D) that each patient whose daily dose of methadone is above 100 milligrams be required to take the drug under observation at least 6 days a week irrespective of the length of time in treatment, unless the program has received prior approval from the State authority and FDA. The comment stated that there is no medical justification for the requirement and that it interferes with the professional judgment of the program physician.

Daily doses of over 100 milligrams present a high risk of diversion. A patient may take only a portion of his or her prescribed dose, leaving what methadone remains to be sold on the illicit drug market. Alternatively, a patient who is diverting all of his or her 100-milligram dose would be placing that much more methadone on the illicit drug market until the diversion is detected and stopped. The agencies believe that, in this case, concerns about the possibility of diversion must outweigh concerns about infringing on the clinical judgment of the program's physician. FDA and NIDA are aware that some patients are taking other medication that reduces the blood concentration of methadone to a degree sufficient to produce withdrawal symptoms which may necessitate methadone doses above 100 milligrams. The agencies believe that this situation is not common enough, at this time, to provide a specific provision dealing with this situation in the regulation. Such cases may be handled individually under the provisions of § 291.505(d)(6)(v)(D) of the final rule.

*Laboratory Examinations*

27. A large number of comments mentioned the existence of the HIV epidemic and the need for strengthening treatment programs that will reduce intravenous drug abuse. These comments suggested that narcotic treatment programs be required to conduct HIV testing of patients and provide appropriate counseling services at the narcotic treatment program or by referral to appropriate health-care providers.

The agencies are actively considering this point and, elsewhere in this issue of the Federal Register, are proposing to require that HIV counseling be provided to patients entering treatment programs and are soliciting comments on the issue of HIV testing. Comments on the potential impact of mandatory HIV testing on a patient's willingness to enter treatment, cost, availability, frequency of testing, and what treatment decisions may be made based on the results of HIV testing would be particularly welcome.

*Treatment of Patients Under 18 Years of Age*

28. One comment recommended retention of the former requirement (see § 291.505(d)(3)(iv) of the former regulation) that a treatment program obtain prior approval by FDA and the State methadone authority to place a person under 18 years of age on maintenance treatment. The comment said that the effects of the extended use of methadone on a youth's physiological and psychological development are unknown.

FDA and NIDA do not disagree with the comment's assertion regarding the unknown effects of the extended use of methadone in younger patients. Indeed, the final regulation has retained all the former limitations regarding maintenance treatment of patients under 18 years of age (see § 291.505(d)(1)(iv) of the final rule). However, FDA and NIDA consider the cited provisions for patients under 18 years of age as unnecessary because they are already included under the limitations for patients under 18 years of age. The agencies believe that the limitations regarding maintenance treatment for younger patients in the final rule coupled with the additional requirement for a parent, legal guardian, or responsible adult designated by the State authority to complete and sign a consent form prior to admission of a person under 18 years of age into maintenance treatment are adequate safeguards to preclude indiscriminate admission of younger patients to maintenance treatment.

*Treatment Plans*

29. One comment stated that the proposed requirement under § 291.505(d)(8)(i)(F) for monthly periodic treatment plan evaluations for long-term detoxification patients is unnecessary and recommended that an initial treatment plan with periodic treatment plan evaluations occurring as needed would be sufficient.

FDA and NIDA do not agree. Because detoxification patients are at a greater risk of reverting to illicit narcotic use, the agencies believe it necessary to require, at a minimum, monthly periodic treatment plan evaluations so that the program physician can closely monitor and reassess such patient's progress in detoxification and can implement alternate treatment strategies if needed.

30. One comment suggested that jail programs and jail dispensing units should be considered for incorporation into the regulation.

Jail programs and jail dispensing units are governed by this regulation. FDA's and NIDA's experience with jail programs indicates that this regulation and use of the exemption provided in § 291.505(d)(11) of the final rule to relax or eliminate provisions not applicable in a particular penal or detention setting provides a successful regulatory scheme for jail programs.

*Health-Care Professionals*

31. One comment recommended the retention of the former provision requiring that, if a physician is not available, on site, to review the initial evaluation of the patient made by a health-care professional and the physician's review is performed over the telephone, the physician sign the evaluation within 72 hours of the telephone procedure. (See 21 CFR 291.505(d)(6)(iii)(*c*) of the former regulation.) The comment stated that health-care professionals are often not properly utilized by treatment programs and oral orders from physicians are not being properly documented.

FDA and NIDA do not agree with this recommendation. The agencies do not believe that the regulation should outline or elaborate on the use of health-care professionals and the recording of oral orders by a program physician. As now stated under § 291.505(d)(4)(iii) of the final rule, licensed or certified health-care professionals in accordance with Federal, State, and local law are not prohibited from performing certain functions (e.g., administering or dispensing certain medications on a physician's oral order) delegated to them by the medical director, and records are required to be properly countersigned by the medical director or licensed physician. Further elaboration on this requirement will not prevent the problems cited in the comment.

**Environmental Impact**

The agency has determined under 21 CFR 25.24(a)(8) that this action is of a type that does not individually or cumulatively have a significant effect on

VOL 54 ISS 40 MR 2 1989 UMI

the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

**Economic Impact**

The agency has examined the regulatory impact and regulatory flexibility implications of the final rule in accordance with Executive Order 12291 and the Regulatory Flexibility Act (Pub. L. 96-354). The agency finds that the final rule is not a major rule inasmuch as these revisions would not result in any increase in cost (significant or otherwise) to narcotic treatment programs or to the State and local authorities that would enforce the final rule. Moreover, this final rule provides treatment programs with more flexibility than exists under the current regulation and thus allows such programs alternative and presumably more cost efficient means to comply with the requirements. For these reasons, therefore, the agency has determined that the final rule is not a major rule as defined in Executive Order 12291. Further, FDA certifies that the final rule will not have a significant impact on a substantial number of small entities as defined by the Regulatory Flexibility Act.

**Paperwork Reduction Act of 1980**

This final rule contains information collections which require approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980. The title, description, and respondent description of the information collection are shown below with an estimate of the annual reporting and recordkeeping burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

*Title:* Required Application for Treatment Program Dispensing Methadone for Detoxification and Maintenance

*Description:* FDA requires this information to assure individual program's and hospital's compliance with 21 CFR 291.505. This information will be used in evaluating programs and hospitals that apply for FDA approval under 21 CFR 291.505. The information required under § 291.505 is submitted by completing three FDA-supplied forms: FDA-2632 "Application for Approval of Use of Methadone in a Treatment Program," FDA-2633 "Medical Responsibility Statement for Use of Methadone in a Treatment Program," and FDA-2636 "Hospital Request for Methadone Detoxification Treatment." In addition, Form FDA-2635 "Consent to Methadone Treatment," a recordkeeping form, is also required by § 291.505. These forms are completed occasionally as programs apply to FDA for approval to dispense methadone, and in the case of Form FDA-2633, as new medical staff join the program. There are no periodic reporting requirements under this regulation.

*Description of Respondents:* State or local governments; businesses or other for-profit organizations; non-profit institutions.

*Estimated Annual Reporting and Recordkeeping Burden:*

| Section | Annual number of respondents | Annual frequency | Average burden per response | Annual burden hours |
|---|---|---|---|---|
| § 291.505(c)(4)(i) (Form FDA-2636) | 65 | 1 | 2 hours | 130 hours. |
| § 291.505(c)(4)(ii) (Form FDA-2633) | 65 | 1 | 2 hours | 130 hours. |
| § 291.505(f)(2)(viii) (Form FDA-2636) | 40 | 1 | 10 minutes | 7 hours. |
| Total | | | | 137 hours. |

This regulation amending § 291.505 contains recordkeeping and reporting requirements that are subject to OMB approval. Comments on the content and burden of the information collection requirement would be directed to FDA's Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, and to the Office of Information and Regulatory Affairs, OMB, Rm. 3208, New Executive Office Bldg., Washington, DC 20503, Attn: Allison Herron.

**List of Subjects in 21 CFR Part 291**

Health professions, Methadone, Reporting and recordkeeping requirements.

Therefore, under the Comprehensive Drug Abuse Prevention and Control Act of 1970, the Narcotic Addict Treatment Act of 1974, and applicable delegations of authority thereunder, and under authority delegated to the Commissioner of Food and Drugs, Part 291 is amended as follows:

## PART 291—DRUGS USED FOR TREATMENT OF NARCOTIC ADDICTS

1. The authority citation for 21 CFR Part 291 is revised to read as follows and the authority citations following all of the sections in Part 291 are removed:

Authority: Secs. 3, 505, 701(a) (21 U.S.C. 823(g), 355, 371(a)); secs. 4, 548 (42 U.S.C. 257a, 290ee-3).

2. Section 291.505 is revised to read as follows:

**§ 291.505 Conditions for the use of narcotic drugs; appropriate methods of professional practice for medical treatment of the narcotic addiction of various classes of narcotic addicts under section 4 of the Comprehensive Drug Abuse Prevention and Control Act of 1970.**

(a) *Definitions.* As used in this part:

(1) "Detoxification treatment" means the dispensing of a narcotic drug in decreasing doses to an individual to alleviate adverse physiological or psychological effects incident to withdrawal from the continuous or sustained use of a narcotic drug and as a method of bringing the individual to a narcotic drug-free state within such period. There are two types of detoxification treatment: short-term detoxification treatment and long-term detoxification treatment.

(i) "Short-term detoxification treatment" is for a period not in excess of 30 days.

(ii) "Long-term detoxification treatment" is for a period more than 30 days but not in excess of 180 days.

(2) "Maintenance treatment" means the dispensing of a narcotic drug in the treatment of an individual for dependence on heroin or other morphine-like drug.

(3) A "medical director" is a physician, licensed to practice medicine in the jurisdiction in which the program is located, who assumes responsibility for the administration of all medical services performed by the narcotic treatment program including ensuring that the program is in compliance with all Federal, State, and local laws and regulations regarding the medical treatment of narcotic addiction with a narcotic drug.

(4) A "medication unit" is a facility established as part of, but geographically dispersed, i.e., separate from a narcotic treatment program from which licensed private practitioners and community pharmacists—

(i) Are permitted to administer and dispense a narcotic drug, and

(ii) Are authorized to collect samples for drug testing or analysis for narcotic drugs.

(5) "Narcotic dependent" means an individual who physiologically needs heroin or a morphine-like drug to prevent the onset of signs of withdrawal.

(6) A "narcotic treatment program" is an organization (or a person, including a private physician) that administers or dispenses a narcotic drug to a narcotic addict for maintenance or detoxification treatment, provides, when appropriate or necessary, a comprehensive range of medical and rehabilitative services, is approved by the State authority and the Food and Drug Administration, and that is registered with the Drug Enforcement Administration to use a narcotic drug for the treatment of narcotic addiction.

(7) A "program sponsor" is a person (or representative of an organization) who is responsible for the operation of a narcotic treatment program and who assumes responsibility for all its employees including any practitioners, agents, or other persons providing services at the program (including its medication units).

(8) The term "services," as used in this part, includes medical evaluations, counseling, rehabilitative and other social programs (e.g., vocational and educational guidance, employment placement), which will help the patient become a productive member of society.

(9) A "State authority" is the agency designated by the Governor or other appropriate official to exercise the responsibility and authority within the State or Territory for governing the treatment of narcotic addiction with a narcotic drug.

(b) *Organizational structure and approval requirements—*

(1) *Organizational structure.* (i) A narcotic treatment program may be an independent organization or part of a centralized organization. For example, if a centralized organizational structure consists of a primary facility and other outpatient facilities, all of which conduct initial evaluation of patients and administer or dispense medication, the primary facility and each outpatient facility are separate programs, even though some services (e.g., the same hospital or rehabilitative services) are shared.

(ii) The program sponsor shall submit to the Food and Drug Administration and the State authority a description of the organizational structure of the program, the name of the persons responsible for the program, the address of the program, and the responsibilities of each facility or medication unit. The sources of funding for each program shall be listed and the name and address of each governmental agency providing funding shall be stated.

(iii) Where two or more programs share a central administration (e.g., a city or State-wide organization), the person responsible for the organization (administrator or program sponsor) is required to be listed as the program sponsor for each separate participating program. An individual program shall indicate its participation in the central organization at the time of its application. The administrator or sponsor may fulfill all recordkeeping and reporting requirements for these programs, but each program must continue to receive separate approval.

(iv) One physician may assume primary medical responsibility for more than one program and be listed as medical director. If a physician assumes medical responsibility for more than one program, a statement documenting the feasibility of the arrangement is required to be attached to the application.

(v) [Reserved]

(2)(i) *Program approval.* Before a narcotic treatment program may be lawfully operated, the program, whether an outpatient facility or a private practitioner, shall submit the applications specified in this section simultaneously to the Food and Drug Administration and the State authority and must receive the approval of both, except as provided for in paragraph (h)(5) of this section. Before granting approval, the Food and Drug Administration will consult with the Drug Enforcement Administration, Department of Justice, to ascertain if the program is in compliance with Federal controlled substances laws. Each physical location within any program is required to be identified and listed in the approval application. At the time of application for approval, the program sponsor shall indicate whether medication will be administered or dispensed at a location not previously approved for this purpose, the program is required to obtain approval from FDA and the State agency. However, no approval is necessary, but notification is required when a facility in which medication is administered or dispensed is deleted by a program. In that event, the program shall notify the Food and Drug Administration and the State authority within weeks of the deletion. Similarly, addition or deletion of facilities which provide services other than administering or dispensing medication is also permitted without approval, but notification must be made within 3 weeks to the Food and Drug Administration and the State authority about the addition and/or deletion.

(ii) *Exemption of Federal programs.* The provisions of this section requiring approval (or permitting disapproval or revocation of approval) by the State authority, compliance with requirements imposed by State law, or the submission of applications or reports required by the State authority do not apply to programs operated directly by the Veterans' Administration or any other department or agency of the United States. Federal agencies operating narcotic treatment programs have agreed to cooperate voluntarily with State agencies by granting permission on an informal basis for designated State representatives to visit Federal narcotic treatment programs and by furnishing a copy of Federal reports to the State authority, including the reports required under this section.

(iii) *Services.* Each narcotic treatment program shall provide medical and rehabilitative services and programs. (See paragraph (d)(4) of this section.) These services should normally be made available at the primary facility, but the program sponsor may enter into a formal documented agreement with private or public agencies, organizations, or institutions for these services if they are available elsewhere. The program sponsor, in any event, must be able to document that medical and rehabilitative services are fully available to patients.

(iv) *Prohibition against unapproved use of narcotic drugs.* No prescribing, administering, or dispensing of a narcotic drug for the treatment of narcotic addiction may occur without prior approval by the Food and Drug Administration and the State authority, except as provided for in paragraph (h)(5) of this section, unless specifically exempted by this section.

(v) *Approved narcotic drugs for use in treatment programs.* The following narcotic drug has been approved for use in the treatment of narcotic addiction: Methadone.

(3)(i) *Medication unit.* A program may establish a medication unit to facilitate the needs of patients who are stabilized on an optimal dosage level. To lawfully operate a medication unit, the program shall, for each separate unit, obtain approval from the Food and Drug Administration, the Drug Enforcement

VOL 54 ISS 40 MR 2 1989 UMI

Administration, and the State authority, except as provided for in paragraph (h)(5) of this section. The Food and Drug Administration, in determining whether to approve a medication unit, will consider the distribution of units within a particular geographic area. Any new medication unit is required to receive approval before it may lawfully commence operation.

(ii) *Revocation of approval.* If the Food and Drug Administration revokes the primary program's approval, the approval for any medication unit associated with the program is deemed to be automatically revoked. The Food and Drug Administration's revocation of the approval of a particular medication unit, will not, in and of itself, affect the approval of the primary program.

(iii) *Narcotic drug supply.* A medication unit must receive its supply of the narcotic drug directly from the stocks of the primary facility. Only persons permitted to administer or dispense the drug or security personnel licensed or otherwise authorized by State law to do so may deliver the drug to a medication unit.

(iv) *Referral.* (A) The patient shall be stabilized at his or her optimal dosage level before he or she may be referred to a medication unit.

(B) Since the medication unit does not provide a range of services, the program sponsor shall determine that the patient to be referred is not in need of frequent counseling, rehabilitative, and other services which are only available at the primary program facility.

(v) *Services.* A medication unit is limited to administering or dispensing a narcotic drug and collecting samples for drug testing or analysis for narcotic drugs in accordance with paragraph (d)(2) of this section. If a private practitioner wishes to provide other services besides administering or dispensing a narcotic drug and collecting samples for drug testing or analysis for narcotic drugs, he or she must submit an application for separate approval.

(vi) *Responsibility for patient.* After a patient is referred to a medication unit, the program sponsor retains continuing responsibility for the patient's care. The program sponsor shall ensure that the patient receives needed medical and rehabilitative services at the primary facility.

(c) *Conditions for approval of the use of a narcotic drug in a treatment program*—(1) *Applicants.* An individual listed as program sponsor for a treatment program using a narcotic drug need not personally be a licensed practitioner but shall employ a licensed physician for the position of medical director. Persons responsible for administering or dispensing the narcotic drug shall be practitioners as defined by section 102(21) of the Controlled Substances Act (21 U.S.C. 802(21)) and licensed to practice by the State in which the program is to be established.

(2)(i) *Assent to regulation.* A person who sponsors a narcotic treatment program, and any persons responsible for a particular program, shall agree to adhere to all the rules, directives, and procedures, set forth in this section, and any regulation regarding the use of narcotic drugs in the treatment of narcotic addiction which may be promulgated in the future. The program sponsor has responsibility for all personnel and individuals providing services, who work in the program at the primary facility or at other facilities or medication units. The program sponsors shall agree to inform all personnel and individuals providing services of the provisions of this section and to monitor their activities to assure compliance with the provisions.

(ii) The Food and Drug Administration and the State authority are required to be notified within 3 weeks of any replacement of the program sponsor or medical director. Activities in violation of this regulation may give rise to the sanctions set forth in paragraph (i) of this section.

(3) *Description of facilities.* Only program site(s) approved by Federal, State, and local authorities may treat narcotic addicts with a narcotic drug. To obtain program approval, the applicant shall demonstrate that he or she will have access to adequate physical facilities to provide all necessary services. A program must have ready access to a comprehensive range of medical and rehabilitative services so that the services may be provided when necessary. The name, address, and description of each hospital, institution, clinical laboratory, or other facility available to provide the necessary services are required to be included in the application submitted to the Food and Drug Administration and the State authority. The application is also required to include the name and address of each medication unit.

(4) *Submission of proper applications.* The following applications shall be filed simultaneously with both the Food and Drug Administration and the State authority:

(i) Form FDA-2632 "Application for Approval of Use of Methadone in a Treatment Program." This form, required by paragraph (k) of this section, shall be completed and signed by the program sponsor and submitted in duplicate to the Food and Drug Administration and the State authority.

(ii) Form FDA-2633 "Medical Responsibility Statement for Use of Methadone in a Treatment Program." This form, required by paragraph (k) of this section, shall be completed and signed by each licensed physician authorized to administer or dispense narcotic drugs and submitted in duplicate to the Food and Drug Administration and the State authority. The names of any other persons licensed by law to administer or dispense narcotic drugs working in the program shall be listed even if they are not responsible for administering or dispensing the drug at the time the application is submitted.

(5) *State and Federal approval, denial, and revocation of approval of narcotic treatment programs.* (i) The Food and Drug Administration may grant approval to a program only after FDA has received notification from both the State authority and the Drug Enforcement Administration that the program conforms to all pertinent State and Federal requirements.

(ii) The Food and Drug Administration will revoke the approval of a narcotic treatment program if so requested by the State authority or the Drug Enforcement Administration. If approval of a program is denied or revoked, the program shall have a right to appeal to the Commissioner, as provided for in paragraph (h)(5) of this section.

(iii) No shipment of a narcotic drug may lawfully be made to any program which does not have current approval from the Food and Drug Administration. Within 60 days after receipt of the application from the program sponsor for approval, the Food and Drug Administration will notify the sponsor whether the application is approved or denied.

(d)(1) *Minimum standards for admission—(i) History of addiction and current physiologic dependence.* (A) A person may be admitted as a patient for a maintenance program only if a program physician determines that the person is currently physiologically dependent upon a narcotic drug and became physiologically dependent at least 1 year before admission for maintenance treatment. A 1-year history of addiction means that an applicant for admission to a maintenance program was physiologically addicted to a narcotic at a time at least 1 year before admission to a program and was addicted, continuously or episodically, for most of the year immediately before admission to a program. In the case of a person for whom the exact date on which physiological addiction began cannot be ascertained, the admitting program physician may, in his or her reasonable clinical judgment, admit the person to maintenance treatment, if from the evidence presented, observed, and recorded in the patient's record, it is reasonable to conclude that there was physiologic dependence at a time approximately 1 year before admission.

(B) Although daily use of a narcotic for an entire year could satisfy the regulatory definition of a 1-year history of addiction, operationally one might be physiologically dependent without daily use during the entire 1-year period and still satisfy the definition. The following, although not exhaustive, are examples of applicants who would meet the minimum standard of a 1-year history of addiction and who, if currently physiologically dependent on the date of application for admission, would be eligible for admission to a maintenance program:

(*1*) Physiologic addiction began in August 1987 and continued to the date of application for admission in August 1988.

(*2*) Physiologic addiction began in January 1988 and continued until April 1988. Physiologic addiction began again in July 1988 and continued until the application for admission in January 1989.

(*3*) Physiologic addiction began in January 1987 and continued until October 1987. The date of application for admission was January 1988, at which time the patient had been readdicted for 1 month preceding his or her admission.

(*4*) Physiologic addiction consisted of four episodes in the last year, each episode lasting 2½ months.

(C) The program physician or an appropriately trained staff member designated and supervised by the physician shall record in the patient's record the criteria used to determine the patient's current physiologic dependence and history of addiction. In the latter circumstance, the program physician shall review, date, and countersign the supervised staff member's evaluation to demonstrate his or her agreement with the evaluation. The program physician shall make the final determination concerning a patient's physiologic dependence and history of addiction. The program physician shall sign, date, and record a statement that he or she has reviewed all the documented evidence to support a 1-year history of addiction and the current physiologic dependence and that in his or her reasonable clinical judgment the patient fulfills the requirements for admission to maintenance treatment. The program physician shall complete and record the statement before the program administers any methadone to the patient.

(ii) *Voluntary participation, informed consent.* The person responsible for the program shall ensure that: A patient voluntarily chooses to participate in a program; all relevant facts concerning the use of the narcotic drug used by the program are clearly and adequately explained to the patient; all patients, with full knowledge and understanding of its contents, sign the "Consent to Methadone Treatment" Form FDA-2635 (see paragraph (k) of this section); a parent, legal guardian, or responsible adult designated by the State authority (e.g., "emancipated minor" laws) sign for patients under the age of 18 the second part of Form FDA-2635 "Consent to Methadone Treatment."

(iii) *Exceptions to minimum admission criteria*—(A) *Penal or chronic care.* A person who has resided in a penal or chronic care institution for 1 month or longer may be admitted to maintenance treatment within 14 days before release or discharge, or within 6 months after release from such an institution without documented evidence to support findings of physiological dependence, provided the person would have been eligible for admission before he or she was incarcerated or institutionalized and, in the reasonable clinical judgment of a program physician, treatment is medically justified. Documented evidence of the prior residence in a penal or chronic care institution and evidence of all other findings and the criteria used to determine the findings are required to be recorded in the patient's record by the admitting program physician, or by program personnel supervised by the admitting program physician. The admitting program physician shall date and sign these recordings or review the health-care professional's recordings before the initial dose is administered to the patient. In the latter case, the admitting program physician shall date and sign the recordings in the patient's record made by the health-care professional within 72 hours of administration of the initial dose to the patient.

(B) *Pregnant patients.* (*1*) Pregnant patients, regardless of age, who have had a documented narcotic dependency in the past and who may return to narcotic dependency, with all its attendant dangers during pregnancy, may be placed on a maintenance regimen. For such patients, evidence of current physiological dependence on narcotic drugs is not needed if a program physician certifies the pregnancy and, in his or her reasonable clinical judgment, finds treatment to be medically justified. Evidence of all findings and the criteria used to determine the findings are required to be recorded in the patient's record by the admitting program physician, or by program personnel supervised by the admitting program physician. The admitting program physician shall date and sign these recordings or review the health-care professional's recordings before the initial methadone dose is administered to the patient. In the latter case, the admitting program physician shall date and sign the recordings in the patient's record made by the health-care professional within 72 hours of administration of the initial methadone dose to the patient. Pregnant patients are required to be given the opportunity for prenatal care either by the program or by referral to appropriate health-care providers.

(*2*) If a program cannot provide direct prenatal care for pregnant patients in treatment, the program shall establish a system for informing the patients of the publicly or privately funded prenatal care opportunities available. If there are no publicly funded prenatal referral opportunities and the program cannot provide such services or the patient cannot afford them or refuses them, then the treatment program shall, at a minimum, offer her basic prenatal instruction on maternal, physical, and dietary care as part of its counseling service.

(*3*) Counseling records and/or other appropriate patient records are required to reflect the nature of prenatal support provided by the program. If the patient is referred for prenatal services, the physician to whom she is referred is required to be notified that she is in maintenance treatment, provided that notification is in accordance with the Department of Health and Human Services' confidentiality regulations (42 CFR Part 2). If a pregnant patient refuses direct treatment or appropriate referral for treatment, the treating program physician should consider using informed consent procedures; e.g., to have the patient acknowledge in writing that she had the opportunity for this treatment but refuses it. The program physician, consistent with the confidentiality regulations, shall request the physician or the hospital to which a patient is referred to provide, following birth, a summary of the delivery and treatment outcome for the patient and offspring. If the program physician does not receive a response to the request, he or she shall document in the record that such a request was made.

VOL 54 ISS 40 MR 2 1989 UMI

(4) Within 3 months after termination of pregnancy, the program physician shall enter an evaluation of the patient's treatment state into her record and state whether she should remain in the maintenance program or be detoxified.

(5) Caution should be taken in the maintenance treatment of pregnant patients. Dosage levels should be maintained at the lowest effective dose if treatment is deemed necessary. The program sponsor shall ensure that each female patient is fully informed of the possible risks to her or to her unborn child from continued use of illicit drugs and from the use of, or withdrawal from, a narcotic drug administered or dispensed by the program in maintenance or detoxification treatment.

(C) *Previously treated patients.* Under certain circumstances a patient who has been treated and later voluntarily detoxified from maintenance treatment may be readmitted to maintenance treatment, without evidence to support findings of current physiologic dependence, up to 2 years after discharge, if the program attended is able to document prior narcotic drug maintenance treatment of 6 months or more, and the admitting program physician, in his or her reasonable clinical judgment, finds readmission to maintenance treatment to be medically justified. For patients meeting these criteria, the quantity of take-home medication will be determined in the reasonable clinical judgment of the program physician, but in no case may the quantity of take-home medication be greater than would have been allowed at the time the patient voluntarily terminated previous treatment. The admitting program physician or a program employee under supervision of the admitting program physician must enter in the patient's record documented evidence of the patient's prior treatment and evidence of all decisions and criteria used relating to the admission of the patient and the quantity of take-home medication permitted. The admitting program physician shall date and sign these entries in the patient's record or review the health-care professional's entries therein before the program administers any medication to the patient. In the latter case, the admitting program physician shall date and sign the entries in the patient's record made by the health-care professional within 72 hours of administration of the initial dose to the patient.

(iv) *Special limitation; treatment of patients under 18 years of age.* A person under 18 is required to have had two documented attempts at short-term detoxification or drug-free treatment to be eligible for maintenance treatment. A 1-week waiting period is required after such a detoxification attempt, however, before an attempt is repeated. The program physician shall document in the patient's record that the patient continues to be or is again physiologically dependent on narcotic drugs. No person under 18 years of age may be admitted to a maintenance treatment program unless a patient, legal guardian, or responsible adult designated by the State authority (e.g., "emancipated minor" laws) completes and signs consent form, Form FDA-2635 "Consent to Methadone Treatment."

(v) *Denial of admission.* If in the reasonable clinical judgment of the medical director a particular patient would not benefit from treatment with a narcotic drug, the patient may be refused such treatment even if the patient meets the admission standards.

(2) *Minimum testing or analysis for drugs: Uses and frequency.* (i) The person(s) responsible for a program shall ensure that: An initial drug-screening test or analysis is completed for each prospective patient; at least eight additional random tests or analyses are performed on each patient during the first year in maintenance treatment; and at least quarterly random tests or analyses are performed on each patient in maintenance treatment for each subsequent year, except that a random test or analysis is performed monthly on each patient who receives a 6-day supply of take-home medication. When a sample is collected from each patient for such test or analysis, it must be done in a manner that minimizes opportunity for falsification. Each test or analysis must be analyzed for opiates, methadone, amphetamines, cocaine, and barbiturates. In addition, if any other drug or drugs have been determined by a program to be abused in that program's locality, or as otherwise indicated, each test or analysis must be analyzed for any of those drugs as well. Any laboratory that performs the testing required under this regulation shall be in compliance with all applicable Federal proficiency testing and licensing standards and all applicable State standards. If a program proposes to change a laboratory used for such testing or analysis, the program shall have the change approved by the Food and Drug Administration.

(ii) The person responsible for a program shall ensure that test results are not used as the sole criterion to force a patient out of treatment but are used as a guide to change treatment approaches. The person responsible for a program shall also ensure that when test results are used, presumptive laboratory results are distinguished from results that are definitive.

(3) *Patient evaluation; minimum admission and periodic requirements—*(i) *Minimum contents of medical evaluation.* Each patient is required to have a medical evaluation by a program physician or an authorized health-care professional under the supervision of a program physician on admission to a program. At a minimum, this evaluation is required to consist of a medical history which includes the required history of narcotic dependence, evidence of current physiologic dependence unless excepted by the regulations, and a physical examination, and includes the following laboratory examinations: serological test for syphilis, a tuberculin skin test, and a test or analysis for drug determination. If in the reasonable clinical judgment of the program physician, a patient's subcutaneous veins are severely damaged to the extent that a blood specimen cannot be obtained, the serological test for syphilis may be omitted. The physical examination is required to consist of an investigation of the organ systems for possibilities of infectious disease, pulmonary, liver, and cardiac abnormalities, and dermatologic sequelae of addiction. In addition, the physical examination is required to include a determination of the patient's vital signs (temperature, pulse, and blood pressure and respiratory rate); an examination of the patient's general appearance, head, ears, eyes, nose, throat (thyroid), chest (including heart, lungs, and breasts), abdomen, extremities, skin, and neurological assessment; and the program physician's overall impression of the patient.

(ii) *Recordings of findings.* The admitting program physician or an appropriately trained health care professional supervised by the admitting program physician shall record in the patient's record all findings from the admission medical evaluation. In each case the admitting program physician shall date and sign these entries, or date, review, and countersign these recordings in the patient's record to signify his or her review of and concurrence with the history and physical findings.

(iii) *Admission evaluation.* (A) Each patient seeking admission or readmission for treatment services is required to be interviewed by a well-trained program counselor, qualified by virtue of education, training, or experience to assess the psychological and sociological background of drug abusers, to determine the appropriate treatment plan for the patient. To determine the most appropriate treatment plan for a patient, the interviewer shall obtain and document in the patient's record the patient's history.

(B) A patient's history includes information relating to his or her educational and vocational achievements. If a patient has no such history; i.e., he or she has no formal education or has never had an occupation, this requirement is met by writing this information in the patient's history.

(iv) *Initial treatment plan.* (A)(1) The initial treatment plan is required to contain a statement that outlines realistic short-term treatment goals which are mutually acceptable to the patient and the program. The initial treatment plan is also required to spell out the behavioral tasks a patient must perform to complete each short-term goal; the patient's requirements for education, vocational rehabilitation, and employment; and the medical, psychosocial, economic, legal, or other supportive services that a patient needs. The plan is also required to identify the frequency with which these services are likely to be provided. Prior to developing a treatment plan, the patient's needs for medical, social, and psychological services; education; vocational rehabilitation; and employment must be assessed, and the needs reflected, when clinically appropriate, in the treatment plan.

(2) A primary counselor is one who is assigned by the program to develop, implement, and evaluate the patient's initial and periodic treatment plan and to monitor a patient's progress in treatment. The primary counselor shall enter in the patient's record the counselor's name, the contents of a patient's initial assessment, and the initial treatment plan. The primary counselor shall make these entries immediately after the patient is stabilized on a dose or within 4 weeks after admission, whichever is sooner.

(B) It is recognized that patients need varying degrees of treatment and rehabilitative services which are often dependent on or limited by a number of variables; e.g., patient resources, available program, and community services. It is not the intent of this regulation to prescribe a particular treatment and rehabilitative service or the frequency at which a service should be offered.

(C) The program supervisory counselor or other appropriate program personnel so designated by the program physician shall review and countersign all the information and findings required to be recorded in each patient's record under paragraph (d)(3)(iv) of this section.

(v) *Periodic treatment plan evaluation.* (A) The program physician or the primary counselor shall review, reevaluate, and alter where necessary each patient's treatment plan at least once each 90 days during the first year of treatment, and then at least twice a year after the first year of continuous treatment.

(B) The program physician shall ensure that the periodic treatment plan becomes part of each patient's record and that it is signed and dated in the patient's record by the primary counselor and is countersigned and dated by the supervisory counselor.

(C) At least once a year, the program physician shall date, review, and countersign the treatment plan recorded in each patient's record and ensure that each patient's progress or lack of progress in achieving the treatment goals is entered in the patient's record by the primary counselor. When appropriate, the treatment plan and progress notes should deal with the patient's mental and physical problems, apart from drug abuse. The treatment plan is required to include the name of and the reasons for prescribing any medication for emotional or physical problems.

(D) The requirement for annual physician review and signature by the program physician in paragraph (d)(3)(v)(C) of this section is discretionary, however, as it applies to a patient who has satisfactorily adhered to program rules for at least 3 consecutive years from his or her entrance into the maintenance treatment program and who has made substantial progress in rehabilitation.

(4) *Minimum program services*—(i)(A) *Access to a range of services.* A treatment program shall provide a comprehensive range of medical and rehabilitative services to its patients especially during the first 3 years of treatment.

(B) *Pregnant patients.* (1) For pregnant patients in a treatment program who were not admitted under paragraph (d)(1)(iii)(B) of this section, a treatment program shall give them the opportunity for prenatal care either by the narcotic treatment program or by referral to appropriate health care providers. If a program cannot provide direct prenatal care for pregnant patients in treatment, it shall establish a system of referring them for prenatal care which may be either publicly or privately funded. If there is no publicly funded prenatal care available to which a patient may be referred, and the program cannot provide such services, or the patient cannot afford or refuses prenatal care services, then the treatment program shall, at a minimum, offer her basic prenatal instruction on maternal, physical, and dietary care as a part of its counseling service.

(2) Counseling records and other appropriate patient records are required to reflect the nature of prenatal support provided by the program. If the program refers a patient for prenatal services, it shall inform the physician to whom she is referred that the patient is in maintenance treatment, provided such notification is in accordance with the Department of Health and Human Services' confidentiality regulations (42 CFR Part 2). If a pregnant patient refuses direct prenatal services or appropriate referral for prenatal services, the treating program physician should consider using informed consent procedures; i.e., to have the patient acknowledge in writing that she has the opportunity for this treatment but refuses it. The program physician shall request the physician or the hospital to which a patient is referred to provide, following birth, a summary of the delivery and treatment outcome for the patient and offspring. The information should be obtained in accordance with the Department of Health and Human Services' confidentiality regulations (42 CFR Part 2). If no response is received, the program physician shall document in the record that such a request was made and no response was received.

(3) Caution should be taken in the maintenance treatment of pregnant patients. Dosage levels should be maintained at the lowest effective dose if continued treatment is deemed necessary. It is the responsibility of the program sponsor to ensure that each female patient is fully informed of the possible risks to a pregnant woman and her unborn child from continued use of illicit drugs and from the use of, or withdrawal from, a narcotic drug administered or dispensed by the program in maintenance or detoxification treatment.

(C) [Reserved]

(D) *Off-site services.* Any service not furnished at the primary facility is required to be listed in any application for approval submitted to the Food and Drug Administration or to the State authority. The addition, modification, or deletion of any program service is required to be reported immediately to the Food and Drug Administration.

BEST COPY AVAILABLE

VOL 54 ISS 40 MR 2 1989 UMI

(ii) *Minimum medical services; designation of medical director and responsibilities.* Each program shall have a designated medical director who assumes responsibility for administering all medical services performed by the program. The medical director and other authorized program physicians are required to be licensed to practice medicine in the jurisdiction in which the program is located. The medical director is responsible for ensuring that the program is in compliance with all Federal, State, and local laws and regulations regarding medical treatment of narcotic addiction. In addition, the medical director or other authorized physicians shall:

(A) Ensure that evidence of current physiologic dependence, length of history of addiction, or exceptions to criteria for admission are documented in the patient's record before the patient receives the initial dose.

(B) Ensure that a medical evaluation including a medical history has been taken, and physical examination has been done before the patient receives the initial dose (except that in an emergency situation, the initial dose may be given before the physical examination).

(C) Ensure that appropriate laboratory studies have been performed and reviewed.

(D) Sign or countersign all medical orders as required by Federal or State law. (Such medical orders include but are not limited to the initial medication orders and all subsequent medication order changes, all changes in the frequency of take-home medication, and prescribing additional take-home medication for an emergency situation.)

(E) Review and countersign treatment plans at least annually as qualified by paragraph (d)(3)(v)(D) of this section.

(F) Ensure that justification is recorded in the patient's record for reducing the frequency of clinic visits for observed drug ingesting, providing additional take-home medication under exceptional circumstances or when there is physical disability, or prescribing any medication for physical or emotional problems.

(iii) *Use of health-care professionals.* Although the final decision to accept a patient for treatment may be made only by the medical director or other designated program physician, it is recognized that physicians can train program personnel to detect and document narcotic abstinence symptons and that some jurisdictions allow State-licensed or certified health-care professionals; e.g., physician's assistants, nurse practitioners, to perform certain functions—record medical histories, perform physical examinations, and prescribe, administer, or dispense certain medications—that are ordinarily performed by a licensed physician. These regulations do not prohibit licensed or certified health-care professionals from performing those functions in narcotic treatment programs if it is authorized by Federal, State, and local laws and regulations, and if those functions are delegated to them by the medical director, and records are properly countersigned by the medical director or a licensed physician.

(iv) *Vocational rehabilitation, education, and employment.* Each program shall provide opportunities directly, or through referral to community resources, for patients who either desire or have been deemed by the program staff to be ready to participate in educational job training programs or to obtain gainful employment as soon as possible.

(5) *Staffing patterns*—(i) *Program personnel.* The person(s) responsible for a program shall determine program personnel requirements after considering the number of patients who are vocationally and educationally impaired; the number of patients with significant psychopathology; the number of patients who are also nonnarcotic drug or alcohol abusers; the number of patients with behavioral problems in the program; and the number of patients with serious medical problems.

(ii) *Supportive services.* The person(s) responsible for the program shall take notice, when considering the staffing pattern, that maintenance treatment programs need to establish supportive services in accordance with the varying characteristics and needs of their patient populations. The person(s) responsible for a program shall also take notice of the availability of existing community resources which may complement or enhance the program's delivery of supportive services and then establish a staffing pattern based on a combination of patient needs and available, accessible community resources.

(6) *Frequency of attendance; quantity of take-home medication; dosage of methadone; initial and stabilization—(i) Dosage and responsibility for administration.* (A) The person(s) responsible for the program shall ensure that the initial dose of methadone does not exceed 30 milligrams and that the total dose for the first day does not exceed 40 milligrams, unless the program medical director documents in the patient's record that 40 milligrams did not suppress opiate abstinence symptoms.

(B) A licensed physician shall assume responsibility for the amount of the narcotic drug administered or dispensed and shall record, date, and sign in each patient's record each change in the dosage schedule.

(C) The administering licensed physician shall ensure that a daily dose greater than 100 milligrams is justified in the patient's record.

(ii) *Authorized dispensers of narcotic drugs; responsibility.* A narcotic drug may be administered or dispensed only by a practitioner licensed under the apporpriate State law and registered under the appropriate State and Federal laws to order narcotic drugs for patients, or by an agent of such a practitioner, supervised by and under the order of the practitioner. This agent is required to be a pharmacist, registered nurse, or licensed practical nurse, or any other health care professional authorized by federal and State law to administer or dispense narcotic drugs. The licensed practitioner assumes responsibility for the amounts of narcotic drugs administered or dispensed and shall record and countersign all changes in dosage schedule.

(iii) *Form.* Methadone may be administered or dispensed in oral form only when used in a treatment program. Hospitalized patients under care for a medical or surgical condition are permitted to receive methadone in parenteral form when the attending physician judges it advisable. Although tablet, syrup concentrate, or other formulations may be distributed to the program, all oral medication is required to be administered or dispensed in a liquid formulation. The oral dosage form is required to be formulated in such a way as to reduce its potential for parenteral abuse. Take-home medication is required to be labeled with the treatment center's name, address, and telephone number and must be packaged in special packaging as required by 16 CFR 1700.14 in accordance with the Poison Prevention Packaging Act (Pub. L. 91-601, 15 U.S.C. 1471 *et seq.*) to reduce the chances of accidental ingestion. Exceptions may be granted when these provisions conflict with State law with regard to the administering or dispensing of drugs.

(iv) *Take-home medication.* (A) Take-home medication may be given only to a patient who, in the reasonable clinical judgment of the program physician, is responsible in handling narcotic drugs. Before the program physician reduces the frequency of a patient's clinical visits, she or he or a designated staff member shall record the rationale for the decision in the patient's clinical record. If this is done by a designated staff member, a program physician shall review, countersign, and date the patient's record where this information is recorded.

(B) The program physician shall consider the following in determining whether, in his or her reasonable clinical judgment, a patient is responsible in handling narcotic drugs:

(*1*) Absence of recent abuse of drugs (narcotic or nonnarcotic), including alcohol;

(*2*) Regularity of clinic attendance;

(*3*) Absence of serious behavioral problems at the clinic;

(*4*) Absence of known recent criminal activity, e.g., drug dealing;

(*5*) Stability of the patient's home environment and social relationships;

(*6*) Length of time in maintenance treatment;

(*7*) Assurance that take-home medication can be safely stored within the patient's home; and

(*8*) Whether the rehabilitative benefit to the patient derived from decreasing the frequency of clinic attendance outweighs the potential risks of diversion.

(v) *Take-home requirements.* The requirement of time in treatment is a minimum reference point after which a patient may be eligible for take-home privileges. The time reference is not intended to mean that a patient in treatment for a particular time has a specific right to take-home medication. Thus, regardless of time in treatment, a program physician may, in his or her reasonable judgment, deny or rescind the take-home medication privileges of a patient.

(A)(*1*) In maintenance treatment it is required that a patient come to the clinic for observation daily or at least 6 days a week. If, in the reasonable clinical judgment of the program physician, a patient demonstrates that he or she has satisfactorily adhered to program rules for at least 3 months, has made substantial progress in rehabilitation and responsibility in handling narcotic drugs (see paragraphs (d)(6)(iv)(B) (*1*) through (*8*) of this section, and would improve his or her rehabilitative progress by decreasing the frequency of attendance at the clinic for observation, the patient may be permitted to reduce his or her attendance at the clinic for observation to three times weekly. The patient may receive no more than a 2-day take-home supply of medication.

(*2*) If, in the reasonable clinical judgment of the program physician, a patient demonstrates that he or she has satisfactorily ahered to program rules for at least 2 years from his or her entrance into the program, has made substantial progress in rehabilitation and responsibility in handling narcotic drugs (see paragraphs (d)(6)(iv)(B) (*1*) through (*8*) of this section), and would improve his or her rehabilitative progress by decreasing the frequency of attendance at the clinic for observation, the patient may be permitted to reduce his or her clinic attendance at the clinic for observation to twice weekly. Such a patient may receive no more than a 3-day take-home supply of medication.

(*3*) If, in the reasonable clinical judgment of the program physician, a patient demonstrates that he or she has satisfactorily adhered to program rules for at least 3 consecutive years from his or her entrance into the maintenance treatment program, has made substantial progress in rehabilitation, has no major behavioral problems, is responsible in handling narcotic drugs (see paragraphs (d)(6)(iv)(B) (*1*) through (*8*) of this section), and would improve his or her rehabilitative progress by decreasing the frequency of his or her clinic attendance for observation, the patient may be permitted to reduce clinic attendance for observation to once weekly, provided that the following additional criteria are met: The program physician has written into the patient's record an evaluation that the patient is responsible in handling narcotic drugs (paragraphs (d)(6)(iv)(B)(*1*) through (*8*) of this section); the patient is employed (or actively seeking employment), attends school, is a homemaker, or is considered unemployable for mental or physical reasons by a program physician; the patient is not known to have abused drugs including alcohol in the last year; and the patient is not known to have engaged in criminal activity; e.g., drug dealing, in the last year. A patient permitted to reduce clinic attendance for observation to once weekly may receive no more than a 6-day take-home supply of medication.

(B)(*1*) If a patient, after receiving a supply of take-home medication, is inexcusably absent from or misses a scheduled appointment with a treatment program without authorization from the program staff, the program physician shall increase the frequency of the patient's clinic attendance for drug ingestion under observation. For such a patient, the program physician shall not reduce the frequency of the patient's clinic attendance for drug ingestion under observation until she or he has had at least three consecutive monthly tests or analyses that are neither positive for morphine-like drugs (except from the narcotic drug administered or dispensed by the program) or other drugs of abuse, nor negative for the narcotic drug administered or dispensed by the program, and until she or he is again determined by a program physician to be responsible in handling narcotic drugs (see paragraphs (d)(6)(iv)(B) (*1*) through (*8*) of this section) and to meet criteria in paragraph (d)(6)(v)(A) of this section.

(*2*) If a patient, after receiving a 6-day supply of take-home medication, has a test or analysis which is confirmed to be positive for morphine-like drugs (except for the narcotic drug administered or dispensed by the program) or other drugs of abuse, or negative for the narcotic drug administered or dispensed by the program, the program physician shall place the patient on probation for 3 months. If, during this probation, the patient has a test or analysis either positive for morphine-like drugs (except for the narcotic drug administered or dispensed by the program) or other drugs of abuse, or negative for the narcotic drug administered or dispensed by the program, the program physician shall increase the frequency of the patient's clinic attendance for observation to at least twice weekly. Such a patient may receive no more than a 3-day take-home supply of medication until she or he has had at least three consecutive monthly tests or analyses which are neither positive for morphine-like drugs (except for the narcotic drug administered or dispensed by the program) or other drugs of abuse, nor negative for the narcotic drug administered or dispensed by the program, and the program physician again determines that the patient is responsible in handling narcotic drugs (see paragraphs (d)(6)(iv)(B)(*1*) through (*8*) of this section) and meets the criteria contained in paragraph (d)(6)(v)(A) of this section.

(C) In calculating the number of years of maintenance treatment, the period is considered to begin on the first day the medication is administered, or on readmission if a patient has had a continuous absence of 90 days or more. Cumulative time spent by the patient in more than one program is counted toward the number of years of treatment, provided there has not been a continuous absence of 90 days or more.

(D) Each patient whose daily dose is above 100 milligrams is required to be under observation while ingesting the drug at least 6 days per week irrespective of the length of time in treatment, unless the program has received prior approval from the Food and Drug Administration with the concurrence of the State authority.

(vi) *Exceptions to take-home requirements.* If, in the reasonable

VOL 54 ISS 40 MR 2 1989 UMI

clinical judgment of the program physician:

(A) A patient is found to have a physical disability which interferes with his or her ability to conform to the applicable mandatory schedule, she or he may be permitted a temporarily or permanently reduced schedule, provided she or he is also found to be responsible in handling narcotic drugs.

(B) A patient, because of exceptional circumstances such as illness, personal or family crises, travel, or other hardship, is unable to conform to the applicable mandatory schedule, she or he may be permitted a temporarily reduced schedule, provided she or he is also found to be responsible in handling narcotic drugs. The rationale for an exception to a mandatory schedule is to be based on the reasonable clinical judgment of the program physician and shall be recorded in the patient's record by the program physician or by program personnel supervised by the program physician. In the latter situation, the physician shall review, countersign, and date the patient's record where this rationale is recorded. In any event, a patient may not be given more than a 2-week supply of narcotic drugs at one time.

(vii) *Official State holidays.* If a treatment center program is not in operation due to the observance of an official State holiday, patients may be permitted one extra take-home dose per visit and one fewer clinic visit per week to allow patients not to have to attend the clinic on an official State holiday. An official State holiday is a holiday on which most State offices are usually closed and routine State government business is not conducted.

(7) [Reserved]

(8) *Minimum standards for short-term detoxification treatment.* (i) For short-term detoxification from narcotic drugs, the narcotic drug is required to be administered by the program physician or by an authorized agent of the physician, supervised by and under the order of the physician. The narcotic drug is required to be administered daily, under close observation, in reducing dosages over a period not to exceed 30 days. All requirements for maintenance treatment apply to short-term detoxification treatment with the following exceptions:

(A) Take-home medication is not allowed during short-term detoxification.

(B) A history of 1 year physiologic dependence is not required for admission to short-term detoxification.

(C) Patients who have been determined by the program physician to be currently physiologically narcotic dependent may be placed in short-term detoxification treatment, regardless of age.

(D) No test or analysis is required except for the initial drug screening test or analysis.

(E) The initial treatment plan and periodic treatment plan evaluation required for maintenance patients are not necessary for short-term detoxification patients. However, a primary counselor must be assigned by the program to monitor a patient's progress toward the goal of short-term detoxification and possible drug-free treatment referral.

(F) The requirements of paragraph (d)(4) of this section, except paragraphs (d)(4)(ii) (A) through (D) and (d)(4)(iii) of this section, do not apply to short-term detoxification treatment.

(ii) A patient is required to wait at least 7 days between concluding a short-term detoxification treatment episode and beginning another. Before a short-term detoxification attempt is repeated, the program physician shall document in the patient's record that the patient continues to be, or is again, physiologically dependent on narcotic drugs. The provisions of these requirements, except as noted in paragraph (d)(8)(i) of this section, apply to both inpatient and ambulatory short-term detoxification treatment.

(iii) Short-term detoxification treatment is not recommended for a pregnant patient.

(9) *Minimum standards for long-term detoxification treatment.* (i) For long-term detoxification from narcotic drugs, the narcotic drug is required to be administered by the program physician or by an authorized agent of the physician, supervised by and under the order of the physician. The narcotic drug is required to be administered on a regimen designed to reach a drug-free state and to make progress in rehabilitation in 180 days or less. All requirements for maintenance treatment apply to long-term detoxification treatment with the following exceptions.

(A) In long-term detoxification treatment it is required that the patient be under observation while ingesting the drug daily or at least 6 days a week, for the duration of the long-term detoxification treatment.

(B) A history of 1 year physiologic dependence is not required for admission to long-term detoxification.

(C) The program physician shall document in the patient's record that short-term detoxification is not a sufficiently long enough treatment course to provide the patient with the additional program services he or she deems necessary for the patient's rehabilitation. The program physician shall document this information in the patient's record before long-term detoxification may begin.

(D) Patients who have been determined by the program physician to be currently physiologically dependent on narcotics may be placed in long-term detoxification treatment, regardless of age.

(E) An initial drug screening test or analysis is required for each patient. And at least one additional random test or analysis must be performed monthly on each patient during long-term detoxification.

(F) The initial treatment plan and periodic treatment plan evaluation required for maintenance patients are also required for long-term detoxification patients, except that the required periodic treatment plan evaluation is required to occur monthly.

(ii) A patient is required to wait at least 7 days between concluding a long-term treatment episode and beginning another. Before a long-term detoxification attempt is repeated, the program physician shall document in the patient's record that the patient continues to be or is again physicologically dependent on narcotic drugs. The provisions of these requirements apply to both inpatient and ambulatory long-term detoxification treatment.

(iii) Long-term detoxification is not recommended for a pregnant patient.

(10) *Inspections of programs; patient confidentiality.* A program shall allow inspections by duly authorized employees of the State authority, and in accordance with Federal controlled substances laws and Federal confidentiality laws, by duly authorized employees of the Food and Drug Administration, the Drug Enforcement Administration of the Department of Justice, and the National Institute on Drug Abuse.

(11) *Exemptions from specific program standards.* (i) A program is permitted, at the time of application or any time thereafter, to request exemption from specific program standards. The rationale for an exemption shall be thoroughly documented in an appendix to be submitted with the application or at some later time. The Food and Drug Administration will approve such exemptions of program standards at the time of application, or any time thereafter, with the concurrence of the State authority. An example of a case in which an exemption might be granted would be for a private practitioner who wishes to treat a limited number of patients in a nonmetropolitan area with few physicians and no rehabilitative services geographically accessible and requests exemption from some of the staffing and service standards.

(ii) The Food and Drug Administration has the right to withhold the granting of an exemption requested at the time of application until a program is in actual operation in order to assess if the exemption is necessary. If periodic inspections of the progam reveal that discrepancies or adverse conditions exist, the Food and Drug Administration shall reserve the right to revoke any or all exemptions previously granted.

(12) *Research.* When a program conducts research on human subjects or provides subjects for research, there must be written policies and written review to assure the rights of the patients involved. Appropriate informed consent forms are required to be signed by the patient and to be retained in his or her patient record at the program. All research, development, and related activities which involve human subjects and which are funded by grants from or contracts with the Department of Health and Human Services are required to comply with the Department of Health and Human Services' regulations on the protection of human subjects, 45 CFR Part 46, and confidentiality of information, 42 CFR Part 2. All investigational research involving human subjects conducted for submission to the Food and Drug Administration must be conducted in compliance with Part 312 of this chapter.

(13) *Patient record system*—(i) *Patient care.* The person(s) responsible for a program shall establish a record system to document and monitor patient care. This system is required to comply with all Federal and State reporting requirements relevant to methadone. All records are required to be kept confidential and in accordance with all applicable Federal and State regulations regarding confidentiality.

(ii) *Drug dispensing.* The person(s) responsible for a program shall ensure that accurate records traceable to specific patients are maintained showing dates, quantity, and batch or code marks of the drug dispensed. These records must be retained for a period of 3 years from the date of dispensing.

(iii) *Patient's record.* An adequate record must be maintained for each patient. The record is required to contain a copy of the signed consent form(s), the date of each visit, the amount of drug administered or dispensed, the results of each test or analysis for drugs, any significant physical or psychological disability, the type of rehabilitative and counseling efforts employed, an account of the patient's progress, and other relevant aspects of the treatment program. For recordkeeping purposes, if a patient misses appointments for 2 weeks or more without notifying the program, the episode of care is considered terminated and is to be so noted in the patient's record. This does not mean that the patient cannot return for care. If the patient does return for care and is accepted into the program, this is considered a readmission and is to be so noted in the patient's record. This method of recordkeeping helps assure the easy detection of sporadic attendance and decreases the possibility of administering inappropriate doses of narcotic drugs (e.g., the patient who has received no medication for several days or more and upon return receives the usual stabilization dose). An annual evaluation of the patient's progress must be entered in the patient's record.

(14) *Security of drug stocks.* adequate security is required to be maintained over drug stocks, over the manner in which it is administered or dispensed, over the manner in which it is distributed to medication units, and over the manner in which it is stored to guard against theft and diversion of the drug. The program is required to meet the security standards for the distribution and storage of controlled substances as required by the Drug Enforcement Administration, Department of Justice (21 CFR 1301.72–1301.76).

(e) *Multiple enrollments*—(1) *Administering or dispensing to patients enrolled in other programs.* There is a danger of drug dependent persons attempting to enroll in more than one narcotic treatment program to obtain quantities of drugs for the purpose of self-administration or illicit marketing. Therefore, except in an emergency situation, drugs shall not be provided to a patient who is known to be currently receiving drugs from another treatment program

(2) *Patient attendance requirements.* The patient shall always report to the same treatment facility unless prior approval is obtained from the program sponsor for treatment at another program. Permission to report for treatment at the facility of another program shall be granted only in exceptional circumstances and shall be noted on the patient's clinical record.

(f) *Conditions for use of narcotic drugs in hospitals for detoxification treatment*—(1) *Form.* The drug may be administered or dispensed in either oral or parenteral form. (See paragraph (d)(6)(iii) of this section.)

(2) *Use of narcotic drugs in hospitals*—(1) *Approved uses.* For hospitalized patients, the use of a narcotic drug for narcotic addict treatment may be administered or dispensed only for detoxification treatment. If a narcotic drug is administered for treatment of narcotic dependence for more than 180 days, the procedure is no longer considered detoxification but is, rather, considered maintenance treatment. Only approved narcotic treatment programs may undertake maintenance treatment. This does not preclude the maintenance treatment of a patient who is hospitalized for treatment of medical conditions other than addiction and who requires temporary maintenance treatment during the critical period of his or her stay or whose enrollment in a program which has approval for maintenance treatment using narcotic drugs has been verified. (See 21 CFR 1306.07(c).) Any hospital which already has received approval under this paragraph (f) may serve as a temporary narcotic treatment program when an approved treatment program has been terminated and there is no other facility immediately available in the area to provide narcotic drug treatment for the patients. The Food and Drug Administration may give this approval upon the request of the State authority or the hospital, When no State authority has been established.

(ii) *Individuals responsible for supplies.* Hospitals shall submit to the Food and Drug Administration and the State authority the name of the individual (e.g., pharmacist) responsible for receiving and securing supplies of narcotic drugs for the treatment of narcotic addicts. The individual responsible for supplies shall ensure that the only persons who receive supplies of narcotic drugs are those who are authorized to do so by Federal or State law.

(iii) *General description.* The hospital shall submit to the Food and Drug Administration and the State authority a general description of the hospital including the number of beds, specialized treatment facilities for drug dependence, and nature of patient care undertaken.

(iv) *Anticipated quantity of drug needed.* The hospital shall submit to the Food and Drug Administration and the State authority the anticipated quantity of narcotic drugs for narcotic addict treatment needed per year.

(v) *Records.* The hospital shall maintain accurate records showing dates, quantity, and batch or code marks of the drug used for inpatient treatment. The hospital shall retain the records for at least a period of 3 years.

VOL 54 ISS 40 MR 2 1989 UMI

(vi) *Inspection.* The hospital shall permit the Food and Drug Administration and the State authority to inspect supplies of the drug at the hospital and evaluate the uses to which the drug is being put. The Food and Drug Administration and the State authority will keep the identity of the patients confidential in accordance with confidentiality requirements of 42 CFR Part 2. Records on the receipt, storage, and distribution of narcotic medication are subject to inspection under Federal controlled substances laws; but use or disclosure of records identifying patients will, in any case, be limited to actions involving the program or its personnel.

(vii) *Approval of hospital pharmacy.* Application for a hospital pharmacy to provide narcotic drugs for detoxification treatment must be submitted to the Food and Drug Administration and the State authority and approval from both is required, except as provided for in paragraph (h)(5) of this section. Within 60 days after the Food and Drug Administration receives the application, it will notify the applicant of approval or denial or will request additional information, when necessary.

(viii) *Approval of shipments to hospital pharmacies.* Before a hospital pharmacy may lawfully receive shipments of narcotic drugs for detoxification treatment, a responsible official shall complete, sign, and file in duplicate with the Food and Drug Administration and the State authority Form FDA–2636 "Hospital Request for Methadone Detoxification Treatment" (see paragraph (k) of this section) and must have received from the Food and Drug Administration a notice that the request has been approved.

(ix) *Sanctions.* Failure to abide by the requirements described in this section may result in revocation of approval to receive shipments of narcotic drugs for narcotic addict treatment, seizure of the drug supply on hand, injunction, and criminal prosecution.

(g) *Confidentiality of patient records.* (1) Except as provided in paragraph (g)(2) of this section, disclosure of patient records maintained by any program is governed by the provisions of 42 CFR Part 2, and every program must comply with that part. Records on the receipt, storage, and distribution of narcotic medication are also subject to inspection under Federal controlled substances laws: But use or disclosure of records identifying patients will, in any case, be limited to actions involving the program or its personnel.

(2) A treatment program or medication unit or any part thereof, including any facility or any individual, shall permit a duly authorized employee of the Food and Drug Administration to have access to and to copy all records on the use of narcotic drugs in accordance with the provisions of 42 CFR Part 2. A treatment program may reveal such records only when necessary in a related administrative or court proceeding.

(h) *Denial or revocation of approval.* (1) Complete or partial denial or revocation of approval of an application to receive shipments of narcotic drugs (Forms FDA–2632 "Application for Approval of Use of Methadone in a Treatment Program" and FDA–2636 "Hospital Request for Methadone Detoxification Treatment") may be proposed to the Commissioner of Food and Drugs by the Director of the Food and Drug Administration's Center for Drug Evaluation and Research, on his or her own initiative or at the request of representatives of the Drug Enforcement Administration, Department of Justice, National Institute of Drug Abuse, the State authority, or any other interested person.

(2) Before presenting such a proposal to the Commissioner, the Director of the Center for Drug Evaluation and Research, or his or her representative, will notify the applicant in writing of the proposed action and the reasons therefor and will offer the applicant an opportunity to explain the matters in question in an informal conference and/or in writing within 10 days after receipt of such notification. The applicant shall have the right to hear and to question the information on which the proposal to deny or revoke approval is based, and may present any oral or written information and views.

(3) If the explanation offered by the applicant is not accepted by the Center for Drug Evaluation and Research as sufficient to justify approval of the application, and denial or revocation of approval is therefore proposed, the Commissioner will evaluate information obtained in the informal conference and/or in writing before the Director of the Center for Drug Evaluation and Research. If the Commissioner finds that the applicant has failed to submit adequate assurance justifying approval of the application, the Commissioner shall issue a notice of opportunity for hearing with respect to the matter pursuant to § 314.200 of this chapter and the matter shall thereafter be handled in accordance with established procedures for denial or revocation of approval of a new drug application. If the Secretary determines that there is an imminent hazard to health, revocation of approval will become effective immediately and any administrative procedure will be expedited. Upon revocation of approval of an application, the Commissioner will notify the applicant, the State authority, the Drug Enforcement Administration, Department of Justice, and all other appropriate persons that the applicant may no longer receive shipments of narcotic drugs, and will require the recall of all of the drugs from the applicant. Revocation of approval may also result in criminal prosecution.

(4) Denial or revocation of approval may be reversed when the Commissioner determines that the applicant has justified approval of the application.

(5) A treatment program or medication unit or any part thereof, including any facility or any individual, may appeal to the Food and Drug Administration a complete or partial denial or revocation of approval by the State authority unless the denial or revocation is based upon a State law or regulation. The appeal shall first be made to the Director of the Center for Drug Evaluation and Research, who shall hold an informal conference on the matter in accordance with paragraph (h)(2) of this section. The State authority may participate in the conference. The appellant or the State authority may appeal the Director's decision to the Commissioner, who shall decide the matter in accordance with paragraph (h)(3) of this section. If the Commissioner denies or revokes approval, such action shall be handled in accordance with paragraph (h)(3) of this section. The Commissioner may not grant or retain Food and Drug Administration approval if the Commissioner finds that the appellant is not in compliance with all applicable State laws and regulations and with this section.

(i) *Sanctions*—(1) *Program sponsor or individual responsible for a particular program.* If the program sponsor or the person responsible for a particular program fails to abide by all the requirements set forth in this regulation, or fails to adequately monitor the activities of those employed in the program, he or she may have the approval of his or her application revoked, his or her narcotic drug supply seized, an injunction granted precluding operation of his or her program, and criminal prosecution instituted against him or her.

(2) *Persons responsible for administering or dispensing narcotic drugs.* If a person responsible for administering or dispensing narcotic drugs for narcotic addict treatment fails to abide by all the requirements set forth in this regulation, criminal prosecution may be instituted against him or her, his or her drug supply may be seized, the approval of the program may be revoked, and an injunction may be granted precluding operation of the program.

(j) *Requirements for distribution by manufacturers of narcotic drugs for narcotic addict treatment*—(1) *Distribution requirements.* Shipments of narcotic drugs for narcotic addict treatment are restricted to direct shipments by manufacturers of the drugs to approved treatment programs using the narcotic drugs and to approved hospital pharmacies. If requested by a manufacturer or State authority, wholesale pharmacy outlets in some regions or States may be authorized to stock narcotic drugs for narcotic addict treatment for that area and then transship the drug to approved narcotic treatment programs and approved hospital pharmacies. Alternative methods of distribution will be permitted if they are approved by the Food and Drug Administration and the State authority. Prior to any approval of an alternative method of distribution there will be consultation with the Drug Enforcement Administration, Department of Justice, to assure compliance with its regulations regarding controlled substance distribution.

(2) *Information regarding approved programs and hospitals.* The Food and Drug Administration will provide manufacturers and the public with names and locations of programs and hospitals that have been approved to receive shipments of narcotic drugs for narcotic addiction treatment. All information contained in the forms required by paragraph (k) of this section is available for public disclosure, except the names or other identifying information with respect to patients.

(3) *Acceptance of delivery.* Delivery shall only be made to a licensed practitioner or a licensed pharmacist employed at the facility. At the time of delivery the licensed practitioner or licensed pharmacist shall sign for the drugs and place his or her specific title and identification number on any invoice. Copies of these signed invoices shall be kept by the manufacturer.

(k) *Program forms.* The program sponsor must ensure that the following forms are completed by the proper program staff and submitted to the appropriate State authority and the Division of Scientific Investigations, Regulatory Management Branch (HFD–342), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. Forms are available upon request from the Regulatory Management Branch (HFD–342), at the same address.

Form

FDA 2632—Application for Approval of Use of Methadone in a Treatment Program.
FDA–2633—Medical Responsibility Statement for Use of Methadone in a Treatment Program.
FDA–2635—Consent to Methadone Treatment.
FDA–2636—Hospital Request for Methadone Detoxification Treatment.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 88D-0445]

**National Institute on Drug Abuse; Guidance on the Use of Methadone in Maintenance and Detoxification Treatment; Availability**

**AGENCIES:** Food and Drug Administration and National Institute on Drug Abuse.

**ACTION:** Notice of availability.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing the availability of a guidance document entitled "Guidance on the Use of Methadone in Maintenance and Detoxification Treatment of Narcotic Addicts." This guidance document consists of recommended practices in the maintenance and detoxification of narcotic addicts. The guidance document is intended to be used in conjunction with the final regulation on methadone in maintenance and detoxification treatment, which is published elsewhere in this issue of the **Federal Register**.

**ADDRESSES:** The guidance document is available for review at, and written comments are to be submitted to, the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857. Copies of the guidance document are available from the Legislative, Professional, and Consumer Affairs Branch (HFD-365), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. (Send a self-addressed adhesive label to assist the Branch in processing your request.)

**FOR FURTHER INFORMATION CONTACT:** Robert J. Meyer, or Wayne H. Mitchell, Center for Drug Evaluation and Research (HFD-362), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8049.

**SUPPLEMENTARY INFORMATION:** In the **Federal Register** of October 2, 1987 (52 FR 37046), FDA and the National Institute on Drug Abuse (NIDA) jointly published a proposed rule to revise the regulation on the conditions for the use of methadone in maintenance and detoxification treatment (21 CFR 291.505). The agencies proposed a number of revisions, which were designed to streamline the regulation and to promote more efficient operation of narcotic treatment programs. A significant revision involved the development of a separate guidance document consisting of those provisions of § 291.505 that were not legal requirements. Although these provisions are, in effect, already guidance, their inclusion in § 291.505 made it difficult to distinguish them from other provisions that are legal requirements. Therefore, FDA has incorporated those provisions into a guidance document entitled "Guidance on the Use of Methadone in Maintenance and Detoxification Treatment of Narcotic Addicts." This document announces the availability of the guidance document.

Elsewhere in this issue of the **Federal Register**, FDA and NIDA are publishing the final regulation based on the October 2, 1987, proposal. Also in this issue of the **Federal Register**, the agencies are publishing a proposed rule to provide minimum service maintenance treatment to patients awaiting placement in comprehensive maintenance treatment, and an advance notice of proposed rulemaking soliciting comments on a pilot study designed to help identify improved measures of methadone program performance and thus enhance the quality of treatment.

This guidance document is not legally binding on FDA, NIDA, or any individual or organization, and it does not represent the formal legal opinion of either FDA or NIDA. The recommendations contained in the guidance document are intended to give guidance to programs that want to provide more and better services than the minimum required by the regulation. States may also wish to consider the guidance document when developing requirements for using methadone in the treatment of narcotic addiction.

Interested persons may submit written comments on the guidance document to the Dockets Management Branch (address above). FDA will consider these comments to determine whether any future revisions to the guidance document are warranted. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The guidance document and all comments received on it may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Requests for copies of the guidance document should be submitted to the Legislative, Professional, and Consumer Affffairs Branch (address above).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 291

[Docket No. 88N-0444]

**National Institute on Drug Abuse; Methadone in Maintenance Treatment of Narcotic Addicts; Joint Proposed Revision of Conditions for Use**

**AGENCIES:** Food and Drug Administration and National Institute on Drug Abuse.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) and the National Institute on Drug Abuse (NIDA) are proposing to revise the conditions for the use of methadone in the maintenance treatment of narcotic addicts. The proposal would allow programs to provide minimum service (interim) maintenance treatment to patients awaiting placement in comprehensive maintenance treatment and require programs to provide counseling on avoidance of human immunodeficiency virus (HIV) transmission. These requirements are being proposed in response to the HIV epidemic and are intended to allow more narcotic addicts into treatment more quickly, thereby decreasing the incidence of intravenous drug abuse and the transmission of HIV.

**DATE:** Comments by April 3, 1989.

**ADDRESS:** Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Wayne H. Mitchell, or Robert J. Meyer, Center for Drug Evaluation and Research (HFD-362), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8046.

**SUPPLEMENTARY INFORMATION:**

## I. Background

Elsewhere in this issue of the **Federal Register**, FDA and NIDA have published a final rule revising the conditions for the use of methadone in maintenance and detoxification treatment. Among other changes, the final rule provides for long-term (180-day) detoxification treatment and eliminates the mandatory patient/counselor ratio. Elsewhere in this issue of the **Federal Register**, the agencies are also publishing a notice of availability of a guidance document which sets out recommended practices, as opposed to the requirements contained in the regulation, in the methadone treatment of narcotic addiction.

In addition, elsewhere in this issue of the **Federal Register**, FDA and NIDA are publishing an advance notice of proposed rulemaking soliciting comments on a pilot study designed to help identify improved measures of methadone program performance and thus enhance the quality of treatment.

FDA and NIDA are now proposing to revise the methadone regulation to provide programs with the additional flexibility that may be required to facilitate admission of narcotic addicts into methadone treatment programs. Under these proposed interim maintenance treatment provisions, methadone treatment programs will be allowed to dispense methadone to medically evaluated narcotic addicts who are awaiting placement in comprehensive maintenance treatment. The programs would be required to provide these patients only a limited range of services until they are transferred to comprehensive maintenance treatment, which provides a full range of services. This initiative is being undertaken by FDA and NIDA in response to the HIV epidemic in the intravenous (IV) drug abusing population and is intended to help reduce the spread of HIV infection.

## II. Basis for Action

Acquired immune deficiency syndrome (AIDS) is making massive inroads into the IV drug abuser population (Ref. 1), and increasing access to methadone treatment is one action that should be taken to help reduce the spread of HIV infection. Methadone treatment should decrease an individual's use of IV narcotic drugs, therefore decreasing the use of hypodermic needles and curtailing the spread of HIV, which is known to be transmitted by sharing contaminated hypodermic needles. Studies support this thesis and indicate that methadone treatment is, in fact, an effective method of limiting the transmission of HIV and that drug addicts in methadone treatment have a lower incidence of HIV positive test results and less frequent use of needles than addicts outside of programs (Refs. 2 and 3). A recent study conducted by a methadone treatment program under an investigational new drug application (IND) showed that minimum service maintenance treatment, similar to the interim maintenance treatment provided for in this proposal, significantly reduced needle use among the program's patients (Ref. 4).

FDA and NIDA recognize that shortages of funds, facilities, and trained personnel limit the immediate expansion of narcotic treatment programs. The agencies are also aware of the waiting lists for methadone treatment that are currently present in a number of cities across the nation. Accordingly, FDA and NIDA are proposing changes in the methadone regulation that will permit programs to provide interim maintenance treatment to help alleviate the human suffering of addicted individuals and reduce the abuse of IV drugs. The title "interim maintenance treatment" is doubly appropriate, because the treatment is an interim treatment for the patient until he or she can be admitted to comprehensive maintenance treatment and, at the same time, the treatment modality itself is intended to be an interim response to an emergency situation until the expansion of the capacity of comprehensive maintenance and detoxification treatment programs can be implemented. The Presidential HIV Epidemic Commission report (Ref. 5) also acknowledged the existence of this emergency situation, and further stated that:

> The National Institute on Drug Abuse (NIDA) estimates that 6.5 million people are now using drugs in a manner which significantly impairs their health and ability to function. Of these, 1.2 to 1.3 million are intravenous drug abusers. At any given time there are probably not more than 250,000 drug abusers in treatment, of whom 148,000 are intravenous drug abusers. The lack of treatment capacity has produced long waiting lists for treatment, in some cases up to six months, in three out of four cities in the United States. During this waiting period many intravenous drug abusers continue to use drugs intravenously several times each day, increasing their risk of contracting and spreading HIV, and in many cases diminishing their resolve to enter treatment.

FDA and NIDA believe that it is a necessary response to the HIV epidemic to allow programs to establish interim maintenance treatment. The agencies do not intend interim maintenance to become an alternative to comprehensive maintenance, with patients placed in interim treatment for extended periods of time. Patients would be placed in interim maintenance only when there are no openings available, and there should be a real expectation of their being transferred to comprehensive treatment at the end of a finite and relatively short period of time. The agencies intend that interim

VOL 54 ISS 40 MR 2 1989 UMI

maintenance treatment be an adjunct to comprehensive maintenance treatment rather than a substitute for it. The proposed regulation would not, however, compel programs to transfer patients from interim maintenance treatment to comprehensive maintenance treatment within any fixed period of time. The agencies considered, but rejected, proposing additional limitations on admission to interim maintenance and mandatory transfer criteria, because these limitations would excessively interfere with the exercise of sound medical judgment by a program's medical staff. Instead, the proposal would require that interim maintenance be offered only by programs also offering comprehensive maintenance and that programs formally evaluate patients at 6-month intervals to determine whether patients meet transfer criteria set by the program. The agencies specifically solicit comments on the adequacy of this approach to prevent inappropriate long-term interim maintenance, and solicits comments on other means to encourage timely transfer from interim to comprehensive maintenance treatment. One approach under consideration is a requirement that programs maintain a certain minimum ratio between the number of comprehensive maintenance treatment slots and interim maintenance treatment slots.

The agencies also solicit comments on (1) whether the approach set forth in this proposal, of totally prohibiting stand-alone interim maintenance programs, should be implemented; or (2) whether, and under what circumstances, referral arrangements should be allowed between stand-alone interim and comprehensive maintenance programs.

The proposal would require programs to counsel patients on reducing the risk of HIV transmission. The incidence of HIV infection among IV drug abusers in some cities is close to 50 percent, and the situation is worsening across the country (Ref. 1).

RDA and NIDA have considered requiring HIV testing as part of the pre-admission physical examination, but have tentatively decided not to make testing mandatory. The agencies encourage programs to provide access to HIV testing services for patients entering interim and comprehensive maintenance and detoxification treatment. FDA and NIDA request comments on the question of requiring HIV testing in methadone treatment programs. Issues of particular interest to the agencies include the availability, cost (including internal cost), and frequency of testing; the impact of testing on an addict's decision to enter treatment; and what treatment decisions are made based on the results of HIV testing.

### III. Summary of the Proposal

"Interim maintenance treatment," which is defined in proposed § 291.505(a)(2)(ii) and the requirements for which are set out in proposed § 291.505(d)(7), would allow programs to provide methadone to narcotic addicts awaiting admission to comprehensive maintenance treatment. To distinguish between this new treatment modality and the current maintenance treatment modality, the pre-existing maintenance treatment would be referred to as "comprehensive maintenance treatment." (See proposed § 291.505(a)(2)(i).) Programs offering interim maintenance treatment would be required to provide a medical examination and services, but rehabilitative services will not be required. Programs would, of course, be encouraged to provide counseling or other services beyond the minimum requirements of the regulation. No take-home medication would be allowed, and clinics offering interim maintenance treatment will be required to be open 7 days a week to dispense medication. No random drug screening tests would be required to be performed on patients in interim maintenance treatment, because all methadone would be ingested under observation. The agencies believe that this approach would provide adequate protection against diversion, and solicit comments as to the utility of random urine testing of interim-care patients.

Under the proposal, programs would be required to establish and follow reasonable written priorities, which may take into account medical and rehabilitative factors, for transferring patients from interim maintenance treatment to comprehensive maintenance treatment. Programs may wish to consider such factors as pregnancy, HIV positive blood tests, and the presence of clinical AIDS, in setting priority criteria for transferring a patient to comprehensive maintenance. Programs would also be free to transfer patients on a "first come, first serve" basis, as long as the "chronological" system of priority was documented. The agencies anticipate that patients will be transferred to comprehensive maintenance treatment after a relatively brief period in interim maintenance; however, if a patient is in interim maintenance treatment for 6 months, the program would be required to formally evaluate the patient to determine how the patient meets transfer priority criteria. This evaluation would be repeated, at 6-month intervals, until the patient leaves interim maintenance either by transfer to comprehensive maintenance or by leaving the program. The results of this evaluation would have to be noted in the patient's record.

The proposal would prohibit separate interim maintenance treatment programs requiring that interim maintenance treatment be offered only by programs offering comprehensive maintenance (proposed § 291.505(b)(1)(v)).

Under the proposal, methadone for interim maintenance treatment may be dispensed at either a medication unit or the program's primary facility. For methadone to be dispensed at a medication unit for interim maintenance treatment, all provisions in § 291.505(b)(3) on medication units must be met, with the exception of the provisions on counseling and rehabilitative service, which expressly do not apply to interim maintenance treatment. (See paragraphs (b)(2)(iii) and (3)(iv)(B) of § 291.505 of the final rule as they relate to proposed § 291.505(d)(7)(vi).)

Counseling on avoidance and transmission of HIV would be required under proposed § 291.505(d)(4)(i)(C). This counseling would be offered upon entrance to both detoxification and maintenance treatment. Counseling should be repeated as the program determines it to be necessary.

### IV. References

The following information has been placed on display in the Dockets Management Branch (address above) and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

### V. Environmental Impact

FDA has determined under 21 CFR 25.24(a)(8) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

### VI. Economic Impact

FDA and NIDA have examined the regulatory impact and regulatory flexibility implications of the proposed rule in accordance with Executive Order 12291 and the Regulatory Flexibility Act (Pub. L. 96–354). The agencies find that the proposed rule is not a major rule inasmuch as the revisions proposed would not result in any significant increase in cost to narcotic treatment programs or to the State and local authorities that would enforce the proposed rule. In fact, this proposal would allow maintenance treatment of narcotic drug addicts at a lower-per-patient cost. For these reasons, therefore, the agencies have determined that the proposed rule is not a major rule as defined in Executive Order 12291. Further, FDA and NIDA certify that the proposed rule will not have a significant impact on a substantial number of small entities as defined by the Regulatory Flexibility Act.

### VII. Paperwork Reduction Act of 1980

This proposed rule contains information collections which are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980. The title, description, and respondent description of the information collection are shown below with an estimate of the annual reporting and recordkeeping burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

*Title:* Transfer Priority Criteria Evaluation Notation.

*Description:* FDA and NIDA are requiring this notation to ensure that a record exists of the transfer criteria evaluation, which is designed to help prevent interim maintenance treatment from becoming a long-term treatment modality for any patient.

*Description of Respondents:* State or local governments, businesses or other for-profit organizations; nonprofit institutions.

ESTIMATED ANNUAL REPORTING AND RECORDKEEPING BURDEN

| Section | Annual number of respondents | Annual frequency | Average burden per response |
|---|---|---|---|
| § 291.505(d)(7) | 20 | 200 | 5 minutes<br>annual burden hours 333 |

The agencies have submitted a copy of this proposed rule to OMB for its review of these information collections. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to FDA's Dockets Management Branch (address above), and to the Office of Information and Regulatory Affairs, OMB, Washington, DC 20503.

### VIII. Request for Comments

The agencies are requesting that all comments on this proposed rule be submitted within 30 days after publication, rather than the customary 60 days, due to the imminent threat to the public health posed by the HIV epidemic, as is discussed above. FDA and NIDA will be mailing copies of this proposal to all approved treatment programs, to State regulatory agencies (including State drug abuse authorities), to individuals and organizations who have submitted comments on methadone-related documents in the past, and to other individuals and organizations that are likely to be concerned with the proposal, so they may comment within the 30-day period.

Interested persons may, on or before April 3, 1989, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

### List of Subjects in 21 CFR Part 291

Health professions, Methadone, Reporting and recordkeeping requirements.

Therefore, under the Comprehensive Drug Abuse Prevention and Control Act of 1970, the Narcotic Addict Treatment Act of 1974, and applicable delegations of authority thereunder, and under authority delegated to the Commissioner of Food and Drugs, it is proposed that Part 291 be amended as follows:

## PART 291—DRUGS USED FOR TREATMENT OF NARCOTIC ADDICTS

1. The authority citation for Part 291 continues to read as follows:

Authority: Secs. 3, 505, 701(a) (21 U.S.C. 823(g), 355, 371(a)); secs. 4, 548 (42 U.S.C. 257a, 290ee–3).

2. Section 291.505 is amended by inserting the word "comprehensive" before the word "maintenance" everywhere it appears in paragraphs (d)(1)(i), (d)(1)(iii), (d)(1)(iv), (d)(2)(i), (d)(3)(v)(D), (d)(4)(i)(B)(*2*), (d)(5)(ii), (d)(6)(iv)(B)(*6*), (d)(6)(v)(A)(*1*) and (*3*), (d)(6)(v)(C), (d)(8)(i) introductory text and (d)(8)(i)(E), (d)(9)(i) introductory text and (d)(9)(i)(F), and by revising paragraph (a)(2), and by adding paragraphs (b)(1)(v), (d)(4)(i)(C), and (d)(7) to read as follows:

**§ 291.505 Conditions for the use of narcotic drugs; appropriate methods of professional practice for medical treatment of the narcotic addiction of various classes of narcotic addicts under section 4 of the Comprehensive Drug Abuse Prevention and Control Act of 1970.**

(a) * * *

(2) "Maintenance treatment" means the dispensing of a narcotic drug, at relatively stable dosage levels, in the treatment of an individual for dependence on heroin or other morphine-like drug. There are two types of maintenance treatment: comprehensive maintenance treatment and interim maintenance treatment.

(i) "Comprehensive maintenance treatment" is maintenance treatment provided in conjunction with a comprehensive range of appropriate medical and rehabilitative services.

(ii) "Interim maintenance treatment" is maintenance treatment provided solely in conjunction with appropriate medical services while a patient is

VOL 54 ISS 40 MR 2 1989 UMI

awaiting transfer to comprehensive maintenance treatment.

* * * * *

(b) * * *

(1) * * *

(v) *Interim maintenance treatment.* A narcotic treatment program may provide interim maintenance treatment only if the program also provides comprehensive maintenance treatment to which interim maintenance treatment patients may be transferred.

* * * * *

(d) * * *

(4) * * *

(i) * * *

(C) *Human immunodeficiency virus (HIV) education.* For each patient seeking admission or readmission to a treatment program, the program shall provide counseling on HIV transmission and avoidance.

* * * * *

(7) *Minimum standards for interim maintenance treatment.* The person(s) responsible for a program may place a patient, otherwise eligible for admission to comprehensive maintenance treatment, in interim maintenance treatment if the program does not have open treatment slots available in comprehensive maintenance treatment. A program shall establish and follow reasonable criteria for establishing priorities for transferring patients from interim maintenance to comprehensive maintenance treatment. These transfer criteria shall be in writing and available for inspection. If a patient is transferred from interim maintenance treatment to comprehensive maintenance treatment other than in accordance with the written criteria, a justification for the transfer shall be entered in the patient's record. Six months after a patient has entered interim maintenance treatment, the program shall evaluate that patient to determine if the patient meets transfer priority criteria. The evaluation shall be repeated every 6 months until the patient leaves interim maintenance treatment, either by transferring to comprehensive maintenance treatment or by leaving the program. The results of all such evaluations shall be recorded in the patient's record. All requirements for comprehensive maintenance treatment apply to interim maintenance treatment with the following exceptions:

(i) The narcotic drug is required to be administered daily under observation;

(ii) Take-home medication is not allowed;

(iii) Drug-screening tests are not required except for the initial drug-screening test required to be given each prospective patient;

(iv) The initial treatment plan and periodic treatment plan evaluation are not required;

(v) A primary counselor is not required to be assigned to a patient; and

(vi) The requirements and exceptions in paragraphs (b)(2)(iii), (b)(3)(iv)(B), (d)(4)(i)(A) and (B), (d)(4)(ii)(E) and (F), (d)(4)(iv), and (d)(6)(iv), (v), (vi), and (vii) of this section do not apply.

Charles R. Schuster,

*Director, National Institute on Drug Abuse.*

Frank E. Young,

*Commissioner of Food and Drugs.*

Otis R. Bowen,

*Secretary of Health and Human Services.*

Dated: January 18, 1989.

## 21 CFR Part 291

[Docket No. 89N-0434]

## Conditions for the Use of Methadone; Advance Notice of Proposed Rulemaking; Request for Comments

**AGENCIES:** National Institute on Drug Abuse and Food and Drug Administration.

**ACTION:** Advance notice of proposed rulemaking; request for comments.

**SUMMARY:** The National Institute on Drug Abuse (NIDA) and the Food and Drug Administration (FDA) want to develop a method for evaluating the effectiveness of methadone treatment programs. The long-term goal of this effort is to develop performance standards for programs, based upon treatment outcome. Such standards could serve as an alternative to the detailed requirements currently contained in the Federal methadone regulation (21 CFRA Part 291). Ideally, if acceptable standards could be developed, then a treatment program would simply have to demonstrate that it meets the standards; i.e., that it is above the threshold for acceptable treatment. To move toward this goal, NIDA and FDA believe the first step is to conduct a feasibility study designed to identify the practical problems inherent in such a system, the costs, and the benefits. The appendix to this advance notice contains one proposal for a pilot feasibility study. This advance notice solicits public comment on the potential value of performance-based evaluation standards as a means of evaluating treatment programs, on the proposed pilot study contained in the appendix, and recommendations for other approaches that would achieve the same objective.

**DATE:** Comments by May 1, 1989.

**ADDRESS:** Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Stephen P. Molinari, Office of Medical and International Affairs, Rm. 8A-54, National Institute on Drug Abuse, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4577.

**SUPPLEMENTARY INFORMATION:**

### I. Authority

Legislative authority for involvement by the Department of Health and Human Services in the treatment of narcotic addiction is included in section 4 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (Pub. L. 91-513) which requires the Secretary of Health and Human Services (the Secretary) to determine the appropriate methods of professional practice for the medical treatment of narcotic addiction. In addition, the Narcotic Addict Treatment Act of 1974 (Pub. L. 93-281) was enacted by Congress as a means to ensure that only confirmed narcotic addicts are admitted to treatment, that they receive quality care, and that illicit diversion is limited. Specifically, Pub. L. 93-281 amended the Controlled Substances Act (21 U.S.C. 823) to require that practitioners who wish to dispense narcotic drugs to individuals for the maintenance treatment or detoxification treatment of narcotic addiction must be registered annually with the Department of Justice, Drug Enforcement Administration (DEA). Registration depends, in part, upon a determination by the Secretary that the applicant is qualified, under treatment standards established by the Secretary, to engage in such treatment. In addition, the applicant must comply with standards established by the Secretary (after consultation with DEA) respecting the quantities of narcotic drugs that may be provided for unsupervised use by individuals in such treatment. Finally, the applicant must comply with standards established by DEA respecting security of stocks of narcotic drugs used for such treatment and maintenance of records on such drugs. The Secretary has delegated the authority to establish treatment standards to NIDA and the authority to evaluate the safety and effectiveness of drugs for use in the treatment of narcotic addiction to FDA.

### II. Background

Although the national concern about levels of illicit drug use in this country has led to increased Federal funding for treatment programs, resources are limited and must be directed to those drug abuse control activities found to be most effective. Several recent reports acknowledge the need to increase the effectiveness of treatment programs, and make specific recommendations. The White House Conference for a Drug Free America, among its treatment recommendations, recommended an increase in treatment slots, the development of a standardized, objective method for determining drug treatment outcome and treatment effectiveness, and more treatment program accountability so that Federal funds may be distributed based on effectiveness (Ref. 1). The National Drug Policy Board, established by Executive Order 12590 on March 26, 1987, to centralize oversight for all aspects of the Federal anti-drug effort, set an objective to direct Federal research to improve quality and efficiency of treatment (Ref. 2). The General Accounting Office, in a report on managing the Federal drug control efforts, stated that measures of program effectiveness are needed and should be developed by the Federal government (Ref. 3). The report of the Presidential Commission on the Human Immunodeficiency Virus Epidemic recommended that NIDA, in conjunction with State and local agencies and treatment providers, develop a plan for increasing the capacity of the drug treatment system. It further recommended that the plan include elements to ensure quality of care and mechanisms to evaluate progress. In addition, the Commission recommended that the Federal government develop scientifically based quality assurance mechanisms for evaluating quality of care (Ref. 4). Finally, the Anti-Drug Abuse Act of 1988 (Pub. L. 100-690) authorizes the use of certain funds for data collection, and requires an evaluation of treatment program quality. These various sources have all clearly recognized the need for monitoring and evaluating treatment programs to improve the quality of care.

### III. A Pilot Study

NIDA and FDA believe that before a full-scale effort to collect information for the evaluation of methadone treatment programs and the development of performance standards is initiated, a pilot study will be necessary. The pilot study will help to assess the appropriateness of the data and the methodology used to collect that data. The appendix to this notice details a proposal for such a study. The agencies seek comments on this approach, names of treatment programs, and State and local agencies that would be interested in participating in the pilot study.

### IV. Request for Comments

FDA and NIDA request comments on all aspects of this notice and on alternative means of achieving these objectives. The agencies are particularly interested in data and information relevant to the following specific questions:

1. In developing a method for undertaking an ongoing treatment program evaluation, such as is being proposed, perhaps the most significant question is what mechanism can be used to assure that there is a fair comparison among treatment programs. The agencies realize that treatment programs do not necessarily serve the same types of individuals. Some programs may admit a large proportion of individuals who are unemployed, have little education, have long histories of chronic drug use, and suffer from severe physical or psychiatric problems. In contrast, other programs may be selective and limit their admissions to individuals who have greater financial, social, and psychological assets. NIDA and FDA believe these concerns may be answered by using the Addiction Severity Index (ASI), developed by McClellan et al. (Ref. 5), as an admission diagnostic instrument to categorize programs into one of several problem severity categories. (The ASI is discussed in the appendix to this notice.) However, the agencies also realize that other important factors may involve matters such as program philosophies and funding. In addition, programs themselves vary in terms of resources and staffing. Therefore, should programs be categorized based on these parameters, the ASI, or should even other factors be used to categorize programs?

2. Another significant question to which the agencies are soliciting opinion in what are the appropriate treatment measures that should be considered. NIDA and FDA believe that some important treatment performance measures include illicit drug use, medication noncompliance, retention of patients in treatment, and types of patient discharge; e.g., successful completion of treatment, left against advice of the program, or arrested. The agencies are also seeking comments on how to measure patient movement between programs and/or recidivism.

3. The agencies also invite comments on whether the data should be required for patients in comprehensive maintenance treatment only, or whether it would also be useful and appropriate to require the same or some other types of data for patients in detoxification (both short-term and long-term) treatment, and for patients in interim-care treatment. The proposal for the interim-care treatment modality is contained elsewhere in this issue of the Federal Register.

4. The agencies believe information to be collected should include reporting positive urine test results for those drugs for which the methadone regulation currently requires testing; i.e., opiates, cocaine, barbiturates, and amphetamines, and negative results for methadone. The agencies are aware that some have questioned the need to continue to test for amphetamines and barbiturates, arguing that there is no longer widespread abuse of these drugs among patients in methadone treatment programs. Others have asserted that marijuana use and benzodiazepine abuse are more of a problem and testing should be required for these substances. The agencies welcome any information including supporting data addressing the need to maintain or change the drugs for which testing is required.

5. Related questions with regard to urine testing are which analytical test procedures should be used and the laboratories that should perform the tests. The agencies recommend only using urine test results obtained by the immunoassay procedure when measuring drug use. This method was chosen because many programs now use this method, and, for comparison purposes, it is important that the test procedures be consistent. More specificity is obtained by using chromatographic test methods. However, some methods, e.g., gas chromatography/mass spectrometry which is now required as the confirmatory test procedure to be used in the Federal workplace drug testing programs (Ref. 6), are more expensive to perform than the immunoassay. Comments are requested on the adequacy of the immunoassay method for this purpose or, in the alternative, whether a chromatographic procedure should be required instead of the immunoassay, or in addition to the immunoassay, as a confirmation test. With regard to which laboratories should perform the testing, the pilot study proposes that urine testing be performed by those laboratories which currently perform the analytical testing or treatment programs. The agencies solicit comments on the adequacy of this procedure or whether the urine

VOL 54 ISS 40 MR 2 1989 UMI

specimens should be sent to designated laboratories to assure uniform proficiency testing.

## Appendix: Pilot Study Proposal

### *A. Overview*

To develop appropriate performance standards, extensive data on treatment populations, treatment characteristics, and patient outcomes need to be gathered. NIDA and FDA have developed a draft proposal for a pilot study on methadone treatment program effectiveness. Under the proposal a representative sample of treatment programs would voluntarily join in an effort to collect needed data. Under this voluntary pilot study methadone treatment programs would submit demographic and diagnostic data on every patient currently in treatment and every new admission. These data would be used to categorize programs along a continuum of patient problem severity. Quarterly, each program would collect urine specimens following a standardized procedure and submit the results along with patient discharge data to NIDA.

The aggregate results of the urine tests as well as patient retention rates (for each patient problem severity category) would be compiled quarterly by NIDA and would serve as a benchmark against which programs may be compared.

### *B. Admission Data*

The agencies are considering to propose that the ASI be used as the admission diagnostic instrument. The ASI is a structured, 45-minute interview that assesses patient problems in seven areas: medical condition, psychiatric condition, drug use, alcohol use, family relations, employment, and illegal activity. The interview necessary to complete the ASI can be given by a trained technician. The ASI has the advantage of covering a range of problems commonly manifested in drug abusers, having a standardized content and evaluation method, and demonstrated reliability and validity. The instrument permits reporting objective data on the number, intensity, and duration of problem symptoms; subjective information based upon the interviewee's rating of the severity of his or her problems and need for treatment; the interviewer's estimate of problem severity; and a composite score.

NIDA and FDA believe that the ASI would be the most appropriate instrument for providing admission information for several reasons. First, most treatment program personnel are familiar with the ASI, since it has been used for over 10 years. Moreover, it is estimated that almost half of the treatment programs use the ASI as an admission interview, including those programs administered by the Veterans' Administration. In addition, some States already require the ASI as part of the admission process.

### *C. Problem Severity Category*

Each program would be placed into one of several program categories on the basis of the types of patients in treatment during a reporting period. The categories would be a composite of the seven ASI factors. The categories would ensure that only programs with like characteristics in terms of severity of client problems are compared.

### *D. Urine Tests*

Each day, except Sunday, a random sample of treatment programs would be selected to collect urine specimens. The sampling would be designed to ensure that each program is selected once each quarter. NIDA would notify a selected program, no earlier than 24 hours before the program opens for business, that urine must be collected that day. Selected programs would collect specimens on every patient seen that day prior to the administration of methadone. Each program would assure that appropriate chain-of-custody procedures are used for urine collection to minimize falsification and collection errors. The program would send the urine specimens to a laboratory which is in compliance with all Federal proficiency testing and licensing standards. The laboratory would perform an immunoassay on all specimens to determine the presence of opiates, cocaine, amphetamines, barbiturates, and methadone. Unannounced on-site audits, including urine collection, may be performed from time-to-time to assess validity in reporting and in collecting urine specimens.

### *E. Initial Treatment Program Submission*

Initially, those participating treatment programs would submit the following information: (1) A list of all patients in maintenance treatment, identified by number only; (2) the date of admission for each patient; (3) methadone dose of each patient; (4) number of take-home doses of methadone, if any, that each patient receives; (5) other treatment services, e.g., counseling, rehabilitative, vocational, or educational services, each patient is receiving; and (6) a copy of the results of the ASI administered to each patient.

### *F. Quarterly Treatment Program Log*

On the urine collection day, the program would complete a quarterly log containing the following information: (1) All active patient identification numbers; (2) patients scheduled to be seen that day; (3) patients from whom urine specimens were collected; (4) patients discharged since the last reporting period, and the date and reason for discharge; (5) methadone dose by patient; and (6) number of take-home doses of methadone, if any, that each patient receives.

Programs would submit their quarterly logs and the results of the urine tests within 21 days of the urine collection date.

Admission information on patients who have entered into treatment since the last reporting date would be submitted with the quarterly log.

### *G. Quarterly Report*

Each quarter, NIDA would tabulate the urine test and retention data in two formats. The first format would present urine test and retention results for the previous eight reporting quarters for programs falling into each of the several problem severity categories. The measures to be reported would include, at a minimum:

*Drug use:* The percentage of collected urine specimens found positive for each illicit drug or found negative for methadone;

*Retention:* The average length of time active patients have been in treatment;

*Participating patients:* The number and percentage of active patients on whom urine tests were collected;

*Discharge:* The percentage of patients who were discharged from the program each quarter reported by type of discharge (successfully completed treatment, left against program advice, transferred to another program, died, arrested, etc.).

The second format would also present the urine and retention results by problem severity category, but it would aggregate the data by length of time in treatment rather than by calendar period. For this purpose, patients would be compared by weekly cohorts; i.e., each cohort of patients would consist of those patients first admitted to treatment during any 1 week. The following measures would be reported:

*Drug use:* The percentage of the cohort of patients in each week of treatment (up to the 104th week) whose urine specimens were found to be positive for each illicit drug or negative for methadone;

*Retention:* The percentage of the cohort of patients that actually remain in treatment;

*Participating patients:* The number and percentage of active patients in a given week of treatment from whom urine tests were collected.

In addition to this information, from time-to-time other parameters might be included in the quarterly reports or in special reports. Each participating treatment program would be provided with results for the patients in its program.

### *H. Patient Confidentiality*

In order to comply with the Federal regulation relating to confidentiality of patient records (42 CFR Part 2), programs would supply data relating to patient enrollment, urine test results and discharge data, by patient identification number only.

### *I. Cost*

The pilot study would be funded by NIDA and operated by an independent contractor. Nonetheless, the agencies are particularly interested in comments from treatment programs and other interested parties concerning the anticipated costs that would be incurred with these data collection and reporting procedures and recommendations for mechanisms that might be implemented to maximize cost-effectiveness.

Interested persons may, on or before May 1, 1989, submit to the Dockets Management Branch (address above) written comments regarding this advance notice of proposed rulemaking. Three copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

# Department of the Interior

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 773, 778, and 843

**Requirements for Surface Coal Mining and Reclamation Permit Approval; Ownership and Control Information; Reporting of Violations; Final Rule**

VOL 54 ISS 40 MR 2 1989 UMI

DEPARTMENT OF THE INTERIOR

**Office of Surface Mining Reclamation and Enforcement**

**30 CFR Parts 773, 778, and 843**

**Requirements for Surface Coal Mining and Reclamation Permit Approval; Ownership and Control Information; Reporting of Violations**

**AGENCY:** Office of Surface Mining Reclamation and Enforcement, Interior.

**ACTION:** Final rule.

**SUMMARY:** The Office of Surface Mining Reclamation and Enforcement (OSMRE) of the U.S. Department of the Interior (DOI) is revising its regulations governing the requirements for an application for a permit to conduct surface coal mining operations. This rule will require a permit applicant to submit more detailed information on persons who own or control it, and will revise the requirements for reporting violations. The rule also will require a regulatory authority to make its decision to approve or disapprove a permit application on the basis of up-to-date information concerning the compliance record of the applicant and related persons. The revisions are needed to conform the permit application requirements with changes in the permitting process and to insure that permits are issued based on current compliance review information.

**EFFECTIVE DATE:** April 3, 1989.

**FOR FURTHER INFORMATION CONTACT:** Andrew F. DeVito, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue NW., Washington, DC 20240; telephone (202) 343-5241 (Commercial or FTS).

**SUPPLEMENTARY INFORMATION:**

I. Background
II. Discussion of the Rule
III. Discussion of Public Comments
IV. Procedural Matters

## I. Background

This rule conforms the requirements for an application for a permit to conduct surface coal mining operations with related changes in the permit review process. On October 3, 1988 (53 FR 38868) OSMRE published a final rule which amended its regulations dealing with the review and approval of permit applications. That rule added a definition of the terms "owned or controlled" and "owns or controls" as these concepts are used in section 510(c) of the Surface Mining Control and Reclamation Act of 1977 (the Act or SMCRA), 30 U.S.C. 1201 et seq., and expanded the scope of the compliance review which a regulatory authority is required to make prior to the approval of a permit application.

This rule will require a permit applicant to include in his or her application detailed information on the owners and controllers of related operations, and to update that information immediately prior to the issuance of a permit. The rule also will require a regulatory authority to use the updated information in making a final decision to approve or disapprove the application.

The information reported under this rule will provide an essential part of the data contained in OSMRE's computer-based Applicant/Violator System, which processes multiple sources of applicant and violation information to match applicants and their owners and controllers to violators of the Act and its implementing regulatory programs. It is important that the information submitted pursuant to this rule be as complete and up-to-date as is reasonably possible to insure a thorough and accurate review of the compliance record of the permit applicant and related persons prior to making a decision on whether to issue a permit.

The proposed rule to amend 30 CFR 773.15(e) was published on July 16, 1986 (51 FR 25822). The proposed rule to amend 30 CFR 773.17, 778.13 and 778.14 was published on May 28, 1987 (52 FR 20032). No request was received for a public hearing and none was held. The two proposals are being adopted together because their information reporting requirements are interrelated.

## II. Discussion of the Rule

The rule language in the proposed rule published on May 28, 1987 has been modified to clarify the reporting requirements in response to comments and to break them into logical components. Any substantive changes from the proposed rule are noted in the preamble discussions of the various sections.

*Section 773.15(e)—Final Compliance Review*

Under 30 CFR 773.15(b)(1), a regulatory authority may not issue a permit to an applicant if any surface coal mining and reclamation operation owned or controlled by either the applicant or by any person who owns or controls the applicant is currently in violation of the Act or certain other environmental laws and regulations. Experience has shown that the time that elapses between the submission of an application and the issuance of the permit typically is several months at a minimum. Information submitted with the application may become dated by the time of permit issuance, thus making it impossible for the regulatory authority to make an accurate compliance review under § 773.15(b)(1).

This rule adds to § 773.15 a new paragraph (e) to require that before a permit is issued the regulatory authority reconsider its initial § 773.15(b)(1) compliance review in light of any new information submitted pursuant to §§ 778.13(i) and 778.14(d) of this rule, which are discussed subsequently. If the applicant fails or refuses to respond as required, the regulatory authority will be unable to make the final compliance review required by § 773.15(e) and a permit will not be issued. The final compliance review based on this updated information will insure that the regulatory authority makes an accurate permitting decision under § 773.15(b)(1). Authority for this section is contained in sections 101, 102, 201(c)(1), 201(c)(2), 412(a), 501(b), 504, 505, 507(b)(4), 510 (a), (b) and (c), 511, 518, 701(16) and 701(19) of the Act.

The proposed rule, published on July 16, 1986, would have added paragraphs (e)(1)(i), (e)(1)(ii) and (e)(2) to § 773.15. Proposed paragraphs (e)(1)(i) and (e)(1)(ii) have been adopted in this rule as §§ 778.13(i) and 778.14(d), respectively, and are discussed later in this preamble. Proposed § 773.15(e)(2) has been adopted in this rule as § 773.15(e).

*Section 773.17(i)—Permit Condition*

Section 773.17(i) is a new permit condition requiring the submission, correction or update of certain information after the issuance of a cessation order. It applies to all permits to conduct surface coal mining operations, including those issued prior to the adoption of this rule.

Section 773.17(i) will require that within thirty days of the issuance of a cessation order under 30 CFR 843.11, or the State program equivalent, the permittee of the surface coal mining and reclamation operation for which the cessation order was issued shall either submit, correct or update and furnish to the regulatory authority that issued the permit, the information required by § 778.13(c) of this rule concerning the identity of persons who own or control the permittee. The information must be current to the date the cessation order was issued. If there has been no change in the information previously submitted, the permittee must notify the regulatory authority of that fact in writing. The regulatory authority will enter any new information into the Applicant/Violator System, which will insure that the data in the System is current.

A permittee's failure to comply with this permit condition will result in appropriate enforcement action by the regulatory authority. The obligation to furnish the updated information applies even if the cessation order is under appeal. This obligation is consistent with 43 CFR 4.1116, which states that except where temporary relief is granted pursuant to section 525(c) or 526(c) of the Act, cessation orders issued under the Act shall remain in effect during the pendency of review before an administrative law judge or the Interior Board of Land Appeals. If temporary relief from a cessation order is granted, the permittee need not comply with the permit condition as long as the temporary relief is in effect.

The proposed rule would have required that this information be updated and furnished to the regulatory authority on an annual basis. However, once a permit is issued the updated information is needed only if a violation which would require that a new permit be denied occurs and remains uncorrected. In response to comments objecting to the burden of information submittal, OSMRE has decided to require the information update at the issuance of a cessation order, which is such a violation. This will eliminate a superfluous reporting obligation for the majority of permittees who operate in accordance with their permits. If a notice of violation is issued, timely abatement of the violation will avoid not only the issuance of a failure-to-abate cessation order, but also the obligation to submit updated information on owners and controllers. In this manner, the commenters' concern over the amount of information that must be submitted is partially alleviated. The rule will insure that the regulatory authority obtains the names of the owners and controllers of the permittee at the time a cessation order is issued in order to withhold the issuance of new permits to such persons if the underlying violation remains unabated.

*Section 778.10—Information collection*

Section 778.10 of the rule concerns the information collection requirements in 30 CFR Part 778 including approval by the Office of Management and Budget (OMB) to collect the information and the clearance number assigned by OMB. This rule revises § 778.10 by deleting the reference to clearance number 1029-0037. As stated in § 778.10, the clearance number assigned by OMB to the information collection requirements in Part 778 is 1029-0034.

*Section 778.13—Identification of Interests*

As stated in the May 28, 1987 proposed rule, the information reporting requirements in this final rule have been conformed as necessary to the recently promulgated final definition of "owned or controlled" and "owns or controls" at 30 CFR 773.5.

Section 778.13(b) of the rule will require each applicant for a permit to conduct surface coal mining operations to include in his or her application the name, address, telephone number, and, as applicable, the employer identification number of the applicant, the applicant's resident agent who will accept service of process and the person who will pay the abandoned mine land reclamation fee. Section 778.13(b) also requests the social security numbers of the above persons, but indicates that the disclosure of any social security number is voluntary.

Section 7(a) of the Privacy Act of 1974, 88 Stat. 1896, specifies that it shall be unlawful for any Federal, State or local government agency to deny to any individual any right, benefit or privilege provided by law because of such individual's refusal to disclose his or her social security number unless the disclosure is required by Federal law or was required under statute or regulation prior to January 1, 1975. Since SMCRA does not specifically require the disclosure of an individual's social security number, and since the information was not required prior to January 1, 1975, no benefit, right or privilege, including a permit to conduct a surface coal mining operation, may be denied for failure to disclose a social security number under this rule.

Section 7(b) specifies that when an individual is asked to disclose his or her social security number, the individual shall be told whether the requirement is mandatory or voluntary. OSMRE is requesting the voluntary disclosure of an individual's social security number pursuant to the authority granted under sections 201 (c)(1) and (c)(2) of the Act. The information will be used to process permit applications and to perform the compliance review required by section 510(c) of the Act and 30 CFR 773.15(b)(1). This exemption from mandatory disclosure applies only to a social security number and not to an employer identification number, which is the taxpayer identification number for business entities such as corporations and partnerships, and for sole proprietors if they pay wages to one or more employees. The submission of the employer identification number is mandatory under this rule.

The requirement in § 778.13(b) of this rule to supply the name of the person who will pay the abandoned mine land reclamation fee is in addition to the requirement in § 778.13(c) to list the operator. Section 402(a) of the Act requires that an operator of a surface coal mining and reclamation operation pay the reclamation fee required by the Act. Experience has shown that often the reclamation fee is paid for the operator by agents such as attorneys, trustees, accounting firms, banks or other companies, or by the permittee if different from the operator. Furnishing the name of the person paying the reclamation fee will assist OSMRE in collecting the money and arranging for audits when necessary. Supplying the name of the person who will actually pay the reclamation fee does not in any way alter the legal obligation of other persons responsible for its payment.

As originally proposed, paragraph (b) requested the social security number *or* taxpayer identification number of the applicant, the operator, the applicant's resident agent, the person who will pay the abandoned mine land reclamation fee, and any contractor who will conduct the surface coal mining and reclamation operation. Since a taxpayer identification number can be either a social security number or an employer identification number, OSMRE has substituted the term "employer identification number" for the term "taxpayer identification number" in order to eliminate any confusion.

The final rule requests the disclosure of both a social security number *and* an employer identification number. OSMRE is requesting both numbers because of the possibility that a person may have used a social security number on some occasions and an employer identification number on others. Requesting both numbers will help to insure that the data in the Applicant/Violater System is complete. A similar change has been made in paragraph (c).

The reference in proposed § 778.13(b) to the operator, and the requirement to furnish information concerning the operator, have been transferred to paragraph (c) of the final rule.

Proposed § 778.13(b) also requested the name of any contractor who will conduct the surface coal mining and reclamation operation. In the final rule, the requirement to furnish information concerning contract mining operations has been transferred to paragraph (c).

Final § 778.13(c) will require the applicant to submit the following information, as applicable, for any person who owns or controls the applicant under the definition of "owned

VOL 54 ISS 40 MR 2 1989 UMI

or controlled" and "owns or controls" in 30 CFR 773.5:

(1) The person's name, address, social security number, and employer identification number;

(2) The person's ownership or control relationship to the applicant, including the percentage of ownership and location in the organizational structure;

(3) The title of the person's position, date position was assumed, and when submitted under § 773.17(i) of this rule, the date of departure from the position;

(4) Each additional name and identifying number, including, employer identification number, Federal or State permit number and MSHA number with date of issuance, under which the person owns or controls, or previously owned or controlled, a surface coal mining and reclamation operation in the United States within the five years preceding the date of the application; and

(5) The application number or other identifier of, and the regulatory authority for, any other pending surface coal mining operation permit application filed by the person in any State in the United States.

Under the referenced definition in 30 CFR 773.5 the permit applicant must furnish the above information for all: (1) Operators; (2) officers, directors, and any other persons who perform a function similar to an officer or director; (3) persons having the ability to commit the financial or real property assets or working resources of an entity; (4) general partners; (5) shareholders owning of record a ten percent or greater interest; (6) persons owning or controlling the coal to be mined under the proposed permit under a lease, sublease or other contract, and having the right to receive such coal after mining or having authority to determine the manner in which the proposed surface coal mining and reclamation operation is to be conducted; (7) persons who have any other relationship with the permit applicant which gives them authority directly or indirectly to determine the manner in which the proposed surface coal mining operation is to be conducted; and (8) persons who own or control the persons specified in paragraphs (1) through (7), either directly or indirectly through intermediary entities.

The requirements to list "persons having the ability to commit the financial or real property assets or working resources of an entity," and "persons owning or controlling the coal to be mined * * *" have been added to the final rule because under the definition of "owned or controlled" and "owns or controls" at 30 CFR 773.5 those persons are presumed to own or control the permit applicant. The addition was necessary in order to conform these information reporting requirements with the definition.

Like the proposed rule, the final rule requires a permit applicant to report both direct and indirect ownership and control relationships. As explained in the October 3, 1988 final rule (53 FR 38868) defining "owned or controlled" and "owns or controls," the ten percent ownership presumption applies at each level of a business structure. If a ten percent or greater ownership interest exists at any level, that interest must be reported along with the controllers at that level. For example, if company "A" owned ten percent of company "B," and company "B" owned ten percent of company "C," and company "C" owned ten percent of the applicant, the permit application must list companies "A," "B" and "C" along with the controllers of companies "A," "B" and "C." However, if company "A" owned ten percent of company "B", and company "B" owned nine percent of company "C," and company "C" owned ten percent of the applicant, the permit application would be required to list only company "C" and its controllers. The permit applicant would not be required to list company "A" or company "B" because the ownership interest between company "B" and company "C" was less than ten percent.

If the operator is a business entity and a subsidiary of another corporation, then the operator, its owners and controllers and the owners and controllers of the parent corporation must be reported by the permit applicant. The same also applies to anyone owning or controlling the coal to be mined by another person under a lease, sublease or other contract and having the right to receive such coal after mining or having authority to determine the manner in which that person or another person conducts a surface coal mining and reclamation operation. If that person is a business entity and a subsidiary of another corporation, then the owners and controllers of the parent corporation must be reported by the permit applicant, along with an explanation of how each person is linked in the chain of ownership or control.

The requirement of § 778.13(c) to furnish information on anyone owning or controlling the coal to be mined by another person under a lease, sublease or other contract and having the right to receive such coal after mining or having authority to determine the manner in which that person or another person conducts a surface coal mining and reclamation operation does not apply to persons who receive coal as an in-kind royalty payment. However, simply labeling the receipt of coal as in-kind royalty payments will not automatically exempt a person or operation from the reporting requirements of this section if the in-kind payment is more than a simple royalty or if the recipient otherwise controls the conduct of the surface coal mining operation.

Under final § 778.13(c)(2), the permit applicant must explain each identified person's ownership or control relationships to the applicant, including the percentage of ownership and the location of the owner or controller in the organizational structure. In the example given above, if company "A" owns ten percent of company "B," and company "B" owns ten percent of company "C," and company "C" owns ten percent of the applicant, the permit application must list companies "A," "B" and "C" along with the controllers of "A," "B" and "C", and must clearly indicate that "A" owns "B," and that "B" owns "C". The applicant must also furnish the percentage of ownership at each level, and when listing officers, directors, general partners, and other persons required to be reported, indicate the business entity they work for. All of the information must be furnished in a manner that will enable the regulatory authority to precisely determine the organizational structure of the applicant and its owners and controllers.

In the proposed rule at § 778.13(d), OSMRE requested the "permit or application numbers or other identifiers" for all current and previous coal mining permits in the United States during the five year period preceding the date of the application. In the final rule, OSMRE has reworded this requirement to "Federal or State permit number, and MSHA number with date of issuance." OSMRE has specifically included the MSHA number here and elsewhere in the final rule so that there is no doubt the number must be included in the permit application. The date of issuance of the MSHA number is being asked for because MSHA reassigns previously issued numbers. If a violation is linked to a particular MSHA number and the number is later reassigned, the date the number was reassigned will allow the regulatory authority to determine that the current site should not be associated with the prior violation.

Final § 778.13(d) will require for any surface coal mining operation owned or controlled by either the applicant or by any person who owns or controls the applicant under the definition of "owned or controlled" and "owns or controls" in 30 CFR 773.5, the operation's:

(1) Name, address, identifying numbers, including employer identification number, the Federal or State permit number and MSHA number, the date of issuance of the MSHA number, and the regulatory authority; and

(2) Ownership or control relationship to the applicant, including the percentage of ownership and the location in the organizational structure.

Section 778.13(i) of the final rule requires that after an application has been approved but before the permit to conduct a surface coal mining operation is issued, the applicant shall, as applicable, bring up to date, correct, or indicate that no change has occurred in the information previously submitted under paragraphs (a) through (d). If the applicant fails or refuses to submit the information required under § 778.13(i), the regulatory authority will not issue the permit. The updated information will enable the regulatory authority to make an accurate § 773.15(b)(1) compliance review and to take appropriate action.

This provision was proposed on July 18, 1988 (51 FR 25828) as § 773.15(e)(1)(i). It has been codified in the final rule in § 778.13(i) so that the obligation to update information will be located with the requirement for the information that must be updated.

Under § 778.13(j), a permit applicant will be required to submit the information required by §§ 778.13 and 778.14 in any prescribed format that is issued by OSMRE. In the final rule, OSMRE has substituted the term "format" for the term "form." OSMRE has made the substitution to allow for the electronic transfer of data if that can be done in a manner compatible with the operation of the Applicant/Violator System.

For the present OSMRE contemplates use of a standard form as the prescribed format. If a standard form is issued, use of the form will be required by all permit applicants when submitting the information regardless of whether the permit application is filed with OSMRE or a State regulatory authority. The form will cover only the information required by §§ 778.13 and 778.14, and will be in addition to any permit application forms required by any of the State regulatory authorities.

Use of a standard form should facilitate the imput of legal, financial and compliance data into the Applicant/Violator System and help reduce errors when that data is transferred from a permit application to the computer. It should also prove helpful to those applying for permits because it will indicate what information must be furnished pursuant to the regulations. OSMRE will state on any forms requesting a social security number that the submission of a social security number is voluntary. Development and use of any such form will not limit any additional information collection requirements of any approved program.

*Section 778.14—Violation Information*

Section 778.14(c) will require a permit applicant to submit a list of all violation notices received by the applicant and a list of all cessation orders and air and water quality violation notices received by any surface coal mining operation owned or controlled by either the applicant, or by any person who owns or controls the applicant, during the three year period preceding the application date. The list must cover violations of any provision of the Act, or of any law, rule or regulation of the United States, or of any State law, rule or regulation enacted pursuant to Federal law, rule or regulation pertaining to air or water environmental protection. The lists also must contain any identifying numbers for the operation, including the Federal or State permit number and MSHA number, the date of issuance of the violation notice and MSHA number, the name of the person to whom the violation notice was issued, and the name of the issuing regulatory authority, department or agency. The purpose of this information is to provide the data necessary to perform the compliance review required by section 510(c) of the Act and 30 CFR 773.15(b)(1) prior to making a final decision on whether to issue a permit.

A *violation notice*, as defined in 30 CFR 701.5, includes any written notification from a governmental entity of a violation of law, whether by letter, memorandum, legal or administrative pleading, or other written communication. While all notices of violation (NOV's) are violation notices, not all violation notices are NOV's. For example, a violation notice may also be a cessation order issued by a regulatory authority or a notice of noncompliance issued by the Environmental Protection Agency. Under § 778.14(c), the permit applicant must list all violation notices, including NOV's, cessation orders, notices of noncompliance, and other citations, regardless of terminology, for any violation of any provision of the Act, or of any law, rule or regulation of the United States, or of any State law, rule or regulation enacted pursuant to Federal law, rule or regulation pertaining to air or water environmental protection in connection with any surface coal mining operation. For any surface coal mining operation owned or controlled by either the applicant or by any person who owns or controls the applicant only cessation orders and air and water quality violation notices must be reported.

The proposed rule would have required the date of issuance of the violation notice, the name of the person to whom the violation notice was issued, and the issuing regulatory authority department or agency. In the final rule, OSMRE is also requesting any identifying numbers, including the Federal or State permit number and MSHA number associated with the operation, and the dates of issuance of the violation notice and MSHA number. This additional information will assist the regulatory authority in linking a violation notice to a particular mine site and its owners and controllers.

The requirement in the prior regulations to list violation notices, including NOV's, received by any subsidiary, affiliate, or persons controlled by or under the common control with the applicant has been deleted for two reasons. First, the information concerning NOV's incurred by any subsidiary, affiliate, or persons controlled by or under common control with the applicant is not required by the Act and is not needed in view of a presumption contained in revised 30 CFR 773.15(b)(1). That presumption holds that in the absence of a failure-to-abate cessation order an NOV is presumed to be in the process of being corrected to the satisfaction of the agency that has jurisdiction over the violation. It is because of the presumption that cessation orders but not NOV's must be reported for any surface coal mining operation owned or controlled by the applicant or by any person who owns or controls the applicant. In spite of the presumption, all NOV's received directly by the applicant must still be reported under revised § 778.14(c) because section 510(c) of the Act requires that an application list all NOV's incurred directly by the applicant.

The second reason for revising the previous requirement to list violation notices "received by any subsidiary, affiliate, or persons controlled by or under the common control with the applicant" was the desire of OSMRE to eliminate confusion and conform the scope and language of the persons about whom information must be submitted with the coverage of the compliance review requirements of 30 CFR 773.15 (b)(1) and (b)(3). As revised on October 3, 1988 (53 FR 38868), those sections do not use the terms "subsidiary,"

BEST COPY AVAILABLE

VOL 54 ISS 40 MR 2 1989 UMI

"affiliate" or "common control." Instead they refer to operations "owned or controlled by either the applicant or by any person who owns or controls the applicant."

Section 778.14(d) of the rule requires that after a surface coal mining and reclamation permit application has been approved, but before the permit is issued, the applicant shall, as applicable, bring up to date, correct or indicate that no change has occurred in the information previously submitted under § 778.14(c). If the applicant fails or refuses to submit the information required under § 778.14(d), the regulatory authority will not issue the permit. The updated information will enable the regulatory authority to make an accurate § 773.15(b)(1) compliance review.

Section 778.14(d) was proposed on July 18, 1986 (51 FR 25828) as § 773.15(e)(1)(ii). It has been codified in the final rule in § 778.14(d) so that the requirement to update information will be located with the requirement to provide the information that must be updated.

*Section 843.11—Cessation Orders*

Section 843.11(g) required that where OSMRE is the regulatory authority, within sixty days of the issuance of a cessation order, OSMRE must notify all owners and controllers identified pursuant to 30 CFR 778.13(c) that the cessation order has been issued and that they have been identified as owners or controllers of the violator.

As described earlier in this preamble, § 773.17(i) of the rule requires a permittee to submit to the regulatory authority within thirty days after a cessation order is issued, updated information on its owners and controllers. Upon receipt of this information, OSMRE will send the notification required by § 843.11(g). If updated information is not received, OSMRE will send the notice to the persons currently in its records as owners or controllers.

OSMRE has added this provision to the final rule for three reasons. First, notification to the owners and controllers will insure that they are aware of the violation, and that unless the violation is abated their names will be linked to the violation in the Applicant/Violator System. Second, where the person notified of the violation is no longer linked with the violator, notification will allow the person to immediately notify the regulatory authority that a link no longer exists. This will help prevent any problems in the future for that person should the permittee fail to submit the update information required by § 773.17(i) indicating that the link no longer exists or if it submits erroneous information. Third, where the violator is a corporation, the notification to the individual owners and controllers will also provide a basis for the assessment of an individual civil penalty under section 518(f) of the Act and 30 CFR Part 846 or the State program equivalent.

Since this section contains a procedural requirement relating to enforcement sanctions, pursuant to § 840.13(c) each state regulatory authority must adopt the same or similar requirements.

## III. Discussion of Public Comments

One commenter objected to the rule on procedural grounds. The commenter said that the proposed rule was based on the April 16, 1986 (51 FR 12879) option for defining ownership and control, and not on the option published for comment on May 4, 1987 (52 FR 16275). The commenter said that the data collection requirements varied dramatically between the two proposed definitions of ownership and control, and that it was not possible for the public to comment intelligently on the agency's approach to data collection. The commenter said that this failure violated the basic tenets of the Administrative Procedure Act (APA).

OSMRE disagrees. The APA requires that an agency publish "either the terms or substance of the proposed rule or a description of the subjects and issues involved." 5 U.S.C. 553(b)(3). OSMRE complied with this requirement on May 28, 1987 (52 FR 20032) when it published proposed rule language which would conform the permit application requirement in §§ 778.13 and 778.14 with the April 16, 1986 option for the definition for "owned or controlled" and "owns or controls." The requirements adopted in this rule are substantially similar to those published on May 28, 1987. The requirements published on May 28, 1987 were based on the April 16, 1986 option because the definitions discussed in that option were more inclusive than the option published on April 5, 1985 (50 FR 13724).

In the May 28, 1987 notice, OSMRE also stated that if the May 4, 1987 option for the definition were selected rather than the April 16 option, the information reporting requirements might be changed, and indicated the nature of the change and specifically requested comments on alternative reporting requirements. Thus, this rule complies with the requirements of the APA.

One commenter objected to including in the rule any provision which would require an applicant to submit any information other than that specifically required by section 507(b) of the Act. The commenter argued that since the Congress articulated, with specificity, precise permit information requirements with respect to the applicant's corporate officers and owners, it was arbitrary and capricious for OSMRE to impose more expansive information reporting requirements. In support for this position, the commenter cited In re: Permanent Surface Mining Regulation Litigation, 14 E.R.C. 1083, 1097 (D.D.C. February 26, 1980).

OSMRE disagrees. The case cited by the commenter dealt with the narrow issue of whether the Secretary of the Interior could require the submission of hydrologic information for areas outside a permit area. In its decision the court concluded that the Congress articulated, with specificity, those instances in which hydrologic information outside the permit area was necessary, and consequently the Secretary's requirements which went beyond those instances specified by the Congress were arbitrary and capricious. *Id.*

In the case of In re: Permanent Surface Mining Regulation Litigation, 653 F.2d 514 (D.C. Cir. 1981), cert. denied, 454 U.S. 822 (1981), the U.S. Court of Appeals for the District of Columbia Circuit decided the question of whether the Secretary had rulemaking authority to require a permit applicant to submit any items of information beyond those enumerated in the Act. The court held that the Act's explicit listings of permit information were not exhaustive and did not preclude the Secretary from requiring additional information needed to ensure compliance with the Act. *Id.* at 527. The court held that both sections 201(c)(2) and 501(b) of the Act provide adequate authority for the Secretary to require the submission of additional information.

Section 201(c)(2) authorizes the Secretary to "publish and promulgate such rules and regulations as may be necessary to carry out the purposes and provisions of this Act." Section 501(b) directs the Secretary to promulgate regulations "establishing procedures and requirements for preparation, submission and approval of State programs."

In addition to the two sections cited by the court, support for the rule may also be found in sections 201(c)(1), 507(b), 510(c) and 517(b)(1)(E) of the Act. The rule aids implementing the section 102(c)(1) requirement that permits be withheld for noncompliance with the Act. Section 507(b) requires the identification of owners and controllers,

and also requests information on any suspension, revocation or bond forfeiture incurred by the applicant or any subsidiary, affiliate or person controlled by or under common control with the applicant in the five years preceding the date of the application. Section 510(c) requires a listing of all notices of violation incurred by the applicant during the three year period preceding the date of the application. Section 517(b)(1)(E) authorizes the regulatory authority to require any permittee to provide such other information relative to surface coal mining and reclamation operations as the regulatory authority deems necessary for purposes of developing or assisting in the development, administration and enforcement of any approved State or Federal program, or of determining whether any person is in violation of any requirement of any such State or Federal program. It is evident, therefore, that the Secretary has ample authority to adopt the information reporting requirements contained in this rule.

One commenter said that the final § 733.15(b)(1) compliance review required by § 773.15(e) should be limited to any new information received in the information update required by §§ 778.13(i) and 778.14(d). Presumably the comment was made out of concern that the final compliance review could delay the issuance of the permit.

OSMRE believes that the final compliance review will not be a time-consuming process. When the updated information is submitted by the applicant pursuant to §§ 778.13(i) and 778.14(d) of this rule, OSMRE or the appropriate State regulatory authority will enter the information into the Applicant/Violator System. Both the initial and the second § 773.15(b)(1) compliance review may be made using the Applicant/Violator System. Use of the computer-based system to make the review will take very little time and should not result in a delay in the issuance of the permit if the updated information does not result in a match between the applicant and a violator.

One commenter stated that a permit should be rescinded if the permittee failed to comply with the requirement of § 773.17(i) to update certain information on its owners and controllers on an annual basis. In the proposed rule OSMRE stated that failure to submit the information could result in rescission of the permit.

As previously discussed, the updating requirement in § 773.17(i) has been changed in the final rule to make it contingent upon the issuance of a cessation order. Once such a provision is incorporated into a regulatory program, if the permittee fails to furnish the required information, the permittee will have violated a permit condition and be subject to appropriate enforcement measures under the applicable regulatory program.

One commenter requested clarification concerning the requirement in § 778.13(b) to furnish the name, address and telephone number of the person who will pay the abandoned mine land reclamation fee. The commenter wanted to know if the regulation required the submission of an organization such as a bank, or the name of a particular person at the bank who would make the payments on behalf of the operator.

The term person is defined in section 701(19) of the Act to mean an individual, partnership, association, society or joint stock company, firm company, corporation or other business organization. Consequently, if a financial institution makes the required payment for the operator the name of the institution would suffice. The name of the person actually paying the abandoned mine land reclamation fee on behalf of the operator is being requested in order to facilitate requests for audits and financial information.

Several commenters objected to the requirement in § 778.13(i) and 778.14(d) of the rule for an applicant to submit updated information at the time a permit is approved but before it is issued. One commenter objected on the grounds that the Act requires that the information be submitted only once, and that the requirement to update the permit application information immediately prior to the issuance of the permit would be burdensome.

OSMRE disagrees. The commenter submitted no evidence to support the assertion that the requirement would be burdensome. The requirement could be burdensome only if numerous changes had occurred since the permit application was submitted. Where such changes have occurred in the ownership or control of the proposed mining operation or in the type and number of outstanding violations, it is only appropriate that the compliance history of the permit applicant and its owners and controllers be reviewed to insure that the permit is not issued in violation of section 510(c) of the Act.

Another commenter said that the proposed requirement to update the information in the permit application at the time of the submission of the bond would destroy the two-step process envisioned by the Act for permit issuance. The commenter stated that the decision to issue the permit should be based on the material submitted with the permit application, and the decision to accept the bond should be based on satisfaction of the bonding requirements in section 509 of the Act.

OSMRE disagrees. There is nothing in the Act to prevent the Secretary from requiring that the permit application be complete and accurate at the time of permit issuance. Clearly, it is the intent of the Congress that the permit be issued based on accurate information contained in the permit application.

Another commenter said that any delays between the submission of the permit application and the issuance of the permit were caused by the regulatory authority. Therefore, the commenter concluded, the applicant should not be required to update the information in the application.

OSMRE disagrees. Very often the delay between the time when a permit application is submitted and when the permit is issued is the result of factors such as the large size of the planned mining operation, the extent of the mining plan, requests for clarification concerning information in the permit application, or the need to prepare environmental documents. The lapse of time caused by such factors can be minimized but not entirely avoided. The only way of insuring that the permit is approved based on current information is to require that the information be updated. It is to the advantage of the permit applicant to update the information in the application in order to insure that the permit is issued based on accurate information.

One commenter suggested that the entire package of compliance information should be required only once at the time of bond submittal.

The suggestion to have the compliance information submitted only at the time the bond is submitted could delay the issuance of a permit. If the compliance information is submitted only at the time the bond is submitted, OSMRE or a State regulatory authority would not be able to conduct a compliance review until the very end of the permit application review process. By requiring the information to be submitted in the beginning, the regulatory authority is able to make an initial compliance review of the application and alert the applicant to any potential problem early enough to give the applicant sufficient time to correct it or to submit information indicating that the results of the initial compliance review were erroneous. This process should reduce or eliminate delays in the issuance of a permit. In addition, the regulatory authority's

VOL 54 ISS 40 MR 2 1989 UMI

communication with the applicant at the outset concerning any problem that could preclude permit issuance will allow the regulatory authority to avoid expending resources on technical review of a permit application until a substantial likelihood exists that withholding of the permit will not be required.

One commenter suggested that OSMRE should have the responsibility to update that information at the time of permit issuance, based upon the information contained in the original application and OSMRE records.

OSMRE disagrees. The regulatory authority cannot totally update information without assistance from the applicant because it would have no way of knowing who any new owners or controllers of the applicant may be or what new violations may exist, but have not yet been entered into the Applicant/Violator System.

One commenter objected to the rule on the grounds that it did not require sufficient information concerning the rebuttable presumptions contained in the definition of "owned or controlled" and "owns or controls". The commenter argued that the rule should require the submission of information describing the role of each officer in a company, and the legal authority and duties of each director. In effect, the commenter wanted a permit applicant to submit sufficient information to either rebut or confirm the presumptions contained in the definition of ownership and control. The commenter was concerned that if the information were submitted at the time of a permit block, the individuals linked to a violator would "come forth on a piece-meal basis with self-selected information" to rebut the presumption.

OSMRE did not adopt the commenter's suggestion. Under the definition at 30 CFR 773.5 certain relations create a presumption of ownership or control. For example, owning at least ten percent of the applicant, or being an officer, director, general partner, or operator of the applicant results in a presumption of control. However, for the purpose of processing permit applications a presumption of control is important only if there is an outstanding violation to which a shareholder, officer, director, general partner, operator or other person covered by the definition is linked. If there is a violation, then it becomes important to determine if the control presumed by the rule does not in fact exist. OSMRE believes that it would result in an unreasonable expenditure of time, effort and resources by both the regulatory authority and the permit applicant if the regulations were to require all permit applicants to submit the information needed to rebut a presumption of control if no link to a violation existed and therefore there was no reason to rebut the presumption. An applicant can always submit the information if the compliance review indicates a link between an applicant and a violator. Once the link is discovered, both the applicant and the regulatory authority can focus their attention on the specific relationship in question and will know what information is actually needed to rebut the presumption.

One commenter objected to the exception in § 778.14(c) of the rule, which does not require the permit applicant to report all notices of violation (NOV's). Section 778.14(c) requires that only NOV's incurred directly by the applicant be reported. NOV's incurred to surface coal mining and reclamation operations owned or controlled by the applicant or by anyone who owns or controls the applicant need not be reported. The commenter argued that all NOV's should be listed and that they should be taken into consideration during the compliance review because the absence of a cessation order does not indicate the absence of a violation. The commenter further argued that the receipt of an NOV serves as an important indicator of an applicant's willingness and ability to comply with necessary legal restrictions and permit requirements.

OSMRE did not adopt the commenter's suggestion that NOV's incurred by operations owned or controlled by the applicant or by anyone who owns or controls the applicant be reported. Section 778.14(c) as adopted complies with the requirements of section 510(c) of the Act. That section requires that notices of violations incurred "by the applicant" be listed. The Act does not require that notices of violations incurred at surface coal mining operations owned or controlled by the applicant or by any person who owns or controls the applicant be reported. OSMRE believes that the exception to reporting NOV's incurred by operations owned or controlled by the applicant or by any person who owns or controls the applicant is reasonable in view of the Secretary's revision of the scope of the compliance review in § 773.15(b)(1) and the presumption contained in that section that "in the absence of a failure-to-abate cessation order, the regulatory authority may presume that a notice of violation has been or is in the process of being corrected to the satisfaction of the agency with jurisdiction over the violation, except where evidence to the contrary is set forth in the permit application."

In addition to the above, the Secretary is adding to the regulations in § 778.14(d) a new requirement. That section requires that after the approval of the permit, but before its issuance, the permit applicant must bring up to date, correct, or indicate no change has occurred in the violation information previously submitted pursuant to § 778.14(c). Consequently, any unreported NOV's which were outstanding at the time the permit application was filed, and for which a cessation order was subsequently issued prior to the issuance of the permit, would have to be reported in the information update required immediately prior to the issuance of the permit, and would result in the permit being blocked unless the violation was in the process of being abated or else was the subject of a good faith appeal, in which case the permit would be conditionally issued.

Several commenters said that the information reporting requirements of the rule would be very burdensome. As an example, one commenter said that an existing company might be required to list on a permit application the names and addresses of one direct parent company, five second generation parent corporations (none of whom were primarily engaged in coal production), and an unknown number of third generation owners holding ten percent or more of the stock of the five second generation owners; three affiliates which are coal producing companies and ten affiliates which are not; in addition to officers, directors and violations of all of the above. By the commenter's calculations, the permit applicant would be required to list information for forty-three surface coal mining operations in ten States.

OSMRE is aware that for some large corporations the reporting requirements of this rule could be extensive. After the initial compilation of such material, however the incremental amount of effort to maintain and update the data for future applications would be less than the initial effort. These requirements are well within the discretion granted to the Secretary by the Act and are necessitated by the complex business structures created by companies mining coal.

One commenter disagreed with OSMRE's determination that the time and effort required to fulfill the data collection requirements of this rule would be minimal. The commenter said that the operating costs, time and effort involved in complying with the rule would have a substantial impact on all companies regardles of size. The commenter said that the annual updating of permit information could easily require an additional man-year or more to track all corporate personnel changes and violations and their ultimate resolution.

OSMRE's determination of the impact of the rule was based on calculations contained in its Determination of Effects, which indicates that in 1985, 73.4% of all operations could be classified as small operations. The result would be that most operations would not need much time to gather, organize and mail information required under the rule. The commenter did not submit any evidence to support the assertion that one man-year or more would be required. Moreover, the commenter said that many companies have already developed their own computerized data processing systems to track some of the required information. This should minimize any increase in burden that might result. Also, in order to address concerns about the information reporting requirements, OSMRE did not adopt an annual update. Instead, updated information is required only after a cessation order is issued. Thus companies acting in compliance with their permits, or who abate violations within the time specified in a notice of violation can avoid having to submit updates of ownership and control information.

One commenter said that the regulatory authority should collect ownership information up and down the corporate chain. The commenter stated that requiring such information will not place a burden on coal companies because this data should be readily available in coal company records.

OSMRE agrees that such information must be submitted in a permit application. The rule requires the submission of information on owners and controllers of the permit applicant as well as mining operations owned or controlled by the applicant. See § 778.13 (c) and (d) of the rule and the preamble discussion of those two sections.

One commenter asked for clarification of how OSMRE would determine control based on indirect ownership. For an example and discussion of indirect ownership, see the OSMRE final rule defining "owned or controlled" and "owns or controls," published on October 3, 1988 (53 FR 38868) at page 38874.

One commenter objected to the requirement in § 778.13(j) for the use of a standard form to report the information required by this rule because it could cause additional burdens for the many companies that have already developed their own data processing systems to track some of the required information.

OSMRE believes that use of a standard form to report the information required by this rule can assist those applying for a permit application by indicating on the face of the form what information they must submit with regard to the identification of interests and violation history. Also, the use of a standard form can assist OSMRE and the State regulatory authorities in entering the information from the permit application into the Applicant/Violator System and minimize the amount of data entry error that might result. Any additional burden the use of a standard form might impose would be offset by these important advantages.

One commenter said that a permit applicant should be required to list all violations for which a permit block can be imposed.

OSMRE disagrees. While it is true a permit block can be imposed for violations an applicant is not required to list, OSMRE does not believe that it is necessary for the permit applicant to submit all of the information for which a permit block may be imposed because much of the information already is available to OSMRE and the State regulatory authorities. Final § 778.14(c) and the existing regulations in § 778.13 (a) and (b) together require the submission of most of the information suggested by the commenter, with the exception of outstanding Federal and State civil penalties and delinquent AML fees.

With regard to outstanding Federal civil penalties and delinquent AML fees, OSMRE has two computer-based systems which supply Federal violation data to the Applicant/Violator System. One is the Collection Management Information System (CMIS), and the other is the Abandoned Mine Land Fee Collection System (AML System). CMIS contains information on all delinquent Federal civil penalties while the AML System contains information on delinquent AML fees. With regard to delinquent State civil penalties, OSMRE intends to collect the relevant data and add it to the Applicant/Violator System at a later date after the quality of the data has been checked.

One commenter suggested that the rule should include a general provision which requires ownership and control information for anyone in an ownership or control relationship with the applicant or operator. For example, the commenter said, family members are frequently used as shams or fronts by irresponsible coal operators, and it would be a minimal burden to the applicant and the operator to list immediate family members who have mined in the past five years. The commenter also suggested that information be requested on mine managers, subcontractors and mine foremen.

OSMRE did not adopt the commenter's suggestion. The final rule at § 778.13(c) requests information for any person who owns or controls the applicant under the definition of "owned or controlled" and "owns or controls" at 30 CFR 773.5. Under § 778.13(c) the permit applicant is required to list the operator and those who own or control the operator.

If a family member, mine manager or subcontractor controls the applicant, there is an obligation under §§ 778.13(c) and 773.5(a)(3) to list that person in the permit application. However, the rule does not specifically require information when control does not exist. First, the Act does not require OSMRE to collect such information, and second, the Congress has imposed limitations on information collection. OSMRE, like all other Federal agencies, is required by the Congress to reduce where possible the information collection burden it imposes on the public. In order to do this OSMRE has limited the information reporting requirements of this rule to those specifically required by the Act or clearly necessary for the compliance review required by 30 CFR 773.15(b). There has to be some reasonable limit on the information collected for the compliance review. If OSMRE were to request all data which may be useful but not essential for performing the compliance review, the data when added to that already required by other sections of the Act and regulations would be difficult and expensive to process for both the permit applicant and the regulatory authority.

The regulations at 30 CFR 773.13(b) allow for public participation in the permitting process. Through that process, the regulatory authority can receive, and often does receive, pertinent information about the permit applicant and its owners and controllers, which may affect the permitting decision.

One commenter said that there should be a specific requirement for the applicant to state whether the proposed operation is a contract mine, and if so, the applicant should be required to list the entity or entities involved in that relationship. The commenter stated that ownership and control information should be required for both parties to the contract, and a copy of the contract should be required as part of the permit

VOL 54 ISS 40 MR 2 1989 UMI

application, if the contract is oral, its basic provisions should be described in the application.

OSMRE agrees in part. The rule in § 778.13(c) requires that the permit application contain the name of any person owning or controlling coal to be mined under the proposed permit under a lease, sublease or other contract, and having the right to receive such coal after mining or having authority to determine the manner in which the proposed surface coal mining operation is to be conducted. Section 778.13(e) requires that the permit application contain the name and address of each legal or equitable owner of record of the mineral property to be mined and each leaseholder of record of any leasehold interest in the property to be mined. Consequently, with the exception of the terms of the contract, information concerning the parties to a contract mining operation, where control is presumed, is required by the rule. Information on the contracts of other mines is not needed unless the contracts result in control over the mines. Although the submittal of every contract would reduce the likelihood of the regulatory authority not discovering control relationships, a requirement for applicants to submit and regulatory authorities to review such information appears overly burdensome.

Under the definition of "owned or controlled" and "owns or controls" at 30 CFR 773.5, there is a presumption of control for any person who owns or controls coal to be mined by another person under a lease, sublease or other contract and has the right to receive this coal after mining or has authority to determine the manner in which the other person mines the coal. If a presumption of control exists in a particular permitting situation, the permit applicant may rebut the presumption if the compliance review indicates a link between the applicant and the violator. In order to rebut the presumption in a contract mining situation, the applicant would be required, at a minimum, to submit the terms of the contract for examination. OSMRE does not believe that it should require the submission of the contract until such time as there is a need to rebut the presumption of control because of a potential permit block.

The same commenter also wanted the permit application to contain information on past contract mining operations of the applicant and operator along with the permit number, Mine Safety Health Administration (MSHA) number, and any outstanding violations.

OSMRE agrees in part with the commenter. This information with regard to past contract mining operations owned or controlled by the applicant is required by the rules in §§ 778.13(c)(4) and 778.14(c)(1).

One commenter suggested that previous § 778.14(c) should be retained without change. Prior to revision, § 778.14(c) required information on violation notices received by the applicant or any subsidiary, affiliate or persons controlled by or under common control with the applicant. As revised, § 778.14(c) requires information on violation notices received by the applicant or any surface coal mining operation owned or controlled by the applicant or by anyone who owns or controls the applicant.

OSMRE declined to adopt the commenter's suggestion. The language adopted in § 778.14(c) mirrors the language in 30 CFR 773.15(b)(1) governing compliance review. The language is no less inclusive than the compliance review required by section 773.15(b)(1), and in fact results in a review of companies under common control with the applicant. Use of this same terminology in both §§ 778.14(c) and 773.15(b)(1) will eliminate confusion.

One commenter stated that § 778.14(c) of the rule should require the applicant to include the status of any violation. This information is already required by § 778.14(c)(4) of the existing regulations.

One commenter also suggested that the permittee be required to submit updated information on an annual basis concerning all outstanding violations previously reported pursuant to § 778.14(c).

OSMRE disagrees. The violation information submitted with the permit application is needed for the compliance review required by § 773.15(b)(1). Once that review has been completed and the permit issued an update is not needed because any violation which occurs after the issuance of a permit will not affect the validity of the permit, and any violation which has already been reported pursuant to § 778.14(c) will remain in the records of the regulatory authority until the violation is abated.

One commenter requested clarification of the responsibility of the regulatory authority with regard to verifying the information supplied by the permit applicant or challenging any information the regulatory authority has reason to believe may be incorrect.

The regulatory authority may independently verify the information contained in a permit application if it has reason to believe that the information is either inaccurate or incomplete. If the regulatory authority determines that the permit application is inaccurate or incomplete it may refuse to process the application until the missing information is submitted, or it may block the permit because of a violation or an ownership or control relationship discovered as a result of its own investigation. In either event, the regulatory authority should notify the permit applicant to submit additional information, which may indicate that the application is in fact accurate and complete or that a permit should be issued because there is no ownership or control link between the applicant and the violator. After such notice, the burden to respond is on the applicant.

One commenter suggested that the permittee be required to update the information at midterm review rather than on an annual basis, and to make any other updates only if changes occur. Another commenter suggested that updates be made only at the time of permit revision.

OSMRE did not adopt these suggestions. As previously discussed, the final rule requires a permittee to update the information contained in the permit application within thirty days of the issuance of a cessation order for the permitted site. OSMRE believes that it will be more advantageous to request the information at the time of a violation rather than on an annual basis. If no violation has occurred at midterm, there is no need for an information update. If a violation has occurred prior to an application for a permit revision, then the updated information is needed so that appropriate alternative enforcement action may be taken if necessary.

## IV. Procedural Matters

### *Effect in Federal Program States and on Indian Lands*

The rule will apply through cross-referencing to the following Federal program States: California, Georgia, Idaho, Massachusetts, Michigan, North Carolina, Oregon, Rhode Island, South Dakota, Tennessee and Washington. The Federal programs for these States appear at 30 CFR Parts 905, 910, 912, 921, 922, 933, 937, 939, 941, 942 and 947, respectively. Comments were specifically solicited in the proposed rule as to whether unique conditions existed in any of these States relating to the proposal which should be reflected in the final rule either as changes to the national rules or as State-specific amendments to any or all of the Federal programs. No comments were received.

The rule also applies through cross-referencing to Indian lands under the Federal program for Indian lands as provided in 30 CFR Part 750.

### *Effect on State Programs*

Following promulgation of the final rule, OSMRE will evaluate permanent State regulatory programs approved under section 503 of the Act to determine any changes in these programs that will be necessary. When the director determines that certain State program provisions should be amended in order to be made no less effective than the revised Federal rules, the individual States will be notified in accordance with the provision of 30 CFR 732.17.

### *Paperwork Reduction Act*

The information collection requirements contained in this rule have been approved by the Office of Management and Budget as required by 44 U.S.C. 3501 *et seq.*, and assigned clearance numbers 1029–0034 and 1029–0041.

The public reporting burden for this information is estimated to average one hour per response for § 773.17(i), and 13.5 hours per response for the sections located in Part 778 amended by this rule. The estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. You may send comments regarding these burden estimates or any other aspect of this collection of information, including suggestions for reducing the burden, to Information Collection Clearance Officer, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue NW., Washington, DC 20240; and the Office of Management and Budget, Paperwork Reduction Project (1029–0034), Washington, DC 20503.

The information is needed to meet the requirements of sections 201, 507 and 510 of Pub. L. 95–87. The information will be used by OSMRE in reviewing and approving permit applications. Except for the disclosure of a social security number, the obligation to respond is mandatory in accordance with sections 201(c)(1), 201(c)(2), 501(b), 507(b), 510(c) and 517(b)(1)(E).

### *Executive Order 12291*

The Department of the Interior has examined the rule according to the criteria of Executive Order 12291 (February 17, 1981) and has determined that it is not major and does not require a regulatory impact analysis. This determination is based on the findings that the regulatory revisions and additions of this rule will cause very little increase in the costs of operating a mine in a manner that meets the requirements of the Act. Further, there will be no significant impacts on competition, employment, productivity, innovation or on the ability of U.S.-based enterprises to compete with foreign-based enterprises.

### *Regulatory Flexibility Act*

The Department of the Interior has also determined, pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, that the proposed rule will not have a significant economic impact on a substantial number of small entities because although the rule will impose new regulatory burdens on small entities, the time and effort required for a small entity to fulfill the additional data collection requirements will be minimal.

### *National Environmental Policy Act*

The rule has been reviewed by OSMRE and it has been determined to be categorically excluded from the National Environmental Policy Act (NEPA) process in accordance with the Department of the Interior Manual (516 DM 2, Appendix 1.10) and the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA (40 CFR 1507.3).

### *Author*

The principal author of this rule is Andrew F. DeVito, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue NW., Washington, DC 20240; Telephone: 202–343–5241 (Commercial or FTS).

### List of Subjects

*30 CFR Part 773*

Administrative practice and procedure, Reporting and recordkeeping requirements, Surface mining, Underground mining.

*30 CFR Part 778*

Reporting and recordkeeping requirements, Surface mining, Underground mining.

*30 CFR Part 843*

Administrative practice and procedure, Law enforcement, Reporting and recordkeeping requirements, Surface mining, Underground mining.

Accordingly, 30 CFR Parts 773, 778 and 843 are amended as set forth below.

Date: December 8, 1988.

**James E. Cason,**

*Deputy Assistant Secretary—Land and Minerals Management.*

## PART 773—REQUIREMENTS FOR PERMITS AND PERMIT PROCESSING

1. The authority citation for Part 773 continues to read as follows:

**Authority:** 30 U.S.C. 1201 *et seq.*, 16 U.S.C. 470 *et seq.*, 16 U.S.C. 1531 *et seq.*, 16 U.S.C. 661 *et seq.*, 16 U.S.C. 703 *et seq.*, 16 U.S.C. 668a *et seq.*, 16 U.S.C. 469 *et seq.*, 16 U.S.C. 470aa *et seq.*, and Pub. L. 100–34.

2. Section 773.15 is amended by adding paragraph (e) to read as follows:

**§ 773.15 Review of permit applications.**

* * * * *

(e) *Final compliance review.* After an application is approved, but before the permit is issued, the regulatory authority shall reconsider its decision to approve the application, based on the compliance review required by paragraph (b)(1) of this section in light of any new information submitted under §§ 778.13(i) and 778.14(d) of this chapter.

3. Section 773.17 is amended by adding paragraph (i) to read as follows:

**§ 773.17 Permit conditions.**

* * * * *

(i) Within thirty days after a cessation order is issued under § 843.11 of this chapter, or the State program equivalent, for operations conducted under the permit, except where a stay of the cessation order is granted and remains in effect the permittee shall either submit to the regulatory authority the following information, current to the date the cessation order was issued, or notify the regulatory authority in writing that there has been no change since the immediately preceding submittal of such information:

(1) Any new information needed to correct or update the information previously submitted to the regulatory authority by the permittee under § 778.13(c) of this chapter; or

(2) If not previously submitted, the information required from a permit applicant by § 778.13(c) of this chapter.

## PART 778—PERMIT APPLICATIONS—MINIMUM REQUIREMENTS FOR LEGAL, FINANCIAL, COMPLIANCE AND RELATED INFORMATION

4. The authority citation for Part 778 is revised to read as follows:

**Authority:** Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*, and Pub. L. 100–34.

5. Section 778.10 is revised to read as follows:

VOL 54 ISS 40 MR 2 1989 UMI

**§ 778.10 Information collection.**

The information collection requirements contained in Part 778 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1029–0034. The information is being used to meet the requirements of sections 201, 507(b), 508(a), and 510(c) of the Act, which require that persons conducting surface coal mining operations submit to the regulatory authority relevant information regarding ownership and control of the property to be affected by such operations, compliance status and history. This information will be used by the regulatory authority to insure that all legal, financial and compliance requirements are satisfied prior to making a decision to issue or deny a permit under the permanent regulatory program. Except where specifically noted, the obligation to respond is mandatory in accordance with sections 201(c)(1), 201(c)(2), 501(b), 507(b), 510(c), and 571(b)(1)(E).

8. Section 778.13 is amended by revising the introductory text and paragraphs (b), (c) and (d), and by adding paragraphs (i) and (j) to read as follows:

**§ 778.13 Identification of interests.**

An application shall contain the following information, except that the submission of a social security number is voluntary:

* * * * *

(b) The name, address, telephone number and, as applicable, social security number and employer identification number of the:

(1) Applicant;

(2) Applicant's resident agent; and

(3) Person who will pay the abandoned mine land reclamation fee.

(c) For each person who owns or controls the applicant under the definition of "owned or controlled" and "owns or controls" in § 773.5 of this chapter, as applicable:

(1) The person's name, address, social security number and employer identification number;

(2) The person's ownership or control relationship to the applicant, including percentage of ownership and location in organizational structure;

(3) The title of the person's position, date position was assumed, and when submitted under § 773.17(i) of this chapter, date of departure from the position;

(4) Each additional name and identifying number, including employer identification number, Federal or State permit number, and MSHA number with date of issuance, under which the person owns or controls, or previously owned or controlled, a surface coal mining and reclamation operation in the United States within the five years preceding the date of the application; and

(5) The application number or other identifier of, and the regulatory authority for, any other pending surface coal mining operation permit application filed by the person in any State in the United States.

(d) For any surface coal mining operation owned or controlled by either the applicant or by any person who owns or controls the applicant under the definition of "owned or controlled" and "owns or controls" in § 773.5 of this chapter, the operation's:

(1) Name, address, identifying numbers, including employer identification number, Federal or State permit number and MSHA number, the date of issuance of the MSHA number, and the regulatory authority; and

(2) Ownership or control relationship to the applicant, including percentage of ownership and location in organizational structure.

* * * * *

(i) After an applicant is notified that his or her application is approved, but before the permit is issued, the applicant shall, as applicable, update, correct or indicate that no change has occurred in the information previously submitted under paragraphs (a) through (d) of this section.

(j) The applicant shall submit the information required by this section and by § 778.14 of this part in any prescribed OSMRE format that is issued.

7. Section 778.14 is amended by revising the introductory text, the introductory text to paragraph (c), and paragraph (c)(1) and by adding paragraph (d) to read as follows:

**§ 778.14 Violation information.**

Each application shall contain the following information:

* * * * *

(c) For any violation of a provision of the Act, or of any law, rule or regulation of the United States, or of any State law, rule or regulation enacted pursuant to Federal law, rule or regulation pertaining to air or water environmental protection incurred in connection with any surface coal mining operation, a list of all violation notices received by the applicant during the three year period preceding the application date, and a list of all unabated cessation orders and unabated air and water quality violation notices received prior to the date of the application by any surface coal mining and reclamation operation owned or controlled by either the applicant or by any person who owns or controls the applicant. For each violation notice or cessation order reported, the lists shall include the following information, as applicable:

(1) Any identifying numbers for the operation, including the Federal or State permit number and MSHA number, the dates of issuance of the violation notice and MSHA number, the name of the person to whom the violation notice was issued, and the name of the issuing regulatory authority, department or agency;

* * * * *

(d) After an applicant is notified that his or her application is approved, but before the permit is issued, the applicant shall, as applicable, update, correct or indicate that no change has occurred in the information previously submitted under this section.

## PART 843—FEDERAL ENFORCEMENT

7. The authority citation for Part 843 continues to read as follows:

**Authority:** Pub. L. 95–87, 30 U.S.C. 1201 et seq., and Pub. L. 100–34.

8. Section 843.11 is amended by adding paragraph (g) to read as follows:

**§ 843.11 Cessation orders.**

* * * * *

(g) Where OSMRE is the regulatory authority, within sixty days after issuing a cessation order, OSMRE shall notify in writing any person who has been identified under §§ 773.17(i) and 778.13 (c) and (d) of this chapter as owning or controlling the permittee, that the cessation order was issued and that the person has been identified as an owner or controller.

**Health Care Financing Administration**

**42 CFR Part 405**

**[BERC-478-IFC]**

## Medicare Program; Fee Schedules for Radiologist Services

**AGENCY:** Health Care Financing Administration (HCFA), HHS.

**ACTION:** Interim rule with comment period.

**SUMMARY:** As required by section 4049 of the Omnibus Budget Reconciliation Act of 1987, this interim rule with comment period sets forth the relative value scale and the methodology for determining fee schedules upon which Medicare Part B payment for radiologist services will be determined. This method of payment will be implemented for services furnished on or after April 1, 1989.

**DATES:** Effective Date: The amendments to the Code of Federal Regulations are effective April 1, 1989. By statute, the fee schedules (which are not published in the Code of Federal Regulations) are effective for services furnished on or after January 1, 1989. Initial implementation of the fee schedules will be for services furnished on or after April 1, 1989.

*Comment Date:* Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5:00 p.m. on May 1, 1989.

**ADDRESS:** Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BERC-478-IFC, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Ave. SW., Washington, DC.

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to file code BERC-478-IFC. Comments received timely will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in Room 309-G of the Department's offices at 200 Independence Ave. SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202-245-7890).

**FOR FURTHER INFORMATION CONTACT:** William Morse, (301) 966-4520.

**SUPPLEMENTARY INFORMATION:**

### I. Background

Currently, under the provisions of sections 1833 and 1842 of the Social Security Act (the Act), payment for most physician and other medical and health services furnished under Part B of the Medicare program (Supplementary Medical Insurance) is made on a reasonable charge basis through contractors known as carriers. There are some exceptions to the rule of Part B payments made on a reasonable charge basis such as hospital outpatient services, which are usually reimbursed on a reasonable cost basis, and diagnostic laboratory services, which are reimbursed on a fee schedule basis.

In accordance with section 1842(b)(3) of the Act, when payment is made on a charge basis, the charge must be reasonable. In determining the reasonableness of a physician's charge for Medicare purposes, carriers are required to consider the following factors and, in general, payment for the physician services is to be based on the lowest of these factors:

- The actual billed charge for the service.
- The customary charge for similar services generally made by the physician for the service.
- The prevailing charge in the locality for similar services.

After adjustment for the annual deductible amount, Medicare pays 80 percent of the reasonable charge. The rules governing payment of reasonable charges for Medicare Part B services are set forth in Part 405, Subpart E (§§ 405.501 through 405.580).

### II. Summary of New Legislation

Section 4049(a)(1) of the Omnibus Budget Reconciliation Act of 1987 (Pub. L. 100-203), which was enacted on December 22, 1987, amended section 1833(a)(1) of the Act by adding a new subparagraph (J) to require that, effective with services furnished on or after January 1, 1989, radiologist services are reimbursed at 80 percent of the lesser of the actual charge for the services or the amount set under a radiology fee schedule. Section 4049(a)(2) of Pub. L. 100-203 added a new section 1834(b) to the Act to provide for the development of a fee schedule for radiologist services. Section 411(f)(8) of the Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100-360) enacted on July 1, 1988, made several amendments to section 4049(a)(2) of Pub. L. 100-203, and those changes are incorporated in our discussion below. Section 1834(b) of the Act provides for the following:

- Section 1834(b)(1)(A) of the Act requires the Secretary to develop a relative value scale to serve as the basis for payment for radiologist services. Using this relative value scale and appropriate conversion factors, the Secretary is required under section 1834(b)(1)(B) of the Act to develop fee schedules (on either a regional, statewide, or carrier service area basis) for payment for radiologist services under Medicare Part B. The fee schedules are to be implemented for those services furnished during 1989.
- Section 1834(b)(2) of the Act requires the Secretary, in developing the relative value scale and fee schedules, to consult closely and regularly with the Physician Payment Review Commission, the American College of Radiology (ACR), and other organizations representing physicians and suppliers who furnish radiologist services. The Secretary is required to share with these organizations the data and data analysis being used to make the determinations in developing the relative value scale and fee schedules, including data on variations in current Medicare payments by geographic area and by service and physician specialty.
- Under section 1834(b)(3) of the Act, the Secretary must, in developing the relative value scale and fee schedules, consider variations in the cost of furnishing radiologist services among geographic areas and any different sites of service. The Secretary may also consider other factors concerning the manner in which physicians in different specialties furnish these services to ensure equitable payment amounts and to promote effective and efficient provision of radiologist services by physicians in different specialties.
- Section 1834(b)(4) of the Act requires that the Secretary develop preliminary fee schedules for 1989 that are budget neutral; that is, the preliminary fee schedules are designed to result in the same amount of aggregate payment (net of coinsurance and deductible amounts) for radiologist services in calendar year 1989 as would have been made absent the enactment of section 4049 of Pub. L. 100-203. However, the fee schedules that are established for actual payment purposes for radiologist services furnished in 1989 must be 97 percent of the amounts established in the preliminary fee schedules. The fee schedules that will be effective in years subsequent to 1989 will be equal to the previous year's fee schedule updated by the percentage increase in the Medicare Economic Index (MEI). In addition, each fee schedule is required to provide that the payment rate for nonparticipating physicians and suppliers is equal to the appropriate percent (as defined in section 1842(b)(6)(A)(iv) of the Act) of the payment rate recognized for participating physicians and suppliers.
- Section 1834(b)(5) of the Act requires that the actual charge made by a nonparticipating physician or supplier for a radiology service that is paid on the basis of a radiology fee schedule be limited as follows:
  - —In 1989, the charge must be no more than 125 percent of the applicable fee schedule amount for the service.
  - —In 1990, the charge must be no more than 120 percent of the applicable fee schedule amount for the service.
  - —In years subsequent to 1990, the charge must be no more than 115 percent of the applicable fee schedule amount for the service.

If a physician or supplier knowingly and willfully bills in excess of these amounts, the Secretary may impose sanctions against the physician or supplier in accordance with section 1842(j)(2) of the Act, with the sanctions set forth in that section applying to suppliers in the same manner as those sanctions apply to a physician. (A separate rulemaking document addressing these sanction and penalty provisions will be developed by the Office of Inspector General.)

- Section 1834(b)(6) of the Act defines radiologist services as radiology services performed by, or under the direction or supervision of, a physician who is certified or eligible to be certified by the American Board of Radiology, or for whom radiology services account for at least 50 percent of the total amount of charges made by the physician for Medicare Part B services.

### III. Consultation Requirements

In accordance with the provisions of section 1834(b)(2) of the Act, we have consulted with interested organizations in the preparation in this interim rule. As a part of this process, we shared data on draft conversion factors and a national relative value scale with the American College of Radiology (ACR), the Physician Payment Review Commission, the American Osteopathic Association, and other interested organizations. The ACR developed its own relative value scale, which it shared with us. As discussed below in more detail, we have decided to adopt the ACR's relative value scale for determining the radiology fee schedules.

### IV. System of Coding

To facilitate the reporting of items and services provided to Medicare beneficiaries and the processing of claims for those items and services, codes are used in lieu of narrative descriptions. For purposes of the radiology fee schedules, radiology services will be defined by codes contained in the HCFA Common Procedure Coding System (HCPCS). HCPCS was developed to satisfy the operational needs of the Medicare and Medicaid fee-for-service reimbursement programs and to ease communication between them by replacing various uncoordinated systems with a single national coding system. HCPCS is based upon the American Medical Association's (AMA) *Physicians' Current Procedure Terminology, Fourth Edition* (commonly referred to as CPT-4). In addition to CPT-4, HCPCS contains codes and modifiers developed by other professionals and insurers to meet their reporting needs as well as the codes developed by HCFA, State agencies, and Medicare contractors to meet the claims processing needs of the Medicare and Medicaid programs. While the coding system is designed to improve the ability of the physicians and suppliers to communicate the services they furnish, more importantly, the codes offer a degree of specificity and uniformity that permits a uniform application of HCFA coverage and payment policies.

HCPCS is designed with three levels of codes and modifiers. There is an upward progression of these codes from the lowest level (local assignment) to the highest level (national assignment) with HCFA and other third parties monitoring the entire system to ensure uniformity. The first level (national assignment) contains only the AMA's CPT-4 codes. These codes are all five-digit numeric. The AMA maintains responsibility for this level of codes. The second level contains the codes for physician and nonphysician services that are not included in CPT-4, (for example, ambulance, durable medical equipment, orthotics and prosthetics). These codes are alpha-numeric and are maintained jointly by HCFA, the Blue Cross and Blue Shield Association, and the Health Insurance Association of America. The third level (local assignment) contains the codes for services needed by the individual carrier or State agency to process Medicare and Medicaid claims. These codes are used for services that are not contained in either of the first two levels. The local codes are also alpha-numeric, but are restricted to the code ranges beginning with W, X, Y, and Z. These codes are used for items and services not having the frequency of use, geographic distribution, or general applicability to justify a code assignment at a higher level.

### V. Provisions of the Interim Rule

In order to implement the provisions of section 4049 of Pub. L. 100-203, we are adding new §§ 405.530 through 405.533 to the regulations to provide for the following:

#### *A. Effective Date*

Initially we have decided to implement this interim rule for services furnished on or after April 1, 1989, instead of the statutory effective date of January 1, 1989. This delay is necessary because of unexpected problems in calculating budget neutral conversion factors, which prevented publication of this rule before January 1, 1989. If the statutory effective date remains unchanged, we plan eventually to apply the fee schedule to services between January 1 and March 31, 1989. We will announce such a plan in the Federal Register.

#### *B. Applicability*

Effective with services furnished on or after April 1, 1989, Medicare Part B payment for radiologist services will be equal to 80 percent of the lesser of—

- The actual charge for the service; or
- The amount set under the applicable radiology fee schedule.

In accordance with section 1834(b)(6) of the Act, radiologist services are defined as radiology services performed by or furnished under the supervision of a physician who—

- Is certified by or eligible to be certified by the American Board of Radiology (ABR); or
- Bills at least 50 percent of his or her total amount of charges for Medicare Part B services for radiology services.

If a radiology service is performed by or under the supervision of a physician who does not meet either of these two requirements, the usual Medicare reasonable charge method of payment will apply. Thus, in order for the fee schedule to apply to a service, the service must meet both the following criteria: (1) The service must be a radiology service; and (2) the service must be provided by or supervised by an ABR-certified or ABR-eligible physician or by a physician with at least 50 percent radiology service charges.

#### *C. Definition of Radiology Services*

For purposes of the radiology fee schedules, the following services are defined as radiology services:

- Services represented by level 1 HCPCS "Radiology procedure codes

VOL 54 ISS 40 MR 2 1989 UMI

(that is, codes beginning with the number 7) from CPT–4.

• Services represented by level II HCPCS codes that begin with "R", including R0070—Transporting of portable X-ray equipment.

• Services represented by level III (local assignment) HCPCS radiology codes.

In defining radiology services, we considered prohibiting the use of any level III (local assignment) HCPCS codes by the carriers. In fact, carriers were advised in September, 1988 to convert any of their level III codes for radiology services to CPT–4 or level II alpha-numeric codes by January 1, 1989 so that the services requested by those codes would be subject to national relative values. However, many of the carriers objected to the total elimination of all local radiology codes and requested that we reconsider our decision. In support of their request, the carriers identified a number of local codes for which there are no appropriate CPT–4 or level II alpha-numeric codes.

We have accepted the carriers' recommendation and will include level III (local assignment) HCPCS codes in our definition of radiology services. These codes will be paid based on local relative values as described below in section V.E.1 of this preamble. We expect that the number of local codes will be small and that those carriers that were able to convert many of their local codes to CPT–4 or level II alpha-numeric codes, will leave those conversions in place. we have begun to review all of the remaining local codes in use by the carriers and hope to further reduce their use through the conversion to an existing code or the assignment of a national CPT–4 or alpha-numeric code where appropriate.

*D. Services Not Included in the Fee Schedule*

1. Visit and Consultation Services

We are not including the visit and consultation services defined by the codes in the Medicare section of CPT–4 on the radiology fee schedule. We considered including these services when they are performed by radiologists because, in those cases, the services would often be related to the performance of radiology procedures. However, if we were to consider visits and consultations to be "radiology services," it could result in many internists and family practitioners being included as "radiologists" because of the "at least 50 percent of charges" criterion. Although these visits and consultations would not usually be related to radiology, if we were to view visits and consultations to be radiology services, then these physicians and our payment to them for visits and consultations would be subject to the radiology fee schedule. We do not believe that this result was intended by Congress in enacting section 4049 of Pub. L. 100–203. In 1985, radiologists performed less than 1 percent of the total number of any single visit code and no more than five percent of any single consultation service.

Moreover, when ranked by allowed charges, only one visit or consultation service falls within the top 100 services furnished by radiologists. That service is comprehensive consultation (CPT–4 code 90620) and its 1985 allowed charges were $4.7 million. The top 100 services represent approximately 80 percent of the $1.6 billion in allowed charges for radiologists in 1985. Therefore, only a small percentage of dollars paid to radiologists are for visit and consultation services. For these reasons, we are providing that visit and consultation services performed by radiologists continue to be paid for on a reasonable charge basis.

2. Codes for Injection Procedures

We are not including the codes for injection procedures associated with interventional radiology procedures or diagnostic studies as radiology services on the radiology fee schedule. We do not consider "injection-only" codes to be radiology services since they generally describe services performed by physicians other than the radiologists performing the associated radiology service. Further, codes for these separate injection procedures are not listed in the "Radiology" section but rather in the "Surgery," section of CPT–4. The performance of a given diagnostic radiology study may be coded with either a single code from the Radiology section for the complete procedure or with two codes—one for "injection only" from the Surgery section and one for "supervision and interpretation only" from Radiology section. The CPT–4 definitions for "complete" and "supervision and interpretation only" services are as follows:

• Complete Procedures: If a single physician performs an international radiology procedure or diagnostic study involving injection of contract media and all usual preinjection and postinjection services are included, then the service is designated as a "complete procedure." A complete procedure includes injection of the necessary local anesthesia, placement of needle or catheter, injection of contrast media, supervision of the study, and interpretation of results.

• Supervision and Interpretation Only: If an interventional radiology procedure or diagnostic study is performed by a radiologist-clinician team, the study service is designated as "supervision and interpretation only" code. This supervision and interpretation only code is used only when a procedure is performed by more than one physician, for example, a radiologist-clinician team.

Numerous CPT–4 codes in the Surgery section describe only the injection of contrast media, or the introduction of a catheter. For example, the narrative for CPT–4 code 21116 is "injection procedure for temperomandibular joint arthrography." The narrative for CPT–4 code 36100 is "introduction of needle or intracatheter, carotid or vertebral artery." These codes generally describe the services of a surgeon assisting a radiologist in the performance of an arthrogram and artheriogram respectively. If the "complete" radiology service is billed, no payment for the injection-only procedure code is made, because payment for the complete procedure includes payment for the injection procedure.

Both the "supervision and interpretation only" and "complete" radiology services will be included on the radiology fee schedule. Thus, to the extent that injections are included in the complete procedure, they are encompassed in payment for the complete procedure under the fee schedule.

3. Procedures Requiring Radiologic Guidance

Some CPT–4 codes in the Radiology section represent the performance of surgical procedures under radiologic guidance; that is, they include both the radiologic guidance as well as the performance of the actual procedure. These radiology codes are generally listed as "complete procedure". Other radiologic guidance procedure codes involve only radiologic guidance, and the procedure for which the guidance is provided is coded and billed separately (usually by a surgeon). These radiology codes are generally listed as "supervision and interpretation only".

When a surgical procedure is performed under radiologic guidance by a radiologist-clinician team, the surgical procedure itself is not considered to be a radiology service and is therefore not included on the radiology fee schedule. Only the radiologic guidance itself (as described by the appropriate "supervision and interpretation" code is included on the fee schedule. However, if the surgical procedure is performed under radiologic guidance by a single physician, then it is coded as a "complete procedure" and is included on the fee schedule. For example, if fluid is removed by a surgeon from a patient's chest cavity through a needle inserted under ultrasonic guidance provided by a radiologist, the surgeon bills for his service under code 32000, "Thoracentesis, puncture of pleural cavity for aspiration" and the radiologist bills under code 76934, "Ultrasonic guidance for thoracentesis; supervision and interpretation only". Code 32000 will not be on the radiology fee schedule because it is considered to be a surgical procedure. Code 76934 will be on the radiology fee schedule because it is a radiology service. If, however, the radiologist performs the thoracentesis alone under radiologic guidance then he would bill under code 76935, "Ultrasonic guidance for thoracentesis; complete procedure." Code 76935 will also be on the radiology fee schedule because it too is a radiology service.

We note, however, that there are some procedures in CPT–4 that include radiology services that will not be included as radiology services on the fee schedule because they are frequently performed by nonradiologists and they are listed outside of the Radiology section of CPT–4 (for example, codes 43260 through 43272). We invite public comment on the appropriateness of excluding these codes from the fee schedule.

*E. Physicians and Suppliers Subject to the Fee Schedule*

We will apply the fee schedule when paying any claim for radiology services submitted by the following:

• Physicians who have identified themselves as radiologists to Medicare carriers.

• Physicians whose charges for radiology services are at least 50 percent of their total charges for Medicare Part B services.

• Hospitals billing for the services of hospital-based physicians.

• Multispecialty clinics listed under the HCFA Part B Medicare Annual Data System (BMAD) specialty 70.

• Portable x-ray suppliers listed under HCFA BMAD specialty 63.

• Any other supplier or nonphysician entity.

A physician has identified himself or herself as a radiologist if the carrier reports that physician's charges in the BMAD system under specialty 30 (radiology), specialty 31 (roentgenology, radiology—osteopaths only), specialty 32 (radiation therapy—osteopaths only), or specialty 36 (nuclear medicine).

Carriers will be required to review the bills submitted by all physicians in their areas for the 1989 charge year (that is, July 1, 1987 through June 31, 1988) in order to determine which of them meet the "at least 50 percent of charges" criterion.

A physician or other entity may rebut the application of the fee schedule. For example, a physician may demonstrate that although he or she is a radiologist on the carrier's file, he or she is not ABR-certified or ABR-eligible. Similarly, a clinic or portable x-ray supplier billing for a technical component radiology service may demonstrate that the physician who furnished or supervised the service was not ABR-certified, ABR-eligible, or did not meet the at least 50 percent of charges criterion. (In order to be covered by Medicare, such technical component services must be furnished under the supervision of a physician (section 2070 of the Medicare Carriers Manual (HCFA Pub. 14)).)

A BMAD specialty 70 clinic or a hospital may demonstrate that a physician other than an ABR-certified, ABR-eligible, or at least 50 percent radiology-billing physician furnished or supervised a radiology service for which the clinic or hospital is billing and thereby exempt the claim from the fee schedule.

Carriers will be required to review the status of physicians for the purpose of determining whether they are subject to the radiology fee schedule only at the time of the annual fee screen update. (Update screens are prepared in the fall of each year and are effective on the following January 1.) At that time, carriers will determine which physicians continue to identify themselves as radiologists or specialty 70 clinics and which physicians continue to meet the at least 50 percent of charges criterion.

Carriers will make their determinations based on the most recent charge year data. The carrier will then decide whether the physician will be paid under the fee schedule for the upcoming calendar year. Carriers will make this determination for any entity that receives payment for services under Medicare Part B at the time of the update. Both in the initial year and in subsequent years, physicians and suppliers whose bills are to be subject to the fee schedule will be permitted to rebut the carrier's assumption that the radiology services being billed were furnished directly or under the supervision of an ABR-certified or ABR-eligible physician or a physician that meets the at least 50 percent of charges criterion.

A new physician who identifies himself or herself to the carrier as a radiologist and who begins practice after an annual fee screen update and, thus, after the latest radiology status review, will, from the outset, be paid under the fee schedule. The status of these physicians will be reviewed with the status of other physicians at the time of the next fee screen update. A new physician who does not identify himself or herself as a radiologist will be paid on a reasonable charge basis and the physician's status will be subject to review at the time of the next annual fee screen update.

As is true for other physicians, a new physician may rebut the carrier's determination that the physician's billings are subject to the fee schedule. For example, a new physician filing as a radiologist may indicate to the carrier that he or she furnishes the radiology services for which he or she bills but that he or she is not certified or eligible to be certified by the ABR.

Any physician not subject to the fee schedule because of not being identified as a "radiologist" or not meeting the at least 50 percent of charges criterion may nevertheless demonstrate to the carrier that he or she should be subject to the fee schedule. For example, such a physician may be an ABR-certified physician who is not listed as a radiologist with the carrier.

*F. Development of the Fee Schedules for Radiologist Services*

As required by section 1834(b)(1) of the Act, the fee schedule for radiologist services will be based on a relative value scale and appropriate conversion factors.

1. Development of a Relative Value Scale

Section 1834(b)(1)(A) of the Act requires that, as a first step in developing radiology fee schedules, we develop a relative value scale for radiologist services. In accordance with Congressional intent, we are providing a national relative value scale that will be uniform across the country. (See H.R. Rep. No. 391, 100th Cong., 1st Sess. 397 (1987).)

We had developed, based on 1986 BMAD data, a charge-based national relative value scale. It established relative values for professional services by computing the national average submitted charge for each service and weighting the services in relation to each other, based on those national average charges. Consistent with our regulations (§ 405.555(c)(2)), our charge-based relative value scale valued the professional service at 40 percent of the global service. This was accomplished

VOL 54 ISS 40 MR 2 1989 UMI

by making the global value 2.5 times the professional value.

However, the national relative value scale that we have adopted, and that is published as Appendix A of this interim rule, was developed by the ACR. It is based on extensive data, including the following:

- A national charge survey sent to more than 3,000 radiology practices.
- A "magnitude estimation" survey sent to more than 2,000 radiologists. (Magnitude estimation is a technique for providing comparisons about a subjective dimension, such as the level of technical skill needed to perform a procedure.)
- A survey of technical component costs.
- Meetings of consensus panels that used the survey results and judgments of the survey results in arriving at the values proposed by ACR.

According to ACR, its panels were composed of members from academic and nonacademic settings, geographic areas throughout the country, all radiology specialty organizations, and all subspecialties of radiology, as well as representatives from the College of Nuclear Physicians, the Society of Nuclear Medicine, and the American Osteopathic College of Radiology.

We believe it is appropriate to adopt the ACR relative value scale, rather than the charge-based scale that we developed. As noted above, the ACR methodology appeared to be thorough and inclusive of a wide range of interests and views and represents a refinement to the charge-based relative value scale. Appendix C of this interim rule compares the separate sets of values for certain high-volume procedures.

We have accepted ACR's relative values for all services except angiography and interventional radiology. ACR's recommendations for global values for most angiography and interventional radiology codes exceeds ACR's charge-based values for these two types of codes by more than two to one. For all other categories of services, this is not the case. Because of this apparent discrepancy, and because of the low volume of office-based or global angiography, we are not adopting ACR's global relative values for any angiography and interventional radiology. Instead, these services will be paid for under locally-established global relative values. The angiography and interventional codes to be paid based on local global relative values are listed in Appendix B to this interim rule.

Additional services, such as the level II "RHCPCS" codes, level III local codes and services described by any new CTP–4 codes will also be paid based on local relative values. This is because there are no current national relative values for those services. (See Appendix B.) Carriers will establish local values based on advice from their medical directors and the relationships between charges and allowances for various services. We will review the local relative values established by carriers to ensure that those values are reasonable.

We are aware that another recently released study establishes resources based values for certain radiology services. The study by William C. Hsiao, Ph.D., et al., "A National Study of Resource-Based Relative Value Scales for Physician Services", *The New England Journal of Medicine*, 319 (1988), 835, was conducted by the Harvard School of Public Health and its subcontractor, the American Medical Association, and funded by HCFA. We intend to review that analysis or other available data that are brought to our attention and, if appropriate, may propose revisions to the radiology relative value scale. Such revisions may be made effective at times other than the three-year update intervals discussed below.

Currently, in some carrier areas, three aspects of radiology services have been or can be billed. The physician can bill for the "professional only" aspects of a service, such as reading an X-ray. This is a professional component billing. An entity can also bill for only the technical component of a radiology service, such as the taking of an X-ray. Finally, there can also be a bill for the complete or global service (that is, both the professional and the technical components). Therefore, a radiology service may technically be three services. Only a small amount of technical component billing is actually done under the reasonable charge methodology. Most radiology service billings are on a global or professional only basis.

The relative value scale in Appendix A has a global, professional, and technical component breakdown for each radiology service listed. The base procedure on that relative value scale is the professional component of code 71010, single view chest x-ray; that service has been given a value of one (1.00).

Some CPT–4 radiology codes have payment-related modifiers representing something other than global, professional, or technical services. For example, some may have a modifier of "22", which means that the procedure involved unusual circumstances. Others may have a modifier of "52", which means reduced services. In carrier areas where prevailing charge screens have not been established for claims with payment-related modifiers other than blank (global service), "26" (professional service), or "TC" (technical service) and those claims are instead paid on a case-by-case or individual consideration basis, this practice will be continued during 1989. If a carrier currently establishes screens for radiology codes with other than blank, "26" or "TC" modifiers, the carrier will establish a local relative value for the service, as modified. (See Appendix B.) Effective for services furnished on or after January 1, 1990, no payment-related unusual modifiers will be recognized for fee schedule payment purposes. We are recognizing them for one year to give carriers sufficient time to phase out their use. We do not believe that these modifiers should continue to be recognized since the values established in the fee schedule are intended to represent the correct value for the HCPCS identified code, regardless of whether or not unusual circumstances were associated with furnishing the services.

Also, in the relative value scales, values are established for only weekly management radiation therapy codes. No values are established for daily management. This is because, effective April 1, 1989, payment will be made on only a weekly management basis. Weekly management services will include most covered services furnished by radiation therapists or in conjunction with radiation therapy. Daily management services will no longer be recognized for a Medicare payment because of the difficulty of obtaining documentation showing that daily physician services were provided to a patient. Weekly management, on the other hand, can be payable even if a covered physician service is not furnished at the time of each individual treatment. By paying a "global" weekly treatment fee, fragmentation of services, which occurs with daily fees, will be reduced.

2. Development of Conversion Factors

As required by section 1834(b)(1)(B) of the Act, we must develop appropriate conversion factors to be used in determining the fee schedules for radiologist services. The conversion factor is the dollar value used as a multiplier with the service's relative value in order to determine the fee schedule amount for the radiology service.

The requirement under section 1834(b)(4) of the Act that the fee schedules developed for 1989 be budget neutral was a significant consideration in our development of appropriate conversion factors. Budget neutral means that the application of the fee schedule is to result in outlays for radiologist services that are no greater nor any less than would have occurred in 1989 had the fee schedules not been implemented.

Another issue that we considered was the geographic basis for which conversion factors should be computed, that is, at the locality, the carrier area, or the national level. The computation of one conversion factor for the entire nation would have the effect of creating one fee schedule applicable nationwide. We decided against this approach in favor of locality conversion factors, because of the provision in section 1834(b)(3)(A) of the Act that we take geographic cost variations into consideration when developing the fee schedules.

Locality-specific conversion factors will result in each locality's keeping the same amount of aggregate payment for radiology services furnished by radiology providers as would have resulted if these services continued to be paid under the usual reasonable charge methodology. Therefore, to the extent that geographic variations in our Medicare allowed charges reflect geographic cost variations, those cost variations have been considered in the calculation of the conversion factor. The result will be a fee schedule for each locality in the carrier's service area.

We are planning, however, to have carriers compute a carrierwide conversion factor to be available for fee schedule pricing in localities where no current locality conversion factor can be computed. This could occur in localities where there are currently no portable x-ray suppliers or no radiologists. (See subsequent discussion regarding separate conversion factors for these two groups). A carrierwide factor would be available to be applied in such localities if a physician or supplier covered by the fee schedule were to move into the area.

The conversion factors (CF) will be computed by dividing the estimated total Medicare charges that would have been allowed in 1989 under the reasonable charge methodology for physicians and suppliers subject to the fee schedule by the sum of each radiology service's relative value (RV) times the frequency (Freq) that the service (Proc) was performed by the individuals in the year ending June 30, 1988. The estimated total Medicare charges are determined by multiplying the lowest of the 1989 reasonable charge screen (RCS) that would have gone into effect absent the fee schedule under the provisions of § 405.502 and § 405.555(c)(2) for each physician or supplier (MD), by the frequency (Freq) with which the service (Proc) was performed in the year ending June 30, 1988. The quotient is then multiplied by .97 to yield the three percent savings required by law.

Thus,

$$CF = 0.97\left[\frac{(\text{Freq MD}_1\text{Proc}_1)(\text{RCS})+\ldots+(\text{Freq MD}_1\text{Proc}_n)(\text{RCS})+(\text{Freq MD}_2\text{Proc}_1)(\text{RCS})+\ldots+(\text{Freq MD}_n\text{Proc}_n)(\text{RCS})}{(\text{Freq Proc}_1)(\text{RV Proc}_1)+(\text{Freq Proc}_2)(\text{RV Proc}_2)+\ldots+(\text{Freq Proc}_n)(\text{RV Proc}_n)}\right]$$

The conversion factors will be computed by each carrier and will be subject to HCFA regional office approval.

Thus, as required by the statute, we have set the fee schedule payment amounts at 97 percent of the amounts, in the aggregate, that would have been paid in the absence of the fee schedule. To the extent the implementation of the fee schedule results in behavioral changes in the provision of radiology services, the fee schedule may not result in a three percent reduction in aggregate Medicare payments. We intend to monitor the aggregate amounts being paid under the fee schedule to determine how closely they approximate 97 percent of the amounts that would have been payable on a reasonable charge basis.

One aspect that we will specifically evaluate will be the relationship of actual charges to the fee schedule amount, compared with the relationship of actual charges to the reasonable charge screens used prior to the fee schedule. Generally, under the reasonable charge system, Medicare payment is based on the lower of the actual charge or the applicable reasonable charge screen. In establishing the conversion factor, we used the applicable reasonable charge screen; however, we did not factor into the conversion factor computation the effect of actual charges lower than the reasonable charge screen. Our reasons for not doing this are that—

- Situations in which physicians charge less than the reasonable charge screen are relatively rare and insignificant when they do occur; and
- The degree to which radiologists occasionally charged less than the reasonable charge screen in the past will likely be the same under the fee schedule.

Thus, our assumption is that the resultant conversion factors under the fee schedule are budget neutral (minus three percent) compared to what would have been paid under the reasonable charge system. During 1989 we intend to closely review both our experience under the fee schedule and historic charging practices of radiologists, to evaluate the validity of our assumptions. If they prove to be incorrect, we will propose an appropriate downward adjustment in the conversion of factor at the time of a subsequent update.

Section 1834(b)(3)(B) provides that we may consider specialty differentials in developing the relative value scale and fee schedules. We have decided that carriers should establish conversion factors for portable x-ray suppliers separate from those applicable to all other entities. Although portable x-ray suppliers are paid under the same codes as others, the technical component x-ray services that they furnish are generally different from the x-ray services furnished by others. Portable x-ray services tend to involve special equipment requiring extra time for assembling and dismantling. Also, the patients are often elderly nursing home or homebound patients requiring extra time and care for the set-up of the x-ray. Therefore, to the extent that the experience of nonportable x-ray suppliers has influenced the relative value amounts of the "common" codes, portable x-ray suppliers could be disadvantaged. A separate conversion factor accommodates for this and the ultimate payment outcome amounts to a separate relative value scale for portable x-ray suppliers. Other categories of radiology supplier, on the other hand, do not often share their high-volume codes with other types of suppliers. For example, radiation therapy codes are generally billed by only radiation oncologists. Therefore, generally, no other category of supplier has influenced the relative values established for these codes. As a consequence, no separate relative value scale or conversion factor is needed to limit the influence of one type of supplier on the most pertinent relative values of another.

VOL 54 ISS 40 MR 2 1989 UMI

3. Code Collapsing

There are over 700 codes that we are considering to represent radiology services. We receive very few bills for many of those codes. Although we are not deleting or revising any of the radiology codes as a part of this interim rule, we are soliciting suggestions for radiology code deletions or revisions. Any comments we receive concerning the revision or deletion of radiology codes will be considered as a part of any future changes HCFA may recommend as a part of the CPT–4 procedure code update process.

*F. Method of Payment Under the Radiology Fee Schedules*

As discussed above in section IV.A. of this preamble, section 1833(a)(1)(J) of the Act requires that Medicare's payment for radiologist services is 80 percent of the lesser of the actual charge or the radiology fee schedule amount. However, section 1834(b)(4)(D) of the Act requires that the same payment distinctions between participating and nonparticipating physicians that apply to prevailing charges as set forth in section 1842(b)(4)(A)(iv) of the Act also apply to radiology fee schedule payments. Section 4042(c) of Pub. L. 100–203, as amended by 411(f)(2) of Pub. L. 100–360, amended section 1842(b)(4)(A)(iv) of the Act to provide that the prevailing charge level for nonparticipating physicians is 95 percent of the level for participating physicians. Therefore, nonparticipating physicians' and suppliers' fee schedule amounts are equal to 95 percent of the fee schedule amount applicable to participating physicians and suppliers.

In addition, sections 1834(b)(5)(A) and (B) of the Act place a limit on the amount a nonparticipating physician or supplier can charge a Medicare beneficiary for a service for which payment is made under a radiology fee schedule. In 1989 (that is, April 1, 1989 through December 31, 1989), the nonparticipating physician or supplier can charge no more than 125 percent of the fee schedule amount applicable to the service. In 1990, the limit on charges is 120 percent of the fee schedule amount and after 1990, the limit on charges is 115 percent of the fee schedule amount. (Since a nonparticipating physician's or supplier's fee schedule amount is 95 percent of a participating physician's or supplier's fee schedule amount, the limit on the charge made to the beneficiary in 1989 on or after April 1, 1989, for example, is 125 percent of the 95 percent.) When the charge limit specified by section 1834(b)(5)(A) and (B) applies, the maximum allowable actual charges (MAACs), established under section 1842(j)(1)(B) of the Act, do not apply.

Under section 1834(b)(5)(C) of the Act, if a physician or supplier knowingly or willfully imposes a charge in violation of the limit on charges, the Secretary may apply sanctions against the physician or supplier (that is, excluding the physician or the supplier from the program or imposing civil money penalties, or both). These regulations do not include details regarding the sanctions process. Regulations now being developed by the Department's Office of Inspector General will include details on this provision.

*G. Updating the Relative Value Scale and Conversion Factors*

As required in section 1834(b)(4)(C) of the Act, fee schedule values will be updated annually by the percentage increase in the MEI.

We will also revise the radiology fee schedules at least every three years, primarily for the purpose of adding new services or new procedure codes. Until these revisions are made, carriers will pay for any new services or new codes under a local fee schedule (that is, on the basis of a local relative value scale and the locality's conversion factor). (See Appendix B.) New services will be added to the national relative value scale fee schedules after we have had the opportunity to consult with the American College of Radiology and other interested organizations regarding appropriate values for the new services.

At the time of the revisions, new national relative values and conversion factors will be established.

If, after a fee schedule is effective, there is deletion of a CPT–4 code with a cross-referral to a different current code, we will implement that change in the fee schedules when HCPCS changes in the reasonable charge system are being made. This will not involve the establishment of new fee schedule values.

When there is merely a deletion of a code from HCPCS and no cross-referral to another code, there is no need to develop a new fee schedule value. Implementation of the deletion will occur when HCPCS changes are made in the reasonable charge system.

If there is a fragmentation of a current code and the new codes are not components of the old (for example, procedure code X represents a procedure done on either the right or the left side and that code is fragmented into two—one for the procedure on the left side and the other for the procedure on the right side), each of the one or more new codes will receive the fee schedule value of the predecessor code. Again, there will be no new fee schedule values involved and we will implement the change when the HCPCS changes are made in the reasonable charge system. If the new codes were components of the old, the relative value of the old code will be divided evenly among the new codes unless we instruct otherwise.

If two or more "component" codes are collapsed, into a single new code, the fee schedule values for the resulting codes will be the sum of the values of the component services. The change will be implemented when HCPCS changes are made in reasonable charge.

When language revisions are made in the description of a given code, we will make any appropriate changes in the code's relative value at HCPCS conversion time.

*H. Continuation of Reasonable Charge Screens*

Since the radiology services furnished by physicians and suppliers who are not subject to the fee schedule continue to be paid under the general reasonable charge rules, we will continue to compute reasonable charge screens for radiology services.

Customary charges for radiology services will continue to be computed for all physicians and suppliers, including physicians and suppliers who are subject to the fee schedule. Physicians and suppliers not subject to the fee schedule must continue to have customary charges computed for them because they will continue to receive payment for radiology services on a reasonable charge basis. Fee schedule physicians and suppliers also must continue to have customary charges computed for their radiology services because, as is discussed below, those customary charges will be used to compute prevailing charges.

Carriers will have to continue to compute area prevailing charges for radiology services.

In carrier areas where radiologists' charges are merged with those of other physicians to compute prevailing charges (that is, where there is no unique radiology prevailing charge), prevailing charges must be computed—to be applicable to any physician not subject to the fee schedule—and those prevailing charges must be based on the customary charges of both physicians subject to the fee schedule and those who are not.

In computing prevailing charges for radiology services, we will include in the array the customary charges of physicians and suppliers who are subject to the fee schedule. This is because the concept of a prevailing charge (that is, not the MEI-adjusted prevailing charge) is that it is a measure of how physicians in the area have been charging, not a measure of how they have been or will be paid. It is therefore irrelevant how Medicare pays physicians (on a reasonable charge or a fee schedule basis) when determining whether their charges, if available in our data system, should be used in computing customary and prevailing charges. All actual charges, regardless of our method of payment to the physicians, will be used. This is consistent with our regulations at § 405.504, which discuss how prevailing charges are to be determined. That section does not indicate that only customary charges of physicians under the reasonable charge system are to be used.

**VI. Regulatory Impact Statement and Flexibility Analysis**

*A. Executive Order 12291*

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any interim rule that meets one of the E.O. criteria for a "major rule"; that is, that will be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

According to data from HCFA's BMAD system, allowed charges for radiology procedures performed by radiologists in calendar year 1986 were approximately $2.6 billion. Section 1834(b)(4) of the Act requires that the Secretary develop preliminary fee schedules for 1989 that are budget neutral. However, the fee schedules that are established for actual payment purposes for radiologist services furnished in 1989 must be 97 percent of the amounts established in the preliminary fee schedules.

We anticipate that this interim rule will result in the following savings:

TABLE 1.—PROJECTED MEDICARE SAVINGS AS A RESULT OF FEE SCHEDULES FOR RADIOLOGIST SERVICES [1]

| FY 1989 | FY 1990 | FY 1991 | FY 1992 | FY 1993 | FY 1994 |
|---|---|---|---|---|---|
| $15 | $35 | $40 | $50 | $55 | $60 |

[1] Rounded to the nearest $5 million.

Although we have reduced the fee schedule amounts by three percent, our estimates do not reflect a three-percent savings. This is due to the effects of rounding to the nearest five million dollars, anticipated changes in the behavior patterns of physicians, savings not being realized in the year in which the service is furnished due to a time lag in billing, and the regulation's implementation date of April 1, 1989 (which means that only six months of savings are realized).

In addition, we anticipate that physicians, in response to this fee schedule, may change their behavioral patterns. These changes may include increased utilization or increased intensity of services, in order for them to maintain current levels of Medicare reimbursement.

This interim rule does not meet the $100 million criterion nor do we believe that it meets the other E.O. 12291 criteria. Therefore, this interim rule is not a major rule under E.O. 12291, and an interim regulatory impact analysis is not required.

*B. Regulatory Flexibility Act*

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that an interim rule will not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, all physicians are treated as small entities.

This interim rule implements sections 1833(a)(1)(J) and 1834(b) of the Act as amended by section 4049 of Pub. L. 100–203 and section 411(f)(8) of Pub. L. 100–360. We are preparing a regulatory flexibility analysis for this interim rule because of the large number of physicians who will be affected and the significance and potential controversy of these provisions.

Section 1102(b) of the Social Security Act requires the Secretary to prepare a regulatory impact analysis if an interim rule may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital with fewer than 50 beds located outside of a Metropolitan Statistical Area.

We are not preparing a rural hospital impact statement since we have determined, and the Secretary certifies, that this interim rule will not have a significant economic impact on the operations of a substantial number of small rural hospitals.

1. Impact on Physicians

It is clear that the fee schedule established by this regulation will affect a substantial number of physicians. These physicians can be divided into three categories. Those who are American Board of Radiology (ABR)-certified, ABR-eligible, or physicians for whom at least 50 percent of their total Medicare Part B charges are for radiology services. As of December 31, 1986, there were 6,345 radiologists practicing in the United States with 6,365 being certified by their corresponding board (Physician Characteristics and Distribution in the U.S., 1986. Department of Data Release Services, Division of Survey and Data Resources, American Medical Association, 1987). We expect that most of these physicians will be subject to the fee schedules.

In order for the fee schedule to apply to a radiology service, the service has to meet the following criteria: (1) The service must be a radiology service; and (2) the service must be performed by or under the supervision of an ABR-certified or ABR-eligible physician or by a physician with at least 50 percent radiology service charges. Radiologists as a group had a Medicare participation rate of 40 percent in 1987 and a Medicare assignment rate of 73 percent in 1988.

As added, section 1834(b)(4)(A) of the Act provides that the Secretary will develop preliminary fee schedules for 1989, that are designed to result in the same amount of aggregate payments (less any coinsurance and deductibles under sections 1833(a)(1)(J) and 1833(b) of the Act) for radiologist services furnished in 1989 as would have been made if this section had not been enacted. Section 1834(b)(4)(B) of the Act requires that the fee schedules established under this paragraph for radiologist services furnished in 1989 be 97 percent of the amounts permitted under the preliminary fee schedules developed under 1834(b)(4)(A) of the Act. Consequently, the overall impact of the fee schedules on the radiology industry as a whole in 1989 will be an average three-percent reduction in Medicare fee levels. For those years after 1989, fee schedule values will be

VOL 54 ISS 40 MR 2 1989 UMI

updated annually by the Medicare Economic Index. At least every three years, new services will be added as appropriate and the fee schedule system will be rebased using a new relative value scale and new conversion factors.

a. *Participating Physicians.* The three percent reduction in the fee schedule amounts will not necessarily result in a three percent reduction in Medicare payments to an individual physician. First, there may be redistributions involved in the shift from the reasonable charge payment methodology to the fee schedule. Payment for an individual service and for the particular mix of services furnished by a physician may be more or less than 97 percent of the amount the physician currently receives on a reasonable charge basis for the same services. Second, there may be behavioral changes, for example, changes in the volume or mix of services a physician provides, in response to the different amounts received under the fee schedule that would affect the total payments received from Medicare. Finally, payments for any nonradiologic services furnished by the physician are unaffected by the fee schedule.

b. *Nonparticipating Physicians.* Nonparticipating physicians will also be affected by this interim rule to the extent that their covered services will be subject to the fee schedule. Section 1834(b)(5)(B) of the Act places an upper limit on the amount that a nonparticipating physician or supplier can charge beneficiaries. In 1989, the first year of implementation, the maximum allowable actual charge will be 125 percent of the fee schedule amount. In the second year, it will be 120 percent of the fee schedule amount, and, in the third and subsequent years, it will be 115 percent of the fee schedule amount. A nonparticipating physician's fee schedule amount will be 95 percent of a participating physician's fee schedule amount. Therefore, in 1989, for example, the nonparticipating physician's upper charge limit will be 125 percent of 95 percent of the amount allowed for participating physicians.

2. Impact on Portable X-ray Suppliers

Portable X-ray suppliers bill using specialty code 63 under the HCFA BMAD system. As of April 1988, there were approximately 440 portable X-ray suppliers in the United States. These suppliers account for slightly less than two percent of all total allowed charges for radiology services.

We are using a separate conversion factor for portable X-ray suppliers because if we were to use a combined conversions factor (that is, one that includes both portable X-ray suppliers and physicians furnishing radiology services) payments would be redistributed between portable X-ray suppliers and other physicians furnishing radiology services.

We believe that the impact on these suppliers will be similar to the one experienced by physicians. Our rationale is the same as the one advanced above for participating physicians.

3. Impact on Beneficiaries

We believe that this interim rule will have a negligible effect upon beneficiaries out-of-pocket expenses. Our main concern is the effect on Medicare beneficiaries out-of-pocket expenes on nonassigned claims. Congress has addressed this concern by placing an upper limit on the amount which a nonparticipating physician could charge beneficiaries. In 1989, the upper limit will be 125 percent of the fee schedule, in 1990 it will be 120 percent of the fee schedule, and in 1991 and subsequent years it will be 115 percent of the fee schedule.

*C. Alternatives Considered*

Our consideration of alternatives is limited because of the provisions set forth in section 4049 of Pub. L. 100-203. However, within this overall constraint, we have latitude in establishing the relative value scale, and the conversion factors. In section V of this preamble, we discuss the methodologies that we considered for each of these policy issues and our rationale for choosing a particular methodology.

*D. Conclusion*

Medicare payment for radiologist services will vary among individual participating and nonparticipating physicians to the extent that there are differences in the particular mix of covered radiology services they furnish to Medicare patients and in the amount physicians charge for covered services prior to the implementation of this fee schedule.

Similarly, Medicare payment for radiologist services provided by portable X-ray suppliers will vary among individual suppliers depending on how much of their business is Medicare derived, and the amounts they charge for their services.

## VII. Other Required Information

*A. Interim Rule With Comment Period*

Section 4049(b)(2) of Pub. L.100-203 established January 1, 1989, as the effective date for the implementation of the radiology fee schedule. However, for the reasons discussed below, we have been unable to meet that deadline. In order to achieve the objectives of section 4049 within a timeframe as close as possible to the Congressionally-prescribed effective date, we have determined that it is necessary to publish this regulation as an interim rule pursuant to the authority granted in section 4039(g) of Pub. L. 100-203. This regulation will be implemented April 1, 1989.

The development of a new relative value scale and fee schedule for radiologist services that meets the standards prescribed by Congress has proved to be an exceedingly complex task. Congress directed that the fee schedule be based on a variety of factors respecting the manner in which physicians furnish radiology services and that the fee schedule be equitable and promote efficient and effective provision of those services. Congress also directed that, in developing the schedule, we consult closely with the Physician Payment Review commission, the American College of Radiology, and other affected organizations. We have acted as expeditiously as possible to gather data, to meet with affected parties, to solicit their input on the design of the relative value scale and to discuss with them the numerous options that have come under consideration. We have also sought to expedite the process through shortened timeframes. Despite these efforts, publication by the January 1, 1989 effective date has eluded us.

We had expected to publish an interim rule before January 1, 1989. However, shortly before publication, we discovered several methodological problems with the computation of the conversion factors necessary for translating the relative values of the relative value scale into the payment amounts found on the fee schedule. These methodological errors had the effect of lowering the payment for all services. After consulting with American College of Radiology and other interested groups we determined that it was necessary to delay implementation of the fees schedule until April 1, 1989 in order to correct those methodological errors.

Section 4039(g) of Pub. L. 100-203 provides that, if necessary, we may issue regulations to implement certain provisions of that law, including the radiology fee schedule and other Medicare reforms, on an interim basis. Congress, in Pub. L. 100-203, charged the agency with developing and implementing several significant and complex payment reforms. Congress recognized, however, that the agency may not be able to both develop the regulations necessary to implement these reforms and engage in the time-consuming and resource-consuming process entailed by the notice and comment procedure before the affective dates which it prescribed. At the same time, Congress recognized that interested parties should be given an opportunity to comment on implementing regulations. Therefore, it authorized the Secretary to provide a comment period after implementation of the regulation and, in the case of the radiology fee schedule, specified that there be close consultation between the agency and affected groups. For reasons explained below, we believe that this procedure is a particularly appropriate means of accommodating the interests and needs of all parties—the agency, the affected groups, and the public at large—in this case.

Publication of an interim rule is necessary in order for us to realize the objectives that Congress intended the radiology fee schedule to achieve. Congress intended the radiology fee schedule to provide for an equitable method of radiology payment under which payment for those radiology procedures determined to be overvalued would be reduced and payment for hitherto undervalued procedures would be increased. The fee schedule was also intended to achieve a three percent budgetary savings. Congress, moreover, believed that the public interest would be served best if this new payment policy were put in place on January 1, 1989. The methodological errors in the conversion factors would have resulted in the underpayment of all procedures, thereby frustrating the goal of equitable payment among radiologists. Therefore, in order to achieve this goal, we felt it necessary to delay implementation of the fee schedule until the errors were corrected. Now that the errors have been corrected, however, we feel it necessary to proceed as promptly as possible.

Were we to go through the traditional notice and comment process, we would have to leave the current radiology payment policy in place for an extended period of time subsequent to the date Congress intended the new payment policy to go into effect. This would make realization of the three percent savings more difficult. It would also be contrary to Congress's admonition that we put the fee schedule in place by January 1, 1989. We believe that our delay to correct the erroneous methodology coupled with publication of this regulation in interim form is necessary to preserve the objectives of equitable payment, cost-savings, fee schedule integrity, and timely implementation to the maximum extent possible.

In addition, the process we have employed in the development of this rule and the process we will employ in the interim between publication of this interim rule and publication of a final rule are more than adequate to ensure that all interested parties have an opportunity to voice their ideas and concerns and have them considered by the agency. As already noted, we have consulted closely and extensively with the American College of Radiology and a variety of other groups through each step of the regulation development process. Nevertheless, we are interested in comments and advice regarding changes that should be made to this interim rule. Therefore, we are providing a 60-day comment period for public comments.

Because of the large number of items of correspondence we normally receive concerning regulations, we cannot acknowledge or respond to the comments individually. However, in preparing the final rule, we will consider all comments that we receive by the date and time specified in the "Dates" section of this preamble, and we will respond to the comments in the preamble of that rule.

*B. Paperwork Reduction Act*

This interim rule does not impose information collection requirements. Consequently, it need not be reviewed by the Executive Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501-3511).

**List of Subjects in 42 CFR Part 405**

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Nursing homes, Reporting and recordkeeping requirements, Rural areas, X-rays.

We are amending 42 CFR Part 405, Subpart E as set forth below:

**CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Subchapter B—Medicare Program**

**PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED**

1. The authority citation for Part 405, Subpart E is revised to read as follows:

Authority: Secs. 1102, 1814(b), 1832, 1833(a), 1834(b), 1842 (b) and (h), 1861 (b) and (v), 1862(a)(14), 1866(a), 1871, 1881, 1886, 1887, and 1889 of the Social Security Act as amended (42 U.S.C. 1302, 1395f(b), 1395k, 1395l(a), 1395m(b), 1395u (b) and (h), 1395x (b) and (v), 1395y(a)(14), 1395cc(a), 1395hh, 1395rr, 1395ww, 1395xx, and 1395zz).

2. The table of contents for Part 405 Subpart E is amended by revising the title of the subpart, adding the titles for new §§ 405.530 through 405.533, and revising the titles for §§ 405.551 and 405.555, to read as follows:

**Subpart E—Criteria for Determination of Reasonable Charges; Radiology Fee Schedules; and Reimbursement for Services of Hospital Interns, Residents, and Supervising Physicians**

* * * * *

Sec.

405.530 Payment of radiologist services under a fee schedule.

405.531 Basic methodology for calculating radiology fee schedules for calendar year 1989.

405.532 Calculating radiology fee schedules for calendar years after 1989.

405.533 Special rules for nonparticipating physicians furnishing radiology services.

* * * * *

405.551 Payment of charges for physician services in providers: General provisions.

* * * * *

405.555 Payment of charges for radiology services.

* * * * *

3. Section 405.501 is amended by revising paragraph (a), redesignating paragraph (c) as paragraph (d), and adding a new paragraph (c) to read as follows:

**§ 405.501 Determination of reasonable charges.**

(a) Except as specified in paragraphs (b) and (c) of this section, Medicare pays no more for Part B medical and other health services than the "reasonable charge" for such service. The reasonable charge is determined by the carriers (subject to any deductible and co-insurance amounts as specified in §§ 410.152 and 410.160 of this chapter.)

* * * * *

(c) For services furnished on or after April 1, 1989, payment under Medicare Part B for radiologist services is governed by radiology fee schedules that are determined in accordance with the provisions of §§ 405.530 through 405.533.

* * * * *

4. New §§ 405.530 through 405.533 are added to read as follows:

**§ 405.530 Payment of radiologist services under a fee schedule.**

(a) *Purpose.* This section and §§ 405.531 through 405.533 implement sections 1833(a)(1)(J) and 1834(b) of the Act by establishing fee schedules for radiologist services.

VOL 54 ISS 40 MR 2 1989 UMI

(b) *Method of payment.* For services furnished on or after April 1, 1989, the amount paid under Medicare Part B for radiologist services is 80 percent of the lesser of—

(1) The actual charge; or

(2) The amount provided under the radiology fee schedules.

(c) *Definitions.* For purposes of this subpart, the following definitions apply:

*"Radiology services"* means services represented by—

(1) Level I HCFA Common Procedure Coding System (HCPCS) radiology procedure codes (that is, all codes beginning with the number 7) from the Physicians' Current Procedural Terminology, Fourth Edition (commonly referred to as CPT–4);

(2) Level II HCPCS alpha-numeric "R" codes, including R0070—Transporting of portable x-ray equipment; and

(3) Level III (local assignment) HCPCS radiology codes.

*"Radiologist services"* means radiology services furnished by or under the direct supervision of a physician—

(1) Who is certified, or eligible to be certified, by the American Board of Radiology; or

(2) For whom radiology services account for at least 50 percent of the physician's total amount of charges made under Medicare Part B.

**§ 405.531 Basic methodology for calculating radiology fee schedules for calendar year 1989.**

(a) *General rule.* For services furnished on or after April 1, 1989 and before January 1, 1990, each carrier establishes a radiology fee schedule for each locality in its service area based on a national relative value scale and any appropriate local relative value scale multiplied by locality-specific conversion factors computed as described in paragraphs (b) through (d) of this section.

(b) *Relative value scales.*

(1) *National relative value scale.* HCFA establishes a national scale.

(2) *Local relative value scale.* Each carrier establishes a local scale (at the carrier service area level) for radiology services that are not included in the national scale and that are not reimbursed on an individual or case-by-case basis.

(c) *Conversion factors.* After separating the portable x-ray data from all other data, each carrier establishes two conversion factors for each locality (one for portable x-ray suppliers and another for all other radiology physicians and suppliers) by—

(1) Computing the locality's total Medicare reasonable charges that would have been recognized during 1989 under the reasonable charge methodology (see §§ 405.502 and 405.555(c)(2));

(2) Dividing that amount by the sum of each radiologist service's relative value, multiplied by the 1989 charge year (that is, July 1, 1987 through June 30, 1988) frequency in the locality; and

(3) Multiplying that amount by 97 percent.

**§ 405.532 Calculating radiology fee schedules for calendar years after 1989.**

(a) *Annual update.* Radiology fee schedules for services furnished in a calendar year after 1989 are established by updating the previous calendar year's fee schedules by the percentage increase in the Medicare economic index as described in § 405.504(a)(3)(i).

(b) *Revisions.* Using the methodology set forth in § 405.531, at least every three years—

(1) HCFA establishes new relative values; and

(2) Carriers established new conversion factors.

(c) *New radiology services.* New radiology services are added to the national relative value scale at the time of a revision under the provisions of paragraph (b) of this section. Until they are included on the national relative value scale, these services are paid on the basis of local relative value scales, established by the carriers.

**§ 405.533 Special rules for nonparticipating physicians furnishing radiology services.**

(a) *Fee schedule amounts.* The payment amount recognized under the radiology fee schedules for a nonparticipating physician or a nonparticipating supplier is limited to the applicable percent (as set forth in section 1842(b)(4)(A)(iv) of the Act) of the fee schedule amount.

(b) *Limit on actual charge.* The charge made to a beneficiary by a nonparticipating physician or a nonparticipating supplier for a radiology service for which payment is made under a radiology fee schedule is limited as follows:

(1) In 1989, the charge may not exceed 125 percent of the fee schedule amount applicable to the service.

(2) In 1990, the charge may not exceed 120 percent of the fee schedule amount applicable to the service.

(3) For years after 1990, the charge may not exceed 115 percent of the fee schedule amount applicable to the service.

5. In § 405.550, the introductory text of paragraph (b) is revised, the introductory text of paragraph (e) is republished, and paragraph (e)(1) is revised to read as follows:

**§ 405.550 Conditions for payment of charges for physician services to patients in providers: General provisions.**

* * * * *

(b) *Conditions for payment for services of physicians to provider patients.* The carrier pays for services of physicians to patients of providers on a reasonable charge basis or, for radiologist services, under a fee schedule only if the following requirements are met:

* * * * *

(e) *Effect of physician's assumption of operating costs.* If a physician or other entity enters into an agreement (such as a lease or concession) with a provider, under which the physician (or entity) assumes some or all of the operating costs of the provider department in which the physician furnishes physician services in the provider, the following rules apply:

(1) The carrier makes payment under a radiology fee schedule or on a reasonable charge basis only for a physician's services to an individual patient.

* * * * *

6. Section 405.551 is amended by revising the heading and paragraphs (a) and (f) to read as follows:

**§ 405.551 Payment of charges for physician services in providers: General provisions.**

(a) *Scope.* The carrier determines payment of charges for physician services to patients in providers in accordance with the general rules governing reasonable charge payment in §§ 405.501 through 405.508, except as provided in paragraphs (b) through (f) of this section.

(f) *Rules for certain specialties.* In determining the amount of payment for anesthesiology or radiology services furnished by a physician to an individual patient, the carrier applies the rules in this section and in §§ 405.553 and 405.555 in addition to the general rules governing reasonable charges at §§ 405.501 through 405.508 and the rules concerning payment of radiologist services on a fee schedule basis at §§ 405.530 through 405.533.

7. Section 405.554 is revised to read as follows:

**§ 405.554 Conditions for payment of charges: Radiology services.**

(a) *Services to patients.* The carrier reimburses radiology services furnished by a physician to an individual patient on a radiology fee schedule or reasonable charge basis only if the services meet the conditions for reasonable charge payment in

§ 405.550(b) and are identifiable, direct, and discrete diagnostic or therapeutic services to an individual patient, such as interpretation of X-ray plates, angiograms, myelograms, pyelograms, or ultrasound procedures.

(b) *Services to providers.* The carrier does not pay on a radiology fee schedule or reasonable charge basis for physician services to the provider (for example, administrative or supervisory services) or for provider services needed to produce the X-ray films or other items that are interpreted by the radiologist. However, allowable costs for such services will be paid to the provider by the intermediary. (See § 405.480 for provider costs, and § 405.550(e)(2) for costs borne by a physician, such as under a lease or concession agreement.)

8. In § 405.555, the heading and paragraph (b) are revised, the introductory text of paragraph (c) is republished, and paragraph (c)(1) is revised to read as follows:

**§ 405.555 Payment of charges for radiology services.**

* * * * *

(b) *Services not furnished in providers.* If the services are furnished in a radiologist's office, a freestanding radiology clinic, or any other setting that is not part of a provider, the carrier determines the amount of payment for the services under the general reasonable charge rules in §§ 405.501 through 405.508 or the rules governing payment under a radiology fee schedule in §§ 405.530 through 405.533.

(c) *Services furnished in providers.* If the services are furnished in a hospital radiology department or any other setting that is part of a provider, the following rules apply:

(1) The carrier determines the amount of payment under the payment of charges rules for physician services in providers in § 405.551 and the general reasonable charge rules in §§ 405.501 through 405.508 or the radiology fee schedule rules in §§ 405.30 through 405.533.

# New edition now available....

For those of you who must keep informed about **Presidential Proclamations and Executive Orders**, there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period January 20, 1961, through January 20,1985, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1961-1985 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

**FEDERAL REGISTER** Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 54 FR 12345.

# Rules and Regulations

Federal Register
Vol. 54, No. 41
Friday, March 3, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

**DEPARTMENT OF AGRICULTURE**

**Agricultural Marketing Service**

**7 CFR Part 907**

**[Navel Orange Reg. 690]**

## Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** Regulation 690 establishes the quantity of California-Arizona navel oranges that may be shipped to market during the period March 3 through March 9, 1989. Such action is needed to balance the supply of fresh navel oranges with the demand for such oranges during the period specified due to the marketing situation confronting the orange industry.

**DATES:** Regulation 690 (§ 907.990) is effective for the period March 3, 1989, through March 9, 1989.

**FOR FURTHER INFORMATION CONTACT:** Jacquelyn R. Schlatter, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2528–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–5120.

**SUPPLEMENTARY INFORMATION:** This final rule is issued under Marketing Order 907 [7 CFR Part 907], as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 125 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order, and approximately 4,065 producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and produces of California-Arizona navel oranges may be classified as small entities.

This action is consistent with the marketing policy for 1988–89 adopted by the Navel Orange Administrative Committee (Committee). The Committee met publicly on February 28, 1989, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended by a seven to three vote a quantity of navel oranges deemed advisable to be handled during the specified week. The Committee reports that the market for navel oranges is weaker.

Based on consideration of supply and market conditions, and the evaluation of alternatives to the implementation of prorate regulations, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. To effectuate the declared purposes of the Act, it is necessary to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

**List of Subjects in 7 CFR Part 907**

Arizona, California, Marketing agreements and orders, Navel oranges.

For the reasons set forth in the preamble, 7 CFR part 907 is amended as follows:

## PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

1. The authority citation for 7 CFR Part 907 continues to read as follows:

**Authority:** Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 907.990 is added to read as follows: [This section will not appear in the Code of Federal Regulations.]

**§ 907.990 Navel Orange Regulation 690.**

The quantity of navel oranges grown in California and Arizona which may be handled during the period March 3, 1989, through March 9, 1989, are established as follows:

(a) District 1: 1,216,000 cartons;
(b) District 2: 234,000 cartons;
(c) District 3: unlimited cartons;
(d) District 4: unlimited cartons.

Dated: March 1, 1989.

**Eric M. Forman,**
*Acting Director, Fruit and Vegetable Division.*

**7 CFR Part 910**

**[Lemon Reg. 655]**

**Lemons Grown in California and Arizona; Limitation of Handling**

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** Regulation 655 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 375,126 cartons during the period March 5 through March 11, 1989. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

**DATES:** Regulation 655 (§ 910.955) is effective for the period March 5 through March 11, 1989.

**FOR FURTHER INFORMATION CONTACT:** Beatriz Rodriguez, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, D.C. 20090-6456; telephone: (202) 447-5697.

**SUPPLEMENTARY INFORMATION:** This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 85 handlers of lemons grown in California and Arizona subject to regulation under the lemon marketing order and approximately 2,500 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona lemons may be classified as small entities.

This regulation is issued under Marketing Order No. 910, as amended (7 CFR Part 910) regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601-674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee (Committee) and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1988-89. The Committee met publicly on February 28, 1989, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and unanimously recommended a quantity of lemons deemed advisable to be handled during the specified week. The Committee reports that demand for lemons is good.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

**List of Subjects in 7 CFR Part 910**

Marketing agreements and orders, California, Arizona, Lemons.

For the reasons set forth in the preamble, 7 CFR Part 910 is amended as follows:

**PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA**

1. The authority citation for 7 CFR Part 910 continues to read as follows:

**Authority:** Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Section 910.955 is added to read as follows: [This section will not appear in the Code of Federal Regulations.]

**§ 910.955 Lemon Regulation 655.**

The quantity of lemons grown in California and Arizona which may be handled during the period March 5, 1989, through March 11, 1989, is established at 375,126 cartons.

Dated: March 1, 1989.

**Eric M. Forman,**

*Acting Director, Fruit and Vegetable Division.*

[FR Doc. 89-5108 Filed 3-2-89; 8:45 am]

BILLING CODE 3410-02-M

**DEPARTMENT OF TRANSPORTATION**

**Federal Aviation Administration**

**14 CFR Part 39**

**[Docket No. 88-ANE-05; Amdt. 39-6075]**

**Airworthiness Directives; Switlik Parachute Co., Inc. TSO-C13 Life Preservers and TSO-C72 Individual Flotation Devices**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts a new airworthiness directive (AD) which requires inspection for cracks and, if needed, replacement of carbon dioxide ($CO_2$) inflators on Switlik TSO-C13 Life Preservers and TSO-C72 Individual Flotation Devices. The AD is needed to prevent the malfunctioning of the $CO_2$ inflators on TSO-C13 Life Preservers and TSO-C72 Individual Flotation Devices which could result in inadequate inflation of the devices when operated during emergency conditions.

**DATES:** Effective April 3, 1989. Compliance—As required in the body of the AD. Incorporation by Reference—Approved by the Director of the Federal Register as of April 3, 1989.

**ADDRESSES:** The applicable service bulletin (SB) may be obtained from Switlik Parachute Co., Inc., 1325 East State Street, P.O. Box 1328, Trenton, New Jersey 08607.

A copy of Switlik SB No. 25-00-19, dated September 8, 1987, is contained in the Rules Docket, Docket No. 88-ANE-05, Office of the Assistant Chief Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and may be examined between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

**FOR FURTHER INFORMATION CONTACT:** Adrew Gfrerer, Systems and Equipment Branch, ANE-173, New York Aircraft Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 181 South Franklin Avenue, Room 202, Valley Stream, New York NY 11581; telephone (516) 791-6427.

**SUPPLEMENTARY INFORMATION:** A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD which requires inspection for cracks and, if needed, replacement of $CO_2$ inflators on certain Switlik TSO-C13 Life Preservers and TSO-C72 Individual Flotation Devices was published in the **Federal Register** on March 18, 1988 (53 FR 8926).

The proposal was prompted by reports of cracked $CO_2$ inflators on Switlik TSO-C13 Life Preservers and TSO-C72 Individual Flotation Devices which could result in inadequate inflation of the devices when operated during emergency conditions.

Interested persons have been afforded an opportunity to participate in the making of this amendment and due consideration has been given to all the comments received.

A total of nine comments were received, two of which concurred with the AD as proposed, and seven proposed that changes be made by extending the compliance time. Following consideration of those comments, it was determined that the proposal would be changed by extending the compliance period to one year.

Three commenters proposed that the compliance time should follow the requirements set forth in Switlik Service Bulletin No. 25-00-19, dated September 8, 1987, which sets compliance time at the next regularly scheduled service. The FAA disagrees. A compliance time set at the next regularly scheduled service could occur at 24, 36 or as much as 48 months from the effective date of the AD depending on the airline. The proposed interval is not adequately defined, does not provide an adequate level of safety during the inspection/retrofit program due to the lengthy proposed compliance interval and would increase the chance for malfunction of the $CO_2$ inflator when it would be needed.

Another commenter mentioned that its life vests do not have manufacture dates on the life vest package and they must open and unfold all vests to checks for date, which would take extra time. The FAA requires all operators to carry out their inspections by looking for dates that are printed on the life vest and not on the life vest package. The reason for this is that the life vest might have been taken out of the package and repackaged in a different package. This procedure will take longer and the compliance time has been extended as mentioned above.

Another commenter feels that they must reinspect all its life preservers because of AD documentation requirements in the proposed AD. The FAA has determined that reinspection of the life preservers is not necessary if satisfactory documentation is available to show that the inspections have previously been accomplished. This is pointed out in the compliance statement in the AD, "Compliance Is Required As Indicated, Unless Already Accomplished."

Some commenters mentioned that every life preserver and individual flotation device must be first checked for date of manufacture, which would take extra time and expense. The FAA agrees that additional labor is involved in determining whether the life preservers and the individual flotation devices were manufactured during the time interval stated in the AD and has extended the compliance time so that this can be accomplished during normal aircraft maintenance periods. The labor expended for inspection, and replacement if necessary, of inflators in the life preservers and the individual flotation devices which were manufactured within the time period stated in the AD is less than 3 (three) minutes per unit according to the manufacturer, Switlik Parachute Company. The FAA has reviewed the manufacturer's estimate and has increased the time to inspect, and replace if necessary, to 5 (five) minutes per inflator. Although the FAA is unable to specifically identify all costs associated with determining manufacture date, the increase in the manufacturer's time assessment to complete compliance, from less than 3 (three) minutes to 5 (five) minutes, is considered a proper assessment of the time required to comply with the AD. Further, the FAA has determined that the cost associated with this estimated time is realistic.

Another commenter also mentions that the FAA used a very general term, "service", in the compliance statement, "At next regularly scheduled service * * *". Since "service" is not defined, the compliance period is open for interpretation, for example, Preserver/Flotation Device Service, or does it mean the next scheduled A, B, or C check? The commenter suggests that we remove "At next regularly scheduled service" from the compliance statement.

The FAA agrees, and the following changes have been made to the compliance statement. The text in the AD will change from, "At the next regularly scheduled service or within six (6) months after the effective date of this AD, whichever comes first, visually inspect * * *" to, "Within one year after the effective date of this AD, visually inspect * * *".

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of governments. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

*Conclusion:* The FAA has determined that this regulation involves approximately 69,220 inflators, and will cost approximately $3.50 labor for both inspection and replacement, if replacement is required. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT"**.

**List of Subjects in 14 CFR Part 39**

Air transportation, Aircraft, Aviation safety, Incorporation by reference.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding to § 39.13 the following new airworthiness directive (AD):

VOL 54 ISS 41 MR 3 1989 UMI

**Switlik Parachute Company, Inc.:** Applies to Switlik TSO–C13 Life Preservers and TSO–C72 Individual Flotation Devices: all models and all part numbers manufactured from September 1, 1984, through January 30, 1985, and June 1, 1985, through October 30, 1985 (date located on identification label on front surface).

Compliance is required within one year after the effective date of this AD, unless already accomplished.

To prevent the improper functioning of the carbon dioxide ($CO_2$) inflators on TSO–C13 Life Preservers and TSO–C72 Individual Flotation Devices, accomplish the following:

(a) Visually inspect the $CO_2$ inflators for cracks and chipping and, if necessary, replace $CO_2$ inflators with serviceable parts in accordance with Paragraph 2, Accomplishment Instructions of Switlik Parachute Company, Inc., Service Bulletin No. 25–00–19, dated September 8, 1987.

(b) Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

(c) Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, New York Aircraft Certification Office, Federal Aviation Administration, Engine and Propeller Directorate, Aircraft Certification Service, 181 South Franklin Avenue, Valley Stream, New York 11581.

(d) Upon submission of substantiating data by an owner or operator through an FAA Airworthiness Inspector, the Manager, New York Aircraft Certification Office, Federal Aviation Administration, Engine and Propeller Directorate, Aircraft Certification Service, 181 South Franklin Avenue, Valley Stream, New York 11581, may adjust the compliance time specified in this AD.

Switlik Service Bulletin No. 25–00–19, dated September 8, 1987, identified and described in this document, is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received this document from the manufacturer may obtain copies upon request to Switlik Parachute Co., Inc., 1325 East State Street, P.O. Box 1328, Trenton, New Jersey 08607.

This document may also be examined at the Office of the Assistant Chief Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, Room 311, Rules Docket No. 88–ANE–05.

This amendment becomes effective on April 3, 1989.

Issued in Burlington, Massachusetts, on November 9, 1988.

**Arthur J. Pidgeon,**

*Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.*

BILLING CODE 4910–13–M

**14 CFR Part 71**

**[Airspace Docket No. 87–AWA–54]**

## Alteration of Airport Radar Service Area; Metropolitan Oakland International, CA

**AGENCY:** Federal Aviation Administration (FAA) DOT.

**ACTION:** Final rule.

**SUMMARY:** This action modifies the Airport Radar Service Area (ARSA) at Metropolitan Oakland International Airport, CA. This modification adjusts the lateral limits of the ARSA to exclude that airspace that is within the outer core of the ARSA, north of Interstate 580. This airspace is being excluded so that the heavily used visual flight rules (VFR) route, north of Interstate 580, will not be compressed below 2,100 feet mean sea level (MSL).

**EFFECTIVE DATE:** 0901 U.T.C. April 6, 1989.

**FOR FURTHER INFORMATION CONTACT:** Betty Harrison, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–9254.

**SUPPLEMENTARY INFORMATION:**

### History

On September 30, 1985, the FAA proposed to designate an ARSA at the Metropolitan Oakland International Airport, CA (50 FR 39822) The FAA, after carefully considering all comments received and making alterations where appropriate, adopted the proposal and published the final rule in the March 10, 1988, issue of the **Federal Register** (51 FR 8284) with an effective date of April 9, 1987.

On October 21, 1988, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to modify the Metropolitan Oakland International Airport, ARSA (53 FR 41512). This rule modifies the ARSA at the Metropolitan Oakland International Airport. Interested parties were invited to partcipate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. Additionally, the FAA held informal airspace meetings for this proposal on July 6, 11, 12 and 13, 1988. Section 71.501 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6D dated January 4, 1988.

The only comment received concerning the Oakland ARSA alteration was from the Department of the Army. The Army wrote in approval of the alteration stating that army aviation operations in the Livermore/Parks Range area would be facilitated.

### The Rule

This action modifies the ARSA at Metropolitan Oakland International Airport, CA. The lateral limits of the ARSA will be reduced to exclude airspace that is within the outer core of the ARSA, north of Interstate 580. This airspace is being excluded so that the heavily used VFR route, north of Interstate 580, will not be compressed below 2,100 feet MSL.

### Regulatory Evaluation Summary

The following is a summary of the cost impact and benefit assessment of the final rule to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71). A more detailed regulatory evaluation has been placed in the docket (87–AWA–54). The objective of this rule is to modify the Metropolitan Oakland International Airport Radar Service Area (ARSA) as follows:

Eliminate the area within the outer core, north of Interstate 580. Interstate 580 is a well known, easily recognizable landmark for VFR aircraft. During user forums and feedback sessions since the original implementation of this ARSA, substantial comments have been received supporting the exclusion of this area so that the heavily used VFR route north of Interstate 580 is not compressed below 2,100 feet MSL.

*Summary of Costs*

The FAA estimates the costs associated with this rule to be very minimal. The rationale for this determination is based upon two factors:

1. The cost evaluation for the final rule ("Establishment of Airport Radar Service Areas" 51 FR 8284, March 10, 1986) determined that potential costs would not materialize to any appreciable degree, and when they do occur, they would be transitional, relatively low in magnitude, or attributable to specific implementation problems that have been experienced at a very small minority of ARSA sites.

2. Since this rule seeks to reduce ARSA controlled airspace, there should be little or no costs to the aviation public. Costs associated with a reduction in safety are not expected because the rule will reduce congestion in the affected airspace, and the final approach to Metropolitan Oakland International's Runway 27 is still protected by the ARSA's outer core.

Sectional charts will continue to be updated during the regular chart cycle.

*Summary of Benefits*

The FAA expects that the benefits of this rule will accrue in three areas. First, controllers will have less airspace to monitor thereby enabling them to better concentrate on traffic in and around Metropolitan Oakland traffic patterns. Second, increased airspace in the Lake Chabot area outside the ARSA will reduce congestion and provide users more freedom while maintaining existing levels of safety within and around the Oakland ARSA. Finally, aircraft noise will be reduced considerably by allowing nonparticipating aircraft to cross Castro Valley at a higher altitude.

*Conclusion*

On balance, the FAA believes that this airspace modification will benefit various users at a near zero cost and expects that the establishment of this rule will produce long term, ongoing benefits that will far exceed any costs which may be incurred.

### Regulatory Flexibility Determination

The Regulatory Flexibility Act (RFA) of 1980 requires agencies to identify rules that will have a significant economic impact on small entities, including small businesses.

This action to reduce the ARSA area north of Interstate 580 will release airspace not required for safety reasons. The establishment of this rule will, in effect, increase public airspace outside of ARSA control and, thus, will not pose an economic burden upon independently owned and operated small businesses and small not-for-profit organizations.

### Trade Impact Statement

This regulation will only impact the Metropolitan Oakland International ARSA. As such, it will have no effect on the sale of foreign aviation products or services in the United States, nor will it affect the sale of United States products or services in foreign countries.

For these reasons, the FAA certifies that this amendment will not result in a significant economic impact on a substantial number of small entities, and a regulatory flexibility analysis is not required under the terms of the RFA.

### Federalism Implications

This regulation will not have a substantial direct effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, preparation of a Federalism assessment is not warranted.

For the reasons discussed above, the FAA has determined that this regulation (1) is not a "major rule" under Executive Order 12291; and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

### List of Subjects in 14 CFR Part 71

Aviation safety, Airport radar service areas.

### Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

**§ 71.501 [Amended]**

2. § 71.501 is amended as follows:

**Metropolitan Oakland International Airport, CA [Revised]**

That airspace extending upward from the surface to and including 4,000 feet MSL within a 5-mile radius of the Metropolitan Oakland International Airport (lat. 37°43'17" N., long. 122°13'11" W.), excluding that airspace contained within the San Francisco, CA, Terminal Control Area (TCA); and that airspace extending upward from 1,500 feet MSL to and including 4,000 feet MSL within a 10-mile radius of the Metropolitan Oakland International Airport, excluding that airspace contained within the San Francisco TCA, and that airspace beyond a 5-mile radius from the Metropolitan Oakland International Airport from the Oakland VORTAC 004° radial clockwise to the northern edge of U.S. Interstate 580, and that airspace beyond the 15-mile radius of the San Francisco TCA.

Issued in Washington, DC, February 16, 1989.

## Alteration of Transition Area—Macomb, IL

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** The nature of this action is to alter the Macomb, IL, transition area to accommodate new NDB RWY 26 and LOC RWY 26 Standard Instrument Approach Procedures (SIAPs) to Macomb Municipal Airport, Macomb, IL. The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument conditions from other aircraft operating under visual weather conditions in controlled airspace.

**EFFECTIVE DATE:** 0901 u.t.c., June 1, 1989.

**FOR FURTHER INFORMATION CONTACT:** Harold G. Hale, Air Traffic Division, Airspace Branch, AGL–520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694–7360.

**SUPPLEMENTARY INFORMATION:**

### History

On Monday, January 9, 1989, the Federal Aviation Administration (FAA) proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the transition area airspace near Macomb, IL (54 FR 626). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6D dated January 4, 1988.

### The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the transition area airspace near Macomb, IL. The present transition area is being modified to accommodate new NDB RWY 26 and LOC RWY 26 SIAPs. The only modification to the existing airspace is in the transition area extension and the extension consists of an additional 4.5 miles to the east and an additional 1.5 mile width each side of the 090° bearing from Macomb Municipal Airport.

VOL 54 ISS 41 MR 3 1989 UMI

The development of these procedures requires that the FAA alter the designated airspace to insure that the procedures will be contained within controlled airspace. The minimum descent altitude for the procedures may be established below the floor of the 700-foot controlled airspace. Aeronautical maps and charts will reflect the defined areas which will enable other aircraft to circumnavigate the area in order to comply with applicable visual fight rule requirements.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Transition areas.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

**PART 71—[AMENDED]**

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.181 [Amended]**

2. Section 71.181 is amended as follows:

**Macomb, IL [Revised]**

That airspace extending upward from 700 feet above the surface within a 6-mile radius of Macomb Municipal Airport (lat. 40° 31' 11" N., long. 90° 39' 17" W.); and within 4.5 miles each side of the 090° bearing from Macomb Municipal Airport extending from the 6-mile radius area to 12.5 miles east of the airport.

Issued in Des Plaines, Illinois on February 21, 1989.

## Standard Instrument Approach Procedures; Miscellaneous Amendments

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

**DATES:** *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

*Incorporation by reference:* Approved by the Director of the **Federal Register** on December 31, 1980, and reapproved as of January 1, 1982.

**ADDRESSES:** Availability of matters incorporated by reference in the amendment is as follows:

*For Examination—*

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

*For Purchase—*

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

*By Subscription—*

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

**FOR FURTHER INFORMATION CONTACT:** Paul J. Best, Flight Procedures Standards Branch (AFS-420), Air Transportation Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-8277.

**SUPPLEMENTARY INFORMATION:** This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The Complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 97**

Approaches, Standard instrument, Incorporation by reference.

Issued in Washington, DC on February 17, 1989.

**Robert L. Goodrich,**

*Acting Director, Flight Standards Service.*

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.M.T. on the dates specified, as follows:

**PART 97—[AMENDED]**

1. The authority citation for Part 97 continues to read as follows:

**Authority:** 49 U.S.C. 1348, 1354(a), 1421, and 1510; 49 U.S.C. 106(g) (revised, Pub. L. 97-449, January 12, 1983; and 14 CFR 11.49(b)(2)).

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

**18 CFR Ch. I**

**[Docket No. RM89-9-000; Order No. 511]**

## Statement of Policy Permitting Limited Intervention by Fish and Wildlife Agencies at the Appeal Stage of a Licensing Proceeding

Issued February 17, 1989.

**AGENCY:** Federal Energy Regulatory Commission, DOE.

**ACTION:** Statement of policy.

**SUMMARY:** The Federal Energy Regulatory Commission (Commission) is establishing a policy permitting limited intervention by fish and wildlife agencies at the appeal stage of a licensing proceeding.

Until a rule is adopted addressing mechanisms for fish and wildlife agencies to appeal license orders when they have not previously intervened in the proceeding, it will be the Commission's policy to allow a fish and

VOL 54 ISS 41 MR 3 1989 UMI

wildlife agency to intervene in a licensing proceeding within 30 days after Commission staff has issued an order rejecting or materially modifying any of the fish and wildlife agency's recommendations submitted pursuant to the Fish and Wildlife Coordination Act, for the limited purpose of appealing such rejection or material modification. The intervention petition must be accompanied by the appeal. This policy will provide fish and wildlife agencies a chance to participate at the appeal stage of a proceeding without requiring them to intervene in those proceedings where a reason to appeal may never arise.

**EFFECTIVE DATE:** This statement of policy is effective February 17, 1989.

**FOR FURTHER INFORMATION CONTACT:** Jessica Seigel, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357–5775.

**SUPPLEMENTARY INFORMATION:** In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in Room 1000 at the Commission's Headquarters, 825 North Capitol Street NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 357–8997. To access CIPS, set your communications software to use 300, 1200 or 2400 baud, full duplex, no parity, 8 data bits, and 1 stop bit. The full text of this statement of policy will be available on CIPS for 30 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in Room 1000, 825 North Capitol Street NE., Washington, DC 20426.

### Statement of Policy

Before Commissioners: Martha O. Hesse, Chairman; Charles G. Stalon, Charles A. Trabandt, Elizabeth Anne Moler and Jerry J. Langdon.

The Federal Energy Regulatory Commission (Commission) has instructed staff to prepare a notice of proposed rulemaking (NOPR) on the conflict resolution procedures prescribed by section 10(j) of the Federal Power Act (FPA), as amended by section 3(a) of the Electric Consumers Protection Act of 1986 (ECPA).[1] One of the matters that the NOPR will address is mechanisms for fish and wildlife agencies to appeal license orders when they have not previously intervened in the proceeding. Until a rule resolving this matter is adopted, the Commission is establishing a policy to permit certain appeals by fish and wildlife agencies that have not previously intervened a proceeding.

Section 10(j) of the FPA requires hydroelectric licenses issued under the FPA to include conditions, based on recommendations submitted pursuant to the Fish and Wildlife Coordination Act by state and federal fish and wildlife agencies, for the protection, mitigation, and enhancement of fish and wildlife (including related spawning grounds and habitat). Whenever the Commission believes that a fish and wildlife agency's recommendations may be inconsistent with the purposes and requirements of applicable law, section 10(j)(2) requires that it attempt to resolve such inconsistency. If the inconsistency cannot be resolved and the Commission does not adopt the agency's recommendation, section 10(j)(2) requires it to publish findings that adoption of such recommendation is inconsistent with the purposes and requirements of applicable law and that the conditions selected by the Commission will adequately and equitably protect, mitigate damage to, and enhance fish and wildlife affected by the project. This is done in the licensing order.

The percentage of proceedings in which an agency's recommendations are held to be inconsistent with applicable law is exceedingly small. However, where a license is issued by the staff pursuant to delegated authority and a fish and wildlife agency is not a party, it will not be able to ensure that the Commission itself will review rejection of one or more of its recommendations. In order that the agencies will not have to intervene in every licensing proceeding so as to preserve their right of appeal to the Commission itself in such an instance, it will be the Commission's policy to allow a fish and wildlife agency to intervene in such a proceeding within 30 days after the issuance by staff pursuant to delegated authority of an order rejecting or materially modifying any of its fish and wildlife recommendations, for the limited purpose of permitting that agency to appeal such action to the Commission itself. The agency's intervention and appeal must be filed simultaneously.

We believe the establishment of this policy provides a practical way to allow fish and wildlife agencies, who have an important statutory role in the licensing process, to participate at the appeal stage of a proceeding, without requiring them to intervene in a large number of proceedings where the necessity for appeal may never arise.

### Effective Date

The Administrative Procedure Act exempts statements of policy from both the notice and comment requirements of section 4(b) of the Administrative Procedure Act [2] and the requirement that publication be made 30 days before the effective date of the rule.[3] Therefore, this statement of policy is effective February 17, 1989.

By the Commission. Commissioner Trabandt concurred with a separate statement attached.

**Lois D. Cashell,**

*Secretary.*

TRABANDT, Commissioner, *Concurring:*

I have publicly stated that a proposed rulemaking on the conflict resolution procedures prescribed by § 10(j) of the Federal Power Act, and the instant policy statement are both unnecessary and inappropriate, because current Commission practice (1) is completely consistent with the legislative history of the Conference Report enacted by Congress, and (2) implements dispute resolution in an effective and efficient manner for the mutual benefit of license applicants and fish and wildlife resources. However, my colleagues have decided to instruct staff to prepare a notice of proposed rulemaking on the conflict resolution procedures prescribed by § 10(j), and address in that proposed rule mechanisms for fish and wildlife agencies to appeal license orders when they have not previously intervened in the proceeding.

I remain seriously concerned that any parties be granted special administrative procedural rights not established expressly by statute, as would be the case here. I do not consider the enactment of § 10(j) by the Electric Consumers Protection Act of 1986, Pub. L. No. 99–495, 100 Stat. 1243 (Oct. 16, 1986) to constitute express statutory direction that fish and wildlife agencies be granted automatically late intervention, particularly after a license has been issued. A better course of action would be to require the Commission staff to notify such agencies of any decision to modify their recommendations in the 10(j) process and provide a period of 30 days thereafter for late intervention before a license issued. The majority here has created inadvertently a conditional license whenever a recommendation of a fish or wildlife agency is not adopted without modification in the 10(j) process. In my judgment, that result is not consistent with the Federal Power Act nor the Congressional intent of ECPA.

Nevertheless, the majority deems it important to ensure the right of intervention under such circumstances and, in any event, this issue will be considered further in the rulemaking process. Therefore, as an interim measure, I reluctantly concur with this policy determination.

Charles A. Trabandt,

*Commissioner.*

### Certain Regulations; Editorial Amendments

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is amending certain of its regulations to correct cross-references and typographical errors, to update the titles and mailing symbols of certain organizational units, and to make technical revisions of, and renumber certain paragraphs in, the agency's list of standing advisory committees to reflect recent changes in the committee charters and a recent agency reorganization. This action will improve the accuracy and clarity of the regulations.

**EFFECTIVE DATE:** March 3, 1989.

**FOR FURTHER INFORMATION CONTACT:** T. Rada Proehl, Regulations Editorial Staff (HFC–222), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–2994.

**SUPPLEMENTARY INFORMATION:** FDA is revising certain of its regulations in Subchapter A of Title 21 of the Code of Federal Regulations to correct cross-references and typographical errors and to update the titles and mailing symbols of certain organizational units. The affected regulations are 21 CFR 1.24(a)(6) (i), (ii) and (iii), 1.96(a)(3), 2.19, 2.125 (d), (g), (h)(1), (h)(2), the introductory text, and (i), 5.10(a)(7), 5.30(c), the introductory text, 5.45(c), the introductory text, 5.63(b), 5.110(c), 7.73, the introductory text, 10.1(a), 10.3 (a) and (b), 10.20(c)(1)(v), 10.25(a), 10.30 (b) and (h)(4), 10.35(d), 10.40(b)(1)(ix) and (i)(1), 10.45(f), 10.50(a)(2), 10.55(c), 10.80(d)(2)(iii)(*b*), 10.90(b) (4) and (5), 10.95(d)(1), the introductory text, and (d)(2), 10.100(b)(3)(v), 10.203(b), 10.206(a), 12.21(a)(2), 12.22(a)(5) (i)(*c*) and (b), the introductory text, 12.24 (b)(6) and (c), 12.50(a), 12.85(a), the introductory text, and (a)(2), 13.15(a), 13.25(b), 14.1(a)(2)(ix), 14.20(b)(9), 14.22(a)(1), 14.75(a) (6) (i) and (ii), 14.80(d), 14.84(c)(1), 14.100, 14.125(d), 14.171(d), (e), and (f), 16.1(b)(2), 16.24(c), 16.40, 16.42(c)(1), 16.119, 20.21(b), 20.42(c), 20.50, 20.81(a)(3), 20.100(c)(3), (13), (14), (15), (16), (17), and (21), 20.103(b), 20.112(a), 20.117(a)(3) and (b), 21.45(c), 21.71 (e)(4), 25.15(c)(18), 25.22(a)(14), 25.24(c)(4), 50.3(b) (6) and (11), 56.102(b) (6) and (10), 58.3(e) (5) and (9), and 58.195(b)(1).

Because these amendments are nonsubstantive notice and public procedures and delayed effective date are unnecessary (5 U.S.C. 553 (b)(B) and (d)).

### List of Subjects

*21 CFR Part 1*

Cosmetics, Drugs, Exports, Food labeling, Imports, Labeling, Reporting and recordkeeping requirements.

*21 CFR Part 2*

Administrative practice and procedure, Cosmetics, Drugs, Foods.

*21 CFR Part 5*

Authority delegations (Government agencies), Imports, Organization and functions (Government agencies).

*21 CFR Part 7*

Administrative practice and procedure, Consumer protection, Infants and children, Reporting and recordkeeping requirements.

*21 CFR Part 10*

Administrative practice and procedure, News media.

*21 CFR Part 12*

Administrative practice and procedure.

*21 CFR Part 13*

Administrative practice and procedure.

*21 CFR Part 14*

Administrative practice and procedure, Advisory committees, Color additives, Drugs, Radiation protection.

*21 CFR Part 16*

Administrative practice and procedure.

*21 CFR Part 20*

Confidential business information, Courts, Freedom of information, Government employees.

*21 CFR Part 21*

Privacy.

*21 CFR Part 25*

Environmental impact statements, Foreign relations, Reporting and recordkeeping requirements.

*21 CFR Part 50*

Prisoners, Reporting and recordkeeping requirements, Research, Safety.

*21 CFR Part 56*

Reporting and recordkeeping requirements, Research, Safety.

*21 CFR Part 58*

Laboratories, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Parts 1, 2, 5, 7, 10, 12, 13, 14, 16, 20, 21 25, 50, 56, and 58 are revised as follows:

## PART 1—GENERAL REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

1. The authority citation for 21 CFR Part 1 continues to read as follows:

**Authority:** Secs. 4, 5, 6 (15 U.S.C. 1453, 1454, 1455); secs. 201, 403, 502, 505, 512, 602, 701 (21 U.S.C. 321, 343, 352, 355, 360b, 362, 371).

**§ 1.24 [Amended]**

2. Section 1.24 *Exemptions from required label statements* is amended in paragraphs (a)(6) (i), (ii), and (iii) by removing "Bureau of Foods" and replacing it with "Center for Food Safety and Applied Nutrition".

**§ 1.96 [Amended]**

3. Section 1.96 *Granting of authorization to relabel and recondition* is amended in paragraph (a)(3) by removing "Bureau of Customs" and replacing it with "U.S. Customs Service".

## PART 2—GENERAL ADMINISTRATIVE RULINGS AND DECISIONS

4. The authority citation for 21 CFR Part 2 continues to read as follows:

**Authority:** Sec. 701, 52 Stat. 1055–1056 as amended (21 U.S.C. 371).

VOL 54 ISS 41 MR 3 1989 UMI

**§ 2.19 [Amended]**

5. Section 2.19 *Methods of analysis* is amended by removing "P.O. Box 540, Benjamin Franklin Station, Washington, DC 20044" and replacing it with "2200 Wilson Blvd., Suite 400, Arlington, VA 22201–3301".

6. Section 2.125 is amended in paragraph (d) by removing "Antibiotic Form 5 or 6" and replacing it with "antibiotic application", in paragraph (g) by removing "§ 314.8" and replacing it with "§ 314.70", in paragraph (h)(1) by removing "§ 314.1" and replacing it with "§ 314.50", by revising the introductory text of paragraph (h)(2), and in paragraph (i) by removing " 'Notice of Claimed Investigational New Drug' " and replacing it with " 'Investigational New Drug Application' " to read as follows:

**§ 2.125 Use of chlorofluorocarbon propellants in self-pressurized containers.**

* * * * *

(h) * * *

(2) The Food and Drug Administration may find that an abbreviated new drug application conforming to § 314.55 of this chapter is acceptable in lieu of a full new drug application for any product included in the classes of products in paragraph (e) of this section. A finding has been made that an ANDA may be submitted for the following products included in the classes of products listed in paragraph (e) of this section:

* * * * *

## PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

7. The authority citation for 21 CFR Part 5 continues to read as follows:

**Authority:** 5 U.S.C. 504, 552; 7 U.S.C. 2217; 15 U.S.C. 638, 1451 *et seq.*; 3701 *et seq.*; 21 U.S.C. 41 *et seq.*, 61–63, 141 *et seq.*, 301–392, 467f(b), 679(b), 801 *et seq.*, 823(f), 1031 *et seq.*; 35 U.S.C. 156; 42 U.S.C. 219, 241, 242(a), 242a, 242l, 242o, 243, 262, 263, 263b through 263m, 264, 265, 300u *et seq.*, 1395y and 1395y note, 3246b(b)(3), 4831(a), 10007, and 10008; Federal Caustic Poison Act (44 Stat. 1406); Federal Advisory Committee Act (Pub. L. 92–463); E.O. 11490, 11921, 12591.

**§ 5.10 [Amended]**

8. Section 5.10 *Delegations from the Secretary, the Assistant Secretary for Health, and Public Health Service Officials* is amended in paragraph (a)(7) by removing "notice of claimed exemption for an investigational new drug" and replacing it with "investigational new drug application".

**§ 5.30 [Amended]**

9. Section 5.30 *Hearings* is amended in the introductory text of paragraph (c) by removing "§ 16.40(b)" and replacing it with "§ 16.42(b)".

**§ 5.45 [Amended]**

10. Section 5.45 *Imports and exports* is amended in the introductory text of paragraph (c) by removing "Bureau of Customs" " and replacing it with "U.S. Customs Service's".

**§ 5.63 [Amended]**

11. Section 5.63 *Detention of meat, poultry, eggs, and related products* is amended in paragraph (b) by removing "467(b)" and replacing it with "467f(b)".

**§ 5.110 [Amended]**

12. Section 5.110 *FDA Public Information Offices* is amended in paragraph (c) by removing "15B–42" and replacing it with "15–05".

## PART 7—ENFORCEMENT POLICY

13. The authority citation for 21 CFR Part 7 continues to read as follows:

**Authority:** Secs. 305, 701(a), 52 Stat. 1045, 1055 (21 U.S.C. 335, 371(a)).

**§ 7.73 [Amended]**

14. Section 7.73 *Termination of recall* is amended in the introductory text by removing "Bureau of Foods" and replacing it with "Center for Food Safety and Applied Nutrition" everywhere that it appears.

## PART 10—ADMINISTRATIVE PRACTICES AND PROCEDURES

15. The authority citation for 21 CFR Part 10 continues to read as follows:

**Authority:** Sec. 201 *et seq.*, Pub. L. 717, 52 Stat. 1040 as amended (21 U.S.C. 321 *et seq.*); sec. 1 *et seq.*, Pub. L. 410, 58 Stat. 682 as amended (42 U.S.C. 201 *et seq.*); sec. 4, Pub. L. 91–513, 84 Stat. 1241 (42 U.S.C. 257a); sec. 301 *et seq.*, Pub. L. 91–513, 84 Stat. 1253 (21 U.S.C. 821 *et seq.*); sec. 409(b), Pub. L. 242, 81 Stat. 600 (21 U.S.C. 679(b)); sec. 24(b), Pub. L. 85–172, 82 Stat. 807 (21 U.S.C. 467f(b)); sec. 2 *et seq.*, Pub. L. 91–597, 84 Stat. 1620 (21 U.S.C. 1031 *et seq.*); secs. 1–9, Pub. L. 625, 44 Stat. 1101–1103 as amended (21 U.S.C. 141–149); secs. 1–10, Ch. 358, 29 Stat. 604–607 as amended (21 U.S.C. 41–50); sec. 2 *et seq.*, Pub. L. 783, 44 Stat. 1406 as amended (15 U.S.C. 401 *et seq.*); sec. 1 *et seq.*, Pub. L. 89–755, 80 Stat. 1296 as amended (15 U.S.C. 1451 *et seq.*); Pub. L. 100–236, 101 Stat. 1731 (28 U.S.C. 2112).

**§ 10.1 [Amended]**

16. Section 10.1 *Scope* is amended in paragraph (ar by removing "§ 5.1" and replacing it with "§ 5.10".

17. Section 10.3 is amended in paragraph (a) by revising the definition for "Office of the Commissioner," in the definition for "Party" by removing "bureau" and replacing it with "center", in the definition for "The laws administered by the Commissioner" by removing "§ 5.1" and replacing it with "§ 5.10", and in paragraph (b) by removing "of Part 1" and replacing it with "or Part 1" to read as follows:

**§ 10.3 Definitions.**

(a) * * *

"Office of the Commissioner" includes the offices of the Associate Commissioners but not the centers or the regional or district offices.

* * * * *

**§ 10.20 [Amended]**

18. Section 10.20 *Submission of documents to Dockets Management Branch; computation of time; availability for public disclosure* is amended in paragraph (c)(1)(v) by removing "§ 310.9 or".

**§ 10.25 [Amended]**

19. Section 10.25 *Initiation of administrative proceedings* is amended in paragraph (a) by removing "§ 314.1" and replacing it with "§ 314.50".

**§ 10.30 [Amended]**

20. Section 10.30 *Citizen petition* is amended in paragraph (b) under the heading "CITIZEN PETITION" by removing "5.1" and replacing it with "5.10" and in paragraph (h)(4) by removing "§ 12.5" and replacing it with "§ 12.20".

**§ 10.35 [Amended]**

21. Section 10.35 *Administrative stay of action* is amended in paragraph (d) by removing "§ 10.80" and replacing it with "§ 10.85".

**§ 10.40 [Amended]**

22. Section 10.40 *Promulgation of regulations for the efficient enforcement of the law* is amended in paragraph (b)(1)(ix) by removing "§ 25.25(a)(3) (ii) or (iii)", and replacing it with "§ 25.42(b)(3) (ii) or (iii)"', and in paragraph (i)(1) "bureau" is removed and replaced with "center" everywhere that it appears.

**§ 10.45 [Amended]**

23. Section 10.45 *Court review of final administrative action; exhaustion of administrative remedies* is amended in paragraph (f) by removing "16.80(c)" and replacing it with "16.80(a)".

**§ 10.50 [Amended]**

24. Section 10.50 *Promulgation of regulations and orders after an opportunity for a formal evidentiary public hearing* is amended in paragraph (a)(2) by removing "430.20(b)" and replacing it with "314.300".

**§ 10.55 [Amended]**

25. Section 10.55 *Separation of functions; ex parte communications* is amended in paragraph (c) by removing "430.20(b)(7)" and replacing it with "314.300".

**§ 10.80 [Amended]**

26. Section 10.80 *Dissemination of draft Federal Register notices and regulations* is amended in paragraph (d)(2)(iii)(*b*) by removing "§ 10.40(f)(9)" and replacing it with "§ 10.40(f)(6)".

**§ 10.90 [Amended]**

27. Section 10.90 *Food and Drug Administration regulations, guidelines, recommendations, and agreements* is amended in paragraphs (b) (4) and (5) by removing "bureau" and replacing it with "center".

**§ 10.95 [Amended]**

28. Section 10.95 *Participation in outside standard-setting activities* is amended in paragraph (d)(1), the introductory text, and in paragraph (d)(2) by removing "bureau" and replacing it with "center".

**§ 10.100 [Amended]**

29. Section 10.100 *Public calendars* is amended by removing and reserving paragraph (b)(3)(v).

**§ 10.203 [Amended]**

30. Section 10.203 *Definitions* is amended in paragraph (b) by removing "Office of Legislation and Information" and replacing it with "Office of Public Affairs".

**§ 10.206 [Amended]**

31. Section 10.206 *Procedures for electronic media coverage of agency public administrative proceedings* is amended in paragraph (a) by removing "(HFW–20), Office of Legislation and Information" and replacing it with "(HFI–20), Office of Public Affairs".

## PART 12—FORMAL EVIDENTIARY PUBLIC HEARING

32. The authority citation for 21 CFR Part 12 continues to read as follows:

**Authority:** Sec. 201 *et seq.*, Pub. L. 717, 52 Stat. 1040 as amended (21 U.S.C. 321 *et seq.* ); sec. 1 *et seq.*, Pub. L. 410, 58 Stat. 682 as amended (42 U.S.C. 201 *et seq.* ); sec. 4, Pub. L. 91–513, 84 Stat. 1241 (42 U.S.C. 257a); sec. 301 *et seq.*, Pub. L. 91–513, 84 Stat. 1253 (21 U.S.C. 821 *et seq.* ); sec. 409(b), Pub. L. 242, 81 Stat. 600 (21 U.S.C. 679(b)); sec. 24(b), Pub. L. 85–172, 82 Stat. 807 (21 U.S.C. 467f(b)); sec. 2 *et seq.*, Pub. L. 91–597, 84 Stat. 1620 (21 U.S.C. 1031 *et seq.* ); secs. 1–9, Pub. L. 625, 44 Stat. 1101–1103 as amended (21 U.S.C. 141–149); secs. 1–10, Ch. 358, 29 Stat. 604–607 as amended (21 U.S.C. 41–50); sec. 2 *et seq.*, Pub. L. 783, 44 Stat. 1406 as amended (15 U.S.C. 401 *et seq.* ); sec. 1 *et seq.*, Pub. L. 89–755, 80 Stat. 1296 as amended (15 U.S.C. 1451 *et seq.*).

**§ 12.21 [Amended]**

33. Section 12.21 *Initiation of a hearing involving the issuance, amendment, or revocation of an order* is amended in paragraph (a)(2) by removing "§ 314.1(c)" and replacing it with "§ 314.50".

**§ 12.22 [Amended]**

34. Section 12.22 *Filing objections and requests for a hearing on a regulation or order* is amended in paragraph (a)(5)(i)(*c*) by removing "§ 310.9 or", and in paragraph (b), the introductory text, by removing "hearing clerk" and replacing it with "Dockets Management Branch".

**§ 12.24 [Amended]**

35. Section 12.24 *Ruling on objections and requests for hearing* is amended in paragraphs (b)(6) and (c) by removing "430.20(b)" and replacing it with "314.300".

**§ 12.50 [Amended]**

36. Section 12.50 *Advice on public participation in hearings* is amended in paragraph (a) by removing "(HFC–10)" and replacing it with "(HFC–220)".

**§ 12.85 [Amended]**

37. Section 12.85 *Disclosure of data and information by the participants* is amended in paragraph (a), the introductory text, and in paragraph (a)(2) by removing "bureau" and replacing it with "center".

## PART 13—PUBLIC HEARING BEFORE A PUBLIC BOARD OF INQUIRY

38. The authority citation for 21 CFR Part 13 is revised to read as follows:

**Authority:** Sec. 201 *et seq.*, Pub. L. 717, 52 Stat. 1040 (21 U.S.C. 321 *et seq.* ); sec. 1 *et seq.*, Pub. L. 410, 58 Stat. 682 as amended (42 U.S.C. 201 *et seq.* ); sec. 4, Pub. L. 91–513, 84 Stat. 1241 (42 U.S.C. 257a); sec. 301 *et seq.*, Pub. L. 91–513, 84 Stat. 1253 (21 U.S.C. 821 *et seq.* ); sec. 409(b), Pub. L. 242, 81 Stat. 600 (21 U.S.C. 679(b)); sec. 24(b), Pub. L. 85–172, 82 Stat. 807 (21 U.S.C. 467f(b)); sec. 2 *et seq.*, Pub. L. 91–597, 84 Stat. 1620 (21 U.S.C. 1031 *et seq.* ); secs. 1–9, Pub. L. 625, 44 Stat. 1101–1103 as amended (21 U.S.C. 141–149); secs. 1–10, Ch. 358, 29 Stat. 604–609 as amended (21 U.S.C. 41–50); sec. 2 *et seq.*, Pub. L. 783, 44 Stat. 1406 as amended (15 U.S.C. 401–411 notes); sec. 1 *et seq.*, Pub. L. 89–755, 80 Stat. 1296 as amended (15 U.S.C. 1451 *et seq.* ).

**§ 13.15 [Amended]**

39. Section 13.15 *Separation of functions; ex parte communications; administrative support* is amended in paragraph (a) by removing "bureau" and replacing it with "center".

**§ 13.25 [Amended]**

40. Section 13.25 *Disclosure of data and information by the participants* is amended in paragraph (b) by removing the word "under" the second time it appears and replacing it with "that".

## PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

41. The authority citation for 21 CFR Part 14 continues to read as follows:

**Authority:** 5 U.S.C. 5332 note; 15 U.S.C. 1451 *et seq.*; 21 U.S.C. 41 *et seq.*; 141 *et seq.*, 321–371, 467f(b), 679(b), 821, 1031 *et seq.*; 42 U.S.C. 201 *et seq.*; 257a; 21 CFR 5.10.

**§ 14.1 [Amended]**

42. Section 14.1 *Scope* is amended in paragraph (a)(2)(ix) by removing "520(1)" and replacing it with "520(f)".

**§ 14.20 [Amended]**

43. Section 14.20 *Notice of hearing before an advisory committee* is amended in paragraph (b)(9) by removing "§ 14.35(c)(2)" and replacing it with "§ 14.35(d)(2)".

**§ 14.22 [Amended]**

44. Section 14.22 *Meetings of an advisory committee* is amended in paragraph (a)(1) by removing "§ 14.5(b)(4)" and replacing it with "§ 14.20(b)(4)".

**§ 14.75 [Amended]**

45. Section 14.75 *Examination of administrative record and other advisory committee records* is amended in paragraph (a)(6)(i) and (ii) by removing "§ 14.22(h)(2)" and replacing it with "§ 14.22(i)(2)".

**§ 14.80 [Amended]**

46. Section 14.80 *Qualifications for members of standing policy and technical advisory committees* is amended in paragraph (d) by removing "14.86" and replacing it with "14.84".

47. Section 14.84 is amended by revising the last sentence in paragraph (c)(1) to read as follows:

**§ 14.84. Nominations and selection of nonvoting members of standing technical advisory committees.**

* * * * *

(c) * * *

(1) * * * All nominations are to be submitted in writing to the Office of Consumer Affairs (HFE–40), Food and Drug Administration, Rm. 16–85, 5600 Fishers Lane, Rockville, MD 20857.

* * * * *

48. Section 14.100 is revised to read as follows:

VOL
54
ISS
41
MR
3
1989
UMI

**§ 14.100 List of standing advisory committees.**

Standing advisory committees and the dates of their establishment are as follows:

(a) *Office of the Commissioner—Board of Tea Experts.*

(1) Date established: March 2, 1897.

(2) Function: Advises on establishment of uniform standards of purity, quality, and fitness for consumption of all tea imported into the United States under 21 U.S.C. 42.

(b) *Center for Biologics Evaluation and Research—*

(1) *Allergenic Products Advisory Committee.*

(i) Date established: July 9, 1984.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of allergenic biological products intended for use in the diagnosis, prevention, or treatment of human disease.

(2) *Biological Response Modifiers Advisory Committee.*

(i) Date established: October 28, 1988.

(ii) Function: Reviews and evaluates data relating to the safety, effectiveness, and appropriate use of biological response modifiers which are intended for use in the prevention and treatment of a broad spectrum of human diseases.The committee will also consider the quality and relevance of FDA's research program which provides scientific support for the regulation of these products, and advise the Secretary of Health and Human Services, the Assistant Secretary for Health, and the Commissioner of Food and Drugs of its findings.

(3) *Blood Products Advisory Committee.*

(i) Date established: May 13, 1980.

(ii) Function: Reviews and evaluates data on the safety and effectiveness, and appropriate use of blood products intended for use in the diagnosis, prevention, or treatment of human diseases.

(4) [Reserved]

(5) *Vaccines and Related Biological Products Advisory Committee.*

(i) Date established: December 31, 1979.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of vaccines intended for use in the diagnosis, prevention, or treatment of human diseases.

(c) *Center for Drug Evaluation and Research*—(1) *Anesthetic and Life Support Drugs Advisory Committee.*

(i) Date established: May 1, 1978.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in the field of anethesiology and surgery.

(2) *Anti-Infective Drugs Advisory Committee.*

(i) Date established: October 7, 1980.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in infectious diseases.

(3) [Reserved]

(4) *Arthritis Advisory Committee.*

(i) Date established: April 5, 1974.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in arthritic conditions.

(5) *Cardiovascular and Renal Drugs Advisory Committee.*

(i) Date established: August 27, 1970.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in cardiovascular and renal disorders.

(6) *Dermatologic Drugs Advisory Committee.*

(i) Date established: October 7, 1980.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in the treatment of dermatologic diseases.

(7) *Drug Abuse Advisory Committee.*

(i) Date established: May 31, 1978.

(ii) Function: Advises on the scientific and medical evaluation of information gathered by the Department of Health and Human Services and the Department of Justice on the safety, efficacy, and abuse potential of drugs and recommends actions to be taken on the marketing, investigation, and control of such drugs.

(8) *Endocrinologic and Metabolic Drugs Advisory Committee.*

(i) Date established: August 27, 1970.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in endocrine and metabolic disorders.

(9) *Fertility and Maternal Health Drugs Advisory Committee.*

(i) Date established: March 23, 1978.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in the practice of obstetrics and gynecology.

(10) *Gastrointestinal Drugs Advisory Committee.*

(i) Date established: March 3, 1978.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in gastrointestinal diseases.

(11) *Oncologic Drugs Advisory Committee.*

(i) Date established: September 21, 1978.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in treatment of cancer.

(12) *Peripheral and Central Nervous System Drugs Advisory Committee.*

(i) Date established: June 4, 1974.

(ii) Function: Reviews and evaluates data on the safeety and effectiveness of marketed and investigational human drugs for use in neurological disease.

(13) *Psychopharmacologic Drugs Advisory Committee.*

(i) Date established: June 4, 1974.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in the practice of psychiatry and related fields.

(14) *Pulmonary-Allergy Drugs Advisory Committee.*

(i) Date established: February 17, 1972.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in the treatment of pulmonary disease and diseases with allergic and/or immunologic mechanisms.

(15) *Radiopharmaceutical Drugs Advisory Committee.*

(i) Date established: August 30, 1967.

(ii) Function: Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in the practice of nuclear medicine.

(d) *Center for Devices and Radiological Health—*

(1) Advisory panels and the dates of their establishments are as follows:

(i) *Anesthesiology and Respiratory Therapy Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(ii) *Circulatory System Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(iii) *Clinical Chemistry and Clinical Toxicology Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(iv) *Dental Products Panel.*

(A) Date established: March 5, 1988.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation. Reviews and evaluates data concerning the safety and effectiveness of over-the-counter (OTC) drug products for human use and makes appropriate recommendations to the Commissioner of Food and Drugs.

(v) *Ear, Nose, and Throat Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(vi) *Gastroenterology-Urology Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(vii) *General and Plastic Surgery Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(viii) *General Hospital and Personal Use Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(ix) *Hematology and Pathology Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(x) *Immunology Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(xi) *Microbiology Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(xii) *Neurological Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(xiii) *Obstetrics-Gynecology Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(xiv) *Ophthalmic Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(xv) *Orthopedic and Rehabilitation Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(xvi) *Radiologic Devices Panel.*

(A) Date established: April 14, 1984.

(B) Function: Reviews and evaluates data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

(2) *Device Good Manufacturing Practice Advisory Committee.*

(i) Date established: August 12, 1976.

(ii) Function: Reviews proposed regulations for good manufacturing practices governing the methods used in, and the facilities and controls used for, the manufacture, packing, storage, and installation of devices, and makes recommendations on the feasibility and reasonableness of the proposed regulations.

(3) *Technical Electronic Product Radiation Safety Standards Committee.*

(i) Date established: October 18, 1968.

(ii) Function: Advises on technical feasibility, reasonableness, and practicability of performance standards for electronic products to control the emission of radiation under 42 U.S.C. 263f(f)(1)(A).

(e) *National Center for Toxicological Research—Science Advisory Board.*

(1) Date established: June 2, 1973.

(2) Function: Advises on establishment and implementation of a research program that will assist the Commissioner of Food and Drugs and the Administrator, Environmental Protection Agency, in fulfilling their regulatory responsibilities.

(f) *Center for Veterinary Medicine—Veterinary Medicine Advisory Committee.*

(1) Date established: April 24, 1984.

(2) Function: Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational new animal drugs, feeds, and devices for use in the treatment and prevention of animal disease and increased animal production.

**§ 14.125 [Amended]**

49. Section 14.125 *Procedures of TEPRSSC* is amended in paragraph (d) by removing "Bureau of Radiological Health" and replacing it with "Center for Devices and Radiological Health".

**§ 14.171 [Amended]**

50. Section 14.171 *Utilization of an advisory committee on the initiative of FDA* is amended in paragraphs (d) and (e) by removing "bureau" and replacing it with "center" and in paragraph (f) by removing "314.14, 431.71," and replacing it with "314.430".

## PART 16—REGULATORY HEARING BEFORE THE FOOD AND DRUG ADMINISTRATION

51. The authority citation for 21 CFR Part 16 continues to read as follows:

**Authority:** Secs. 1 *et seq.*, 2 *et seq.*; 15 U.S.C. 401 *et seq.*, 1451 *et seq.*; secs. 1–10, 1–9, 201 *et seq.*, 24(b), 409(b), 100 *et seq.*, 2 *et seq.*; 21 U.S.C. 41–50, 141–149, 321 *et seq.*, 467f(b), 679(b), 821 *et seq.*, 1031 *et seq.*; secs. 1 *et seq.*, 4; 42 U.S.C. 201 *et seq.*, 257a; 21 CFR 5.10.

**§ 16.1 [Amended]**

52. Section 16.1 *Scope* is amended in the listings in paragraph (b)(2) by removing "§ 312.1(c)(1)", "§ 312.1(c)(4) and (d)" and "§ 312.9(c)" and replacing it with "§ 312.70", "§§ 312.70(d) and 312.44", and "§ 312.160(b)", respectively.

**§ 16.24 [Amended]**

53. Section 16.24 *Regulatory hearing required by the act or a regulation* is amended in paragraph (c) by removing "paragraph (c)" and replacing it with "paragraph (d)".

**§ 16.40 [Amended]**

54. Section 16.40 *Commissioner* is amended by removing "bureau" and replacing it with "center".

**§ 16.42 [Amended]**

55. Section 16.42 *Presiding officer* is amended in paragraph (c)(1) by removing "bureau" and replacing it with "center" everywhere that it appears.

**§ 16.119 [Amended]**

56. Section 16.119 *Reconsideration and stay of action* is amended by removing "§ 10.39" and replacing it with "§ 10.35".

## PART 20—PUBLIC INFORMATION

57. The authority citation for 21 CFR Part 20 is revised to read as follows:

**Authority:** Sec. 201 *et seq.*, Pub. L. 717, 52 Stat. 1040 *et seq.*, as amended (21 U.S.C. 321 *et seq.*); sec. 1 *et seq.*, Pub. L. 410, 58 Stat. 682 *et seq.*, as amended (42 U.S.C. 201 *et seq.*); Pub. L. 90–23, 81 Stat. 54–56 as amended by 88 Stat. 1561–1565 (5 U.S.C. 552); 21 CFR 5.10, 5.11.

**§ 20.21 [Amended]**

58. Section 20.21 *Uniform access to records* is amended in paragraph (b) by removing "§ 7.87(c)(1)" and replacing it with "§ 7.87(c)".

**§ 20.42 [Amended]**

59. Section 20.42 *Fees* is amended in paragraph (c) by removing "Accounting

Operations Branch" and replacing it with "Accounting Branch".

**§ 20.50 [Amended]**

60. Section 20.50 *Availability of records at National Technical Information Service* is amended by removing "22152" and replacing it with "22162".

**§ 20.81 [Amended]**

61. Section 20.81 *Data and information previously disclosed to the public* is amended in paragraph (a)(3) by removing "§ 312.1(a)(3)" and replacing it with "Part 312".

62. Section 20.100 is amended in paragraph (c)(13) by removing "§ 310.505(g)" and replacing it with "§ 291.505(g)", and by revising paragraphs (c)(3), (14), (15), (16), (17), and (21) to read as follows:

**§ 20.100 Applicability; cross reference to other regulations.**

* * * * *

(c) * * *

(3) Environmental assessments; finding of no significant impact, in § 25.41 of this chapter, or draft and final environmental impact statements, in § 25.42 of this chapter.

* * * * *

(14) Investigational new drug notice, in Part 312 of this chapter.

(15) Labeling for and lists of approved new drug applications, in § 314.430 of this chapter.

(16) Master files for new drug applications, in § 314.420 of this chapter.

(17) New drug application file, in § 314.430 of this chapter.

* * * * *

(21) Antibiotic drug file, in § 314.430 of this chapter.

* * * * *

**§ 20.103 [Amended]**

63. Section 20.103 *Correspondence* is amended in paragraph (b) by removing "§ 314.14(e)(7)" and replacing it with "§ 314.430".

**§ 20.112 [Amended]**

64. Section 20.112 *Voluntary drug experience reports submitted by physicians and hospitals* is amended in paragraph (a) by removing "FD-1639" and replacing it with "FDA-1639".

**§ 20.117 [Amended]**

65. Section 20.117 *New drug information* is amended in paragraph (a)(3) by removing "antibiotic Form 5's, or antibiotic Form 6's" and replacing it with "antibiotic applications" and in paragraph (b) by removing "312.5, and 314.14" and replacing it with "312.130, and 314.430", respectively.

## PART 21—PROTECTION OF PRIVACY

66. The authority citation for 21 CFR Part 21 continues to read as follows:

**Authority:** Sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a)); 5 U.S.C. 552a; 21 CFR 5.10.

**§ 21.45 [Amended]**

67. Section 21.45 *Fees* is amended in paragraph (c) by removing "Accounting Operations Branch (HFA-210)" and replacing it with "Accounting Branch (HFA-120)".

**§ 21.71 [Amended]**

68. Section 21.71 *Disclosure of records in Privacy Act Record Systems; accounting required* is amended in paragraph (e)(4) by removing "(a)(5)" and replacing it with "(a)(7)".

## PART 25—ENVIRONMENTAL IMPACT CONSIDERATIONS

69. The authority citation for 21 CFR Part 25 continues to read as follows:

**Authority:** Sec. 701, 52 Stat. 1055–1056 as amended (21 U.S.C. 371); secs. 351, 354–361, 58 Stat. 702 as amended (42 U.S.C. 262, 263b–264); sec. 102(2)(C), 83 Stat. 853 (42 U.S.C. 4332); 40 CFR Parts 1500–1508; Executive Order 11514 as amended by E.O. 11991; E.O. 12114.

70. Section 25.15 is amended by revising paragraph (c)(18) to read as follows:

**§ 25.15 Terminology.**

* * * * *

(c) * * *

(18) IND—Investigational New Drug Application.

* * * * *

**§ 25.22 [Amended]**

71. Section 25.22 *Actions requiring preparation of an environmental assessment* is amended in paragraph (a)(14) by removing "notices of claimed investigational exemption for new drugs" and replacing it with "investigational new drug applications".

**§ 25.24 [Amended]**

72. Section 25.24 *Categorical exclusions* is amended in paragraph (c)(4) by removing "Notice of Claimed Investigational Exemption for New Drug" and replacing it with "Investigational New Drug Application".

## PART 50—PROTECTION OF HUMAN SUBJECTS

73. The authority citation for 21 CFR Part 50 is revised to read as follows:

**Authority:** Secs. 201, 408, 409, 502, 503, 505, 506, 507, 510, 513–516, 518–520, 701(a), 706, and 801, Pub. L. 717, 52 Stat. 1040–1042 as amended, 1049–1054 as amended, 1055, 1058 as amended, 55 Stat. 851 as amended, 59 Stat. 463 as amended, 72 Stat. 1785–1788 as amended, 74 Stat. 399–407 as amended, 76 Stat. 794–795 as amended, 90 Stat. 540–560, 562–574 (21 U.S.C. 321, 346, 348, 352, 353, 355, 350, 357, 360, 360c–360f, 360b–360j, 371(a), 376, and 381); secs. 215, 351, 354–360F, Pub. L. 410, 58 Stat. 690, 702 as amended, 82 Stat. 1173–1186 as amended (42 U.S.C. 216, 282, 263b–263n); 21 CFR 5.10.

74. Section 50.3 is amended by revising paragraph (b)(6) and in paragraph (b)(11) by removing "Part 430" and replacing it with "§ 314.300 of this chapter" to read as follows:

**§ 50.3 Definitions.**

* * * * *

(b) * * *

(6) An investigational new drug application, described in Part 312 of this chapter.

* * * * *

## PART 56—INSTITUTIONAL REVIEW BOARDS

75. The authority citation for 21 CFR Part 56 is revised to read as follows:

**Authority:** Secs. 201, 406, 408, 409, 501, 502, 503, 505, 506, 507, 510, 513–516, 518–520, 701(a), 706, and 801, Pub. L. 717, 52 Stat. 1040–1042 as amended, 1049–1054 as amended, 1055, 1058 as amended, 55 Stat. 851 as amended, 59 Stat. 463 as amended, 68 Stat. 511–518 as amended, 72 Stat. 1785–1788 as amended, 74 Stat. 399–407 as amended, 76 Stat. 794–795 as amended, 90 Stat. 540–560, 562–574 (21 U.S.C. 321, 346, 348, 352, 353, 355, 356, 357, 360, 360b–360f, 360b–360j, 371(a), 376, and 381); secs. 215, 301, 351, 354–360F, Pub. L. 410, 58 Stat. 690, 702 as amended, 82 Stat. 1173–1186 as amended (42 U.S.C. 216, 241, 262, 263b–263n); 21 CFR 5.10.

76. Section 56.102 is amended by revising paragraph (b)(6) and in paragraph (b)(10) by removing "Part 430" and replacing it with "§ 314.300 of this chapter" to read as follows:

**§ 56.102 Definitions.**

* * * * *

(b) * * *

(6) An investigational new drug application, described in Part 312 of this chapter.

* * * * *

## PART 58—GOOD LABORATORY PRACTICE FOR NONCLINICAL LABORATORY STUDIES

77. The authority citation for 21 CFR Part 58 is revised to read as follows:

**Authority:** Secs. 306, 402(a), 406, 408, 409, 502, 503, 505, 506, 507, 510, 512–516, 518–520, 701(a), 706, 801, Pub. L. 717, 52 Stat. 1045–1046 as amended, 1049–1063 as amended, 1055, 1058 as amended, 55 Stat. 851 as amended, 59 Stat. 463 as amended, 68 Stat. 511–517 as amended, 72 Stat. 1785–1788 as amended, 76 Stat. 794 as amended, 82 Stat. 343–351, 90 Stat. 539–574 (21 U.S.C. 336, 342(a), 346, 346a, 348, 352, 353, 355, 356, 357, 360, 360b–360f, 360h–360j, 371(a), 381); secs. 215, 351, 354–360F, Pub. L. 410, 58 Stat. 690, 702 as amended, 82 Stat. 1173–1186 as amended (42 U.S.C. 216, 262, 263b–263n); 21 CFR 5.11.

78. Section 58.3 is amended by revising paragraph (e)(5) and in paragraph (e)(9) by removing "Part 430" and replacing it with "§ 314.300 of this chapter" to read as follows:

**§ 58.3 Definitions.**

* * * * *

(e) * * *

(5) An "investigational new drug application," described in Part 312 of this chapter.

* * * * *

**§ 58.195 [Amended]**

79. Section 58.195 *Retention of records* is amended in paragraph (b)(1) by removing "notices of claimed investigational exemption for new drugs" and replacing it with "investigational new drug applications".

Dated: February 23, 1989.

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

### Office of the Assistant Secretary for Public and Indian Housing

### 24 CFR Part 968

**[Docket No. R-89-1422; FR -2545]**

### Comprehensive Improvement Assistance Program

**AGENCY:** Office of the Assistant Secretary for Public and Indian Housing, HUD.

**ACTION:** Final rule.

**SUMMARY:** This final rule makes changes in the "special purpose modernization" provisions of the existing Comprehensive Improvement Assistance Program (CIAP) regulation (24 CFR Part 968) to implement statutory amendments contained in section 120 of the Housing and Community Development Act of 1987 (1987 Act), along with certain funding provisions to back up the statutory policy, as follows:

- Revision of the definition of "special purpose modernization" to expand the types of physical improvements which may be funded under a special purpose modernization program, subject to a HUD determination that the improvements are necessary and sufficient to extend substantially the useful life of the project, beyond that which it would have if such improvements were not made;
- Revision of certain public housing agency (PHA) planning provisions (five-year plan and project needs assessments), as appropriate to accommodate changes in special purpose modernization;
- Authority for HUD to establish annual funding set-asides for special purpose modernization, to assure that special purpose needs are appropriately addressed;
- Where a project has not been comprehensively modernized, a one-time limitation on use of the special purpose approach for work related to major equipment systems or structural elements, upgrading security, and reduction of vacant, substandard units; and
- For work related to the reduction of vacant, substandard units, limitations on the extent of the physical improvements that may be funded under the special modernization approach.

**EFFECTIVE DATE:** April 17, 1989.

**FOR FURTHER INFORMATION CONTACT:** Nancy S. Chisholm, Director, Policy Staff, Office of Public and Indian Housing, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 755-6640. A telecommunications device for deaf persons (TDD) is available at (202) 245-0850. (These are not toll-feee telephone numbers.)

**SUPPLEMENTARY INFORMATION:** On October 19, 1988, the Department published a notice of proposed rulemaking (53 FR 40903) to amend the "special purpose modernization" provisions of its existing regulation (24 CFR Part 968) governing the Comprehensive Improvement Assistance Program (CIAP) for public housing. After a 30-day comment period and review of the public comments received, the Department is now issuing a final rule that incorporates certain revisions in response to the public comments.

These regulatory changes reflect amendments to section 14 of the United States Housing Act of 1937 (1937 Act), as made by section 120 of the Housing and Community Development Act of 1987 (1987 Act). The changes are limited to provisions on special purpose modernization and do not modify the essential structure or objectives of the CIAP regulation. All other program requirements continue to apply to special purpose modernization, except as stated in the amended regulation. For example, special purpose modernization continues to be limited to physical improvements, and such improvements are subject to the existing *Public Housing Modernization Standards Handbook*, 7485.2 REV-1.

The Department wishes to emphasize its support for all forms of tenant involvement in the modernization process. Those forms may range from tenant participation and consultation in the development of a modernization application to actual resident management of a project. This involvement allows residents to have a voice in improving the livability of their environment. Encouraging resident management and homeownership, wherever possible, gives residents the ability to make decisions about their own lives, and to secure a better life for themselves and their families.

VOL 54 ISS 41 MR 3 1989 UMI

The Department received 10 comments on the proposed rule. Seven of these were from PHAs, two from national public housing associations, and one from an association representing retired people. Below is a discussion of each of the issues raised by the commenters, indicating the changes made in the final rule as a result of the public comments.

**1. Definition of Special Purpose Modernization (Section 968.3)**

Although none of the commenters expressed substantive objections to the revised definition of "special purpose modernization", under § 968.3, several recommended clarifying changes. The final rule adopts some of these recommendations, by revisions to the introductory clause of the definition.

In response to recommendations from several commenters, the "necessary and sufficient" condition has been revised to read as follows: "subject to a HUD determination that the physical improvements are necessary and sufficient to extend substantially the useful life of the project, *beyond that which it would have if such improvements did not occur* * * *" (emphasis supplied). The quoted language before the comma is the same as in the proposed rule, the key phrase—"necessary and sufficient to extend substantially the useful life of the project"—being the *verbatim* statutory condition. The emphasized language has been added for the sake of clarification, using the wording of identical recommendations from several commenters.

One commenter suggested that, although there should be room for judgment in implementing the "necessary and sufficient" condition, the term "extend substantially" should be defined. The Department believes that the added phrase quoted above provides appropriate guidance for the kind of judgment which the statute requires on this point.

Another clarification is the parenthetical phrase "(examples cited in each category are for illustration only)", which has been inserted at the end of the introductory clause of the § 968.3 definition. While approving of the examples of special purpose work items cited in paragraphs (1) and (2) of the proposed definition, some commenters expressed concern that the examples might be construed as being the only eligible improvements permitted under those two paragraphs. As the quoted insertion makes clear, these examples do not exclude any other work items that meet the primary definitional terms.

One commenter recommended that paragraph (3) of the definition—regarding work items to increase accessibility for elderly and handicapped families—be revised to state that the addition, replacement or rehabilition of facilities necessary for the provision of supportive special services are eligible work items. Accessibility needs for non-dwelling as well as dwelling facilities may be addressed by a special purpose program, but the Department believes that no change from the proposed rule is required to make that clear.

The 1987 Act speaks of "physical improvements to increase *accessibility* for elderly and handicapped families" (emphasis supplied). Consequently, improvements to tenant services facilities, or to other dwelling or non-dwelling facilities, could be funded under this type of special purpose modernization only if justified on grounds of accessibility. The Department believes that, with regard to tenant services facilities or other dwelling or non-dwelling facilities, the primary intent of the statute is the retrofitting of existing facilities to "increase accessibility", and not to add major facilities to accommodate tenant services. (If justified on the basis of project needs and applicable modernization standards, new tenanat services facilities that are not required for accessibility might be added with funding provided under a comprehensive program.)

Accessibility needs, including those related to facilities for tenant services or other non-dwelling facilities, are subject to the same standards under either comprehensive or special purpose modernization, and the changes made by this final rule are not intended to imply any change in those standards. The final rule refers to the general standards for accessibility for programs administered by HUD (24 CFR Part 8; see especially 24 CFR 8.21, Non-housing facilities. See also the *Public Housing Modernization Standards Handbook*, 7485.2 REV-1, paragraph 2-8B, Community Services Facilities.)

One commenter recommended that the proposed definition be revised to state that conditions which qualify work for emergency modernization must govern over categorical definitions. The commenter pointed out that, while the repair of an elevator might come within the category of "major systems" under the special purpose definition, the elevator's condition at the time of application may require that its repair be classified and funded as emergency modernization, rather than as special purpose.

The Department believes that this point is already covered by the § 968.3 definition of "emergency modernization" and by the emphasis, in the application processing procedures of § 968.5, on consideration of the relative urgency of needed improvements. The same types of work items now eligible for special purpose modernization under the various categories listed in § 968.3 could possibly be funded under the emergency—rather than the special purpose—category, where it can be shown that the situation poses a genuine emergency. The amendments to the special purpose provisions are not intended to change the priorities and procedures for addressing emergency needs.

**2. Special Purpose Funding Set-Aside (Section 968.5(h)(4))**

All comments on the proposed authorization for HUD to establish annual set-asides for special purpose funding (§ 968.5(h)(4)) expressed approval of the general set-aside concept, including the fact that special purpose applications would be ranked separately, so that they would not have to compete with comprehensive modernization for the set-aside funds. The final rule makes no change in this section. The regulation does not specify any fixed amount; it merely authorizes HUD to establish special purpose set-asides, leaving the amounts to be determined and announced by HUD on a year-to-year basis, in the Department's annual CIAP processing notices.

While endorsing the concept of annual set-asides, several commenters objected to the statement, in the preamble of the proposed rule, that for Federal Fiscal Year (FFY) 1989 HUD intended to establish Regional set-asides for special purpose modernization at 20 percent of total funds available. These commenters were of the opinion that a 20 percent set-aside would be insufficient to address special purpose needs.

Subsequent to publication of the proposed rule, the Department issued the FFY 1989 processing notice (PIH 88-45 (PHA), dated December 2, 1988), as necessitated by the time constraints for processing PHA applications for CIAP funds available for the current year. That notice set the FFY 1989 special purpose set-aside at 20 percent of total CIAP funds.

The Department believes that the 20 percent level is appropriate for first-year implemention of the new special purpose provisions, but emphasizes that the percentage in subject to change for subsequent FFYs, if found justified on the basis of experience in administering the amended regulation. If the full 20 percent is used for special purpose needs, that will leave 80 percent for all other categories—comprehensive, emergency, homeownership and lead-based paint removal modernization. Looking to subsequent years, implementation of the Comprehensive Grant Program (see proposed rule, 53 FR 43648, October 27, 1988) would have a major impact, making the issue irrelevant for PHAs with more than 500 units.

The Department believes this initial set-aside is a reasonable response to the Congressional mandate, considering the 1987 Act's special purpose amendments in the proper perspective of the whole of section 14 of the 1937 Act, as amended. The Department believes that Congress intended that comprehensive modernization remain the primary agenda for the CIAP, subject to greater flexibility to address certain types of physical improvement needs through special purpose modernization. While the congressional directive substantially expands the scope of special purpose modernization, it still characterizes it in terms of exception, limited to physical improvements that are "necessary and sufficient to extend substantially the useful life of the project". As discussed at some length in the preamble to the proposed rule, the intent was to allow special purpose modernization to be used only when there is good reason to proceed with limited physical improvements rather than with a comprehensive program.

While supporting the set-aside concept, two commenters recommended that the Department devise a mechanism to assure that the full amount of the set-aside funding be used for special purpose programs. These commenters recommended that, if the special purpose demands in a particular region should not require the full amount of the Regional Office set-aside, the remaining funds be redistributed for special-purpose use in other high-demand regions.

The final rule does not adopt this recommendation. The total Regional fund allocations are based on relative need, taking account of all modernization categories. The fact that a proposed physical improvement may be eligible for funding under the special purpose category does not necessarily mean that it is more urgent than improvements proposed under other categories. It is likely that the full amounts of all of the FY 1989 Regional set-asides will be required to fund special purpose improvements. If, however, a particular Region should have insufficient special purpose applications of good quality, the remainder of the set-aside funds may be used in the same Region for higher priority applications in other categories.

**3. Special Limitations and Project Needs Assessments (Sections 968.10 and 968.5(h)(5))**

Most of the commenters objected to the limitations on certain types of special purpose modernization, as stated in § 968.10 of the proposed rule. For improvements related to major equipment systems or structural elements, security, and reduction of vacant, substandard units, it was proposed that a PHA be permitted to obtain special purpose funding only once for a project that has not been comprehensively modernized. PHA eligibility for special purpose modernization funds to reduce the number of vacant, substandard units was limited to work necessary to meet local code requirements and return the units to a condition comparable to that of the occupied units in the same project. In addition, eligibility for special purpose funds to reduce the number of vacant, substandard units would have been limited to PHAs with no more than 30 average turnover vacancy days for units on the market.

The one-time funding limitation (§ 968.10(a)) has been retained, but with a revision to make it clear that it applies only to projects that have not been comprehensively modernized. There is no limit on the number of times special purpose modernization may be used for the same project, after the project has been comprehensively modernized. In any event, this limitation applies only to the three types of improvements specified, and not to the other two types of eligible special purpose improvements—work related to accessibility and energy efficiency.

This one-time limitation reflects the Department's concern about the possible over-use of special purpose modernization, especially for projects that are in need of comprehensive modernization. In the past, so-called "piecemeal" modernization has sometimes made small improvements in projects where comprehensive modernization was needed, and the improvements were quickly overwhelmed by the project's management and social problems, along with unmet needs for more extensive physical improvements.

After the first year of experience in administering the special purpose changes, the Department will review this issue and consider whether any changes might be merited, through a further rulemaking proposal. One possibility would be to exempt from the one-time funding limitation those PHAs which meet the performance standards that have been developed jointly by the Department and the PHAs under the Decontrol Initiative. A major consideration will be the implementation of the Comprehensive Grant Program, which will make this and all other special purpose issues irrelevant for PHAs with more than 500 units.

With regard to the second of the limitations contained in the proposed rule (§ 968.10(b)), the Department has responded to the public comments by removing the language that would have barred a PHA from using the special purpose approach to vacancy reduction if its average turnover vacancy period for units on the market exceeded 30 days. The language limiting the scope of the improvements to vacant, substandard units has been retained.

As a related matter, one commenter objected to the proposed revision on PHA assessment of project needs, under § 968.5(e)(2). This provision requires a comprehensive needs assessment for special purpose applications, except that a specialized needs assessment will suffice where special purpose funding for a particular project is limited to accessibility or energy improvements and there is no evidence of major problems that justify a more thorough examination of total project needs. The commenter recommended that a specialized assessment be permitted for all special purpose applications, even if not limited to accessiblity or energy improvements.

The final rule makes no change in the proposed § 968.5(e)(2). The three types of physical improvements which necessitate a comprehensive needs assessment (improvements related to major equipment systems or structural elements, upgrading security, and reduction of the number of vacant, substandard units) are the same as those which are subject to the one-time funding limitation of § 968.10(a). On the same rationale discussed above in reference to § 968.10(a), needs for these three types of improvements tend to raise the issue of whether they will be sufficient of themselves to "extend substantially the useful life of the project", so that the safeguard of a comprehensive needs assessment is justified whenever a special purpose application involves any of the three.

VOL 54 ISS 41 MR 3 1989 UMI

**Other Matters**

A Finding of No Significant Impact with respect to the environment was made in accordance with HUD regulations at 24 CFR Part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection and copying during regular business hours in the Office of the Rules Docket Clerk, Room 10276, 451 Seventh Street, SW., Washington, DC 20410.

This rule does not constitute a "major rule", as that term is defined in section 1(b) of Executive Order 12291 issued by the President on February 17, 1981. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Under the Regulatory Flexibility Act (5 U.S.C. 601), the undersigned hereby certifies that this rule will not have a significant economic impact on a substantial number of small entities. The rule expands the definition of special purpose modernization, to permit CIAP funding to be used under special purpose modernization programs for the four additional types of physical improvements now authorized by statute, and prescribes certain conditions and procedures for such funding. It will thus tend to give PHAs more flexibility and tend to make their modernization efforts less burdensome.

The rule applies to all PHAs, large and small, which apply for special purpose modernization funds. It will not have a significant economic impact on any HUD assistance recipients, including small PHAs or any other small entities.

This rule was listed as sequence number 1060 under the Office of Public and Indian Housing in the Department's semiannual agenda of regulations published on October 24, 1988 (53 FR 42010) under Executive Order 12291 and the Regulatory Flexibility Act.

Information collection requirements under Part 968, as amended by this rule, are no more burdensome than those contained in the provisions of the regulation that were in effect prior to these special purpose amendments.

This rule has been developed in accordance with Executive Order 12612, Federalism, and determined not to have substantial direct effects on the States (including their political subdivisions), or on the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of governments. The changes are consistent with federalism principles because they afford PHAs greater flexibility in their local modernization programs.

This rule has been developed in accordance with Executive Order 12606, The Family. It does not have a potentially significant impact on family formation, maintenance and general well-being. Wise use by the PHAs of the added flexibility afforded them by this rule will have a beneficial effect on the availability of public housing for lower-income families.

(The Catalog of Domestic Assistance numbers for the programs affected by this rule are 14.850, 14.851, and 14.852.)

**List of Subjects in 24 CFR Part 968**

Loan programs: housing and community development, Public housing, Reporting and recordkeeping requirements, Grant programs: housing and community development, Indians.

Accordingly, 24 CFR Part 968 is amended as follows:

## PART 968—COMPREHENSIVE IMPROVEMENT ASSISTANCE PROGRAM

1. The authority citation for Part 968 continues to read as follows:

**Authority:** Secs. 6 and 14, United States Housing Act of 1937 (42 U.S.C. 1437d, 1437l); sec. 7(d) Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. In § 968.3, the definition of "Special purpose modernization" is revised to read as follows:

**§ 968.3 Definitions.**

* * * * *

"Special purpose modernization" means a modernization program for a project that is limited to any one or more of the following types of physical improvements otherwise eligible for CIAP funding under this part, subject to a HUD determination that the physical improvements are necessary and sufficient to extend substantially the useful life of the project, beyond that which it would have if such improvements were not made (examples cited in each category are for illustration only):

(1) Physical improvements to replace or repair major equipment systems (such as elevators and heating, cooling, electrical, and water and sewer systems) or structural elements (such as roofs, walls and foundations);

(2) Physical improvements to upgrade security, such as installation of additional lighting, security screens on windows, better locks, or design changes to enhance security (excluding non-physical improvements, such as security staffing and services);

(3) Physical improvements to increase accessibility for elderly and handicapped families, according to the applicable standards of 24 CFR Part 8;

(4) Physical improvements to reduce the number of units which are vacant and substandard, including any improvements necessary to meet local code requirements and return the units to occupancy; and

(5) Cost-effective physical improvements to increase the energy efficiency of the project.

3. In § 968.5, the references in paragraphs (h)(2)(iii) and (h)(3) to "special purpose" and the commas immediately preceding those words are removed, paragraphs (c)(1) and (e)(2) are revised, and a new paragraph (h)(4) is added as follows:

**§ 968.5 Procedures for obtaining approval of a modernization program.**

* * * * *

(c) * * *

(1) A five-year plan, which is the PHA's initial comprehensive assessment of the modernization funds to be requested over a five-year period to meet the total physical and management improvement needs of its projects for all categories of modernization authorized by this part. The plan shall include a gross estimate of the modernization funds to be requested for each project.

* * * * *

(e) * * *

(2) Completing an assessment of the needs of each project for which the PHA is requesting funds in the current FFY. The PHA will complete a detailed, comprehensive assessment, in a form prescribed by HUD, of the total physical and management needs of each project for which the PHA is requesting comprehensive or special purpose modernization; except that if the request for a particular project is limited to physical improvements to increase accessibility for elderly and handicapped families and to increase energy efficiency, a specialized assessment will be completed unless HUD determines that there is evidence indicating that the project has major problems that justify a comprehensive assessment. An assessment of specialized physical improvement needs will be completed for each project for which the PHA is requesting emergency, homeownership or lead-based paint modernization.

* * * * *

(h) * * *

(4) HUD may set aside for special purpose modernization a portion of the total modernization funds available for any FFY, as determined by HUD to be necessary to assure that special purpose needs are appropriately addressed.

* * * * *

**§ 968.9 [Amended]**

4. In § 968.9, paragraph (h)(4) is amended by revising the reference to "§ 968.19" to read "§ 968.20".

**§§ 968.10 through 968.19 [Redesignated as §§ 968.11 through 968.20]**

5. Sections 968.10 through 968.19 are redesignated as §§ 968.11 through 968.20, respectively, and a new § 968.10 is added, to read as follows:

**§ 968.10 Additional limitations for special purpose modernization.**

(a) For each of the three types of special purpose modernization relating to major equipment systems or structural elements, security, and reduction of vacant, substandard units, a PHA may obtain special purpose modernization funding only once for a project that has not been comprehensively modernized. Subsequent funding for the same project for any additional physical improvements of these types may be provided only as a part of a program which addresses all of the physical and management improvement needs of the project under a comprehensive modernization program. This limitation does not apply to a project which has been comprehensively modernized.

(b) Special purpose modernization to reduce the number of vacant, substandard units will be limited to physical improvements which are necessary to meet local code requirements and return such units to a condition that is comparable to the condition of occupied units in the same project.

**§ 968.14 [Amended]**

6. In § 968.4(a), the reference to "§ 968.18" is revised to refer to "§ 968.19".

**§ 968.8 [Amended]**

7. In § 968.8(b)(3), the reference to "§ 968.10" is revised to refer to "§ 968.11".

**§ 968.14 [Amended]**

8. In newly redesignated § 968.14 the reference in paragraph (b) to "§ 968.14" is revised to refer to "§ 968.15".

Dated: February 21, 1989.

**Thomas Sherman,**

*Acting General Deputy Assistant Secretary for Public and Indian Housing.*

BILLING CODE 4210-33-M

## DEPARTMENT OF JUSTICE

### Office of the Attorney General

### 28 CFR Part 64

**[Order No. 1328-89]**

### Judicial Administration; Designation of Officers and Employees of The United States for Coverage Under Section 1114 of Title 18 of the United States Code

**AGENCY:** U.S. Department of Justice.

**ACTION:** Final rule.

**SUMMARY:** Part 64 of Title 28, Code of Federal Regulations, designates categories of federal officers and employees who, in addition to those already designated by statute, warrant the protective coverage of federal criminal law. This assures federal jurisdiction to prosecute the killing, attempted killing, kidnapping, forcible assault, intimidation or interference with any of the federal officers or employees designated by this regulation while they are engaged in or on account of the performance of their official duties. This order amends 28 CFR Part 64 by adding employees of the Social Security Administration assigned to Administration field offices, hearing offices, and field assessment offices; United States Information Agency Security Office Special Agents; and employees of the United States Nuclear Regulatory Commission who are engaged in activities related to the review of license applications and license amendments to the list of covered federal officers and employees set forth in 28 CFR 64.2.

**EFFECTIVE DATE:** February 24, 1989.

**FOR FURTHER INFORMATION CONTACT:** Roger B. Cubbage, Deputy Chief, Martin C. Carlson, Senior Legal Advisor, or Donald B. Nicholson, Attorney, General Litigation and Legal Advice Section, Criminal Division, Department of Justice, Washington, DC. 20530 (202-786-4827).

**SUPPLEMENTARY INFORMATION:** Part K of Chapter X of the Comprehensive Crime Control Act of 1984, Pub. L. 98-473, Title II, section 1012, 98 Stat. 1976, 2142 (1984) amended 18 U.S.C. 1114, which prohibits the killing of designated federal employees, to authorize the Attorney General to add by regulation other federal personnel who will be protected by this section. The categories of federal officers and employees covered by section 1114 are, by incorporation, also protected, while engaged in or on account of the performance of their official duties, from a conspiracy to kill, 18 U.S.C. 1117; kidnapping, 18 U.S.C. 1201(a)(5); forcible assault, interference, or intimidation, 18 U.S.C. 111; and threat of assault, kidnap or murder with intent to impede or intimidate, 18 U.S.C. 115. Consistent with the legislative history and purpose of section 1114, this protective coverage has been extended by 28 CFR Part 64 to those federal officers and employees whose jobs involve inspection, investigative or other law enforcement responsibilities or whose work involves a substantial degree of physical danger from the public that may not be adequately addressed by available state or local law enforcement resources.

Field employees of the Social Security Administration have been assaulted and threatened by visitors to field offices, and a number of Nuclear Regulatory Commission personnel involved in license hearings and adjudications have received threats. Therefore, their coverage under these regulations is appropriate. The former are added as new subsection (v) of 28 CFR 64.2, and the latter by amendment of subsection (m). United States Information Agency Security Officer Special Agents perform a wide variety of investigative and law enforcement functions and have on occasion been threatened. Their inclusion within these regulations is appropriate, and they have been added as new subsection (w).

Because the material contained herein involves only three federal agencies and is thus of limited and not general effect, the Department of Justice finds inapplicable the provision of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date.

The Department of Justice has determined that this Order is not a major rule for purposes of either Executive Order 12291, or the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*

**List of Subjects in 28 CFR Part 64**

Crime, Government employees, and Law enforcement officers.

VOL 54 ISS 41 MR 3 1989 UMI

By virtue of the authority vested in me by 28 U.S.C. 509, 5 U.S.C. 301, and 18 U.S.C. 1114, Part 64 of Chapter I of Title 28, Code of Federal Regulations, is hereby amended as follows:

1. The authority for Part 64 continues to read as follows:

**Authority:** 18 U.S.C. 1114, 28 U.S.C. 509, 5 U.S.C. 301.

**§ 64.2 [Amended]**

2. Section 64.2 is amended by revising paragraph (m), to read as follows:

(m) Officers and employees of the United States Nuclear Regulatory Commission assigned to perform or to assist in performing investigative, inspection, or law enforcement functions; or who are engaged in activities related to the review of license applications and license amendments;

3. Section 64.2 is amended by adding a new paragraph (v), to read as follows:

(v) Employees of the Social Security Administration assigned to Administration field offices, hearing officers, and field assessment officers; and

4. Section 64.2 is amended by adding a new paragraph (w), to read as follows:

(w) United States Information Agency Security Office Special Agents.

5. Section 64.2 is amended by removing the final word, "and", from paragraph (t) and by removing the period at the end of paragraph (u) and inserting in its place a semicolon.

Date: February 24, 1989.

**Dick Thornburgh,**

*Attorney General.*

BILLING CODE 4410-01-M

## DEPARTMENT OF LABOR

### Occupational Safety and Health Administration

### 29 CFR Part 1952

### Approved State Plans for Enforcement of State Standards; Approval of Supplements to the Wyoming State Plan

**AGENCY:** Occupational Safety and Health Administration (OSHA), Labor.

**ACTION:** Approval of supplements to the Wyoming State Plan.

**SUMMARY:** This document gives notice of Federal approval of amendments to the Wyoming Occupational Health and Safety Act and to the Wyoming Rules of Practice and Procedure. The amendments to the Act and rules involve contested cases, hearings, discrimination, petitions for modification of abatement, and other technical changes.

**EFFECTIVE DATE:** March 3, 1989.

**FOR FURTHER INFORMATION CONTACT:** James F. Foster, Director, Office of Information and Consumer affairs, Occupational Safety and Health Administration, Room N3647, 200 Constitution Avenue NW., Washington, DC 20210. Telephone (202) 523-8148.

**SUPPLEMENTARY INFORMATION:**

**Background**

The Wyoming Occupational Health and Safety (WOHS) Plan was approved under section 18(c) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667(c)) (hereinafter referred to as the Act) and Part 1902 of this chapter on May 3, 1974 (39 FR 15394). A determination of final approval was made under section 18(e) of the Act on June 27, 1985 (50 FR 28770). Part 1953 of this chapter provides procedures for the review and approval of State plan change supplements by the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter referred to as the Assistant Secretary).

**Description of Supplements**

*Wyoming Occupational Health and Safety Act*

The State submitted a State plan change supplement concerning amendments to its Occupational Health and Safety Act (Laws 1983, Ch. 172) in April 1984. The amendments to the Wyoming Act are as follows: modifying the powers and duties of the Occupational Health and Safety Commission; abolishing the power of the review board and the Commission to hear contested cases and providing for an independent hearing officer; providing a procedure for hearings and appeals whereby the Commission makes final administrative decisions in contested cases and the party adversely affected may appeal to the District Court in the county where the violation allegedly occurred; providing for enforcement of the commission's decisions; requiring written notification to employers of their right to refuse entry; creating the Department of Occupational Health and Safety; and, making penalties for posting violations discretionary.

The amendment to the State law which clarifies that penalties for posting violations are discretionary differs from the Federal law in that the Federal law provides mandatory penalties for posting violations. However, the State's guidelines on exercising discretion in proposing penalties for posting violations, as set forth in the Wyoming Operations Manual, require mandatory penalties to be calculated and assessed for the same categories of posting violations as are required pursuant to OSHA policy and procedures. This State provision is being approved subject to continued monitoring and if monitoring reveals less effective application of penalties for posting violations, the State will be required to seek a legislative change.

*Wyoming Rules of Practice and Procedure*

The State submitted amendments to its Rules of Practice and Procedure (Laws 1969, ch. 199, 1.) on May 17, 1983, and subsequent revisions on October 27, 1983, December 13, 1983, and May 22, 1984. The Rules of Practice and Procedure (change 1) were revised because of changes made to the Wyoming Occupational Health and Safety Act in the areas of contested cases, hearings, discrimination, petitions for modification of abatement, and other technical changes. The amendments are as follows:

(1) Chapters I—Introduction, II—Safety Rules and Regulations and III—Variances, have been revised to make them consistent with technical statutory changes made in the Act such as: statutory recodification; clarification of definitions for deminimis violation and party; changing terminology ("failure to abate" to "failure to correct"); changing "Assistant Administrator" to "Department" to more appropriately assign the responsibility for research to the Department of Occupational Health and Safety rather than a position; and, clarifying the requirements for temporary and permanent variances.

(2) Chapter IV—Enforcement, Sections 2.h.(1) through (3) and 2M. and N., have been revised to clarify the Administrator's authority to approve petitions for modification of abatement. A new section was added providing affected employers, and employees or employee representatives who have filed objections, the right to contest the decision of the Chairman.

(3) Chapter IV—Enforcement, Section 4.a.(5), has been revised to eliminate the Review Board and to provide for a hearing officer to hear contested cases. The hearing officer recommends a decision to the Commission for a final administrative decision.

(4) Chapter IV—Enforcement, Section 7.b.(1)(c), has been revised to clarify the Agency's procedure for processing allegations of discrimination, including compensation for the employees for actual harm suffered as a result of discrimination and the Administrator's responsibility to issue a notice of violation when discrimination is found.

(5) Chapter IX—Hearings has been revised to clarify the Agency's burden of proof in contested cases by stating that "The Department shall have the burden of proof in all cases in which Department action is contested" and "the employer shall have the burden to produce evidence of any affirmative defense it may have to any Department action"; to extend authority for all types of hearings allowed by the Act; and, to make the sections consistent with other technical statutory changes made to its Occupational Health and Safety Act.

**Location of Plan Supplement for Inspection and Copying**

A copy of the plan and its supplements may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 1554, Federal Building, 1961 Stout Street, Denver, Colorado 80202; Wyoming Department of Occupational Health and Safety, 604 East 25 Street, Cheyenne, Wyoming 82002; and the OSHA Office of the Director of Federal-State Operations, Room N3700, 200 Constitution Avenue NW., Washington, DC 20210.

**Public Participation**

Under § 1953.2(c) of this chapter the Assistant Secretary may prescribe alternative procedures to expedite the review process or for any other good cause which may be consistent with law. The Assistant Secretary finds that the State amendments to its Occupational Health and Safety Act and to its Rules of Practice and Procedure were adopted in accordance with procedural requirements of State law, which included the opportunity for public participation. Good cause is therefore found for approval of this supplement and further public participation would be unnecessary.

**Decision**

After careful consideration and extensive review by the Regional and National Offices, the Wyoming plan supplements described above are found to be at least as effective as comparable Federal provisions and are hereby approved under Part 1953 of this chapter. However, the amendment to the State law which clarifies that penalties for posting violations are discretionary is approved subject to continued monitoring and if monitoring reveals less effective application of penalties for posting violations, the State will be required to seek a legislative change. This decision incorporates the requirements of the Act and implementing regulations applicable to State plans generally.

**List of Subjects in 29 CFR Part 1952**

Intergovernmental relations, law enforcement, Occupational Safety and Health.

Signed at Washington, DC this 27th day of February, 1989.

**John A. Pendergrass,**

*Assistant Secretary.*

Accordingly, 29 CFR Part 1952 is hereby amended as follows:

**PART 1952—[AMENDED]**

The authority citation for Part 1952 continues to read:

**Authority:** Secs. 8, 18, Pub. L. 91-596, 84 Stat. 1608 Occupational Safety and Health Act of 1970 (29 U.S.C. 657, 667); Secretary of Labor's Order No. 12-71 (36 FR 8754), 8-76 (41 FR 25059), or 9-83 (48 FR 35736), as applicable.

2. A new § 1952.347 is added to Subpart BB to read as follows:

**§ 1952.347 Changes to approved plans.**

In accordance with part 1953 of this chapter, the following Wyoming plan changes were approved by the Assistant Secretary:

(a) *Legislation.* (1) The State submitted amendments to its Occupational Health and Safety Act (Laws 1983, Ch. 172), which became effective on May 27, 1983, modifying the powers and duties of the Occupational Health and Safety Commission, abolishing the powers of the review board and Commission to hear contested cases and establishing an independent hearing officer to hear contested cases, providing procedures for hearings and appeals whereby the Commission makes final administrative decisions in contested cases and the party adversely affected may appeal to the District Court, making penalties for posting violations discretionary (although the State guidelines on penalties for posting violations parallel OSHA's and are set forth in the Wyoming Operations Manual), requiring written notification to employers of their right to refuse entry, and creating the Department of Occupational Health and Safety. The Assistant Secretary approved these amendments on February 27, 1989.

(b) *Regulations.* (1) The State submitted amendments to its Rules of Practice and Procedure pertaining to contested cases, hearings, discrimination, and petitions for modification of abatement; and making the regulations consistent with other statutory changes made to its Occupational Health and Safety Act which became effective on September 6, 1984, except amendment to Chapter IV, Enforcement which became effective on March 28, 1985. The Assistant Secretary approved these amendments on February 27, 1989.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 62

**[A-1-FRL-3531-1]**

### Approval and Promulgation of State Air Quality Implementation Plans for Designated Facilities and Pollutants; Negatives Declarations; Connecticut et al.

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** Regulations promulgated under the provisions of Section 111(d) of the Clean Air Act require states to submit plans to EPA to control emissions of designated pollutants from designated facilities. Section 62.06 of 40 CFR Part 62 provides that when no such designated facilities exist within a state's boundaries, a letter of "negative declaration" may be submitted in lieu of a control plan. The States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont have submitted negative declarations certifying that certain types of designated facilities are not located within their States. EPA is approving negative declarations of fluoride emissions from primary aluminum reduction plants submitted by the States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont, and negative declarations of total reduced sulfur from kraft pulp mills submitted by the States of Connecticut, Massachusetts, Rhode Island and Vermont.

**EFFECTIVE DATE:** This action will become effective May 2, 1989, unless notice is received within 30 days of publication that adverse or critical comments will be submitted.

**ADDRESSES:** Comments may be mailed to Louis F. Gitto, Director, Air Management Division, U.S. Environmental Protection Agency, Region I, JFK Federal Building, Room 2313, Boston, MA 02203. Copies of the

VOL
54
ISS
41
MR
3
1989
UMI

documents relevant to this action are available for public inspection during normal business hours at the Air Management Division, U.S. Environmental Protection Agency, Region I, JFK Federal Building, Room 2313, Boston, MA 02203.

**FOR FURTHER INFORMATION CONTACT:** David B. Conroy, (617) 565-3252; FTS 835-3252.

**SUPPLEMENTARY INFORMATION:** Pursuant to section 111(d) of the Clean Air Act, EPA promulgated regulations at 40 CFR Part 60, Subpart B, which require States to submit control plans to control emissions of designated pollutants from designated facilities. In the event that a State does not have a particular designated facility located within its boundaries, EPA requires that a negative declaration be submitted.

On December 28, 1988, the Connecticut Department of Environmental Protection submitted a letter certifying that there are no existing kraft pulp mills or existing primary aluminum reduction plants in the State subject to 40 CFR Part 60, Subpart B. EPA is codifying these negative declarations in 40 CFR 62.1650 and 62.1700, respectively.

On October 3, 1988, the Maine Department of Environmental Protection submitted a letter certifying that there are no existing primary aluminum reduction plants in the State subject to 40 CFR Part 60, Subpart B. EPA is codifying this negative declaration in 40 CFR 62.4875.

On July 31, 1979, the Massachusetts Department of Environmental Quality Engineering (DEQE) submitted a letter certifying that there are no existing kraft pulp mills in the State subject to 40 CFR Part 60, Subpart B, and on January 18, 1989, the Massachusetts DEQE submitted a letter certifying that there are no existing primary aluminum reduction plants in the State subject to 40 CFR Part 60, Subpart B. EPA is codifying these negative declarations in 40 CFR 62.5375 and 62.5400, respectively.

On January 3, 1989, the New Hampshire Air Resources Division submitted a letter certifying that there are no existing primary aluminum reduction plants in the State subject to 40 CFR Part 60, Subpart B. EPA is codifying this negative declaration in 40 CFR 62.7400.

On July 26, 1979, the Rhode Island Department of Environmental Management (DEM) submitted a letter certifying that there are no existing kraft pulp mills in the State subject to 40 CFR Part 60, Subpart B, and on December 8, 1988, the Rhode Island DEM submitted a letter certifying that there are no existing primary aluminum reduction plants in the State subject to 40 CFR Part 60, Subpart B. EPA is codifying these negative declarations in 40 CFR 62.9900 and 62.9950, respectively.

On August 2, 1979, the Vermont Department of Environmental Conservation submitted a letter certifying that there are no existing kraft pulp mills in the State subject to 40 CFR Part 60, Subpart B, and on January 4, 1989, the Vermont Agency of Environmental Conservation submitted a letter certifying that there are no existing primary aluminum reduction plants in the State subject to 40 CFR Part 60, Subpart B. EPA is codifying these negative declarations in 40 CFR 62.11400 and 62.11425, respectively.

EPA is codifying these negative declarations without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective 60 days from the date of this **Federal Register** notice unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective on May 2, 1989.

## Final Action

EPA is approving negative declarations of fluoride emissions from primary aluminum reduction plants submitted by the States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont, and negative declarations of total reduced sulfur from kraft pulp mills submitted by the States of Connecticut, Massachusetts, Rhode Island and Vermont.

Under 5 U.S.C. section 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 2, 1989. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

## List of Subjects in 40 CFR Part 62

Administrative practice and procedure, Air pollution control, Aluminum, Fluoride, Intergovernmental relations, Paper and paper products industry, Reporting and recordkeeping requirements.

*Regional Administrator, Region I.*

Title 40 of the Code of Federal Regulations, Part 62, Subparts H, U, W, EE, OO, and UU are amended as follows:

## PART 62—[AMENDED]

1. The authority citation for Part 62 continues to read as follows:

**Authority:** 42 U.S.C. 7401–7642

2. Subpart H is amended by adding an undesignated center headings and §§ 62.1650 and 62.1700 to read as follows:

### Subpart H—Connecticut

### Total Reduced Sulfur Emissions From Existing Kraft Pulp Mills

**§ 62.1650 Identification of plan—negative declaration.**

The State Department of Environmental Protection submitted on December 28, 1988, a letter certifying that there are no existing kraft pulp mills in the State subject to Part 60, Subpart B of this chapter.

### Fluoride Emissions From Existing Primary Aluminum Plants

**§ 62.1700 Identification of plan—negative declaration.**

The State Department of Environmental Protection submitted on December 28, 1988, a letter certifying that there are no existing primary aluminum reduction plants in the State subject to Part 60, Subpart B of this chapter.

3. Subpart U is amended by adding an undesignated center heading and § 62.4875 to read as follows:

### Subpart U—Maine

### Fluoride Emissions From Existing Primary Aluminum Plants

**§ 62.4875 Identification of sources—negative declaration.**

The State Department of Environmental Protection submitted on October 3, 1988, a letter certifying that there are no existing primary aluminum reduction plants in the State subject to Part 60, Subpart B of this chapter.

4. Subpart W is amended by adding an undesignated center headings and §§ 62.5375 and 62.5400 to read as follows:

### Subpart W—Massachusetts

### Total Reduced Sulfur Emissions From Existing Kraft Pulp Mills

**§ 62.5375 Identification of plan—negative declaration.**

The State Department of Environmental Quality Engineering submitted on July 31, 1979, a letter certifying that there are no existing kraft pulp mills in the State subject to Part 60, Subpart B of this chapter.

### Fluoride Emissions From Existing Primary Aluminum Plants

**§ 62.5400 Identification of plan—negative declaration.**

The State Department of Environmental Quality Engineering submitted on January 18, 1989, a letter certifying that there are no existing primary aluminum reduction plants in the State subject to Part 60, Subpart B of this chapter.

5. Subpart EE is amended by adding an undesignated center heading and § 62.7400 to read as follows:

### Subpart EE—New Hampshire

### Fluoride Emissions From Existing Primary Aluminum Plants

**§ 62.7400 Identification of sources—negative declaration.**

The State Air Pollution Control Agency submitted on January 3, 1989, a letter certifying that there are no existing primary aluminum reduction plants in the State subject to Part 60, Subpart B of this chapter.

6. Subpart OO is amended by adding an undesignated center headings and §§ 62.9900 and 62.9950 to read as follows:

### Subpart OO—Rhode Island

### Total Reduced Sulfur Emissions From Existing Kraft Pulp Mills

**§ 62.9900 Identification of plan—negative declaration.**

The State Department of Environmental Management submitted on July 26, 1979, a letter certifying that there are no existing kraft pulp mills in the State subject to Part 60, Subpart B of this chapter.

### Fluoride Emissions From Existing Primary Aluminum Plants

**§ 62.9950 Identification of plan—negative declaration.**

The State Department of Environmental Management submitted on December 8, 1988, a letter certifying that there are no existing primary aluminum reduction plants in the State subject to Part 60, Subpart B of this chapter.

7. Subpart UU is amended by adding an undesignated center headings and §§ 62.11400 and 62.11425 to read as follows:

### Subpart UU—Vermont

### Total Reduced Sulfur Emissions From Existing Kraft Pulp Mills

**§ 62.11400 Identification of plan—negative declaration.**

The State Agency of Environmental Conservation submitted on August 2, 1979, a letter certifying that there are no existing kraft pulp mills in the State subject to Part 60, Subject B of this chapter.

### Fluoride Emissions From Existing Primary Aluminum Plants

**§ 62.11425 Identification of plan—negative declaration.**

The State Agency of Environmental Conservation submitted on January 4, 1989, a letter certifying that there are no existing primary aluminum reduction plants in the State subject to Part 60, Subpart B of this chapter.

BILLING CODE 6560-50-M

## FEDERAL COMMUNICATIONS COMMISSION

### 47 CFR Part 65

**[CC Docket 86-497; FCC 89-30]**

### Common Carrier Services; Amendment of Part 65 to Prescribe Components of the Rate Base and Net Income of Dominant Carriers

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** The Commission has adopted an Order on Reconsideration which amends §§ 65.820 and 65.830 of the Rules to: (1) Modify the requirements for the calculation of cash working capital; (2) eliminate the requirement to reduce the rate base for compensated absences; (3) permit the inclusion of the full material and supplies inventory in the rate base; (4) specifically provide for the inclusion of Rural Telephone Bank Stock in the rate base; and (5) make certain minor changes to Part 65. The Commission made these changes because of the need to simplify the rate base and net income determination procedures and to provide clarification as requested in various petitions for reconsideration.

**EFFECTIVE DATE:** August 28, 1989.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Ken Ackerman or John T. Curry, Accounting Systems Branch, Accounting and Audits Division, Common Carrier Bureau, (202) 634-1861.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's *Order on Reconsideration* adopted January 30, 1989, and released February 22, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

## Summary of Order On Reconsideration

Ten parties filed petitions for reconsideration and/or clarification of the Commission's *Report and Order*, released on December 24, 1987, which prescribed rate base and net income determination principles for all dominant carriers in Part 65 of the Commission's rules. In this *Reconsideration Order* the Commission generally affirms its regulatory procedures. However, the Commission modifies the rate base treatment of certain items and provides clarification for others.

In this *Reconsideration Order* the Commission has modified the requirements for the calculation of cash working capital (CWC). The Commission has decided to permit all Class A carriers to compute their CWC by use of either full lead-lag studies or the Simplified Formula Method outlined in § 65.820(d) of the Commission's rules. For Class B carriers the Commission has decided to permit three options. Class B carriers may elect to follow the Simplified Formula Method, perform a full lead-lag study or determine their CWC using an industry "standard time period" of lead or lag referred to as the Standard Allowance Method. The Standard Allowance Method, as currently set, permits a Class B carrier

VOL 54 ISS 41 MR 3 1989 UMI

to include in the rate base a standard cash working capital allowance equal to 15 days of its cash operating expenses. The Commission has delegated the task of periodically reviewing and revising the standard allowance to the Chief of the Common Carrier Bureau. Although the Commission is permitting carriers the flexibility to choose between methods, carriers must advise the Commission of changes in CWC methods in future tariff filings and their reasons for such change.

The Commission has decided that it will continue the long-standing policy of allowing carriers to add minimum bank balances and working cash advances to their CWC determination. However, the Commission rejected the arguments of those parties who wished to include "non-cash" items, such as depreciation and deferred taxes, in lead-lag studies. This *Reconsideration Order* reaffirms the Commission's *Docket 19129 Phase II Initial Decision* in which the Commission decided that non-cash items such as depreciation and deferred taxes should be excluded from lead-lag studies.

On reconsideration, the Commission agreed with those parties that suggested it would be appropriate and less burdensome to include compensated absences (employee time off with pay, such as vacations and sick leave) in lead-lag studies rather than deducting a portion of accrued compensated absences from the rate base as the Commission's *Report and Order* required. Since compensated absences are analogous to other operating expenses, the Commission decided to allow compensated absences to be included in lead-lag studies.

The Commission decided to permit the inclusion of the full material and supplies inventory in the rate base. Although this approach is a departure from the Commission's previous position, it resolves the inequity of not allowing the carrier to earn a return on the portion of material and supplies that will ultimately be issued for use on long-term construction projects. Since the material and supplies account represents only about 1% of the rate base (based on 1988 Tariff Review Plan Data), the impact of this change on the revenue requirement is approximately four-tenths of one percent.

In this *Reconsideration Order* the Commission also amends Part 65 to make specific reference to the inclusion of Rural Telephone Bank Stock in the rate base and to eliminate any instructions which conflict with the Commission's Part 36 Separations procedures.

The Commission was not convinced by arguments to change the rate base treatment of deferred charges, other deferred credits and deferred taxes. Thus, the rate base treatment for these items remains the same as specified in the *Report and Order*. The Commission also did not agree with BellSouth and Southwestern Bell which sought reconsideration of the use of the prime rate, rather than the overall rate of return, for accruing AFUDC. The Commission did not propose in this proceeding to reconsider the allowable rate to be applied in determining AFUDC and accordingly, did not consider further the carriers' arguments on this issue. Thus, the Commission did not change the current requirement that the compound prime rate of interest be used for accruing AFUDC.

Finally, while the Commission did not change its historically held policy of excluding telecommunications plant adjustments from the rate base unless a carrier can specifically justify the amounts, this *Reconsideration Order* provides clarification as to what is required in seeking approval of plant acquisition adjustments. The Commission has also provided for the grandfathering of existing book acquisition adjustments as suggested by both CP National and the United States Telephone Association. Grandfathering existing acquisition adjustments means that the Commission will continue to recognize within the interstate rate base the interstate portion of plant adjustments that have already been included in the calculation of interstate revenue requirements by the National Exchange Carrier Association or by individual local exchange carriers. Since these existing acquisition adjustments have already been included in earlier rate filings, this process should not have an adverse impact on rates.

### Ordering Clauses

Accordingly, it is ordered, pursuant to section 405 of the Communications Act of 1934, as amended, 47 U.S.C. 405, that the petitions filed by BellSouth, Contel, CP National, GTE, NTCA, OPASTCO, SNET, Southwestern Bell, United and USTA are granted to the extent discussed herein, and otherwise are denied.

It is further ordered, that under the authority contained in sections 4(i), 4(j) 201–205 and 220 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j) 201–205 and 220, Part 65, Interstate Rate of Return Prescription Procedures and Methodologies, is amended as shown in the Appendix effective six months from publication of the text of the rules in the **Federal Register**, and the rules and policies adopted in this proceeding are prescribed for all dominant carriers.

It is further ordered that the petitions for partial waiver filed by Rochester Telephone on September 21, 1988, the United Telephone System Companies on June 20, 1988 and by Lincoln Telephone and Telegraph Company on May 20, 1988 are dismissed.

### List of Subjects in 47 CFR Part 65

Administrative practice and procedure, Communications common carriers, Reporting and recordkeeping requirements, Telephone, Interstate rate of return prescription procedures and methodologies.

Federal Communications Commission.

**Donna R. Searcy,**

*Secretary.*

Part 65 of Title 47 of the CFR is amended as follows:

## PART 65—[AMENDED]

1. The authority citation for Part 65 continues to read:

**Authority:** Secs. 4, 201, 202, 203, 205, 218, 403, 48 Stat. 1066, 1072, 1077, 1094, as amended, 47 U.S.C. 154, 201, 202, 203, 205, 218, and 403.

2. Section 65.820 is revised to read as follows:

**§ 65.820 Included items.**

(a) *Telecommunications Plant.* The interstate portion of all assets summarized in Account 2001 (Telecommunications Plant in Service) and Account 2002 (Property Held for Future Use), net of accumulated depreciation and amortization, and Account 2003 (Telecommunications Plant Under Construction-Short Term), and, to the extent such inclusions are allowed by this Commission, Account 2005 (Telecommunications Plant Adjustment), net of accumulated amortization.

(b) *Material and Supplies.* The interstate portion of assets summarized in Account 1220.1 (Material and Supplies).

(c) *Noncurrent Assets.* The interstate portion of Class B Rural Telephone Bank stock contained in Account 1402 (Investment in Nonaffiliated Companies) and the interstate portion of assets summarized in Account 1410 (Other Noncurrent Assets), Account 1438 (Deferred Maintenance and Retirements), and Account 1439 (Deferred Charges) only to the extent that they have been specifically approved by this Commission for inclusion. Otherwise, the amounts in accounts 1401–1500 shall not be included.

(d) *Cash Working Capital.* The average amount of investor-supplied capital needed to provide funds for a carrier's day-to-day interstate operations. Class A carriers may calculate a cash working capital allowance either by performing a lead-lag study of interstate revenue and expense items or by using the formula set forth in paragraph (e) of this section. Class B carriers, in lieu of performing a lead-lag study or using the formula in paragraph (e) of this section, may calculate the cash working capital allowance using a standard allowance which will be established annually by the Chief, Common Carrier Bureau. When either the lead-lag study or formula method is used to calculate cash working capital, the amount calculated under the study or formula may be increased by minimum bank balances and working cash advances to determine the cash working capital allowance. Once a carrier has selected a method of determining its cash working capital allowance, it shall not change to an optional method from one year to the next without Commission approval.

(e) In lieu of a full lead-lag study, carriers may calculate the cash working capital allowance using the following formula.

(1) Compute the weighted average revenue lag days as follows:

(i) Multiply the average revenue lag days for interstate revenues billed in arrears by the percentage of interstate revenues billed in arrears.

(ii) Multiply the average revenue lag days for interstate revenues billed in advance by the percentage of interstate revenues billed in advance. (Note: a revenue lead should be shown as a negative lag.)

(iii) Add the results of paragraphs (e)(1) (i) and (ii) of this section to determine the weighted average revenue lag days.

(2) Compute the weighted average expense lag days as follows:

(i) Multiply the average lag days for interstate expenses (*i.e.*, cash operating expenses plus interest) paid in arrears by the percentage of interstate expenses paid in arrears.

(ii) Multiply the average lag days for interstate expenses paid in advance by the percentage of interstate expenses paid in advance. (Note: an expense lead should be shown as a negative lag.)

(iii) Add the results of paragraphs (e)(2) (i) and (ii) of this section to determine the weighted average expense lag days.

(3) Compute the weighted net lag days by deducting the weighted average expense lag days from the weighted average revenue lag days.

(4) Compute the percentage of a year represented by the weighted net lag days by dividing the days computed in paragraph (e)(3) of this section by 365 days.

(5) Compute the cash working capital allowance by multiplying the interstate cash operating expenses (*i.e.*, operating expenses minus depreciation and amortization) plus interest by the percentage computed in paragraph (e)(4) of this section.

3. Section 65.830 is revised to read as follows:

**§ 65.830 Deducted items.**

(a) The following items shall be deducted from the interstate rate base.

(1) The interstate portion of deferred taxes (Accounts 4100 and 4340).

(2) The interstate portion of customer deposits (Account 4040).

(3) The interstate portion of unfunded accrued pension costs (Account 4310).

(4) The interstate portion of other deferred credits (Account 4360) to the extent they arise from the provision of regulated telecommunications services. This shall include deferred gains related to sale-leaseback arrangements.

(b) The interstate portion of deferred taxes, customer deposits and other deferred credits shall be determined as prescribed by 47 CFR Part 36.

(c) The interstate portion of unfunded accrued pension costs shall bear the same proportionate relationship as the interstate/intrastate expenses which give rise to the liability.

[FR Doc. 89-4504 Filed 3-2-89; 8:45 am]

BILLING CODE 6712-01-M

## GENERAL SERVICES ADMINISTRATION

### 48 CFR Parts 501, 514, 532, and 552

**[APD 2800.12 CHGE 62]**

### Prompt Payment Act

**AGENCY:** Office of Acquisition Policy, GSA.

**ACTION:** Final rule.

**SUMMARY:** The General Services Administration Acquisition Regulation (GSAR), Chapter 5 (APD 2800.12), is amended to add section 501.602–3 to implement and supplement the FAR requirements on the ratification of unauthorized commitments; to delete sections 501.675, 501.675–1, 501.675–2 and 501.675–3; to revise section 514.201–2 to refer to the Prompt Payment clause instead of the Payment Due Date clause; to revise part 532 to delete Payment Due Date, Interest on Overdue Payments, and Method of Payment clauses, to add material to supplement the Federal Acquisition Regulation by establishing parameters for modifying constructive acceptance periods in the FAR Prompt Payment clause; to add a Payments by Electronic Funds Transfer clause for contracts when payments may be made by GSA and other agencies and a Prompt Payment clause for acquisitions of leasehold interests in real property and to delete material that is inconsistent with the FAR and OMB Circular A–125; to revise part 552 to delete the existing Payment Due Date clause and provide a new Payments by Electronic Funds Transfer clause for use when payments may be made by GSA and other agencies, to delete the existing Interest on Overdue Payments clause and provide a new Prompt Payment clause for acquisition of leasehold interests in real property, to add an Invoice Requirements clause, and to make other miscellaneous changes for clarity. Acquisition Circular, AC–88–1 is canceled.

**EFFECTIVE DATE:** March 14, 1989.

**FOR FURTHER INFORMATION CONTACT:** Ms. Shirley Scott, Office of GSA Acquisition Policy and Regulations on (202) 523–4765.

**SUPPLEMENTARY INFORMATION:**

### Background

This rule was not published for public comment prior to issuance because it merely implements and supplements a higher level issuance (The Federal Acquisition Regulation) that has previously undergone the public comment process.

### Impact

The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exemption applies to this rule. The rule simply amends the GSAR as necessary to conform to the FAR as amended by FAC 84–33. Therefore, no regulatory flexibility analysis has been prepared. The rule does not contain information collection requirements that require the approval of OMB under the Paperwork Reduction Act (44 U.S.C. 3501 et seq.).

### List of Subjects in 48 CFR Parts 501, 514, 532 and 552

Government procurement.

1. The authority citation for 48 CFR Parts 501, 514, 532 and 552 continues to read as follows:

VOL 54 ISS 41 MR 3 1989 UMI

Authority: 40 U.S.C. 486(c).

## PART 501—GENERAL SERVICES ADMINISTRATION ACQUISITION REGULATIONS SYSTEM

2. Section 501.602–3 is added to read as follows:

**501.602–3 Ratification of unauthorized commitments.**

(a) *Authority.* Subject to the limitations and in accordance with the procedures prescribed in FAR 1.602–3, contracting officers may ratify contractual commitments made by employees who do not have the requisite authority to enter into contracts on the Government's behalf if the head of the contracting activity (HCA) has approved the ratification action. The authority to approve ratification actions may not be redelegated.

(b) *Procedures.* (1) Generally, the Government is not bound by agreements or contractual commitments made by persons to whom contracting authority has not been delegated. Such unauthorized acts may be in violation of the Federal Property and Administrative Services Act, other Federal laws, the FAR, the GSAR, and good acquisition practice. Therefore, such unauthorized contractual commitments should be considered as serious deviations from authorized conduct and consideration given to initiating disciplinary action in appropriate cases. In any instances where suspected irregularities may involve fraud against the Government, or any type of misconduct that might be punishable as a criminal offense, either the employee's supervisor or the contracting officer should immediately report the matter to the Office of the Inspector General with a request for a complete investigation.

(2) The individual who made the unauthorized commitment shall furnish the appropriate contracting director all records and documents concerning the commitment and a complete written statement of facts, including, but not limited to, a statement as to why normal acquisition procedures were not followed, why the contractor was selected and a list of other sources considered, description of work or products, estimated or agreed upon contract price, citation of appropriation available, and a statement regarding the status of the performance. Under exceptional circumstances, such as when the person who made the unauthorized commitment is no longer available to attest to the circumstances of the unauthorized commitment, the contracting director may waive the requirement that the responsible employee initiate and document the request for ratification, provided that a written determination is made stating that a commitment was in fact made by an employee who shall be identified in the determination.

(3) The appropriate contracting director will assign the request for ratification action to an individual contracting officer for processing. The contracting officer assigned the action will be responsible for preparing a summary statement of facts addressing the limitations in FAR 1.602–3(c) and making a recommendation as to whether the transaction should be ratified and stating the reasons therefore. Advice against express ratification should include a recommendation for other appropriate disposition. When ratification is not permissible due to legal improprieties in the procurement, the contracting officer may recommend that payment be made for services rendered on a quantum meruit basis (the reasonable value of work or labor) or for goods furnished on a quantum valebant basis (the reasonable value of goods sold and delivered) provided there is a showing that the Government has received a benefit. (See FAR 1.602–3(d).)

(4) The request for ratification, the information required by paragraph 3, above, and a recommendation for corrective action to preclude recurrence, must be forwarded, through appropriate channels, to the HCA for consideration.

(5) The HCA, upon receipt and review of the complete file, may approve the ratification if determined to be in the Government's best interest, or direct other disposition as appropriate. Acquisitions that have been approved for ratification shall be forwarded to the appropriate contracting officer for issuance of the necessary contractual documents. If the request for ratification is not justified, the HCA shall return the request without approval and provide an explanation for the decision not to approve ratification.

(6) Each HCA shall maintain a separate file containing a copy of each request for approval to ratify an unauthorized contractual commitment. This file shall be made available for review by the Office of Acquisition Policy and the Inspector General.

**501.675, 501.675–1, 501.675–2 and 501.674–3 [Removed]**

3. Sections 501.675, 501.675–1, 501.675–2 and 501.675–3 are removed.

## PART 514—SEALED BIDDING

4. Section 514.201–2 is revised to read as follows:

**514.201–2 Part I—The schedule.**

All solicitations that contain the Standard Form 33, Solicitation, Offer and Award, should include the following cautionary notice:

"Offerors are reminded that block 13 of the Standard Form 33, Solicitation, Offer and Award, is to be used to offer prompt payment discounts. Payment terms are set forth in the Prompt Payment clause of this solicitation. Offerors are cautioned against inserting any statement in block 13 that indicates that payment is due sooner than the time stipulated in the Prompt Payment clause. **Example:** Inserting "NET 20" in block 13 will cause the offer to be rejected as nonresponsive, because the entry would be contrary to the 30-day payment terms specified in the Prompt Payment clause.

## PART 532—CONTRACT FINANCING

5. The table of contents for Part 532 is amended by adding Subpart 532.9.

**Subpart 532.9—Prompt Payment**

Sec.

532.905 Invoice payments.
532.906 Contract clause.

6. Section 532.111 is amended by deleting paragraphs (b), (c), (d)(2), (d)(3) and (e), redesignating paragraphs (d)(1), (f) and (g) as paragraphs (b), (c) and (d) and by revising the redesignated paragraph (b) to read as follows:

**532.111 Contract clauses.**

* * * * *

(b) *Invoice requirements.* The contracting officer shall insert a clause substantially the same as the clause at § 552.232–72, Invoice Requirements, in all solicitations and contracts for supplies, services or the acquisition of leasehold interests in real property that require the submission of invoices for payment.

(c) *Adjusting payments.* The contracting officer shall insert the clause at § 552.232–78, Adjusting Payments, in all solicitations and contracts for recurring building services expected to exceed the small purchase limitation.

(d) *Final payment.* The contracting officer shall insert the clause at § 552.232–79, Final Payment, in all solicitations and contracts for recurring building services expected to exceed the small purchase limitation.

7. Subpart 532.9 is added to read as follows:

**Subpart 532.9—Prompt Payment**

**532.905 Invoice payments.**

(a) Before exercising the authority to modify the date for constructive acceptance in subdivision (a)(6)(i) of the basic clause at FAR 52.232–25, Prompt Payment, the contracting officer shall prepare a justification explaining the reason why it is necessary to specify a longer period. The written justification must be prepared on a case-by-case basis and must be approved by the contracting director. A contracting officer may not specify a constructive acceptance period that exceeds 30 days.

(b) The time specified for constructive acceptance or approval in subdivision (a)(5)(i)(A) and (B) of Alternate I to FAR clause 52.232–25 will be determined by the contracting officer on a case-by-case basis but may not exceed 7 days for construction or architect engineer services, unless a longer period is justified (in writing) and approved by the contracting director. Under no circumstances may a period of more than 30 days be specified.

**532.906 Contract clause.**

(a) The contracting officer shall insert the clause at § 552.232–70 in solicitations and contracts that include the FAR clause 52.232–25, Alternate II, when payments may be made by GSA and other agencies (e.g., multiple award schedule contracts).

(b) The contracting officer shall insert the clause at § 552.232–71 in solicitations and contracts for the acquisition of leasehold interests in real property. The contracting officer may modify the date for constructive acceptance in subdivision (b)(2) of the basic clause to specify a period longer than 7 calendar days (but not to exceed 30 days) for constructive acceptance, if necessary due to the nature of the services to be received, inspected or accepted by the Government. A written justification for specifying the longer period must be prepared and approved by the contracting director. The contracting officer shall use Alternate I instead of the basic clause if the lease contract does not contain provisions for ordering alterations or overtime utility services. If payment may be made by electronic funds transfer, the contracting officer shall use Alternate II with the basic clause or Alternate I.

**532.7000 [Removed]**

8. Section 532.7000 is removed.

**532.7002 [Removed]**

9. Section 532.7002 is removed.

**532.7004 [Removed]**

10. Section 532.7004 is removed.

## PART 552—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

11. Section 552.232–70 is retitled and revised to read as follows:

**552.232–70 Payments by Electronic Funds Transfer.**

As prescribed in § 532.908(a), insert the following clause:

**Payments by Electronic Funds Transfer (Aug. 1988)**

The requirement for submission of a designation of financial institution for receipt of electronic funds transfer payments in paragraph (c) of the "Prompt Payment" clause at (FAR 52.232–25, Alternate II) does not apply to this contract. Instead, the Contractor shall submit its designation of a financial institution for receipt of electronic funds transfer payments with each invoice requesting payment of $25,000 or more (exclusive of any discount for prompt payment). The information for electronic funds transfer is not required by the Department of Defense, the United States Postal Service, or the Tennessee Valley Authority. Information required for electronic funds transfer payments shall be furnished to the Veterans' Administration in accordance with instructions provided by the agency. Other agencies and departments thereof may waive the requirement for designation of a financial institution for receipt of electronic funds transfer payments and for submission of information required to make such payments by including a notice on delivery orders or otherwise notifying the Contractor. (End of Clause)

12. Section 552.232–71 is retitled and revised to read as follows:

**552.232–71 Prompt Payment.**

As prescribed in § 532.908(b), insert the following clause:

**Prompt Payment (Jan. 1989)**

The Government will make payments under the terms and conditions specified in this clause. Payment shall be considered as being made on the day a check is dated or an electronic funds transfer is made.

(a) *Payment due date.*

(1) *Rental payments.* Rent shall be paid monthly in arrears and will be due on the first workday of each month, and only as provided for by the lease.

(i) When the date for commencement of rent falls on the 15th day of the month or earlier, the initial monthly rental payment under this contract shall become due on the first workday of the month following the month in which the commencement of the rent is effective.

(ii) When the date for commencement of rent falls after the 15th day of the month, the initial monthly rental payment under this contract shall become due on the first workday of the second month following the month in which the commencement of the rent is effective.

(2) *Other payments.* The due date for making payments other than rent shall be the later of the following two events:

(i) The 30th day after the designated billing office has received a proper invoice from the Contractor.

(ii) The 30th day after Government acceptance of the work or service.

(b) *Invoice and inspection requirements for payments other than rent.*

(1) The Contractor shall prepare and submit an invoice to the designated billing office after completion of the work. A proper invoice shall include the following items:

(i) Name and address of the Contractor.

(ii) Invoice date.

(iii) Lease number.

(iv) Government's order number or other authorization.

(v) Description, price, and quantity of work or services delivered.

(vi) Name and address of Contractor official to whom payment is to be sent (must be the same as that in the remittance address in the lease or the order).

(vii) Name (where practicable), title, phone number, and mailing address of person to be notified in the event of a defective invoice.

(2) The Government will inspect and determine the acceptability of the work performed or services delivered within 7 calendar days after the receipt of a proper invoice or notification of completion of the work or services unless a different period is specified at the time the order is placed. If actual acceptance occurs later, for the purpose of determining the payment due date and calculation of interest, acceptance will be deemed to occur on the last day of the 7-day inspection period. If the work or service is rejected for failure to conform to the technical requirements of the contract, the 7 days will be counted beginning with receipt of a new invoice or notification. In either case, the Contractor is not entitled to any payment or interest unless and until actual acceptance by the Government occurs.

(c) *Interest penalty.*

(1) An interest penalty shall be paid automatically by the Government, without request from the Contractor, if payment is not made within 15 days after the due date.

(2) The interest penalty shall be at the rate established by the Secretary of the Treasury under Section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611) that is in effect on the payment date. This rate is referred to as the "Renegotiation Board Interest Rate," and it is published in the **Federal Register** semiannually on or about January 1, and July 1. The interest penalty shall accrue daily on the payment amount approved by the Government and be compounded in 30-day increments inclusive from the first day after the due date through the payment date.

(3) Interest penalties will not continue to accrue after the filing of a claim for such penalties under the Disputes clause or for more than 1 year. Interest penalties of less than $1.00 need not be paid.

(4) Interest penalties are not required on payment delays due to disagreement between the Government and Contractor over the payment amount or other issues involving contract compliance or on amounts temporarily withheld or retained in accordance with the terms of the contract. Claims involving disputes, and any interest that may be payable, will be resolved in accordance with the Disputes clause. (End of Clause)

VOL 54 ISS 41 MR 3 1989 UMI

**Alternate I (Jan. 1989)**

If Alternate I is used, subparagraph (a)(1) of the basic clause should be designated as paragraph (a) and subparagraph (a)(2) and paragraph (b) should be deleted. Paragraph (c) of the basic clause should be redesignated (b).

**Alternate II (Jan. 1989)**

If Alternate II is used with the basic clause, add the following paragraph (d). When Alternate I is used this paragraph should be designated (c).

(d) *Electronic funds transfer.* Payments under this contract will be made by the Government either by check or electronic funds transfer (through the Treasury Financial Communications System (TFCS) or the Automated Clearing House (ACH), at the option of the Government. Not later than 14 calendar days after receipt of a notice of award or request from the Contracting Officer or other Government official, the Contractor shall provide information necessary for check payment and/or designate a financial institution for receipt of electronic funds transfer payments. The Contractor shall submit this information to the Contracting Officer or other Government official, as directed.

(1) For payment by check, the Contractor shall provide the full name (where practicable), title, phone number, and complete mailing address of the responsible official(s) to whom check payments are to be sent (must be the same as the remittance address in the lease or the order).

(2) For payment through TFCS, the Contractor shall provide the following information:

(i) Name, address, and telegraphic abbreviation of the financial institution receiving payment (must be the same as the remittance address in the lease or the order).

(ii) The American Bankers Association 9-digit identifying number of the financial institution receiving payment if the institution has access to the Federal Reserve Communications System.

(iii) Payee's account number at the financial institution where funds are to be transferred.

(iv) If the financial institution does not have access to the Federal Reserve Communications System, name, address, and telegraphic abbreviation of the correspondent financial institution through which the financial institution receiving payment obtains electronic funds transfer messages. Provide the telegraphic abbreviation and American Bankers Association identifying number for the correspondent institution.

(3) For payment through ACH, the Contractor shall provide the following information:

(i) Routing transit number of the financial institution receiving payment (same as American Bankers Association identifying number used for TFCS).

(ii) Number of account to which funds are to be deposited.

(iii) Type of depositor account ("C" for checking, "S" for savings).

(iv) If the Contractor is a new enrollee to the ACH system, a "Payment Information Form," TFS 3881, must be completed before payment can be processed.

(4) In the event the Contractor, during the performance of this contract, elects to designate a different financial institution for the receipt of any payment made using electronic funds transfer procedures, notification of such change and the required information specified above must be received by the appropriate Government official 30 days prior to the date such change is to become effective.

(5) The document furnishing the information required by this paragraph must be dated and contain the signature, title, and telephone number of the Contractor official authorized to provide it, as well as the Contractor's name and contract number.

(6) Contractor failure to properly designate a financial institution or to provide appropriate payee bank account information may delay payments of amount otherwise properly due. (End of Clause)

13. Section 552.232-72 is retitled and revised to read as follows:

**552.232-72 Invoice requirements.**

As prescribed in § 532.111(b), insert the following clause:

**Invoice Requirements (Jan 1989)**

(a) Invoices shall be submitted in an original only, unless otherwise specified, to the designated billing office specified in this contract or purchase/delivery order.

(b) Invoices must include the Accounting Control Transaction (ACT) number provided below or on the purchase/delivery order.

**Act Number (Contracting Officer Insert Number)**

(c) In addition to the requirement for a proper invoice specified in the Prompt Payment clause of this contract or purchase/delivery order, the following information or documentation must be submitted with each invoice:

**(Contracting Office List Additional Requirements)**

(End of Clause)

**552.232-73 [Reserved]**

14. Section 552.232-73 is deleted and reserved.

15. Section 552.232-75 is amended by revising the introductory paragraph to read as follows:

**552.232-75 Payments to contractor.**

As prescribed in § 532.7003(a), insert the following clause:

* * * * *

16. Section 552.232-76 is amended by revising the introductory paragraph to read as follows:

**552.232-76 Certification of payment.**

As prescribed in § 552.7003(b), insert the following clause:

* * * * *

17. Section 552.232-78 is amended by revising the introductory paragraph to read as follows:

**§552.232-78 Adjusting payments.**

As prescribed in § 532.111(c), insert the following clause:

* * * * *

18. Section 552.232-79 is amended by revising the introductory paragraph to read as follows:

**552.232-79 Final payments.**

As prescribed in § 532.111(d), insert the following clause:

* * * * *

Dated: February 14, 1989.

BILLING CODE 6820-61-M

## INTERSTATE COMMERCE COMMISSION

**49 CFR Part 1314**

**[Ex Parte No. 444]**

## Electronic Filing of Tariffs; Correction

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Final rules; correction.

**SUMMARY:** The Commission is adopting regulations that allow electronic tariff filing as an alternative to printed tariffs. To accomplish this, the Commission is replacing its current regulations, which were drafted with only paper tariffs in mind, with regulations that are neutral with regard to the medium by which tariff information is transmitted both to the Commission and to the public. The detailed instructions of the former regulations will be replaced with brief tariff standards that require that tariffs be filed in such a way that rate and service information is described accurately and fully for use both at the time of filing and in the future. The Commission's final rule was published in the **Federal Register** on February 10, 1989 at 54 FR 6403. This notice makes certain editorial corrections to Part 1314 of the final rule.

**DATE:** The rule will become effective March 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** Charles E. Langyher, (202) 275-7739, or Lawrence C. Herzig, (202) 275-7358 (TDD for hearing impaired: (202) 275-1721).

**SUPPLEMENTARY INFORMATION:**

**List of Subjects in 49 CFR Part 1314**

Freight forwarders, Maritime carriers, Motor carriers, Pipelines, Railroads, Tariffs.

**PART 1314—REGULATIONS FOR THE PUBLICATION, POSTING AND FILING OF TARIFFS AND RELATED DOCUMENTS**

1. The authority citation for 49 CFR Part 1314 continues to read as follows:

**Authority:** 49 U.S.C. 10321, 10708, 10761 and 10762; 5 U.S.C. 553.

**§ 1314.5 [Corrected]**

2. In § 1314.5(b), in the chart under Water—Passenger, the figure in the Reduced column is correctly added to read "30" not "3".

**§ 1314.6 [Corrected]**

3. In § 1314.6(b) the name of the Tariff Publishing Officer listed for Railroads is correctly added to read: "Mr. S.R. Rodgers" not "W.J. Hardin".

**§ 1314.8 [Corrected]**

4. In § 1314.8(b) number two under Examples is correctly added to read as follows:

(2) Joint motor/water commodity rates in containerized service between interior points in the United States and ports in Puerto Rico and Hawaii; and governing rules.

# Proposed Rules

Federal Register
Vol. 54, No. 41
Friday, March 3, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

### Federal Grain Inspection Service

### 7 CFR Part 800

### Shiplot Inspection Plan (Cu-Sum)

**AGENCY:** Federal Grain Inspection Service, USDA.

**ACTION:** Proposed rule; extension of comment period.

**SUMMARY:** The Federal Grain Inspection Service (FGIS) published in the **Federal Register** on Monday, January 23, 1989, as corrected on Friday, January 27, 1989, a proposed rule on revising the Shiplot Inspection Plan (Cu-Sum). FGIS is extending the comment period to provide interested persons with additional time in which to prepare comments on the proposed rule.

**DATE:** Comments must be submitted on or before May 23, 1989.

**ADDRESS:** Comments must be submitted in writing to Lewis Lebakken, Jr., Resources Management Division, USDA, FGIS, Room 0628 South Building, P.O. Box 96454, Washington, DC 20090–6454. Alternatively, telemail users may respond to [IRSTAFF/FGIS/USDA] telemail; telex users may respond to Lewis Lebakken, Jr., TLX: 7607351, ANS:FGIS UC; and telecopy users may send responses to the automatic telecopier machine at (202) 447–4628.

All comments received will be made available for public inspection at room 0628 South Building, 1400 Independence Avenue, SW., Washington, DC 20250, during regular business hours (7 CFR 1.27(b)).

**FOR FURTHER INFORMATION CONTACT:** Lewis Lebakken, Jr., address as above, telephone (202) 475–3428.

**SUPPLEMENTARY INFORMATION:** FGIS published in the **Federal Register** on January 23, 1989 (54 FR 3050, FR Doc. 89–1194) as corrected on January 27, 1989 (54 FR 4109) a proposal to revise the current shiplot inspection plan (Cu-Sum). The proposed rule was to revise §§ 800.86, 800.129, and 800.139 of the regulations concerning the inspection of shiplot, unit train, and lash barge grain in single lots; and to organize the sections into a more logical order, clarify and remove unnecessary language, and remove provisions that are no longer needed.

The proposed rule provided for a comment period to obtain public views and comments on the revisions. Comments were to be submitted on or before March 24, 1989. The Grain Elevator and Processing Society (GEAPS), North American Export Grain Association (NAEGA), Bunge Corporation, Archer Daniels Midland Company and Union Equity Co-operative Exchange submitted written requests to extend the comment period. They indicated additional time is needed to review the proposal. GEAPS, NAEGA, and the Bunge Corporation further indicated the grain quality report being developed by the Office of Technology Assessment (OTA) should be considered after it is released to the public before commenting on the proposed rule because the final report may influence their comments.

The intent of the proposed rule was to obtain public views and comments on the revisions. It has been determined that an extension of time to allow additional public input will prove beneficial. Commentors will have additional time to consider the OTA report; foreign buyers will have more time to respond; and additional time may facilitate the development of effective alternative recommendations by industry. Therefore, the comment period is hereby extended until May 23, 1989.

(Pub. L. 94–582, 90 Stat. 2867, as amended, (7 U.S.C. 71 *et seq.*))

Dated: March 1, 1989.

**W. Kirk Miller,**

*Administrator.*

BILLING CODE 3410-EN-M

## DEPARTMENT OF JUSTICE

### Immigration And Naturalization Service

### 8 CFR Part 210a

**[INS No. 1201–89]**

### Admission or Adjustment of Status of Replenishment Agricultural Workers

**AGENCY:** Immigration and Naturalization Service, Justice.

**ACTION:** Proposed rule with request for comments.

**SUMMARY:** This rule adds a new Part 210a of 8 CFR, to conform with the new section 210A of the Immigration and Nationality Act, established by the Immigration Reform and Congrol Act of 1986 (IRCA), Pub. L. 99–603. The purpose of this proposed rule is to set forth the criteria and procedures to be used to admit or adjust the status of replenishment agricultural workers for temporary residence, and to address the rights and obligations of aliens admitted or adjusted under this section.

**DATES:** Comments must be received on or before April 3, 1989.

**ADDRESSES:** Written comments should be mailed in triplicate to the Deputy Assistant Commissioner, Special Agricultural Worker Programs, Immigration and Naturalization Service, 425 I Street NW., Washington, DC 20536, or delivered to Room 5250 at the same address.

**FOR FURTHER INFORMATION CONTACT:** Aaron Bodin, Deputy Assistant Commissioner, Special Agricultural Worker Programs (SAW), 202–786–3658.

**SUPPLEMENTARY INFORMATION:** Section 210 of the Immigration and Nationality Act, added by section 302 of the Immigration Reform and Control Act of 1986 (IRCA), Pub. L. 99–603, provides lawful residence in the United States for "special agricultural workers" (SAWs). Aliens adjusted under this section are not required to remain in agricultural work upon acquiring lawful status. To address the concerns of growers that labor shortages might result as alien farm workers granted status under the SAW program retired or left to go into non-agricultural work, Congress also added section 210A to the Act. Unlike SAWs, these replenishment agricultural workers (RAWs) are obligated to perform seasonal agricultural services in each of the first three years after having been accorded temporary residence. RAWs who fulfill this condition may be given the status of permanent resident. A RAW who fails to perform the requisite seasonal agricultural services is deportable. RAWs who desire to become citizens of the United States are obligated to perform seasonal agricultural services in each of two additional years.

Section 210A(c) of the Act directs the Attorney General to provide for the admission or adjustment of aliens to lawful temporary resident status in order to meet a shortage of workers to perform seasonal agricultural services. The number of aliens admitted or adjusted each fiscal year under the provisions of section 210A(c), which is referred to as the "shortage number", is determined jointly by the Secretaries of Labor and Agriculture with the Bureau of the Census from data collected during the prior fiscal year. If the determination is made that there will be no shortage of workers in any year, no RAW shall be admitted or adjusted in that year unless the Emergency Procedure for Increase in Shortage Number at section 210A(a)(7) is implemented.

On August 15, 1988, a notice of availability for public comment of a preliminary working draft of regulations to implement section 210A(c) was published in the **Federal Register** at 53 FR 30685. The Service gratefully acknowledges the many comments it received from farm worker and grower representatives, members of Congress and others. The knowlege and expertise imparted by the commentors were of considerable help to the Service in refining its views and many of the suggestions were adopted in drafting thir proposal.

These proposed regulations describe a procedure to be employed for the admission or adjustment of RAWs during fiscal year 1990, if required, and the standards and procedures governing all other aspects of the RAW program. Procedures for the admission or adjustment of RAWs during fiscal years 1991 through 1993 will be promulgated by regulation at a later date.

The basic eligibility criteria for RAW status for fiscal year 1990 shall be: (1) A minimum age of 18 by October 1, 1989; (2) the performance of at least 20 man days of agricultural work in the United States in any 12 consecutive months during the period May 1, 1985 through November 30, 1988; (3) admissibility to the United States as an immigrant; and (4) certification of ability and intent to perform the seasonal agricultural services required to maintain RAW status. Aliens who have entered the United States illegally subsequent to November 6, 1986, will not be eligible. Priority consideration shall be given to aliens who meet these criteria and who are spouses or unmarried sons or daughters of aliens legalized under IRCA.

The selection process shall proceed in two stages: (1) The establishment of a list of potentially eligible aliens who will be invited to petition for RAW status; and (2) the petition process during which eligibility will be determined and the admission or adjustment of the alien accomplished.

The shortage number for fiscal year 1990 may not be known until late in fiscal year 1989 and it is possible that there will be no shortage number. The regulations are designed, therefore, to minimize the expenditure of public funds in preparation for the admission or adjustment of RAWs prior to information that there will be a shortage number. In order that registration procedures may proceed prior to the beginning of fiscal year 1990, the Service may commence action based on a formal estimate from the Departments of Agriculture and Labor as to the probable size of a shortage number, including a reasonable margin for a possible emergency increase prior to October 1, 1989.

For reasons of economy and to avoid the creation of unwarranted expectations that would result from a registration out of proportion to the shortage number, registration standards will be variable and geared to the size of the shortage number as follows: (1) Immediately after the announcement or preliminary estimate of a shortage number by the Secretaries of the Departments of Agriculture and Labor, the INS will establish a list of aliens whose applications for SAW status were denied but who meet the eligibility criteria for RAW status. Age and qualifying work experience will be determined from information already in possession of INS. Qualified registrants from this list will be the first to be admitted or adjusted to RAW status. If the number of persons on this list is larger than the shortage number, there may be no need to activate additional procedures for the admission or adjustment of RAWs. If, however, it appears likely that the number of aliens on this list will not meet the shortage number, then the INS will implement a procedure in which additional eligible aliens may register their interest in petitioning for RAW status. (2) if the difference between the anticipated number of aliens in the first group and the shortage number is less than 50,000, registration will be limited to eligible aliens residing in the United States whose qualifying work was in seasonal agricultural services; (3) if the difference is between 50,000 and 200,000, registration will be limited to eligible aliens residing in the United States whose qualifying experience was in any agricultural employment; and (4) if the difference is greater than 200,000, registration will be open to any eligible alien, including aliens outside the United States, whose qualifying work in the United States was in any agricultural employment.

All timely received registration forms will be randomly ordered, with aliens claiming priority consideration based on family relationship to an IRCA legalized alien placed first on the registration list. If a shortage number is determined, aliens in the first group will be invited to petition for admission or adjustment to RAW status in the order that they appear on the registration list until the shortage number is met. If the shortage number is not met by the first group, the appropriate additional registration procedure will be implemented. All registrants will mail their registration forms (I–807) to an INS Central Processing Facility (CPF). Aliens claiming immediate family relationship to an alien legalized under IRCA will be given priority consideration. Registered aliens will be invited to petition for RAW status until the shortage number is met. Additional registrants will be invited to petition as necessary to meet any emergency increase in the shortage number.

It is in the interest of agricultural employers to remain in contact with undocumented former workers so that they may contact these workers with necessary information in the event that there is a registration.

The Service also wishes to note here that it is important for employers to understand that SAWs and RAWs are legal resident aliens and are to be treated as such for tax purposes. They should not be confused with nonimmigrant temporary workers admitted under the H–2A program.

In accordance with 5 U.S.C. 605(b), the Commissioner of the Immigration and Naturalization Service certifies that this rule does not have a significant adverse economic impact on a substantial number of small entities. This rule is not a major rule within the meaning of section 1(b) of E.O. 12291, nor does this rule have federalism implications warranting the preparation of a Federal

VOL 54 ISS 41 MR 3 1989 UMI

Assessment in accordance with Executive Order 12612.

This rule contains information collection requirements that have been submitted to the Office of Management and Budget for clearance under the provisions of the Paperwork Reduction Act.

**List of Subjects in 8 CFR Part 210a**

Aliens, Temporary resident status, Reporting and recordkeeping requirements, Permanent resident status.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended by adding a new Part 210a to read as follows:

## PART 210a—REPLENISHMENT AGRICULTURAL WORKERS

Sec.

210a.1 Definition of terms used in this part.
210a.2 Registration process.
210a.3 Eligibility.
210a.4 Admissibility.
210a.5 Petition for temporary resident status.
210a.6 Status, benefits and obligations.
210a.7 Adjustment to permanent resident status.

Authority: 8 U.S.C. 1103; 8 CFR Part 2.

### § 210a.1 Definition of terms used in this part.

(a) *Act.* The Immigration and Nationality Act, as amended by the Immigration Reform and Control Act of 1986, Pub. L. 99-603.

(b) *ADIT.* Alien Documentation, Identification and Telecommunications card, Form I-89. Used to collect key data concerning an alien. When processed together with an alien's photographs, fingerprints and signature, this form becomes the source document for generation of Form I-551 Alien Registration Receipt Card.

(c) *Agricultural employment.* The term "agricultural employment" includes any employment:

(1) On a farm in connection with cultivating the soil, or in connection with raising or harvesting any agricultural or horticultural commodity, including the raising, shearing, feeding, caring for, training, and management of livestock, bees, poultry, and fur-bearing animals and wildlife;

(2) By a farm operator in connection with operating or maintaining the farm and its tools and equipment, or with salvaging timber or clearing land of brush and other debris left by a hurricane, if the major part of such service is performed on a farm;

(3) In connection with the production or harvest of any agricultural commodity or in connection with the operation or maintenance of ditches, canals, reservoirs, or waterways, not owned or operated for profit, used exclusively for supplying and storing water for farming purposes;

(4) By the operator(s) of a farm in handling, planting, drying, packing, packaging, processing, freezing, grading, storing, or delivering to storage or to market or to a carrier for transportation to market, in its unmanufactured state, any agricultural or horticultural commodity, but does not include service performed in connection with commercial canning or commercial freezing or in connection with any agricultural or horticultural commodity after its delivery to a terminal market for distribution for consumption or service not in the course of the employer's trade or business or domestic service in a private home of the employer.

(d) *Farm.* The term "farm" includes stock, dairy, poultry, fruit, fur-bearing animals, and truck farms, plantations, ranches, nurseries, ranges, greenhouses, or other similar structures used primarily for the raising of agricultural or horticultural commodities, and orchards.

(e) *Agriculture.* The term "agriculture" includes farming in all its branches and among other things includes the cultivation and tillage of the soil, dairying, the production, cultivation, growing, and harvesting of any agricultural or horticultural commodities (including commodities as defined as agricultural commodities in section 1141j(g) of Title 12), the raising of livestock, bees, fur-bearing animals, or poultry, and any practices (including any forestry or lumbering operations) performed by a farmer or on a farm as an incident to or in conjunction with such farming operations, including preparation for market, delivery to storage or to market or to carriers for transportation to market.

(f) *Application under IRCA.* The term "application under IRCA" means an application filed by any alien with the Immigration and Naturalization Service under sections 245a (general amnesty) and 210 (SAWs) of the Immigration and Nationality Act and section 202 (Cuban/Haitian adjustees) of the Immigration Reform and Control Act of 1986 (IRCA) which has been approved.

(g) *Man-day.* The term "man-day" is used to quantify work performed for the purpose of establishing eligibility under § 210a.3(a)(1)(iii) of this part and means the performance during any day of not less than one (1) hour of agricultural employment or seasonal agricultural services for wages paid or any day in which piece rate work was performed. Work for more than one employer in a single day shall be counted as no more than one man-day for purpose of this part.

(h) *Public cash assistance.* Public cash assistance means income or needs-based monetary assistance, to include but not limited to supplemental security income, received by the alien or his or her immediate family members through federal, state or local programs designed to meet subsistence levels. It does not include assistance in kind, such as food stamps, public housing, or other non-cash benefits, nor does it include work-related compensation or certain types of medical assistance (Medicare, Medicaid, emergency treatment, services to pregnant women or children under 18 years of age, or treatment in the interest of public health).

(i) *Replenishment Agricultural Worker (RAW).* Any individual granted temporary resident status or permanent resident status under section 210A(c) of the Act.

(j) *Seasonal Agricultural Services.* Defined in Section 210(h) of the Act as the performance of field work related to planting, cultural practices, cultivating, growing and harvesting of fruits and vegetables of every kind and other perishable commodities, as defined in regulations by the Secretary of Agriculture. The regulations further defining these terms can be found at 7 CFR Part 1d.

(k) *Secretaries.* The term "Secretaries" means the Secretaries of Labor and Agriculture.

(l) *Shortage number.* The number, if any, or replenishment agricultural workers to be adjusted or admitted to the United States during a fiscal year as determined by the Department of Labor and the Department of Agriculture under the provisions of section 210A (a) and (b) of the Act. The numerical limitations of sections 201 and 202 of the Act do not apply to the admission or adjustment of aliens for lawful temporary or permanent resident status under section 210A(c) of the Act.

(m) *Special Agricultural Worker (SAW).* Any individual granted temporary or permanent resident status under § 210.(a) of the Act.

(n) *Work-day.* The term "work-day" quantifies the work required of RAWs in order to maintain temporary resident status as described in § 210a.6 of this part and means a calendar day during which at least four (4) hours of work in seasonal agricultural services is performed.

Note.—The term "work-day" is used here in lieu of the statutory term "man-day" to conform with its usage in Department of Labor regulations at 29 CFR Part 502 and to distinguish between the term "man-day" as defined elsewhere in this section.

### § 210a.2 Registration process.

(a) *General.* The decision to conduct the registration described in this section will be made following the determination of a shortage number or a formal estimate by the Secretaries prior to October 1, 1989, as to the probable size of a shortage number. This number shall include a reasonable margin for a possible emergency increase during the fiscal year.

(b) *Registration standards.* (1) The INS will first establish a list of aliens whose applications for temporary resident status under section 210 (SAW) had been denied. To be on this list there must be credible documentation in the file that the alien meets the RAW eligibility requirements with respect to age and prior agricultural employment. SAW applicants whose applications were denied for fraud or a ground of exclusion under section 212(a) of the Act which cannot be waived shall not be included. After announcement of a shortage number or a preliminary estimate by the Secretaries, aliens who meet the criteria set forth in this sub-paragraph will be furnished a registration form (I-807) to be completed and returned if they desire to be considered for RAW status.

(2) If the difference between the number of persons registered pursuant to paragraph (b)(1) of this section and the shortage number will likely be less than 50,000, registration will be announced only for eligible aliens in the United States who have performed 20 man-days of qualifying work in seasonal agricultural services in the United States during the period beginning May 1, 1985 and ending on November 30, 1988, provided that no person entering the United States illegally after November 6, 1986, shall be eligible.

(3) If the difference between the number of persons registered pursuant to paragraph (b)(1) of this section and the shortage number will likely be greater than 50,000 but less than 200,000, registration will be announced only for eligible aliens in the United States who have performed 20 man-days of any type of agricultural employment in the United States during the period beginning May 1, 1985 and ending on November 30, 1988, provided that no person entering the United States illegally after November 6, 1986, shall be eligible.

(4) If the difference between the number of persons registered pursuant to paragraph (b)(1) of this section and the shortage number is greater than 200,000, and it appears that the number of eligible aliens in the United States will not be sufficient to meet the shortage number, registration will be expanded to include eligible aliens outside the United States who can document 20 man-days of any type of agricultural employment in the United States during the period beginning May 1, 1985 and ending on November 30, 1988, provided that no person entering the United States illegally after November 6, 1986, shall be eligible.

(c) *Registration period.* If a registration is to be conducted, the Service will announce it in the Federal Register and publicize the dates for the beginning and end of the registration period.

(d) *Filing of registration form (I-807).* (1) Registration forms will be available from all Service district, legalization and sub-offices. Should it become necessary to expand the scope of registration as provided in paragraph (b)(4) of this section, registration forms will be available from American Embassies and consular posts as required. Any alien who believes that he or she is eligible for temporary resident status as a Replenishment Agricultural Worker (RAW) and who meets the registration standard may register with the INS Central Processing Facility (CPF) (location to be announced at a later date).

(2) All registration forms shall be submitted by regular domestic or international surface or airmail. Registration forms will not be accepted by any means other than by mail, nor at any address other than the one specified in § 210a.2(d)(1). Registration forms submitted by any means requiring any form of written acknowledgement or confirmation of receipt will be rejected.

(3) A registration form (Form I-807) may not be submitted in person. A separate registration form must be filed by each eligible registrant. Only one registration form per registrant will be accepted. If multiple registration forms are submitted by an alien, all of that person's registration forms will be rejected.

(4) Registration forms (Form I-807) containing information which is incomplete or which cannot be read will be discarded. No registration form will be return. The Service will not respond to status inquiries concerning the registration process.

(5) No registration fee will be collected.

(e) *Priority consideration.* Priority consideration will be given to the qualified spouses and unmarried sons or daughters (18 years of age or older) of aliens who have filed an application under IRCA which has been approved.

(f) *Random selection.* (1) Registration forms timely received at the CPF will be ordered at random.

(2) Registrants claiming priority consideration based on a family relationship to an IRCA legalized alien shall be randomly ordered separately from registrants not claiming this priority.

(g) *Fraud or willful misrepresentation.* If fraud or willful misrepresentation of a material fact is found in the registration process, the registration form (Form I-807) will be rejected or the subsequent petition will be denied. Such fraud or willful misrepresentation will subject the person to deportation under section 241 of the Act and referral to a U.S. Attorney for possible prosecution.

(h) *Appeal.* No appeal shall lie from failure to be placed on the list of registrants or to be given priority consideration.

(i) *No benefit for registration.* Neither employment authorization nor any other benefit shall derive from filing a registration form (Form I-807), being placed on the register, or being invited to petition for RAW status.

(j) *Invitation to petition.* (1) Persons registered pursuant to paragraph (b)(1) of this section will first be invited to petition for admission or adjustment in the order on the register, beginning with the highest ranked registrant in the group claiming family relationship to IRCA legalized aliens, and continuing through the remainder of the register by rank order until the shortage number for that year is reached, or until this supply of registrants is exhausted.

(2) If there are insufficient registrants, as provided in paragraph (j)(1) of this section, to meet the shortage number, then registrants will be invited to petition for admission or adjustment in the order on the register, beginning with the highest ranked registrant in the group claiming family relationship to IRCA legalized aliens, and continuing through the remainder of the register by rank order until the shortage number for that year is reached.

### § 210a.3 Eligibility.

(a) *Eligibility*—(1) *General.* An alien eligible for status as an alien lawfully admitted for temporary residence under section 210A(c) of the Act is one who:

(i) Will be eighteen (18) years of age or older by October 1, 1989;

(ii) Is admissible to the United States as an immigrant, or if inadmissible, may have the grounds of excludability waived in accordance with the provisions of section 210(c)(2)(B)(i) of the Act;

BEST COPY AVAILABLE

VOL 54 ISS 41 MR 3 1989 UMI

(iii) Has performed at least 20 man-days of agricultural employment in the United States during any 12 consecutive months during the period beginning May 1, 1985 and ending on November 30, 1986; and

(iv)( Certifies that he or she is able and intends to perform seasonal agricultural services as required under § 210a.6(b) of this part.

(2) An alien who entered the United States illegally after November 6, 1986, is not eligible for RAW status.

(b) *Proof of eligibility*—(1) *General.* All documentation required to prove age, identity, admissibility, agricultural employment and family relationship must be presented during the petitioning process at the interview as set forth in § 210a.5 of this part.

(2) *Burden of proof.* An alien seeking admission or adjustment of status under this part has the burden of proof in establishing each of the eligibility requirements set forth in paragraph (a) of this section, including family relationship or performance of seasonal agricultural services if claimed on the registration form.

(c) *Proof of identity and age.* (1) Evidence to establish identity and age:

(i) Passport;

(ii) Birth Certificate;

(iii) Any national identity document from the alien's country of origin bearing a photograph and/or fingerprint (e.g. "cedula", "cartilla", "carte d'identite", etc.);

(iv) Driver's license or similar document issued by the state, if it contains a photograph;

(v) Baptismal record or marriage certificate;

(vi) Affidavits; or,

(vii) Such other documentation which may establish the identity and age of the petitioner.

(2) *Assumed names.* (i) In cases where a petitioner claims to have met any of the eligibility criteria under an assumed name, the petitioner has the burden of proving the petitioner was, in fact, the person who used that name. The petitioner's true identity is established pursuant to the requirements of paragraph (c)(1) of this section. The assumed name must appear in documents provided by the petitioner to establish eligibility. To meet the requirements of this paragraph, documentation must be submitted to prove that the assumed name was, in fact, used by the petitioner.

(ii) *Proof of common identity.* The most persuasive proof of common identity is a document issued in the assumed name which identifies the petitioner by photograph, fingerprint or detailed physical description. Other evidence which will be considered are affidavit(s) by a person or persons other than the petitioner, made under oath, which identify the affiant by name and address, state the affiant's relationship to the petitioner and the basis of the affiant's knowledge of the petitioner's use of the assumed name. Affidavits accompanied by a photograph which has been identified by the affiant as the individual known to affiant under the assumed name in question will carry greater weight.

(d) *Evidence of family relationship*—(1) *Spouse of legalized alien.* If the petitioner is the spouse of a legalized alien, then a certificate of marriage between the petitioner and legalized alien is required. If either the husband or wife was married before, then documents must be submitted to show that all previous marriages were legally ended (e.g., divorce decree, death certificate).

(2) *Unmarried son or daughter of a legalized alien.*

(i) If the legalized alien is the mother, then the birth certificate of the child showing the name of the mother is required.

(ii) If the legalized alien is the father, a certificate of marriage of the parents and the child's birth certificate showing the names of the parents must be provided.

(iii) If the legalized alien is the stepparent, the child's birth certicate showing the names of both natural parents, the marriage certificate of the parent to the stepparent, and proof of legal termination of their prior marriages must be provided.

(iv) If the child was born out of wedlock, and the father is the legalized alien, evidence must be provided that a parent/child relationship exists or existed. For example, the child's birth certificate showing the father's name and evidence that he supported the child.

(v) If the child is the adoptive child of a legalized alien, a certified copy of the adoption decree, the legal custody decree if the custody of the child was obtained before adoption, and a statement showing the dates and places the child and adoptive parent lived together must be submitted.

(3) *Documents not available.* If the documents listed in this section are not available, the following evidence may be submitted. The Service may require a statement from the appropriate authority certifying that the needed document is not available:

(i) *Church record.* A certificate under the seal of the church of baptism, dedication, or comparable rite showing the date and place of the child's birth, date of the religious ceremony, and the names of the child's parents;

(ii) *School record.* A letter from the authorities of the first school attended showing the date of admission to the school, the child's date and place of birth, and the names and places of birth of the parents, if shown in the school records;

(iii) *Census record.* State or federal census record showing the name, place of birth, and date of birth or the age of the person listed;

(iv) *Affidavits.* Written statements sworn to or affirmed by two persons who were living at the time who have personal knowledge of the event the petitioner is trying to prove. The affidavit must include the affiant's full name, address, date and place of birth, and his or her relationship to the petitioner, if any; full information concerning the event; and complete details concening how the person acquired knowledge of the event.

(e) *Employment documentation*—(1) *Types of documents.* Aliens petitioning for temporary resident status as a replenishment agricultural worker (RAW) must establish qualifying employment by submitting:

(i) Government employment records; or,

(ii) Records maintained by agricultural producers, farm labor contractors, collective bargining organizations and other groups of organizations which maintain records of employment;

(iii) Worker identification issued by employers or collective bargaining organizations;

(iv) Union membership cards or other union records such as dues receipts;

(v) Other records of the applicant's involvement with organizations providing services to farm workers;

(vi) Work records such as pay stubs, piece work receipts, W–2 forms;

(vii) Certification of filing income tax returns on IRS form 6166; or,

(viii) State verification of the filing of state income tax returns.

(2) *Affidavits.* Affidavits shall not be acceptable to document work performed to qualify for temporary residence as a replenishment agricultural worker (RAW) under this part.

(3) *Non-applicability to certain registrants.* The documentation requirements set forth in this paragraph shall not apply persons registered pursuant to § 210a.2(b)(1) of this part.

(f) *Documents.*—(1) *Original documents.* Original documents must be presented at the time of the interview wherever possible. Copies of records maintained by parties other than the petitioner which are presented in

evidence must be certified as true and complete by such parties and must bear their seal or signature or the signature and title of persons authorized to act in their behalf. If at the time of the interview the return of original documents is desired by the petitioner, then they must be accompanied by notarized copies or copies certified true and complete by the petitioner's representative in the format prescribed at § 204.2(j) (1) or (2) of this chapter. At the discretion of the district director or consular officer, original documents, even if accompanied by certified copies, may be temporarily retained for further examination.

(2) *Documents in a foreign language.* Documents in a language other than English must be accompanied by a complete English translation. The translator must certify that the translation is accurate and that he or she is competent to translate.

(g) *Confidentiality of information.* No information furnished pursuant to registration or a petition under this part, including documentary evidence furnished by third parties, shall be used to identify or locate aliens for the purpose of removing them from the United States unless the Service has information that the alien entered the United States illegally subsequent to November 6, 1986; nor will any such information be provided to any other agency of government for the purpose of identifying or penalizing persons for violation of law. The only exceptions shall be to enforce section 210(b)(7) of the Act, and this part.

**§ 210a.4 Admissibility.**

(a) *General.* An alien seeking temporary resident status as a replenishment agricultural worker must be admissible to the United States as an immigrant. This means that the alien must not be excludable under the provisions of section 212(a) of the Act. However, section 210A(e) of the Act provides that certain grounds of excludability are not applicable, that certain grounds may be waived, and that other grounds cannot be waived.

(b) *Grounds of exclusion not to be applied.* The following paragraphs of section 212(a) of the Act shall not apply to petitioners for temporary resident status: (14), workers entering without Labor Certification; (20), immigrants not in possession of a valid entry document; (21), visas issued without compliance with section 203; (25), illiterates; and (32), graduates of non-accredited medical schools.

(c) *Special rule for determination of public charge.* Section 212(a)(15) of the Act shall not apply to an alien who demonstrates a history of employment in the United States evidencing self-support without reliance on public cash assistance.

(d) *Waiver of grounds for exclusion.* Except as provided in paragraph (e) of this section, the Service may waive any other provision of section 212(a) of the Act only in the case of individual aliens for humanitarian purposes, to assure family unity, or when the granting of such a waiver is in the public interest. If an alien is excludable on grounds which may be waived as set forth in this paragraph, then he or she shall be advised of the procedures for applying for a waiver of grounds of excludability on Form I–690 (procedures to be determined).

(e) *Grounds of exclusion that may not be waived.* The following provisions of 212(a) of the Act may not be waived:

(1) Paragraphs (9) and (10) (relating to criminals);

(2) Paragraph (23) (relating to narcotics), except for a single offense of simple possession of thirty grams or less of marijuana;

(3) Paragraphs (27), (28), and (29) (relating to national security and members of certain organizations);

(4) Paragraph (33) (relating to those who assisted in the Nazi persecutions).

(f) *Exchange visitors.* An alien who was at any time a nonimmigrant exchange visitor (as defined in section 101(a)(15)(J) of the Act), must establish that he or she was not subject to the two-year foreign residence requirement of section 212(e) of the Act or has fulfilled that requirement or has received a waiver of such requirement.

(g) *Entry to U.S. without inspection.* An alien who entered the United States without immigration inspection after Novermber 6, 1986 is not eligible for temporary resident status as a replenishment agricultural worker (RAW) under this part.

**§ 210a.5 Petition for temporary resident status.**

(a) Selected registrants will be sent petition materials consisting of:

(1) Instructions for completing all required forms;

(2) Petition for Temporary Resident Status as a Replenishment Agricultural Worker (RAW) section 210A of the Immigration and Nationality Act, Form I–805;

(3) Change of Address Card for Replenishment Agricultural Workers (RAW), Form I–897A;

(4) Fingerprint card, Form FD–258;

(5) Medical Examination of Aliens Seeking Adjustment of Status (Pub. L. 99–603), Form I–693; and

(6) ADIT photo instruction sheet.

(b) *Changes to petitioner's address.* The petition package will be mailed to the address supplied on the registration form. If a registrant changes address prior to an invitation to petition, it is his or her responsibility to file a notice of a change of address with the postal service so that the petition package may be forwarded to the current address. If a petition package is returned as undeliverable by the postal service because of an insufficient address or because the registrant has moved and left no forwarding address, he or she will be placed at the end of the list and the next registrant on the register will be selected in his or her place.

(c) *Interview.* (1) Registrants will be invited to appear for an interview at an INS office, American Embassy or Consulate for the purpose of petitioning for admission or adjustment to temporary resident status under this part.

(2) At the time of the interview the petitioner must submit the required fee, proof of identity and age, evidence of admissibility and eligibility, the results of the medical examination on Form I–693, and photographs.

(3) The immigration or consular officer shall judge the sufficiency of the documents submitted and may require additional documentation needed to establish eligibility under this part.

(4) All information and evidence of identity, age, admissibility and family relationship and prior agricultural employment will be subject to verification by the Service or by the American Consulate or Embassy abroad at the time of personal interview.

(d) *Securing petitioner employment records.* (1) When a RAW petitioner alleges that an employer refuses to provide him or her with records relating to his or her employment and the petitioner has reason to believe such records exist, the Service shall attempt to secure such records.

(2) Prior to any attempt by the Service to secure the employment records, the following conditions must be met:

(i) A RAW petition must have been filed;

(ii) An interview must have been conducted;

(iii) The petitioner must have made a good faith effort to obtain the necessary documentation;

(iv) The petitioner's testimony must support credibly his or her claim; and

(v) The Service must determine that the petition cannot be approved in the absence of the employment records.

(3) Provided each of the conditions in paragraph (d)(2) of this section have been met, district directors may issue a

VOL 54 ISS 41 MR 3 1989 UMI

subpoena in accordance with 8 CFR 287.4, for the purpose of obtaining the needed employment records.

(3) *Information that cannot be verified.* (i) Registrants who claim a priority based on a family relationship that cannot be verified by the Service or by the American Consulate or Embassy abroad will be randomly ranked within that portion of the register established for qualifying aliens not claiming a priority based on family relationship.

(ii) If any material fact required by the announced registration standard and necessary to establish eligibility or a claim to seasonal agricultural services cannot be verified, the petition will be denied.

(f) *Filing of fee.* The required fee of one hundred and eighty five dollars ($185.00) shall be submitted at the time of the interview at the INS office, American Embassy or Consulate. All fees for petitions where the interview is conducted in the United States shall be in the form of a money order, cashier's check, or bank check made payable to the Immigration and Naturalization Service. No personal checks or currency will be accepted. All fees for petitions where the interview is conducted at an American Consulate or Embassy abroad shall be submitted in United States currency, or in the currency of the country in which the consulate or embassy is located. Fees will not be waived or refunded under any circumstances.

(g) *Medical examination.* If the petitioner is an alien who registered pursuant to § 210a.2 (b)(1) of this part, this paragraph applies only if they have not had a diagnostic test for the presence of the HIV antibody as part of their application for temporary resident status as a special agricultural worker (SAW). This paragraph applies to all other aliens who petition under section 210A(c) of the Act. A petitioner under this part must be examined at no expense to the government by a designated civil surgeon or, in the case of an applicant abroad, by a panel physician designated to perform medical examinations of immigrant visa applicants. The medical report setting forth the findings concerning the mental and physical condition of the applicant shall be incorporated into the record on Form I–693, Medical Examination of Aliens Seeking Adjustment of Status (P.L. 99–603). This form will be sent to the petitioner with the interview notice. The results of the medical examination on Form I–693 must be submitted at the time of the interview. Any petitioner certified under paragraphs (1), (2), (3), (4), or (5) of section 212(a) of the Act may appeal to a Board of Medical Officers of the U.S. Public Health Service as provided in section 234 of the Act and Part 235 of this chapter.

(h) *Decision.* (1) A decision to deny or to recommend approval of the petition for RAW status will be made by a Service district director or consular officer, based on all information provided at the interview in support of claims made to eligibility, agricultural employment experience and family relationship to an IRCA legalized alien.

(2) Where a petitioner is unable to substantiate a claim to family preference and fraud has not been established, the petitioner will be randomly re-ranked within that portion of the register established for qualifying aliens not claiming family preference. In this case, the petition will be held in abeyance until such time as the petitioner may again be invited to petition.

(i) *Approval.* (1) If the petitioner was interviewed at a Service office in the United States or at a designated port of entry and approval is recommended at the interview, the Service will conduct record checks to verify the admissibility of the petitioner.

(i) During the period of pendency of the petition, the alien will receive work authorization and permission to travel abroad on Form I–668A, Employment Authorization Card, for a period not to exceed six months from the date of filing.

(ii) If the record check is returned without adverse information concerning the petitioner, the petitioner will be issued Form I–688, Temporary Resident Card, valid for a period of 18 months from the filing date of the petition. This card may be renewed, extended or reissued for the remainder of the three year period of temporary residence upon a finding by the Service that the alien has completed the first required 90 man-days of employment in seasonal agricultural services as provided in § 210a.8 of this part.

(2) Where a petitioner is interviewed and the petition is approved at an embassy or consular post outside of the United States, the petitioner will be provided with an entry document to enable admission to the United States. The petitioner must appear at any Service office within 30 calendar days of admission to the United States to be processed for a Temporary Resident Card (Form I–688). The petitioner will be issued Form I–688, Temporary Resident Card, valid for a period of 18 months from the filing date of the petition. This card may be renewed, extended or reissued for the remainder of the three year period of temporary residence upon a finding by the Service that the alien has completed the required 90 man-days of employment each year in seasonal agricultural services as provided in § 210a.8 of this part.

(j) *Denial.* If the petitioner fails to meet his or her burden of proof at the interview, or if record checks are returned with adverse information that renders the petitioner ineligible for temporary resident status as a replenishment agricultural worker (RAW), the petition will be denied. No appeal shall lie from a decision to deny a petitioner temporary resident status under this part.

(k) *Date of adjustment.* The status of an alien whose petition for temporary resident status is approved by the Service shall be adjusted to that of a lawful temporary resident as of the date on which the petition was filed. An alien whose petition for temporary resident status is approved at an American Consulate or Embassy abroad shall be issued a visa and admitted to the United States for lawful temporary residence.

(l) *Fraud or willful misrepresentation.* If fraud or willful misrepresentation of a material fact is found in the petition process, the petition will be denied. If the petitioner is in the United States, he or she will be subject to deportation under section 241 of the Act and/or referral to the United States Attorney for possible prosecution.

**§ 210a.6 Status, benefits and obligations.**

(a) *Employment and travel authorization.* An alien who has been lawfully admitted to the United States for temporary residence or whose status has been adjusted to that of a person lawfully admitted for temporary residence under section 210A(c) of the Act has the right to reside in the United States, to travel abroad (including commuting from a residence abroad), and to accept employment in the United States in the same manner as aliens lawfully admitted for permanent residence. Employment and travel abroad will be authorized on Employment Authorization Card (Form I–668A) or Temporary Resident Card (Form I–688).

(B) *Obligation to perform seasonal agricultural services.* (1) An alien who has obtained temporary resident status as a replenishment agricultural worker must establish to the Service as set forth in this section that he or she has performed ninety (90) work-days of seasonal agricultural services in each of three successive twelve (12) month periods following the date of filing the petition.

(2) An alien granted lawful permanent residence on the basis of temporary

residence under section 210A(c) of the Act may not be naturalized as a citizen of the United States under any provision in Title III of the Act unless the alien has performed ninety (90) work-days of seasonal agricultural service in any two (2) twelve (12) month periods prior to naturalization in addition to the three (3) twleve (12) month periods required by section 210A(d)(5)(A) of the Act.

(3) A replenishment agricultural worker who fails to establish to the Attorney General that he or she has fulfilled the requiremnts of section 210A(d)(5)(A) of the Act to perform seasonal agricultural services in any one of the twelve (12) month periods shall be subject to deportation proceedings under section 241(a)(20) of the Act.

(c) *Adjustment of required work-days.* The number of work-days of required employment in seasonal agricultural services specified in this part is subject to adjustment by the Department of Labor and the Department of Agriculture under section 210A(a)(8) of the Act. A notice of any such adjustment will be published in the **Federal Register.**

(d) *Proof of performance of seasonal agricultural services.* (1) The burden is on the RAW temporary resident or permanent resident to collect, maintain, and have available for inspection evidence that he or she has performed the requisite number of work-days of seasonal agricultural services for each year as described in this section.

(2) Such evidence may consist of certificates provided to employees by employers as required in section 210A(b)(2) of the Act or the same type of documentation as may be submitted under section 210(b)(3) of the Act. (Certificates required by section 210A(b)(2) are also required by Department of Labor regulations located at 29 CFR 502.13. The Department of Labor may impose civil monetary penalties upon employers that fail to comply with those regulations.)

(e) *Securing RAW employment records.* (1) When a RAW temporary resident or permanent resident alleges that an employer refuses to provide him or her with records relating to his or her employment and the petitioner has reason to believe such records exist, the Service shall attempt to secure such records.

(2) Prior to any attempt by the Service to secure the employment records, the following conditions must be met:

(i) The alien must be in approved temporary resident status as a Replenishment Agricultural Worker;

(ii) Must have made reasonable attempts to secure the documentation from the employer;

(iii) The alien's testimony must credibly his or her claim;

(iv) The Service must determine that temporary resident status is in jeopardy in the absence of the employer records.

(3) Provided each of the conditions in paragraph (e)(2) of this section have been met, district directors may issue a subpoena in accordance with 8 CFR 287.4, for the purpose of obtaining the needed employment records.

(f) *Reissuance of Temporary Resident Card (Form I–688).* (1) Upon a finding by the Service that the 90 work-days in seasonal agricultural services required during the first twelve (12) month period have been completed, a second Temporary Resident Card (Form I–688) shall be issued and will be valid through the end of the required thirty six (36) month period of temporary residence.

(2) Form I–688 shall not be issued, reissued or extended and shall lose its validity if the temporary resident status of the alien has been terminated as provided in paragraph (h) of this section.

(g) *Ineligibility for immigration benefits.* An alien who is admitted for or whose status is adjusted to that of a lawful temporary resident under section 210A(c) of the Act is not entitled to submit a petition pursuant to section 203(a)(2) of the Act and cannot receive any other benefit or consideration accorded under the Act to aliens lawfully admitted for lawful permanent residence, except as provided in paragraph (a) of this section.

(h) *Termination of temporary resident status.* (1) The temporary resident status of a replenishment agricultural worker shall be terminated under section 210A(d)(2) of the Act upon a finding by the Service that the alien is deportable under sections 235, 236, 237 and 241 of the Act as amended to include failure to meet the work-day requirements of section 210A(d)(5)(A) of the Act.

(2) *Surrender of Form I–688A or Form I–688.* An alien whose status as a temporary resident has been terminated under this section shall, upon demand, promptly surrender Form I–688a, Employment Authorization Card or Form I–688, Temporary Resident Card, to the district director having jurisdiction over the alien's place of residence, or, in the case of a commuter, employment.

**§ 210a.7 Adjustment to permanent resident status.**

The status of an alien lawfully admitted to the United States for temporary residence under section 210A(c) of the Act (if the alien has otherwise maintained such status as required by the Act) shall be adjusted to that of an alien lawfully admitted to the United States for permanent residence as of the end of the three (3) year period that begins on the date the alien was granted such temporary resident status. Procedures for the adjustment process will be published at a later date.

Dated: February 15, 1989.

**Alan C. Nelson,**

*Commissioner, Immigration and Naturalization Service.*

### Federal Aviation Administration

### 14 CFR Part 71

**[Airspace Docket No. 89–AWA–2]**

### Proposed Alteration of VOR Federal Airways

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to alter the descriptions of several Federal Airways located in the Detroit metropolitan area. These airway changes are the result of the reorganization of the Detroit metropolitan air traffic control tower's (ATCT) and Cleveland air route traffic control center's (ARTCC) airspace. The traffic growth at the Detroit Metropolitan Airport and the intermix with the Chicago area traffic mandates these changes at this time. This action would improve traffic flow in the area and reduce controller workload.

**DATES:** Comments must be received on or before April 17, 1989..

**ADDRESSES:** Send comments on the proposal in triplicate to: Director, FAA, Great Lakes Region, Attention: Manager, Air Traffic Division, Docket No. 89–AWA–2, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Il 60018.

The official docket may be examined in the Rule Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

**FOR FURTHER INFORMATION CONTACT:** Lewis W. Still, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic

VOL 54 ISS 41 MR 3 1989 UMI

Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–9250.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89–AWA–2." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comment received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

**Availability of NPRM's**

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

**The Proposal**

The FAA is considering and amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the descriptions of fifteen airways located in the Detroit, MI, area. The Detroit metropolitan air traffic airspace area is being reorganized. The traffic growth at the Detroit Metroplitan Airport has been increasing each year and this growth is forecasted to continue. This action woud provide airways for departures and arrival at the Detroit Metroplitan Airport, Wayne County Airport and the satellite airports. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6D dated January 4, 1988.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation Safety, VOR Federal Airways.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

**§ 71.123 [Amended]**

2. § 71.123 is amended as follows:

**V–2 [Amended]**

By removing the words "INT Salem 083° and Aylmer, ON, Canada, 260° radials;" and substituting the words "INT Salem 093°T(096°M) and Aylmer, ON, Canada, 254°T(262°M) radials;"

**V–6 [Amended]**

By removing the words "Waterville; DRYER, OH;" and substituting the words "Waterville; INT Waterville 091°T(093°M) and DRYER, OH, 282°T(287°M) radials; DRYER;"

**V–30 [Amended]**

By removing the words "Waterville, OH; DRYER, OH;" and substituting the words "Waterville, OH; INT Waterville 091°T(093°M) and DRYER, OH, 282°T(287°M) radials; DRYER;"

**V–126 [Amended]**

By removing the words "Waterville, OH; DRYER, OH;" and substituting the words "Waterville–42e, OH; INT Waterville 091°T(093°M) and DRYER, OH, 282°T(287°M) radials; DRYER;"

**V–10 [Amended]**

By removing the words "Litchfield, MI; Carleton, MI;" and substituting the words "Litchfield, MI; INT Litchfield 101°T(102°M) and Carleton, MI, 262°T(265°M) radials; Carleton;"

**V–11 [Amended]**

By removing the words "Salem, MI; 6 miles wide to INT Salem 052° and Windsor, ON, Canada, 335° radials." and substituting the words "INT Fort Wayne 039°T(039°M) and Pontiac, MI, 212°T(215°M) radials; to INT Pontiac 212°T(215°M) and Carleton, MI, 262°T(265°M) radials."

**V–28 [Amended]**

By removing the words "INT Salem 139° and DRYER, OH, 309° radials;" and substituting the words "INT Salem 140°T(143°M) and DRYER, OH, 305°T(310°M) radials;"

**V–42 [Revised]**

From Waterville, OH; INT Waterville 064°T(066°M) and Akron, OH, 297°T(301°M) radials; INT Akron 297°T(301°M) and Youngstown, OH, 272°T(277°M) radials; Youngstown.

**V–45 [Amended]**

By removing the words "Appleton, OH. From Youngstown, OH; INT Youngstown 272° and Akron, OH, 298° radials; INT Akron 298° and Waterville, OH, 085° radials; Waterville; Jackson, MI;" and substituting the words "Appleton, OH; Waterville, OH; INT Waterville 308°T(308°M) and Jackson, MI, 164°T(169°M) radials; Jackson;"

**V–75 [Amended]**

By removing the words "DRYER, OH." and substituting the words "DRYER, OH; to INT DRYER 321°T(326°M) and Salem, MI, 130°T(133°M) radials."

**V–90 [Amended]**

By removing the words "From Windsor, ON, Canada, via INT Windsor 083° and Dunkirk, NY, 286° radials; Dunkirk." and substituting the words "From Windsor, ON, Canada; INT Windsor 092°T(096°M) and Dunkirk, NY, 262°T(269°M) radials; Dunkirk."

**V–96 [Amended]**

By removing the words "Waterville; Windsor, ON, Canada, excluding the portion within Canada." and substituting the words "Waterville."

**V–98 [Amended]**

By removing the words "From Carleton, MI, Windsor, ON, Canada;" and substituting the words "From Dayton, OH; INT Dayton 360°T(001°M) and Carleton, MI, 243°T(246°M) radials; to INT Carleton 243°T(246°M) and Waterville, OH, 321°T(323°M) radials. From Windsor, ON, Canada;"

**V–100 [Amended]**

By removing the words "Litchfield, MI; INT Litchfield 104° and Carleton, MI, 258° radials; Carleton." and substituting the words "to Litchfield, MI."

**V–103 [Amended]**

By removing the words "INT Akron 312° and Windsor, ON, Canada, 134° radials; INT Windsor 134° and Salem, MI, 117° radials; Salem; INT Salem 308° and Lansing, MI, 103° radials; to Lansing." and substituting the words "INT Akron 319°T(323°M) and Windsor, ON, Canada, 125°T(131°M) radials; Windsor; INT Windsor 292°T(298°M) and Lansing, MI, 091°T(093°M) radials; to Lansing."

Issued in Washington, DC, on February 23, 1989.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

**FOR FURTHER INFORMATION CONTACT:** Lewis W. Still, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–9250.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposals. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89–AWA–3." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

**Availability of NPRM's**

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

**The Proposals**

The FAA is considering amendments to Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) to alter the descriptions of thirteen airways and two jet routes located in the Detroit, MI, area. The Detroit metropolitan air traffic airspace area is being reorganized. The traffic growth at the Detroit Metropolitan Airport has been increasing each year and this growth is forecasted to continue. These actions would improve traffic flow in the area and reduce controller workload. Sections 71.123 and 75.100 of Parts 71 and 75 of the Federal Aviation Regulations were republished in Handbook 7400.6D dated January 4, 1988.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evalaution as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Parts 71 and 75**

Aviation Safety, VOR Federal airways and jet routes.

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) as follows:

VOL 54 ISS 41 MR 3 1989 UMI

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.123 [Amended]**

2. § 71.123 is amended as follows:

**V-116 [Amended]**

By removing the words "INT Jackson 084° and Salem, MI. 254° radials; Salem; Windsor, ON, Canada; INT Windsor 100° and Erie, PA. 275° radials; Erie;" and substituting the words "INT Jackson 089°T(094°M) and Salem, MI. 251°T(254°M) radials; Salem; INT Windsor, ON, Canada; INT Windsor 092°T(096°M) and Erie, PA. 281°T(287°M) radials; Erie

**V-133 [Amended]**

By removing the words "INT Mansfield 346° and Salem, MI. 139° radials;" and substituting the words "INT Mansfield 349°T(352°M) and Salem, MI. 140°T(143°M) radials;"

**V-178 [Removed]**

**V-218 [Amended]**

By removing the words", via Lansing, MI; Pontiac, MI; INT Pontiac 112° and Windsor, ON, Canada, 320° radials; Windsor; INT Windsor 134° and Akron, OH, 312° radials; to Akron. The airspace within Canada is excluded." and substituting the words: "to Lansing, MI."

**V-221 [Amended]**

By removing the words "INT Jackson 084° and Salem, MI. 254° radials; Salem; INT Salem 083° and Erie, PA. 290° radials;" and substituting the words "INT Jackson 089°T(094°TM) and Salem, MI. 251°T(254°M) radials; Salem; INT Salem 082°T(085°M) and Aylmer, Canada, 281°T(289°M) radials; INT Aylmer 280°T(289°M) and Erie, PA. 303°T(309°M) radials;"

**V-232 [Amended]**

By removing the words "From INT of the Cleveland, OH, 024° and the Chardon, OH. 281° radials, via Chardon;" and substituting the words "From Chardon, OH;"

**V-273 [Amended]**

By removing the words "INT Dayton 007° and Salem, MI. 202° radials; Salem." and substituting the words "to INT Dayton 007°T(008°M) and Waterville, OH. 246°T(248°M) radials."

**V-287 [Amended]**

By removing the words "INT Akron 298° and Carleton, MI. 120°; radials to Carleton." and substituting the words "INT Akron 303°T(307°M) and Salem, MI. 130°T(133°M) radials."

**V-337 [Amended]**

By removing the words "INT Akron 326° and Windsor, ON, Canada, 116° radials; Windsor; 29 miles 7 miles wide (3 miles east and 4 miles west of centerline), INT Windsor 335° and Saginaw, MI, 131° radials; Saginaw;" and substituting the words "INT Akron 343°T(347°M) and Peck, MI, 143°T(150°M) radials; Peck; Saginaw, MI;"

**V-458 [Amended]**

By removing the words "INT Flint 088° and Peck, MI, 237° radials;" and substituting the words "INT Flint 091°T(094°M) and London, ON, Canada, 263°T(271°M) radials; to London, excluding the airspace within Canada."

**V-464 [Amended]**

By removing the words "From the INT of Windsor, ON, Canada, 083° and Aylmer, ON, Canada, 235° radials, via Aylmer;" and substituting the words "From Salem, MI; via INT Salem 082°T(085°M) and Aylmer, ON, Canada, 261°T(269°M) radials; Aylmer;"

**V-528 [Amended]**

By removing the words "INT Waterville 108° and DRYER, OH, 252°, radials;" and substituting the words "INT Waterville 113°T(115°M) and DRYER, OH, 252°T(257°M) radials;"

**V-31 [Amended]**

By removing the words "INT Rochester 279° and Geneseo, NY, 305° radials; INT Geneseo 305° and Kleinburg, ON, Canada, 133° radials; Kleinburg;" and substituting the words "INT Rochester 279°T(288°M) and Toronto, Canada, 151°T(160°M) radials; Toronto."

**PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES**

BILLING CODE 4910-13-M

**14 CFR Part 75**

**[Airspace Docket No. 88-AWA-4]**

**Proposed Establishment of Jet Route J-596; ME**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Withdrawal of notice of proposed rulemaking.

**SUMMARY:** This notice withdraws the Notice of Proposed Rulemaking (NPRM), Airspace Docket No. 88-AWA-4, which was published in the **Federal Register** on June 21, 1988. That NPRM proposed to establish a new Jet Route/High Level Route HL/J-596 between Sherbrooke, PQ, Canada and Halifax, NS, Canada, via Bangor, ME. The Canadian Government requested this route to provide efficient routing for traffic en route to Canadian destinations.

**EFFECTIVE DATE:** February 24, 1989.

**FOR FURTHER INFORMATION CONTACT:** Lewis W. Still, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-9250.

**The Proposed Rule**

On June 21, 1988, a Notice of Proposed Rulemaking was published in the **Federal Register** to establish new Jet Route/High Level Route J-596 from Sherbrooke, PQ, Canada, via Bangor, ME, to Halifax, NS, Canada (53 FR 23258). Transport Canada requested this route to provide an efficient routing for traffic between Canadian points which cross a segment of the New England area.

**Summary of Comments**

Comments were received from the Boston Air Route Traffic Control Center (ARTCC) and the Department of Defense (DOD). The objections to the proposed J-596 were as follows:

J-596 would be located within airspace that has high density military activity and training. Also involved are the Air Refueling Tracks AR 212, AR 204 and AR 205. Therefore, the Boston ARTCC and the DOD stated they consider that the route would serve no beneficial purpose to the public or the National Airspace System.

**Conclusions**

**The FAA has decided not to implement the proposed J-596 segment between Sherbrook, PQ, Canada and Bangor, ME, because of the military activity and the limited time of use available for civil traffic.**

**List of Subjects in 14 CFR Part 75**

Aviation safety, Jet routes.

**The Withdrawal**

Accordingly, pursuant to the authority delegated to me, the Notice of Proposed Rulemaking, Airspace Docket No. 88-AWA-4, as published in the **Federal Register** on June 21, 1988 (53 FR 23258) is hereby withdrawn.

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

Issued in Washington, DC, on February 16, 1989.

**Harold W. Becker,**

*Manager, Airspace-Rules and Aeronautical Information Division.*

[FR Doc. 89-4966 Filed 3-2-89; 8:45 am]

BILLING CODE 4910-13-M

**14 CFR Part 75**

**[Airspace Docket No. 88-AWP-20]**

**Proposed Alteration of Jet Route; AZ**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to alter the description of Jet Route J-212 between Buckeye, AZ, and Palm Springs, CA. The current minimum en route altitude (MEA) northwest of Buckeye is 31,000 feet mean sea level (MSL). This action would aid in improving the flow of traffic to Palm Springs and the Los Angeles Basin Airports by lowering the MEA to 26,000 feet.

**DATES:** Comments must be received on or before April 10, 1989.

**ADDRESSES:** Send comments on the proposal in triplicate to: Director, FAA, Western-Pacific Region, Attention: Manager, Air Traffic Division, Docket No. 88-AWP-20, Federal Aviation Administration, P.O. Box 92007, Worldway Postal Center, Los Angeles, CA 90009.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

**FOR FURTHER INFORMATION CONTACT:** Lewis W. Still, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-9250.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 88-AWP-20." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

**Availability of NPRM's**

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-230, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267-3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

**The Proposal**

The FAA is considering an amendment to Part 75 of the Federal Aviation Regulations (14 CFR Part 75) to alter the description of Jet Route J-212 between Buckeye and Palm Springs. Currently the MEA between Buckeye and Palm Springs is 31,000 feet MSL which has created air traffic control problems for aircraft arriving at Palm Springs and the Los Angeles Basin Airports. Flight inspection data indicates the MEA could be lowered to 26,000 feet MSL if the route alignment is changed. This action would improve the flow of traffic into Palm Springs and the Los Angeles Basin area. Section 75.100 of Part 75 of the Federal Aviation Regulations was republished in Handbook 7400.6D dated January 4, 1988.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 75**

Aviation safety, Jet routes.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 75 of the Federal Aviation Regulations (14 CFR Part 75) as follows:

**PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES**

1. The authority citation for Part 75 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 75.100 [Amended]**

2. Section 75.100 is amended as follows:

VOL 54 ISS 41 MR 3 1989 UMI

J-212 [Revised]

From Stanfield, AZ; Buckeye, AZ; INT Buckeye 283°T(269°M) and Palm Springs, CA, 093°T(080°M) radials; to Palm Springs.

Issued in Washington, DC, on February 16, 1989.

Harold W. Becker,

*Manager, Airspace-Rules and Aeronautical Information Division.*

## DEPARTMENT OF THE INTERIOR

### Minerals Management Service

### 30 CFR Parts 202, 206, 210, and 212

### Revision of Geothermal Resources Valuation Regulations and Related Topics

**AGENCY:** Minerals Management Service (MMS), Interior.

**ACTION:** Notice of extension of public comment period and public hearing.

**SUMMARY:** The Minerals Management Service (MMS) hereby gives notice that it is extending the public comment period on its Notice of Proposed Rulemaking, which was published in the **Federal Register** on January 5, 1989 (54 FR 354), proposing to amend and clarify existing regulations to define the value for royalty purposes of geothermal resources produced from Federal lands administered by the Department of the Interior and the Department of Agriculture. In response to requests for additional time, MMS is extending the comment period from March 6, 1989, to April 17, 1989.

**DATE:** Written comments must be received on or before April 17, 1989. A hearing will be held on March 28, 1989, 8:30 a.m. to 4 p.m. in Lakewood, Colorado.

**ADDRESS:** Written comments may be mailed to Minerals Management Service, Royalty Management Program, Rules and Procedures Branch, Denver Federal Center, Building 85, P.O. Box 25165, Mail Stop 662, Denver, Colorado 80225, Attention: Dennis C. Whitcomb.

The hearing will be held in the auditorium, building 25, Denver Federal Center, 6th and Kipling Streets, Lakewood, Colorado.

**FOR FURTHER INFORMATION CONTACT:** Dennis C. Whitcomb, Chief, Rules and Procedures Branch, (303) 231-3432, (FTS) 326-3432.

Date: February 28, 1989.

## DEPARTMENT OF AGRICULTURE

### Forest Service

### 36 CFR Part 290

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

### 43 CFR Part 8360

[AA-340-89-4332-02]

### Cave Resources Management

**AGENCY:** Forest Service, Agriculture; Bureau of Land Management, Interior.

**ACTION:** Advance notice of proposed rulemaking.

**SUMMARY:** The Federal Cave Resources Protection Act of 1988 (Pub. L. 100-691) (the Act) requires the protection and maintenance, to the extent practical, of significant caves on Federal lands administered by the Secretaries of Agriculture and the Interior. The Act requires the Secretaries of Agriculture and the Interior to issue regulations to achieve the purposes of the Act. The regulations promulgated by the respective Secretaries are to be developed cooperatively, and to the extent practical the regulations are to be similar. The regulations are to include, but not be limited to, criteria for the identification of significant caves. The Department of the Interior and the Department of Agriculture have formed an interagency team to prepare the regulations, and request suggestions from the public on the content of the rules, and particularly suggestions as to criteria for determining what constitutes a significant cave.

**DATE:** Comments should be submitted by April 3, 1989. Comments received or postmarked after this date may not be considered in developing the proposed rulemaking. This limitation of time to comment is essential because the Act requires final regulations to be issued by August 18, 1989.

**ADDRESS:** Comments should be sent to the interagency team at the following address: Director (140), Bureau of Land Management, Room 5555, Main Interior Building, 1800 C Street NW., Washington, DC 20240. Comments will be available for public review at the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

**FOR FURTHER INFORMATION CONTACT:** Robert Hellie, (202) 343-6064, Delmar Price, (202) 343-9353, or Tom Lennon, (202) 447-7754.

**SUPPLEMENTARY INFORMATION:** To assist persons providing suggestions on the regulations, the following is a brief summary of the major provisions of the Federal Cave Resources Protection Act, contained mainly in sections 4, 5, and 6 of the Act, the sections guiding Federal agencies in the administration of cave resources.

Regulations are to be issued by both the Secretary of Agriculture and the Secretary of the Interior not later than 9 months after enactment of the Act. The regulations shall include, but not be limited to, criteria for the identification of significant caves.

The Secretary of Agriculture and the Secretary of the Interior are to take such actions as may be necessary to further the purposes of the Act, which shall include, but not be limited to, preparation of an initial list of significant caves for lands under their respective jurisdictions. The initial list is required to be prepared not later than 1 year after publication of the final regulations and to apply the significance criteria defined in the regulations. The list is to be developed after consultation with appropriate private sector interests, including cavers. The initial list of significant caves is also required to be updated, again after consultation, on a periodic basis. The updating process is required to be described by policy or regulation and include management measures to assure that caves under consideration for the list are protected during the period of consideration. Caves recommended to the respective Secretaries for possible inclusion on the list shall be added to the list if the respective Secretaries determine that they meet the criteria for significance as defined in the regulations.

Actions to be taken by the respective Secretaries are also to provide for the regulation or restriction of use of significant caves as are considered appropriate, entering into management agreements with persons of the scientific and recreational caving community, and the appointment of appropriate advisory committees.

The respective Secretaries are to insure that significant caves are considered in the preparation of any land management plan, if the preparation or revision of the plan begins after the date of enactment of the Act. Both Secretaries are also required to foster communication, cooperation, and the exchange of information between their respective agency land managers, those who utilize caves, and the public.

The Act also provides the respective Secretaries authority to issue permits for the collection and removal of cave resources, including the posting of bonds to insure compliance with the provisions of any issued permit. The Act also provides for the revocation of permits for violations of the Act or the permit. Special provisions for the regulation of cave resources located on Indian lands are also contained in the Act.

Sections 7 and 8 of the Act contain provisions pertaining to prohibited acts with respect to cave resources and the criminal and civil penalties which may be imposed for violation of the Act, the regulations, or any permit issued under them.

Comments and suggestions are invited on how the regulations might address the requirements of the Act. Because the Act applies to lands administered by both the Department of Agriculture and the Department of the Interior, a joint interagency team has been established to develop the regulations called for by the Act. Representatives on the interagency team include specialists from: Forest Service (Department of Agriculture); Bureau of Land Management, National Park Service, Fish and Wildlife Service, Bureau of Indian Affairs, and Bureau of Reclamation (Department of the Interior).

To simplify coordination requirements and to facilitate public submittal of comments, they should be sent to the address given. Copies of the comments will then be distributed to the other Federal agencies involved.

George S. Dunlop,

*Assistant Secretary, Natural Resources and Environment.*

James E. Cason,

*Acting Assistant Secretary of the Interior.*

BILLING CODE 3410-11-M

## FEDERAL COMMUNICATIONS COMMISSION

### 47 CFR Part 68

[CC Docket No. 87-124; FCC 89-55]

### Telephone Hearing Aid Compatibility

**AGENCY:** Federal Communications Commission (Commission).

**ACTION:** Proposed rules.

**SUMMARY:** The Commission proposes to amend Part 68 of its rules to require nearly all telephones manufactured in or imported into the United States after August 16, 1989, to be hearing aid compatible. These rule modifications are being made to ensure that hearing impaired persons have reasonable access to telecommunications services and equipment and to comply with the Hearing Aid Compatibility Act of 1988.

**DATES:** Comments must be received on or before March 9, 1989, and reply comments on or before March 20, 1989.

**ADDRESS:** Comments shall be filed with the Federal Communications Commission, Washington, DC 20554 as prescribed in §§ 1.415 through 1.419 of the Commission's Rules.

**FOR FURTHER INFORMATION CONTACT:** Robert James, (202) 634-1831.

**SUPPLEMENTARY INFORMATION:** This is a summary of a FNPRM in CC Docket No. 87-124 adopted by the Commission on February 13, 1989, and released on February 16, 1989. The full text of the item may be examined in the Commission's Docket Branch, Room 230, 1919 M Street NW., Washington, DC, during regular business hours or purchased from the Commission's duplicating contractor, International Transcription Services, 2100 M Street NW., Suite 140, Washington, DC 20037, telephone (202) 857-3800.

#### FNPRM

The Commission's current rules require telephones classified as "essential"—meaning telephones provided for emergency use, coin telephones and other telephones frequently used by the hearing impaired—be internally compatible with hearing aids. A number of parties have presented arguments to us suggesting that these rules may not be enough. In response, the Commission initiated CC Docket No. 87-124, to gather information on what, if any, additional rules or rule revisions are needed to assure that the disabled of America have reasonable access to telecommunications services. In the NPRM phase of this proceeding, the Commission proposed that the definition of "essential telephones" be expanded to include all credit card telephones and workplace telephones located in common areas likely to be used by hearing impaired employees.

On August 17, 1988, the "Hearing Aid Compatibility Act of 1988" (HAC Act) was enacted. This law amends section 710(b) of the Communications Act of 1934. It requires almost all telephones manufactured in or imported into this country more than one year after its enactment to be hearing aid compatible. The new law exempts refurbished, repaired or resold telephones, telephones used with public and private mobile radio services, and secure telephones used for classified communications. The HAC Act provides a three year grace period for cordless telephones before they must comply with the requirement. It directs the Commission to review the exceptions for public and private mobile telephones periodically and to rescind them if they are no longer warranted. Also, the HAC Act grants the Commission authority to waive the hearing aid compatibility requirement with respect to new telephones if telephone manufacturers can demonstrate it is infeasible or too costly to meet this standard. In this FNPRM, the Commission proposes to amend Part 68 of its rules to comply with the HAC Act.

In accordance with 5 U.S.C. 603(a), the Federal Communications Commission concludes that the proposed rules will not have a significant adverse economic impact on small entities.

Comments on the proposed rules are sought.

#### List of Subjects in 47 CFR Part 68

Hearing aid compatible telephones, Notice, Technical standards.

#### Legal Basis

This FNPRM seeking to amend Part 68 of the Commission's rules is issued pursuant to authority contained in sections 1 and 4(i) of the Communications Act of 1934, as amended, and the Hearing Aid Compatibility Act of 1988.

Federal Communications Commission.

Donna R. Searcy,

*Secretary.*

## GENERAL SERVICES ADMINISTRATION

### 48 CFR Parts 525, 546, and 552

[GSAR Notices 5-242 and 5-256]

### General Services Administration Acquisition Regulation; Foreign Acquisition and Quality Assurance

**AGENCY:** Office of Acquisition Policy, GSA.

**ACTION:** Proposed rule.

**SUMMARY:** This notice invites comments on a proposed change to the General Services Administration Acquisition Regulation (GSAR), Chapter 5 (APD 2800.12), that would: (1) amend sections

VOL
54
ISS
41
MR
3
1989
UMI

525.105, 525.105–70, and 525.105–71 to simplify regulatory coverage and prescribe an amended Buy American Act—Hand or Measuring Tools or Stainless Steel Flatware provision and a Notice of Procurement Restriction—Hand or Measuring Tools or Stainless Steel Flatware clause; (2) add section 525.302 to provide policy applicable when contracting under the Balance of Payments Program; (3) retitle and revise section 525.407 to simplify regulatory coverage and prescribe the renumbered Eligible Products from Nondesignated Countries—Waiver clause; (4) revise section 546.710 to prescribe three new warranty clauses; (5) revise sections 552.225–70 and 552.225–71 to include stainless steel flatware in the provision and clause; (6) delete sections 552.225–72 and 552.225–73; (7) renumber and revise section 552.225–74 to clarify regulatory coverage; (8) add section 552.246–17 to provide the text for the Warranty of Supplies of a Noncomplex Nature clause with an Alternate I to be used for commercial items; and (9) add sections 552.246–73 and 552.246–74 to provide the text of the Warranty—Multiple Award Schedule and Warranty—International Multiple Award Schedule clauses.

**DATE:** Comments are due in writing on or before April 3,1989.

**ADDRESS:** Comments should be addressed to Ms. Marjorie Ashby, Office of GSA Acquisition Policy and Regulations (VP), 18th and F Streets, NW, Room 4028, Washington, DC 20405.

**FOR FURTHER INFORMATION CONTACT:** Mr. Paul Linfield, Office of GSA Acquisition Policy and Regulations, (202) 566–1224.

**SUPPLEMENTARY INFORMATION:** The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain procurement regulations from Executive Order 12291. The exemption applies to this proposed rule. The General Services Administration (GSA) certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). The number of small entities to which the restrictions in Part 525 would apply is considered not significant in relation to the total number of small entities that do business with the General Services Administration. To the extent that the warranty clauses prescribed in section 546.710 rely on the contractor's standard commercial warranty, the regulatory impact on small entities is also considered insignificant. Therefore, no regulatory flexibility analysis has been prepared. The Buy American Act—Hand or Measuring Tools or Stainless Steel Flatware clause at 552.255–70 contains an information collection requirement which requires the approval of OMB under section 3504(h) of the Paperwork Reduction Act. The collection requirement in section 552.225–70 has previously been approved by OMB and assigned Control No. 3090–0196. Since the collection requirement is being amended to include stainless steel flatware, this proposed rule has been submitted to OMB for approval. Comments on the information collection requirement in GSAR 552.225–70 may be directed to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for GSA, Washington, DC 20503. The title of the collection is "General Services Administration Acquisition Regulation (GSAR), Part 525, Foreign Acquisition." The provision at GSAR 552.225–70 requires offerors to identify items that are foreign end products and the amount of import duty applicable to each item. The information is needed by the contracting office to comply with procurement restrictions for hand or measuring tools and stainless steel flatware contained in GSA and DOD Appropriation Acts. The respondents are offerors on GSA acquisitions for hand or measuring tools and stainless steel flatware. The estimated annual burden for this collection is 6.7 hours. This is based on an estimated average burden hour per response of 0.16, a proposed frequency of 1 response per respondent, and an estimated number of respondents of 40.

**List of Subjects in 48 CFR Parts 525, 546, 552.**

Government procurement.

1. The authority citation for 48 CFR Parts 525, 546, and 552 continues to read as follows:

**Authority:** 40 U.S.C. 486(c).)

## PART 525—FOREIGN ACQUISITIONS

2. Sections 525.105, 525.105–70, and 525.107–71 are revised to read as follows:

**525.105 Evaluating offers.**

(a) Proposed awards, under FAR 25.105, must be submitted to the HCA or a designee for approval. A statement of facts containing the following information should be submitted for approval.

(1) Description of the item(s), including unit and quantity.

(2) Estimated cost.

(3) Statement as to whether duty is included in the estimate cost and, if not, the reasons for exclusion.

(4) Transportation costs for delivery to destination if the item is to be procured f.o.b. origin.

(5) Country of origin.

(6) Name and address of proposed contractor(s).

(7) Brief statement as to necessity for procurement.

(8) Reasons supporting request for approval explaining—

(i) Why the cost would not be unreasonable or inconsistent with the public interest when award to a domestic concern for more than $250,000 would be made to a small business or labor surplus area concern after the 12 percent factor is applied, but not to a firm after the 6 percent is applied.

(ii) Any proposed rejection of an acceptable low foreign offer to protect essential national security interests or rejection of any offer for other reasons of national interest, when the Trade Agreements Act of 1979 is not applicable.

(b) A determination to reject a foreign offer using differentials greater than those provided at FAR 25.105 may be made—

(1) If necessary to protect national security interests; and

(2) After the HCA or a designee obtains advice from the Director, Federal Emergency Management Agency. The Executive Office of the President, Office of Management and Budget, must be apprised of the facts of each case where such a determination is made.

**525.105–70 Evaluating offers—hand or measuring tools or stainless steel flatware for other than the Department of Defense (DOD).**

(a) *Definitions.* "Hand or mesuring tool," as used in this section, means Groups 51 and 52 in Cataloging Handbook H2–1, Federal Supply Classification Part I, Groups and Classes, published by the Defense Logistics Agency, Defense Logistics Services Center, Battle Creek, Michigan.

(b) *GSA Appropriation Act restrictions.* (1) The current GSA Appropriation Act restricts the acquisition of any hand or measuring tool and stainles steel flatware to domestic end products, except to the extent the Administrator of General Services or a designee determines that a satisfactory quality and sufficient quantity are unavailable from sources in the United States or its possessions or except as prescribed by section 6–104.4(b) of the Armed Services Procurement Regulations (ASPR) in effect on June 15, 1970.

(2) For hand or measuring tools, the GSA Appropriation Act further provides that a factor of 75 percent is to be used in evaluating foreign end products in lieu of the 50 percent in ASPR 6–104.4(b).

(c) *Evaluation procedures.* Offers for hand or measuring tools or stainless steel flatware must be evaluated using the following procedures adapted from ASPR 6–104.4(b).

(1) An offer of an end product manufactured in Canada will be evaluated on the same basis as a domestic end product after applicable duty, determined under 19 U.S.C. 1201 is included, irrespective of whether or not a duty-free entry certificate will be issued.

(2) Any other offer of a foreign end product must be evaluated at the greater evaluated price determined by increasing either (i) the net value of the offer (exclusive of duty) by 50 percent (75 percent for hand or measuring tools) or (ii) the gross value of the offer (inclusive of duty) by 6 percent.

(3) A 12 percent factor must be used in (c)(2)(ii) above, when (i) a small business or any labor surplus area concern submits the low acceptable domestic offer or (ii) an otherwise low acceptable domestic offer would result in a contract not to exceed $100,000 based on its application, but not on the application of the factors in (c)(2)(i) and (ii).

(4) If a contract exceeding $100,000 to a small business or labor surplus area concern would result under the circumstances in (c)(3)(ii), the matter must be submitted to the HCA for a decision whether such award would involve unreasonable cost or be inconsistent with the public interest.

(5) The above evaluation must be applied on an item-by-item basis or to any group of items on which award may be made as specifically provided by the solicitation. Award on the domestic offer will be made when any tie results from the foregoing procedures.

(d) *Solicitation provision.* The contracting officer shall insert the provision at 552.225–70, Buy American Act—Hand or Measuring Tools or Stainless Steel Flatware, in solicitations for the acquisition of hand or measuring tools or stainless steel flatware for other than Department of Defense requirements.

**525.105–71 Procurement of hand or measuring tools or stainless steel flatware for DOD.**

(a) *Definitions.* "Domestic end product," as used in this section, means a hand or measuring tool, other than an electric or air-motor driven hand tool, or stainless steel flatware, that is wholly produced or manufactured, including all components, in the United States or its possessions.

"Electric or air-motor driven hand tool," as used in this section, means a domestic end product if the cost of components produced or manufactured in the United States exceeds 75 percent of the cost of all components in the end product.

"Stainless steel flatware," as used in this section, means nonstock items of stainless steel flatware purchased for DOD and items with the following National Stock Numbers (NSN): 7340–00–060–6057; 7340–00–205–3340; 7340–00–205–3341; 7340–00–241–8169; 7340–00–241–8170; 7340–00–241–8171; 7340–00–559–8357; 7340–00–888–1055; 7340–00–721–6316; 7340–00–721–8971.

(b) *DOD Appropriation Act restrictions.* (1) Except for purchases of $25,000 or less, DOD is prohibited from acquiring hand or measuring tools or stainless steel flatware (see 525.105–71(a)), that are not domestic end products, except in the case of stainless steel flatware, when the Secretary of the department concerned determines that a satisfactory quality and quantity produced or manufactured in the United States or its possessions are not available when needed at domestic market prices.

(2) In GSA procurements of such tools or flatware, a determination must be made by the appropriate Commodity Center Director whenever GSA applies the current DOD Appropriation Act restrictions. This determination must be made on a case-by-case basis, whenever (i) DOD requirements are included in the solication and (ii) the hand or measuring tools or stainless steel flatware are available from domestic sources.

(3) The basis for applying the DOD Appropriation Act restrictions to GSA acquisitions is the—

(i) Statutory prohibition on DOD, which applies when DOD requisitions such items, regardless of whether or not it is from the GSA stock program;

(ii) Impracticality of establishing a dual supply system to satisfy the requirements of civilian and military agencies; and

(iii) Language in the GSA Appropriation Act, which provides for the rejection of any offer when it is considered necessary for reasons of national interest under ASPR 6–104.4(d)(3)(ii).

(c) *Contract clause.* The contracting officer shall insert the clause at 552.225–71, Notice of Procurement Restriction—Hand or Measuring Tools or Stainless Steel Flatware, in solicitations and contracts for the acquisition of hand or measuring tools or stainless steel flatware when the Commodity Center Director makes a determination under 525.105–71(b).

3. Section 525.302 is added to read as follows:

**525.302 Policy.**

(a) Decisions under FAR 25.302(b)(3) must be supported as provided in 525.108–70(a).

(b) Use of a greater differential than provided in FAR 25.302(c) may be authorized by the HCA or a designee.

**525.370 [Removed]**

4. Section 525.370 is removed.

5. Section 525.407 is retitled and revised to read as follows:

**525.407 Solicitation provision and contract clause.**

The contracting officer shall insert the clause at 552.225–72, Eligible Products from Nondesignated Countries—Waiver, in solicitations and contracts subject to the Trade Agreements Act.

**546.470–3 and 546.470–4 [Removed]**

6. Sections 546.470–3 and 546.470–4 are removed.

7. Section 5456.710 is revised to read as follows:

**546.710 Contract Clauses.**

(a) The contracting officer shall insert the clause at 552.246–17, Warranty of Supplies of a Noncomplex Nature, in solicitations and contracts instead of FAR 52.246–17. If commercial items are to be acquired, the clause at 552.246–17 must be used with Alternate I instead of FAR 52.246–17 with its Alternate I.

(b) The contracting officer shall insert the clause at 552.246–73, Warranty-Multiple Award Schedule, in solicitations and multiple award schedule (except international schedule) contracts.

(c) The contracting officer shall insert the clause at 552.246–74, Warranty-International Multiple Award Schedule, in solicitations and international multiple award schedule contracts.

(d) The contracting officer shall insert the clause at 552.246–76, Warranty of Pesticides, in solicitations and contracts involving the procurement of pesticides.

(e) The contracting officer shall insert the clause at 552.246–75, Guarantees, in solicitations and contracts for construction when the contract amount is expected to exceed the small purchase limitation.

VOL 54 ISS 41 MR 3 1989 UMI

## PART 552—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

8. Sections 552.225–70 and 552.225–71 are revised to read as follows:

**552.225–70 Buy American Act—Hand or Measuring Tools or Stainless Steel Flatware.**

As prescribed in 525.105–70(D), insert the following provision:

**Buy American Act—Hand or Measuring Tools or Stainless Steel Flatware (XXX 1989)**

Offers of foreign end products will be evaluated in accordance with GSAR 525.105–70(c) (48 CFR 525.105–70(c)). Offerors that intend to supply foreign end products must specify below or on an attachment to this offer the amount of duty (i) applicable if a duty-free entry certificate was *not* issued (for Canadian end products only) or (ii) included in each offered price (for all other offers of foreign end products). If no duty is specified, the differential in GSAR 525.105–70(c)(2)(i) will be applied to the offered price.

| Item No. | Unit | Amount of duty (in dollars and cents) |
|---|---|---|
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |

(End of Provision)

**552.225–71 Notice of Procurement Restriction—Hand or Measuring Tools or Stainless Steel Flatware.**

As prescribed in 525.105–71(c), insert the following clause:

**Notice of Procurement Restriction—Hand or Measuring Tools or Stainless Steel Flatware (XXX 1989)**

(a) Awards under this solicitation will only be made to offerors that will furnish hand or measuring tools or stainless steel flatware that are domestic end products. Pursuant to the requirements of the current Department of Defense Appropriations Act, GSA has determined, in accordance with Section 6–104.4 of the Armed Services Procurement Regulation (6/15/70, that it is in the national interest to reject foreign products. As used in this clause—

(1) A "domestic end product" is any hand or measuring tool, except for an electric or air-motor driven hand tool, or stainless steel flatware, wholly produced or manufactured, including all components, in the United States or its possessions; or

(2) Any electric or air-motor driven hand tool if the cost of its components produced or manufactured in the United States exceeds 75 percent of the cost of all its components.

(b) Tool kits or sets, being procured under this solicitation, will not be considered domestic end products if any individual tool classified in FSC Group 51 or 52 and included in a tool kit or set is not a domestic end product as defined in paragraph (a) of this clause. The restrictions of this clause do not apply to individual hand or measuring tools that are contained in the tool kit or set but are not classified in FSC Group 51 or 52.

9. Section 552.225–72 is revised to read as follows:

**552.225–72 Eligible products from nondesignated countries.**

As prescribed in 525.407, insert the following clause:

**Eligible Products From Nondesignated Countries Waiver (XXX 1989)**

(a) In accordance with the Trade Agreements Act of 1979 and 48 CFR 25.402(b), no eligible product which originates in a nondesignated country may be purchased by a Federal agency. However, this restriction may be waived before award when it is determined to be in the national interest. Accordingly, offers to furnish products originating in a nondesignated country may be submitted in response to this solicitation and will be considered for award if a waiver is obtained from the U.S. Trade Representative or a designee (19 U.S.C. 2512) on the basis that:

(1) No responsive bid or technically acceptable offer from a responsible offeror is received offering U.S. or designated country end products (48 CFR 52.225–8 and 52.225–9); or

(2) Responsible offerors do not offer a sufficient quantity to meet the Government's requirements.

(b) The determination to seek a waiver is at the sole discretion of the acquiring activity, and the granting of such waiver will be at the sole discretion of the U.S. Trade Representative or designee. (48 CFR 525.402.)

(End of Clause)

**552.225–73 and 552.225–74 [Removed]**

10. Sections 552.225–73 and 552.225–74 are removed.

11. Section 552.246–17 is added to read as follows:

**552.246–17 Warranty of supplies of a noncomplex nature.**

As prescribed in 546.710(a), insert the following clause:

**Warranty of Supplies of a Noncomplex Nature (XXX 1989) (DEVIATION FAR 52.246–17)**

(a) Definitions. "Acceptance," as used in this clause, means the act of an authorized representative of the Government by which the Government assumes for itself, or as an agent of another, ownership of existing supplies, or approves specific services as partial or complete performance of the contract.

"Correction," as used in this clause, means the elimination of a defect.

"Supplies," as used in this clause, means the end item furnished by the Contractor and related services required under the contract. The word does not include "data."

(b) *Contractor's obligations.* (1) Notwithstanding inspection and acceptance by the Government of supplies furnished under this contract, or any condition of this contract concerning the conclusiveness thereof, the Contractor warrants that for _____[1]—

(i) All supplies furnished under this contract will be free from defects in material or workmanship and will conform with all requirements for this contract; and

(ii) The preservation, packaging, packing, and marking, and the preparation for, and method of, shipment of such supplies will conform with the requirements of this contract.

(2) When return, correction, or replacement is required, transportation charges and responsibility for the supplies while in transit shall be borne by the Contractor. However, the Contractor's liability for the transportation charges shall not exceed an amount equal to the cost of transportation by the usual commercial method of shipment between the place of delivery specified in the contract and the Contractor's plant, and return.

(3) Any supplies or parts thereof, corrected or furnished in replacement under this clause, shall also be subject to the terms of this clause to the same extent as supplies initially delivered. The warranty, with respect to supplies or parts thereof, shall be equal in duration to that in paragraph (b)(1) of this clause and shall run from the date of delivery of the corrected or replaced supplies.

(4) All implied warranties of merchantability and "fitness for a particular purpose" are excluded from any obligation contained in this contract.

(c) *Remedies available to the Government.* (1) The Contracting Officer shall give written notice to the Contractor of any breach of warranties in paragraph (b)(1) of this clause within _____[2]

(2) Within a reasonable time after the notice, the Contracting Officer may either—

(i) Require, by written notice, the prompt correction or replacement of any supplies or parts thereof (including preservation, packaging, packing, and marking) that do not conform with the requirements, of this contract within the meaning of paragraph (b)(1) of this clause; or

(ii) Retain such supplies and reduce the contract price by an amount equitable under the circumstances. When the nature of the defect in the nonconforming item is such that the defect affects an entire batch or lot of material, then the equitable price adjustment shall apply to the entire batch or lot of material from which the nonconforming item was taken.

[1] Contracting Officer shall state the specific period of time after delivery, or the specified event whose occurrence will terminate the warranty period; e.g., the number of miles or hours of use, or combination of any applicable event or periods of time.

[2] Contracting Officer shall insert specific period of time; e.g. "45 days of the last delivery under this contract," or "45 days after discovery of the defect"). The number of days specified shall be no less than 30.

(3)(i) If the contract provides for inspection of supplies by sampling procedures, conformance of supplies or components subject to warranty action shall be determined by the applicable sampling procedures in the contract. The Contracting Officer—

(A) May, for sampling purposes, group any supplies delivered under this contract;

(B) Shall require the size of the sample to be that required by sampling procedures specified in the contract for the quantity of supplies on which warranty action is proposed;

(C) May project warranty sampling results over supplies in the same shipment or other supplies contained in other shipments even though all of such supplies are not present at the point of reinspection; *provided,* that the supplies remaining are reasonably representative of the quantity on which warranty action is proposed; and

(D) Need not use the same lot size as on original inspection or reconstitute the original inspection lots.

(ii) Within a reasonable time after notice of any breach of the warranties specified in paragraph (b)(1) of this clause, the Contracting Officer may exercise one or more of the following options:

(A) Require an equitable adjustment in the contract price for any group of supplies.

(B) Screen the supplies grouped for warranty action under the clause at the Contractor's expense and return all nonconforming supplies to the Contractor for correction or replacement.

(C) Require the Contractor to screen the supplies at locations designated by the Government within the continental United States and to correct or replace all nonconforming supplies.

(D) Return the supplies grouped for warranty action under this clause to the Contractor (irrespective of the f.o.b. point or the point of acceptance) for screening and correction or replacement.

(4)(i) The Contracting Officer may, by contract or otherwise, correct or replace the nonconforming supplies with similar supplies from another source and charge to the Contractor the cost occasioned to the Government thereby if the Contractor—

(A) Fails to make redelivery of the corrected or replaced supplies within the time established for their return; or

(B) Fails either to accept return of the nonconforming supplies or fails to make progress after their return to correct or replace them so as to endanger performance of the delivery schedule, and in either of these circumstances does not cure such failure within a period of 10 days (or such longer period as the Contracting Officer may authorize in writing) after receipt of the notice from the Contracting Officer specifying such failure.

(ii) Instead of correction or replacement by the Government, the Contracting Officer may require an equitable adjustment of the contract price for all nonconforming supplies, including batch or lot materials which have either been consumed or other disposition has been made. In addition, if the Contractor fails to furnish timely disposition instructions, the Contracting Officer may dispose of the nonconforming supplies for the Contractor's account in a reasonable manner. The Government is entitled to reimbursement from the Contractor, or from the proceeds of such disposal, for the reasonable expenses of the care and disposition of the nonconforming supplies, as well as for excess costs incurred or to be incurred.

(5) The rights and remedies of the Government provided in this clause are in addition to and do not limit any rights afforded to the Government by any other clause of this contract.

(6) Unless otherwise provided, this warranty is applicable both within and outside the continental limits of the United States.

(7) In addition to other marking requirements of this contract, the Contractor shall stamp or mark the supplies delivered or otherwise furnish notice with the supplies of the existence of the warranty. The marking should briefly include (i) a statement that the warranty exists, (ii) the substance of the warranty, (iii) its duration, and (iv) who to notify if the supplies are found to be defective.

(End of Clause)

**Alternate I (XXX 1989)**

If commercial items are to be acquired, substitute the following for paragraph (b)(1) of the basic clause and delete paragraph (b)(4) of the basic clause.

(1) Notwithstanding inspection and acceptance by the Government of supplies furnished under this contract, or any condition of this contract concerning the conclusiveness thereof, the Contractor warrants for _____ all supplies furnished—

(i) Are of a quality to pass without objection in the trade under the contract description;

(ii) Are fit for the ordinary purposes for which the supplies are used;

(iii) Are within the variations permitted by the contract, and are of an even kind, quality, and quantity within each unit and among all units;

(iv) Are adequately contained, packaged, and marked as the contract may require; and

(v) Conform to the promises or affirmations of fact made on the container.

12. Sections 552.246–73 and 552.246–74 are added to read as follows:

**552.246–73 Warranty—multiple award schedule.**

As prescribed in 546.710(b), insert the following clause:

**Warranty—Multiple Award Schedule (XXX 1989)**

The Contractor's standard commercial warranty as stated in the Contractor's commercial pricelist will apply to this contract if its warranty is equal to or better than the warranty required by 552.246–17 (Alternate I).

(End of clause)

**552.246–74 Warranty—international multiple award schedule.**

As prescribed in 546.710(c), insert the following clause:

**Warranty—International Multiple Award Schedule (XXX 1989)**

Unless specified otherwise in this contract, the Contractor's standard commercial warranty as stated in the commercial pricelist applies to this contract, except: (a) the Contractor shall provide, at a minimum, a warranty on all nonconsumable parts for a period of 90 days from the date that the Government accepts the product; (b) parts and labor required under the warranty provisions shall be supplied free of charge; (c) transportation costs of returning the products to and from the repair facility, or the costs involved with contractor personnel traveling to the Government facility for the purpose of repairing the product onsite shall be borne by the Contractor during the 90 day warranty period.

(End of Clause)

Dated: February 14, 1989.

## INTERSTATE COMMERCE COMMISSION

**49 CFR Part 1016**

**[Ex Parte No. 55 (Sub No. 52)]**

## Special Procedures Governing The Recovery of Expenses by Parties to Commission Adjudicatory Proceedings

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Extension of comment period.

**SUMMARY:** On February 21, 1989, at 54 FR 7454, the Commission issued proposed rules to reflect the recodification and amendment of the Equal Access to Justice Act Pub. L. No. 99–80. 99 Stat. 183). The Commission also served a corresponding decision on February 17, 1989. Inadvertently the Commission's decision was issued without the text of the proposed rules. A notice to the parties has been issued which contains the text of the proposed rules. The comment period of this proceeding will be extended to provide sufficient time for interested persons to submit comments on our proposal.

**DATE:** Comments are due April 3, 1989.

**ADDRESS:** Send an original and 10 copies of comments referring to: Ex Parte No. 55 (Sub-No. 52) to: Case Control Branch, Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

**FOR FURTHER INFORMATION CONTACT:** Richard R. Hartley, 202–275–7786
or
Richard B. Felder, 202–275–7691

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

### 50 CFR Part 671

### Bering Sea/Aleutian Islands King and Tanner Crab Fisheries

**AGENCY:** National Marine Fisheries Service (NMFS), NOAA, Commerce.

**ACTION:** Notice of availability of a fishery management plan and request for comments.

**SUMMARY:** NOAA issues this notice that the North Pacific Fishery Management Council (Council) has submitted a Fishery Management Plan for the commercial king and Tanner crab fisheries in the Bering Sea/Aleutian Islands (FMP) for Secretarial review and is requesting comments from the public. Copies of the FMP may be obtained from the address below.

**DATE:** Comments on the FMP should be submitted on or before May 2, 1989.

**ADDRESS:** All comments should be sent to Steven Pennoyer, Director, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802. Copies of the FMP and the environmental assessment are available upon request from the North Pacific Fishery Management Council, P.O. Box 103136 Anchorage, AK 99510.

**FOR FURTHER INFORMATION CONTACT:** Raymond F. Baglin (National Marine Fisheries Service, Alaska Region), 907–586–7229.

**SUPPLEMENTARY INFORMATION:** The Magnuson Fishery Conservation and Management Act (Magnuson Act, 16 U.S.C. 1801 *et seq.*) requires that each Regional Fishery Management Council submit any FMP it prepares to the Secretary of Commerce (Secretary) for review and approval or disapproval. The Magnuson Act also requires that the Secretary, upon receiving the FMP, immediately publish a notice that the FMP is available for public review and comment. The Secretary will consider the public comments in determining whether to approve the FMP.

The FMP for the commercial king and Tanner crab fisheries in the Bering Sea/Aleutian Islands culminates a 10-year effort by the Council to address the concerns of various user groups while at the same time acknowledging over 20 years of management of crab by the State of Alaska. The FMP provides the State of Alaska with the lead management role for the king and Tanner crab fisheries. Also, the FMP provides for Secretarial oversight of State preseason and inseason actions through a review and appeal procedure to ensure that State management of king crab and Tanner crab is consistent with the FMP, the Magnuson Act, and other applicable Federal law.

No Federal regulatory action is necessary to implement this FMP. The Secretary has preliminarily determined that existing State laws appear to be consistent with the FMP, the Magnuson Act, and other applicable Federal law. If the Secretary later finds that a State regulation or statute governing king or Tanner crab in the Bering Sea/Aleutian Islands is inconsistent with the FMP, the Magnuson Act, or other applicable Federal law, either as the result of an appeal or the mandatory review of measures adopted by the State Board of fisheries provided for in the FMP, he may publish a regulation in the **Federal Register** that supersedes such State regulation or statute as it applies in the EEZ.

**Authority:** 16 U.S.C. 1801 *et seq.*

Dated: February 28, 1989.

**Alan Dean Parsons,**

*Acting Director, Office of Fisheries Conservation and Management.*

Friday, March 3, 1989

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF AGRICULTURE

### Forest Service

### National Environmental Policy Act; Revised Policy and Procedures

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of interim policy and procedures.

**SUMMARY:** On January 23, 1989, the Secretary of Agriculture gave notice of adoption of final rules revising administrative appeal procedures for National Forest Service System plan and project decisions. The new rules at 36 CFR Part 217 introduce a new type of environmental document—a Decision Memo. In order to implement the new appeal procedures, the Forest Service must issue direction immediately to its field officers on when and how to prepare a Decision Memo. This direction is being issued as an Interim Directive to Forest Service Handbook 1909.15, Environmental Policy and Procedures Handbook, and is effective February 22, 1989, to coincide with the effective date of new rules at 36 CFR Part 217.

**EFFECTIVE DATE:** February 22, 1989.

**FOR FURTHER INFORMATION CONTACT:** Questions and comments about this policy should be addressed to David E. Ketcham, Director of Environmental Coordination, Forest Service, USDA, P.O. Box 96090, Washington, DC 20090–6090, phone (202) 447–4708.

**SUPPLEMENTARY INFORMATION:** As noted in the summary, new rules governing administrative appeal of National Forest System plan and project decisions were published January 23, 1989, at 54 FR 3342–3370, and became effective February 22, 1989. The rules at 36 CFR 217.3 establish a new type of environmental document called a "Decision Memo," which is defined as a document in which a forest officer records a decision to categorically exclude a proposed action from documentation in an environmental impact statement or environmental assessment.

In order to implement the new appeal rule in a timely fashion, the Forest Service must issue direction to its employees on how and when to prepare a Decision Memo. These instructions are being issued as an Interim Directive (ID) to FSH 1909.15, Environmental Policy and Procedures Handbook, which contains the detailed guidance needed by Forest Service employees to comply with the National Environmental Policy Act (NEPA) and Council on Environmental Quality implementing regulations at 40 CFR Parts 1500–1508. As required by those rules, the Forest Service hereby given notice of the interim procedures.

Prior to issuance of the interim directive, the agency had begun a comprehensive review and revision of its NEPA policy and procedures and is in the final stages of preparing those revisions for publication in the Federal Register. Upon publication, the public will be invited to submit comments on the proposed revisions. The Decision Memo procedures now being issued as an interim directive will be included in the more comprehensive proposed revision of the agency's policy and procedure. Therefore, the agency is not requesting public comment on the interim directive at this time.

A copy of the interim directive as it is being issued in the Forest Service directive system appears at the end of this notice. In accordance with Forest Service policy, the interim directive will stay in effect up to one year unless removed.

**George M. Leonard,**

*Associate Chief*

Date: February 24, 1989.

## FOREST SERVICE HANDBOOK

Washington, DC

### FSH 1909.15—Environmental Policy and Procedures Handbook

Interim Directive No. 2.

February 28, 1989.

Duration: One year.

Chapter: 20—Environmental Analysis.

Posting Notice: Last ID was No. 1, which has expired.

On February 22, 1989, the new administrative appeal procedures at 36 CFR Part 217 becamse effective. Section 217.3 of the new rules proivdes that decisions documented in a Decision Memo, Decision Notice, or Record of Decision may be appealed under the rules in Part 217. A Decision Memo is a new type of environmental document to be prepared by Forest Service employees. In order to implement the new appeal rules, it is necessary to provide interim direction on when a Decision Memo should be prepared and on the format and content of this type of decision document.

For ease of use and consistency of implementation, this interim directive (ID) also integrates guidance on categorical exlcusions with the guidance on how and when to prepare a Decision Memo. Specifically, this ID (1) enumerates the categories established by the Department of Agriculture at 7 CFR 1b.3 as categorically excluded from documentation in an EIS or EA; (2) identifies the categories of actions for which a project file and Decision Memo must be prepared; (3) defines the content of a project file; and (4) requires notice of a decision to proceed with an action that has been categorically excluded from documentation. The direction on categorical exclusions is identical to that issued in ID No. 16 to FSM 1950, dated August, 1988, which is being removed by separate posting notice.

*26—Categories of Actions Excluded From Documentation in an EIS or EA.* (40 CFR 1508.4)

*26.1—Categories for Whcih a Project File and a Decision Memo Are Not Required.* A project file is not required for the categories of actions listed in sections 26.1a and 26.1b. However, a project file may be established for such an action at the discretion of the responsible official.

*26.1a—Categories Established by the Secretary.* The rules at 7 CFR 1b.3 exclude from documentation in an environmental impact statement (EIS) or an environmental assessment (EA) the following categories of actions:

§ 1b.3 Categorical exclusions.

(a) The following are categories of activities which have been determined not to have a significant effect on the human environment and are excluded from the preparation of environmental assessments (EA's) or environmental impact statements (EIS's), unless

VOL
54
ISS
41
MR
3
1989
UMI

individual agency procedures prescribe otherwise.

(1) Policy development, planning and implementation which relate to routine activities, such as personnel, organizational changes, or similar administrative functions;

(2) Activities which deal solely with the funding of programs, such as program budget proposals, disbursements, and transfer or reprogramming of funds;

(3) Inventories, research activities, and studies, such as resource inventories and routine data collection when such actions are clearly limited in context and intensity;

(4) Educational and informational programs and activities;

(5) Civil and criminal law enforcement and investigative activities;

(6) Activities which are advisory and consultative to other agencies and public and private entities, such as legal counseling and representation;

(7) Activities related to trade representation and market development activities abroad.

*26.1b—Categories Established by the Chief.* The following categories of routine administrative and maintenance actions normally do not individually or cumulatively have a significant effect (40 CFR 1508.22) on the quality of the human environment and, therefore, may be categorically excluded from documentation in an environmental impact statement (EIS) or environmental assessment (EA):

1. Administrative actions, such as road and area closures; restrictions on travel or use, such as camping, boating, or hunting; and posting signs and markers.

2. Construction of low-impact facilities or improvements, such as auxiliary support buildings or other structures; picnic areas and campgrounds; temporary and other low-standard roads, such as traffic service level "D" roads (FSH 7709.56); and trails.

3. Repair and maintenance activities, such as on buildings, grounds, trails, rights-of-way, and range improvements.

*26.2—Categories of Actions for Which a Project File and a Decision Memo Are Required.* Maintain a project file and prepare a Decision Memo for the following categories of proposed actions:

1. Low-impact silvicultural activities that are limited in size and duration and that primarily use existing roads and facilities, such as firewood and miscellaneous forest product sales; salvage, thinning, and small harvest cuts of less than 100,000 board feet or less than 10 acres; site preparation; and planting and seeding.

2. Low-impact range management activities, such as fencing, seeding, and installing water facilities.

3. Issuance or modification of authorizations or agreements for such uses of lands or facilities as road maintenance and additional use of existing roads, rights-of-way, and easements.

4. Low-impact pest management activities, such as suppressing nuisance insects and poisonous plants in campgrounds and picnic areas; controlling cone and seed insects in seed orchards; and fumigating to control weeds in nurseries.

5. Mineral and energy activities of limited size, duration, and degree of disturbance, such as preliminary exploration and removal of small mineral samples.

6. Fish and wildlife management activities, such as improving habitat, installing fish ladders, and stocking native or established species.

7. Transfer of interests in land, such as sales, exchanges, or interchanges pursuant to the Small Tracts Act; purchases and gifts; and small transfers and trades with other Federal agencies.

*26.2a—Content of Project File.* As a minimum, a project file on a proposed action as listed in sec. 26.2 should include:

1. A list of the names of interested and affected people, groups, and agencies contacted during scoping;

2. The results of scoping and the subsequent environmental analysis;

3. A copy of the Decision Memo (sec. 27);

4. A list of the people, agencies, and groups notified of the decision;

5. Other notice used to inform interested and affected persons of the decision to proceed with or to implement an action that has been categorically excluded.

*27—Documentation of Decisions in a Decision Memo*

A Decision Memo is not required if a proposed action has been categorically excluded from documentation in an environmental impact statement or an environmental assessment under categories in sections 26.1a (7 CFR 1b.3) or section 26.1b of this chapter. However, interested and affected persons must be informed in an appropriate manner (sec. 11.5).

A Decision Memo is required if the proposed action has been categorically excluded from documentation in an EIS or EA under the categories listed in section 26.2. These decisions are subject to review under 36 CFR 217.6.

*27.1—Format and Content.* The format of the Decision Memo is not intended to replicate the format of a correspondence memorandum (FSH 6209.12). Generally, Decision Memos should conform to the following format and content although sections may be combined or rearranged in the interest of clarity and brevity.

1. *Heading.* The heading consists of the following elements:

(a) Title of document—"Decision Memo."

(b) The title of the proposed action.

(c) The location of the proposed action (including the Forest Service administrative unit, county, and state). In some cases, including the legal land description is appropriate.

2. *Proposed action.* Describe the proposed action, the decision to be implemented, and reasons for making the decision.

3. *Scoping and public involvement.* Describe the scoping process used and the issues identified. It may be appropriate to identify or refer to the interested and affected agencies, organizations, and persons contacted.

4. *Reasons for categorically excluding the proposed action.* This section includes:

(a) Identification of the category (sec. 26) into which the proposed action falls.

(b) Finding that no extraordinary circumstances exist that might cause the action to have significant effects.

5. *Finding required by other laws.* Include any findings required by any other laws. For example, findings of consistency with the forest plan, suitability, and vegetation management required by the National Forest Management Act (FSM 1922.41 and FSH 1909.12, sec. 5.3).

6. *Implementation date.* Include the date when the responsible official intends to implement the decision (sec. 51).

7. *Administrative review or appeal opportunities.* State whether the decision is subject to review or appeal, cite the applicable regulations (36 CFR Part 217), and identify when and where to file a request for review or appeal.

8. *Contact person.* Include the name, address, and phone number of the Forest Service employee who can supply further information about the decision.

9. *Signature and date.* The responsible official must sign and date the Decision Memo on the date the date the decision is made.

*27.2—Notice and Distribution of Decision Memo.* Distribute the Decision Memo in a manner designed to inform agencies, organizations, and persons interested in or affected by the proposed action.

1. For decisions subject to appeal under 36 CFR Part 217, the responsible official shall promptly mail the Decision Memo to those who, in writing, have requested it, and to those who are known to have participated in the decisionmaking process.

2. The responsible official may provide other forms of notice, including legal notice in newspapers of general circulation in the area where the proposed action is to be implemented

When required by E.O. 12372, send copies to the State Single Point of Contact or, in cases where a State has elected not to establish a Single Point of Contact, the State official(s) involved.

## COMMISSION ON CIVIL RIGHTS

### Kansas Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Kansas Advisory Committee to the Commission will convene at 9:30 a.m. and adjourn at 12:30 p.m., on March 9, 1989 at the Ramada Inn-Downtown, 420 East 6th Street, Topeka, Kansas. The purpose of the meeting is to review the status of current Committee projects and discuss issues which are possible subjects for future activities.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Burdett A. Loomis, or William F. Muldrow, Acting Director of the Central Regional Division (816) 426-5253, (TDD 816/426-5009). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, February 7, 1989.

**Melvia L. Jenkins,**

*Acting Staff Director.*

## DEPARTMENT OF COMMERCE

### International Trade Administration

**(A-570-007)**

### Barium Chloride from the People's Republic of China; Termination of Antidumping Duty Administrative Reviews

**AGENCY:** International Trade Administration/Import Administration, Department of Commerce.

**ACTION:** Notice of termination of antidumping duty administrative reviews.

**SUMMARY:** On November 18, 1987 and December 5, 1988, the Department of Commerce initiated administrative reviews of the antidumping duty order on barium chloride from the People's Republic of China. The Department has now determined to terminate those reviews

**EFFECTIVE DATE:** March 3, 1989.

**FOR FURTHER INFORMATION CONTACT:** Michael Rill or Maureen Flannery, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377-3601/2923

**SUPPLEMENTARY INFORMATION:**

**Background**

On November 18, 1987 and December 5, 1988, in response to requests received from the petitioner in this case, the Department of Commerce published notices of initiation of administrative review of the antidumping duty order on barium chloride from the People's Republic of China (52 FR 44161 and 53 FR 48951). Those notices stated that we would review entries from Sinochem during the periods October 1, 1986 through September 30, 1987 and October 1, 1987 through September 30, 1988, respectively

The petitioner subsequently withdrew its requests for review on January 5, 1989. Accordingly, the Department has determined to terminate the reviews.

This notice is in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and section 353.53a of the Commerce Regulations (19 CFR 353.53a).

Dated: February 27, 1989.

**Jan W. Mares,**

*Assistant Secretary for Import Administration.*

### University of Kentucky, et al.; Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

This is a decision consolidated pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

*Docket Number:* 88-228. University of Kentucky, Lexington, KY 40536-0203. *Instrument:* Electron Microscope with Accessories, Model EM 902PC. *Manufacturer:* Carl Zeiss, West Germany. *Intended Use:* See notice at 53 FR 30084, August 10, 1988. *Instrument Ordered:* April 15, 1988.

*Docket Number:* 88-229. *Applicant:* University of Virginia, Charlottesville, VA 22908. *Instrument:* Electron Microscope with Accessories, Model CEM 902. *Manufacturer:* Carl Zeiss, West Germany. *Intended Use:* See notice at 53 FR 30084, August 10, 1988. *Instrument Ordered:* April 12, 1988.

*Docket Numbers:* 88-230 and 88-232. *Applicant:* University of Kentucky, Lexington, KY 40536-0084. *Instrument:* Electron Microscope, Models H-7000-3T and H-7000. *Manufacturer:* Hitachi Scientific, Japan. *Intended Use:* See notices at 53 FR 30084, August 10, 1988. *Instruments Ordered:* December 23, 1987.

*Docket Number:* 88-233. *Applicant:* Carnegie Mellon University, Pittsburgh, PA 15213. *Instrument:* Electron Microscope, Model HB501. *Manufacturer:* VG Microscopes, Ltd., United Kingdom. *Intended Use:* See notice at 53 FR 31077, August 17, 1988. *Instrument Ordered:* September 29, 1987

*Docket Number:* 88-235. *Applicant:* University of Pennsylvania, Philadelphia, PA 19104-6058. *Instrument:* Electron Microscope, Model JEM-1200/EX/SEG/DP/DP. *Manufacturer:* JEOL, Ltd., Japan. *Intended Use:* See notice at 53 FR 31077, August 17, 1988. *Instrument Ordered:* January 15, 1988.

*Docket Number:* 88-236. *Applicant:* Baylor College of Medicine, Houston, TX 77030. *Instrument:* Electron Microscope, Model JEM-1200/EX/SEG/DP/DP. *Manufacturer:* JEOL, Ltd., Japan. *Intended Use:* See notice at 53 FR 31077, August 17, 1988. *Instrument Ordered:* April 21, 1988.

*Docket Number:* 88-239. *Applicant:* Occidental College, Los Angeles, CA 90041. *Instrument:* Electron Microscope, Model EM 109. *Manufacturer:* Carl

VOL 54 ISS 41 MR 3 1989 UMI

Zeiss, West Germany. *Intended Use:* See notice at 53 FR 32419, August 25, 1988. *Instrument Ordered:* May 23, 1988.

*Docket Number:* 88-243. *Applicant:* Walter Reed Army Institute of Research, Washington, DC 20307-5100. *Instrument:* Electron Microscope, Model CM-12. *Manufacturer:* N.V. Philips, The Netherlands. *Intended Use:* See notice at 53 FR 32420, August 25, 1988. *Instrument Ordered:* March 18, 1988.

*Comments:* None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered. *Reasons:* Each foreign instrument is a conventional transmission electron microscope (CTEM) and is intended for research or scientific educational uses requiring a CTEM. We know of no CTEM, or any other instrument suited to these purposes, which was being manufactured in the United States either at the time of order of each instrument or at the time of receipt of application by the U.S. Customs Service.

### Carleton College et al.; Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Material Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR Part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5:00 p.m. in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

*Docket Number:* 89-053. *Applicant:* Carleton College, One North College Street, Northfield, MN 55057. *Instrument:* Laser System (Excimer Laser and Excimer-pumped Dye Laser). *manufacturer:* Lumonics Inc., Canada. *Intended Use:* The instrument will be used for studies of metal carbonyls and related organo-metallic compounds. These studies will involve investigations of the fundamental dissociation patterns and spectroscopic levels of these compounds when subjected to intense laser light in the visible and ultraviolet regions of the spectrum. In addition, the instrument will be used to demonstrate modern instrumentation in physical chemistry in the course Chemistry 47, Advanced Lab III. *Application Received by Commissioner of Customs:* January 6, 1989.

*Docket Number:* 89-054. *Applicant:* Pennsylvania State University Department of Geosciences, 242 Deike Building, University Park, PA 16802. *Instrument:* Mass Spectrometer. *Manufacturer:* VG Isogas Limited, United Kingdom. *Intended Use:* The instrument will be used for studies of minerals, rocks, waters, solutions, gases, and organic compounds from a variety of geologic environments, and solids, solutions and gaseous materials synthesized in the laboratory. Experiments will be conducted with the objective of unraveling the laws governing the variation of isotopic compositions of H, C, O, S, and N in nature, and to understand the details of various geological processes (such as the formation of precious metal ore deposits, formation and migration of oils and natural gasses, evolution of the Earth's atmosphere and oceans, generation and evolution of magmas). In addition the instrument will be used in Geoscience courses to teach students to understand the concepts and materials discussed in the course. *Application Received by Commissioner of Customs:* January 9, 1989.

*Docket Number:* 89-055. *Applicant:* University of Nebraska Medical Center, Meyer Children's Rehabilitation Institute, 444 South 44th Street, Omaha, NE 68131. *Instrument:* Computerized Videographic Movement Analysis System, Model WATSMART. *Manufacturer:* Northern Digital, Canada. *Intended Use:* The instrument will be used for the study of human movement with primary application for walking. The objective of the experiments will be to examine treatment effects and develop alternatives such as changing types of braces a child or adult may wear during walking or provide input to orthopedic surgeons to develop a surgery plan. The instrument will also be used for educational purposes in a physical therapy curriculum. *Application Received by Commissioner of Customs:* January 10, 1989.

*Docket Number:* 89-056. *Applicant:* U.S. Department of Energy, Argonne National Laboratory, 9700 South Cass Avenue, Argonne, IL 60439-4812. *Instrument:* Mass Spectrometer, Model, Series 800. *Manufacturer:* Kratos, United Kingdom. *Intended Use:* The instrument will be used to study the reaction between water and nuclear waste glasses and to monitor the behavior of actinide elements during the reaction process. *Application Received by Commissioner of Customs:* January 10, 1989.

*Docket Number:* 89-057 *Applicant:* U.S. Department of Energy, Argonne National Laboratory, 9700 South Cass Avenue, Argonne, IL 60439-4812. *Instrument:* Raman Spectrometer with Microscope Attachment. *Manufacturer:* Jobin-Yvon, France. *Intended Use:* The instrument will be used for investigations of ceramic thin films grown with the MOCVD technique. Many of these materials will have structural phase transformations. *Application Received by Commissioner of Customs:* January 11, 1989.

### Virginia Military Institute, et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

*Docket Number:* 88-253. *Applicant:* Virginia Military Institute, Lexington, VA 24450. *Instrument:* Terrain Conductivity Meter, Model EM-34-3-DL. *Manufacturer:* Geonics, Ltd., Canada.

*Docket Number:* 88-254. *Applicant:* U.S. Geological Survey, Columbus, OH 43212. *Instrument:* Ground Conductivity Electromagnetic System and Data Logger, Model EM-34-2-DL and EM-55. *Manufacturer:* GISCO, Canada. *Intended Use:* See notice at 53 FR 37017, September 23, 1988. *Reasons for this Decision:* The foreign instrument provides for in situ measurement of ground conductivity in milli-ohms per meter.

*Docket Number:* 88-237. *Applicant:* Arizona State University, Tempe, AZ 85287. *Instrument:* Optical Microscope Stage System. *Manufacturer:* Autoscan Systems Pty. Ltd., Australia. *Intended Use:* See notice at 53 FR 31077, August 17, 1988. *Reasons for this Decision:* The foreign instrument is an automated microscope stage (accessory) providing automatic location of corresponding points from either samples or replica sites.

*Comments:* None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as each is intended to be used, is being manufactured in the United States. The capability of each of the foreign instruments described above is pertinent to each applicant's intended purposes.

## COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

### Procurement List 1989; Proposed Addition

**AGENCY:** Committee for Purchase from the Blind and Other Severely Handicapped.

**ACTION:** Proposed addition to Procurement List.

**SUMMARY:** The Committee has received a proposal to add to Procurement List 1989 commodities to be produced by a workshop for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: April 3, 1989.

**ADDRESS:** Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

**FOR FURTHER INFORMATION CONTACT:** Beverly Milkman, (703) 557-1145.

**SUPPLEMENTARY INFORMATION:** This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action. On February 17, 1989, (54 FR 7248) these commodities were published with incorrect national stock numbers. The commodities are republished by this action. If the Committee approves the proposed addition, all entities of the Federal Government will be required to procure the commodities listed below from a workshop for the blind or other severely handicapped.

It is proposed to add the following commodities to Procurement List 1989, which was published on November 15, 1988 (53 FR 46018):

Strap, Webbing
5340-00-477-3700
5340-00-494-8238
5340-00-494-8239

BILLING CODE 6820-33-M

### Procurement List 1989; Addition and Deletion

**AGENCY:** Committee for Purchase from the Blind and Other Severely Handicapped.

**ACTION:** Addition to and deletion from Procurement List.

**SUMMARY:** This action adds to and deletes from Procurement List 1989 commodities to be produced by workshops for the blind or other severely handicapped.

**EFFECTIVE DATE:** April 3, 1989.

**ADDRESS:** Committee for Purchase From the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

**FOR FURTHER INFORMATION CONTACT:** Beverly Milkman, (703) 557-1145.

**SUPPLEMENTARY INFORMATION:** On November 4, 1988, and January 6, 1989, the Committee for Purchase From the Blind and Other Severely Handicapped published notices (53 FR 44646 and 54 FR 458) of proposed addition to and deletion from Procurement List 1989, which was published on November 15, 1988 (53 FR 46018).

**Addition**

No comments were received concerning the proposed addition to the Procurement List. After consideration of the material presented to it concerning capability of qualified workshops to produce the commodity at a fair market price and impact of the addition on the current or most recent contractors, the Committee has determined that the commodity listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.6.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for the commodity listed.

c. The actions will result in authorizing small entities to produce the commodities and provide the services procured by the Government.

**Addition**

Accordingly, the following commodity is hereby added to Procurement List 1989:

Index, Elevation
1005-01-134-3621

**Deletion**

After consideration of the relevant matter presented, the Committee has determined that the commodity listed below is no longer suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.6.

Accordingly, the following commodity is hereby deleted from Procurement List 1989:

Pin, Tent, Wood
8340-00-261-9752

**Beverly L. Milkman,**

*Executive Director.*

[FR Doc. 89-4980 Filed 3-2-89; 8:45 am]

### Procurement List 1989 Proposed Additions and Deletions

**AGENCY:** Committee for Purchase from the Blind and Other Severely Handicapped.

**ACTION:** Proposed additions to and a deletion from Procurement List.

**SUMMARY:** The Committee has received proposals to add to and delete from Procurement List 1989 commodities to be produced and a service to be provided by workshops for the blind and other severely handicapped.

COMMENTS MUST BE RECEIVED ON ON BEFORE: April 3, 1989.

**ADDRESS:** Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

**FOR FURTHER INFORMATION CONTACT:** B.L. Milkman, (703) 557-1145.

**SUPPLEMENTARY INFORMATION:** This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

BEST COPY AVAILABLE

VOL 54 ISS 41 MR 3 1989 UMI

**Additions**

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities and service listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities and service to Procurement List 1989, which was published November 15, 1988 (53 FR 46018):

Commodities

Dressing, First Aid, Field, Camouflaged

6510-00-201-7425

6510-00-201-7430

**Deletion**

It is proposed to delete the following service from Procurement List 1989, which was published November 15, 1988 (53 FR 46018):

Furniture Rehabilitation (Metal)

Naval Ordnance Station

Louisville, Kentucky

## DEPARTMENT OF DEFENSE

### Office of the Secretary

### Defense Science Board Task Force on Army Subgroup on Low Observable Technologies

**ACTION:** Notice of advisory committee meeting.

**SUMMARY:** The Defense Science Board Task Force on Army Subgroup on Low Observable Technologies will meet in closed session on April 26-27, 1989 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will examine and provide advice regarding Army activities in the area.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public.

February 28, 1989.

### Department of the Army

### Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

*Name of the Committee:* Army Science Board (ASB).

*Date of Meeting:* March 20, 1989.

*Time of Meeting:* 0900-1700 hours.

*Place:* Aberdeen Proving Ground, Maryland.

*Agenda:* The Army Science Board Ad Hoc Subgroup for Space Systems will meet for classified briefings and discussions reviewing matters that are an integral part of or related to the issue of the study effort. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 2, subsection 10(d). The classified and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. Contact the Army Science Board Administrative Officer, Sally Warner, for further information at (202) 695-3039 or 695-7046.

### Army Science Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

*Name of The Committee:* Army Science Board (ASB).

*Date of Meeting:* March 23-24, 1989.

*Time of Meeting:* 0900-1630 hours each day.

*Place:* Aberdeen Proving Ground, MD.

*Agenda:* The Army Science Board Subgroup on Toxic and Hazardous Waste Management will conduct its third meeting. Briefings will be conducted by various members of DOD and EPA in respect to the Terms of Reference. Past, current, and planned actions will be discussed as they relate to the Terms of Reference. This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695-3039/7046.

## DEPARTMENT OF DEFENSE
## GENERAL SERVICES ADMINISTRATION
## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

### Federal Acquisition Regulation (FAR); Information Collection Under OMB Review

**AGENCIES:** Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

**ACTION:** Notice.

**SUMMARY:** Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection concerning the Make or Buy Program.

**ADDRESS:** Send comments to Ms. Eyvette Flynn, FAR Desk Officer, Room 3235, NEOB, Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** Mr. Jeremy Olson, Office of Federal Acquisition and Regulatory Policy, (202) 523-3781.

**SUPPLEMENTARY INFORMATION:**

**a. Purpose**

Price, performance, and/or implementation of socioeconomic policies may be affected by make-or-buy decisions under certain Government prime contracts.

Accordingly,Subpart 15.7, Make-or-Buy Programs, of the Federal Acquisition Regulation (FAR)—

(a) Sets forth circumstances under which a Government contractor must submit for approval by the contracting officer a make-or-buy program, i.e., a written plan identifying major items to be produced or work efforts to be performed in the prime contractor's facilities and those to be subcontracted;

(b) Provides guidance to contracting officers concerning the review and approval of the make-or-buy programs; and

(c) Prescribes the contract clause at FAR 52.215-21, Changes or Additions to Make-or-Buy Programs, which specifies the circumstances under which the contractor is required to submit for the contracting officer's advance approval a notification and justification of any proposed change in the approved make-or-buy programs.

The information is used to assure the lowest overall cost to the Government for required supplies and services.

**b. Annual Reporting Burden**

The annual reporting burden is estimated as follows: Respondents, *200;* responses per respondent, *3;* total annual responses, *600;* hours per response, *8;* and total response burden hours, *4,800.*

Obtaining Copies of Proposals: Requester may obtain copies from General Services Administration, FAR Secretariat (VRS), Room 4041, Washington, DC 20405, telephone (202) 523-4755. Please cite OMB Control No. 9000-0078, Make or Buy Programs.

Dated: February 24, 1989.

## DEPARTMENT OF EDUCATION

### Office of Special Education and Rehabilitative Services

**[CFDA No. 84.026]**

### New Award for Government Subsidization for the Manufacture and Distribution of a Line 21 Decoder Under the Educational Media Research, Production, Distribution, and Training Program for Fiscal Year 1989

*Purpose of Program:* Provides Federal financial assistance for projects designed to promote the educational advancement of persons who are handicapped by providing assistance for: (1) Conducting research in the use of education media and technology for persons with handicaps; (b) producing and distributing educational media for use of persons with handicaps, their parents, their actual and potential employers, and other persons directly involved in work for the advancement of person with handicaps; and (c) training persons in the use of educational media for the instruction of persons with handicaps. Awards under this program are authorized under Part F of the Education of the Handicapped Act, as amended.

*Deadline for Transmittal of Applications:* 4/19/89.

*Deadline for Intergovernmental Review:* 6/19/89.

*Applications Available:* 3/6/89.

*Available Funds:* $1,000,000.

*Estimated Number of Awards:* 1.

**Note.—The Department of Education is not bound by any estimates in this notice, except as otherwise provided by statute.**

*Project Period:* Up to 12 months.

*Applicable Regulations:* (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74, 75, 77, 79, 80 and 85, and (b) the Educational Media Research, Production, Distribution, and Training Program, 34 CFR 332.

It is the policy of the Department of Education not to solicit applications before the production of a notice of final priority. However, in this case it is essential to solicit applications for this competition on the basis of the notice of proposed funding priority published in the **Federal Register** on January 5, 1989 at 54 FR 375 because it is necessary to maintain a continuing supply of Line 21 decoders.

Further, the Secretary has not received any substantive comments on the notice of final funding priority and does not anticipate making any substantive changes in the final priority. If significant changes are made in the notice of final funding priority, applicants will be given an opportunity to revise or resubmit their applications.

*For Applications or Information Contact:* Joseph Clair, Division of Educational Services, Office of Special Education Programs, Department of Education, 400 Maryland Avenue SW., (Switzer Building, Room 4622—M/S 2466), Washington, DC 20202.

### Law School Clinical Experience Program; New Awards for Fiscal Year 1989

*Purpose of Program:* Provides grants to accredited law schools to establish or expand programs of clinical experience for students in the practice of law.

*Deadline for transmittal of Applications:* April 21, 1989

*Applications Available:* March 13, 1989

*Available Funds:* $3,952,000—The program legislation would permit the Secretary to pay up to 90 percent of the cost of projects at law schools. (20 U.S.C. 1134s(a)). The program regulations at 34 CFR 639.40(a)(2) permit the Secretary to establish annually a lower maximum Federal share. The maximum Federal share will be set at 50 percent for Fiscal Year 1989.

*Estimated Range of Awards:* $26,520—$99,840

*Estimated Average Size of Awards:* $76,000

*Estimated Number of Awards:* 52

*Project Period:* 12 months

*Applicable Regulations:* (a) The Law School Clinical Experience Program Regulations, 34 CFR Part 639. (b) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 85.

*Priorities:* Under the Education Department General Administration Regulations (EDGAR) in 34 CFR 75.105(c)(3) and as described in 34 CFR 639.11, the Secretary gives an absolute preference to the following priorities.

1. Provide legal experience in the preparation and trial of actual cases, including administrative cases and the settlement of controversies outside the courtroom; and

2. Provide service to persons who have difficulty in gaining access to legal representation.

*For Applications or Information Contact:* Dr. Charles H. Miller on (202) 732-4395 or Mrs. Barbara J. Harvey on (202) 732-4863, U.S. Department of Education, Division of Higher Education Incentive Programs, 400 Maryland Avenue, SW, ROB-3, Washington, DC 20202-5251.

*Program Authority:* 20 U.S.C. 1134s-1134t

Dated: February 28, 1989.

**Kenneth D. Whitehead,**

*Assistant Secretary for Postsecondary Education.*

## DEPARTMENT OF ENERGY

### Coordinating Subcommittee on Petroleum Storage & Transportation Committee on Petroleum Storage & Transportation National Petroleum Council; Open Meeting

Notice is hereby given of the following meeting:

VOL
54
ISS
41
MR
3
1989
UMI

*Name:* Coordinating Subcommittee on Petroleum Storage and Transportation of the Committee on Petroleum Storage & Transportation of the National Petroleum Council.

*Date and Time:* Friday, March 10, 1989, 8:00 a.m.

*Place:* Hyatt Regency DFW, Universe Room, International Parkway, Dallas/Fort Worth Airport, TX.

*Contact:* Margie D. Biggerstaff, U.S. Department of Energy, Office of Fossil Energy (FE–1), Washington, DC 20585, Telephone: 202/586–4695.

*Purpose of the Parent Council:* To provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries.

*Purpose of the meeting:* Review the draft of Volume I, *Summary.*

*Tentative Agenda:*

—Opening remarks by the Chairman and Government Cochairman.

—Review the draft of Volume I, *Summary.*

—Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

*Public participation:* The meeting is open to the public. The Chairman of the Subcommittee on Petroleum Storage & Transportation is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Ms. Margie D. Biggerstaff at the address or telephone number listed above. Requests must be received at least 5-days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

**Jeremiah E. Walsh, Jr.,**

*Acting Principal Deputy Assistant Secretary Fossil Energy.*

**[ERA Docket No. 88–70–NG]**

## Atlantic Richfield Co.; Conditional Order Granting Blanket Authorization to Import Natural Gas

**AGENCY:** Department of Energy.

**ACTION:** Notice of a conditional order granting blanket authorization to import natural gas.

**SUMMARY:** The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice that it has issued a conditional order granting Atlantic Richfield Company (ARCO) blanket authorization to import natural gas from Canada. The order issued in ERA Docket No. 88–70–NG conditionally authorizes ARCO to import up to 25 Bcf per year of Canadian natural gas over a two-year period for use as fuel in its oil refinery located in Ferndale, Washington.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, February 27, 1989.

**J. Allen Wampler,**

*Assistant Secretary Fossil Energy.*

## Federal Energy Regulatory Commission

**[Docket Nos. CP89–867–000, et al.]**

## Trunkline Gas Co., et al.; Natural gas certificate filings

February 27, 1989.

Take notice that the following filings have been made with the Commission:

### 1. Trunkline Gas Company

[Docket No. CP89–867–000]

Take notice that on February 21, 1989, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP89–867–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) and the Natural Gas Policy Act (18 CFR 284.223) for authorization to transport natural gas for CSX NGL Corporation (CSX), a shipper and end user of natural gas, under Trunkline's blanket certificate issued in Docket No. CP86–586–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Trunkline proposes to transport up to 50,000 dekatherms (dkt) of natural gas equivalent per day on an interruptible basis on behalf of CSX pursuant to a transportation agreement dated November 23, 1988, between Trunkline and CSX. Trunkline would receive the gas at various existing points of receipt on its system in Texas, offshore Texas, Louisiana, offshore Louisiana, Tennessee and Illinois and deliver equivalent volumes, less fuel used and unaccounted for line loss, to CSX, Unocal in Vermilion Parish, Louisiana.

Trunkline states that the estimated daily and annual quantities would be 10,000 dkt and 3,650,000 dkt, respectively. Service under § 284.223(a) commenced on January 13, 1988, as reported in Docket No. ST89–2169–000, it is stated.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

### 2. United Gas Pipe Line Company

[Docket No. CP89–864–000]

Take notice that on February 21, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478 filed in Docket No. CP89–864–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide interruptible transportation service on behalf of Texaco Gas marketing (Texaco), a marketer of natural gas, under United's blanket certificate issued in Docket No. CP88–6–000, all as more fully set forth in the request on file with the Commission and open to public inspection.

Pursuant to an interruptible gas transportation agreement dated July 25, 1988, as amended December 16, 1988, United proposes to transport up to 103,000 MMBtu of natural gas per day from thirty-five (35) existing points of receipt located in Texas to fifteen (15) existing points of delivery located in Louisiana, Mississippi and Texas. Texaco has informed United that it expects to have the full 103,000 MMBtu transported on an average day and, based thereon, estimates that the annual transportation quantity would be 37,595,000 MMBtu. United advises that the transportation service commenced on December 21, 1988, as reported in Docket No. ST89–2165, pursuant to § 284.223(a) of the Commission's Regulations.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

### 3. United Gas Pipe Line Company

[Docket No. CP89–839–000]

Take notice that on February 16, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas, 77251–1478, filed in Docket No. CP89–839–000, a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under its blanket certificate issued in Docket No. CP88–6–000, pursuant to section 7 of the Natural Gas Act, for Enron Gas Marketing, Inc. (Enron), a marketer, all as more fully set forth in the request on file with the Commission and open to public inspection.

United proposes to transport up to a maximum of 103,000 MMBtu of natural gas per day for Enron from an existing interconnection between United and Sea Robin Pipeline Company near Erath, Vermilion Parish, Louisiana to the existing interconnection between United and Florida Gas Transmission Company at Arnaudville, St. Landry Parish, Louisiana. United anticipates transporting up to 103,000 MMBtu on a peak day and average day, and 37,595,000 MMBtu annually for Enron. United explains that service commenced January 1, 1989, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–1873.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

### 4. Trunkline Gas Company

[Docket No. CP89–871–000]

Take notice that on February 21, 1989, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas, 77251–1642, filed in Docket No. CP89–871–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of Anadarko Trading Company (Anadarko), under Trunkline's blanket certificate issued in Docket No. CP86–586–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Trunkline requests authorization to transport, on an interruptible basis, up to a maximum of 100,000 dt of natural gas per day for Anadarko from receipt points located in Illinois, Louisiana, Tennessee and Texas to a delivery point of Bridgeline Gas located in St. Mary Parish, Louisiana. Trunkline anticipates transporting, on an average day 100,000 dt and an annual volume of 36,500,000 dt.

Trunkline states that the transportation of natural gas for Anadarko commenced January 6, 1989, as reported in Docket No. ST89–2134–000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to Trunkline in Docket No. CP86–586–000.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

### 5. Natural Gas Pipeline Company of America

[Docket No. CP89–715–001]

Take notice that on January 30, 1989, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP89–715–000, as supplemented on February 21, 1989, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide a firm transportation service for LTV Steel Company, Inc. (LTV), an end-user, under the blanket certificate issued in Docket No. CP86–582–000, pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Notice of the instant proposal was issued on February 3, 1989. By its filing received on February 21, 1989, Natural has amended its request in accordance with a contract amendment dated February 6, 1989, to provide for:

(1) An increase in its firm transportation service to a maximum of 25,000 MMBtu equivalent of natural gas per day (plus any additional volumes accepted pursuant to the overrun provisions of Natural's Rate Schedule FTS) for LTV.

(2)(a) The replacement of the secondary receipt point in Cameron Parish, Louisiana, with one in Jefferson County, Texas,

(b) Adding a primary delivery point located on the border of Kankakee County, Illinois, and Lake County, Indiana, and

(c) Adding a secondary delivery point in Bureau County, Illinois.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

### 6. Natural Gas Pipeline Company of America

[Docket No. CP89–878–000]

Take notice that on February 22, 1989, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP89–878–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Natural Gas Clearinghouse Inc. (NGC), a marketer, under the blanket certificate issued in Docket No. CP86–582–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Natural states that pursuant to a transportation agreement dated January 13, 1989, under its Rate Schedule ITS, it proposes to transport up to 50,000 MMBtu per day equivalent of natural gas (plus any additional volumes accepted pursuant to the overrun provisions of Natural's Rate Schedule ITS) for NGC. Natural states that it would transport the gas from an existing interconnection between Natural and Colorado Interstate Gas Company in Beaver County, Oklahoma, and deliver such gas to an existing interconnection with Northern Natural Gas Company in Iowa.

Natural advises that service under § 284.223(a) commenced January 14, 1989, as reported in Docket No. ST89–2316. Natural further advises that it would transport 7,500 MMBtu on an average day and 2,737,500 MMBtu annually.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

### Standard Paragraph

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

## Gulf Power Co.; Filing

February 27, 1989.

Take notice that on January 17, 1989, Gulf Power Company (Gulf Power) tendered for filing Gulf Power's 1989 Informational Filing of the

VOL 54 ISS 41 MR 3 1989 UMI

Interconnection Agreement and Transmission Service Agreement between Gulf Power and Bay Resources Management, Inc. (BRMI).

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 13, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**Kimball Resources, Inc., et al., Applications for Blanket Certificates With Pregranted Abandonment [1]**

February 28, 1989.

Take notice that each Applicant listed herein has filed an application pursuant to section 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for an unlimited-term blanket certificate with pregranted abandonment authorization, all as more fully set forth in the applications which are on file with the Commission and open for public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before March 15, 1989, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

**Lois D. Cashell,**

**Omni Exploration, Inc. and Omni Drilling Partnership No. 1978-2; Petition for Adjustment**

February 27, 1989.

Take notice that on February 13, 1989, Omni Exploration Inc. and Omni Drilling Partnership No. 1978-2 (Omni) filed a motion for reconsideration of the December 21, 1988 order issued by the Director of the Office of Pipeline and Producer Regulation (Director) in *Palmco Management Co.*, Docket No. SA88-14-000, 45 FERC ¶ 62,255 (1988). Omni claims that the Director's order requires it to pay amounts in addition to those already paid pursuant to Order Nos. 399, 399-A, and 399-B or which have been waived and discharged by order to the United States Bankruptcy Court for the Eastern District of Pennsylvania. Omni seeks adjustment from the Director's order holding Omni responsible for the Btu refunds.

The procedures applicable to the conduct of this adjustment proceeding are found in subpart K of the Commission's rules of practice and procedure. Any person desiring to participate in this adjustment proceeding must file a motion to intervene in accordance with the provisions of Rule 214. All motions to intervene must be filed within 15 days after publication of this notice in the **Federal Register**.

**Palmco Management Co., Omni Exploration, Inc. and Omni Drilling Partnership No. 1978-2; Assignment of New Docket Number**

February 27, 1989

Take notice that on January 27, 1989, Omni Exploration, Inc., and Omni Drilling Partnership No. 1978-2 (Omni) filed with the Commission pursuant to Rule 1110 of the Commission's rules of practice and procedure, 18 CFR 385.1110 (1988), a letter-petition requesting review of the order issued by the Director of the Office of Pipeline and Producer Regulation on December 21, 1988, granting Palmco's petition for adjustment relief in Docket No. SA88-14-000, 45 FERC ¶ 62,255 (1988). On February 6, 1989, the Commission designated a presiding officer, who stayed certain procedural requirements until after Omni submitted further information in support of its letter-petition.

On February 13, 1989, the Commission received Omni's motion for reconsideration of the Director's December 21 order. In view of the new facts and arguments set forth in the motion and for administrative convenience, the Commission will treat Omni's filing as a separate petition for adjustment and assign it Docket No. SA89-5-000. The merits of Omni's motion will be fully addressed in the new docket. The Commission will provide notice of Omni's request for adjustment and subsequently issue an order addressing the merits.

## ENVIRONMENTAL PROTECTION AGENCY

**[ER-FRL-3532-4]**

**Environmental Impact Statements and Regulations; Availability of EPA Comments**

Availability of EPA comments prepared February 13, 1989 through February 17, 1989 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5074.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 22, 1988 (53 FR 13318).

**Draft EISs**

*ERP No.:* D-AFS-E65037, Rating EC2, Appalachian Mountains National Forests Vegetation Management Plan, Implementation, AL, GA, KY, NC, SC, TN, VA and WV.

*Summary:* EPA agrees environmental concerns has been identified which should be addressed in the final EIS. Due to the evolving nature of groundwater protection and endangered species guidelines, EPA recommends establishment of a process for ongoing consultation with the states, U.S. EPA and the U.S. Fish and Wildlife Service to ensure the regulatory consistency of the selected management measures.

*ERP No.:* D-BLM-G67000-NM, Rating EC2, Molycorp Guadulupe Mountain Tailings Disposal Facility, Construction, Operation and Closure, Plan of Operation Approval, Tasco County, NM.

*Summary:* EPA expressed environmental concerns with the proposed action in the areas of air and water quality impact and is requesting additional information on windblown tailings dust stabilization, water quality impact assessment and alternative analysis.

*ERP No.:* DS-COE-C32008-NJ, Rating EC2, Great Egg Harbor Inlet and Peck Beach Erosion Control and Flood Protection, Implementation, Updated Information and Detailed Analysis, Ocean City, Cape May County, NJ.

*Summary:* EPA has concerns regarding potential impacts to water quality and benthos. The results of the planned test sampling should be included in the final EIS. The results of the sampling should provide the additional information necessary to resolve EPA's concerns.

*ERP No.:* D-NAS-E12004-00, Rating EC2, Galileo Mission Project, Galileo Spacecraft Preparation and Operation Plan, Implementation, Solar System Exploration Program (Tier 2).

*Summary:* EPA has some environmental concerns about certain procedural aspects of the emergency response and clean-up measures.

**Final EISs**

*ERP No.:* F-AFS-H67001-MO, Mark Twain National Forest, Hardrock Mineral Leasing, Approval and Issuance of Leases, Oregon, Carter and Shannon Counties, MO.

*Summary:* EPA does not object to the proposed project provided that the Forest Service or the Bureau of Land Management will prepare site-specific EISs at such time as mining in the subject area is proposed.

**Other Reviews**

*ERP No.:* A-IBR-A31048-00, Proposed Renewal of Water Contracts for the Friant Unit of the Central Valley Project; Predecision Referral Statement.

*Summary:* EPA has referred to the Council on Environmental Quality the Bureau of Reclamation's proposed renewal of the Orange Cove, California water contract. The contract renewal would have commited to existing uses 1.5 million acre-feet of Central Valley Project water for the next forty years. The referral expressed the belief that unsatisfactory environmental results might occur if the long-term commitment of water is made and that assessment of environmental effects and the implementation of measures to avoid or mitigate those effects is required both by the National Environmental Policy Act (NEPA) and sound public policy. The referral concluded that the Bureau of Reclamation water contract renewal would result in an irretrievable long-term commitment of water use without benefit of an EIS which would be a violation of the purposes and intent of NEPA.

BILLING CODE 6560-50-M

**[ER-FRL-3529-1]**

**Intent To Prepare a Draft Enviromental Impact Statement (EIS); City of San Diego Wastewater Treatment Facilities, CA**

**AGENCY:** U.S. Environmental Protection Agency (EPA) Region IX.

**ACTION:** Preparation of a Draft Environmental Impact Statement.

*Purpose:* In accordance with section 511(c) of the Clean Water Act (CWA) and Section 102(2)(c) of the National Environmental Policy Act (NEPA), EPA has identified a need to prepare an EIS and therefore issues this Notice of Intent pursuant to 40 CFR 1501.7.

For further information and to be placed on the project mailing list contact: Mr. Enio Sebastiani, Construction Grants Branch, U.S. EPA, (W-2-2), 215 Fremont St., San Francisco, CA 94105, Telephone: (415) 974-8316.

**SUMMARY:** The City of San Diego has initiated a new program, the Clean Water Program for Greater San Diego, with a goal of attaining full compliance with the CWA and NEPA. The program is currently in the facilities planning

VOL 54 ISS 41 MR 3 1989 UMI

stage. The resulting plan will recommend both secondary treatment and water reclamation facilities of sufficient size to serve the San Diego metropolitan area through the middle of the twenty-first century. Facilities covered by the plan will include an upgrade of the City's Point Loma wastewater treatment plant, one or two other secondary treatment plants, a number of water reclamation plants, sludge handling and disposal facilities, and associated pump stations and pipelines.

*Need for Action:* On September 30, 1988, EPA announced its decision to tentatively deny the City of San Diego's 1979 and 1983 applications for a waiver under Section 301(h) of the CWA. On November 3, 1988, the City Council authorized the City Manager to send EPA a letter of intent to file a revised waiver application. On February 17, 1987, the City Council decided to discontinue waiver efforts and to pursue secondary treatment.

*Alternatives:* Six alternatives are presently under consideration for siting secondary treatment plants in the San Diego area. The alternatives involve variations in the size and extent of treatment facilities in and around Sorrento Valley, at the existing Point Loma treatment site, at locations near Lindbergh Field, and at sites along the U.S./Mexico border. Alternative sites are also being considered for a number of water reclamation plants throughout the San Diego metropolitan area. The City of San Diego is not making any major decisions at the meetings itemized below with regard to the rejection or adoption of sites. The City is seeking public input which will be used to analyze the alternatives. Subsequent public meetings in the spring of 1989 will address the selection of an alternative.

*Scoping:* The City of San Diego will hold three initial public scoping meetings. Each meeting will be held in a different location within the greater San Diego area: (1) Monday, February 27, 1989, at 7:30 p.m. at University Towne Centre Forum Hall, Great American Building J–1, 4315 La Jolla Village Drive, La Jolla, CA; (2) Tuesday, February 28, 1989, at 7:30 p.m. at Point Loma High School Auditorium, 2335 Chatsworth Blvd., San Diego, CA; and (3) Wednesday, March 1, 1989, at 7:30 p.m. at Southwest High School, 1685 Hollister St., San Diego, CA. The public is encourage to attend, to provide their views on the proposed site alternatives for secondary wastewater treatment and water reclamation, and to assist in the identification of environmental issues.

*Estimated Date of Draft EIS Release:* June 15, 1990.

*Responsible Official:* Daniel W. McGovern, Regional Administrator.

Dated: February 28, 1989.

**Richard E. Sanderson,**

*Director, Office of Federal Activities.*

## Access to Confidential Business Information by CRC Systems

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has authorized its subcontractor, CRC Systems (CRC) of Fairfax, VA for access to information which has been submitted to EPA under all sections of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI).

**FOR FURTHER INFORMATION CONTACT:** Michael M. Stahl, Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Environmental Protection Agency, Rm. EB–44, 401 M St., SW., Washington, DC 20460, (202) 554–1404, TDD: (202) 554–0551.

**SUPPLEMENTARY INFORMATION:** Under contract no. 68–01–7176, subcontractor CRC, 11242 Waples Mill Road, Fairfax, VA will assist the Office of Toxic Substances' Information Management Division in performing modifications and enhancements to EPA data base systems containing TSCA CBI. CRC employees will require access to TSCA CBI on computer screens in order to perform the contract tasks. In addition, CRC employees will occasionally be required to review CBI documents to compare hard copy data to those data elements contained in the systems.

CRC is working as a subcontractor under the Computer Sciences Corporation. Access to TSCA CBI by CSC was previously announced in the **Federal Register** of October 31, 1985 (50 FR 45483).

EPA is issuing this notice to inform all submitters of information under all sections of TSCA that EPA may provide CRC access to these CBI materials on a need-to-know basis. All access to TSCA CBI under this contract will take place at EPA Headquarters facilities.

Clearance for access to TSCA CBI under this contract is scheduled to expire on September 30, 1989.

CRC personnel will be required to sign non-disclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

Dated: February 24, 1989.

**Linda A. Travers,**

*Director, Information Management Division, Office of Toxic Substances.*

## FEDERAL EMERGENCY MANAGEMENT AGENCY

## Agency Information Collection Submitted to the Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for clearance in accordance with the Paperwork Reduction Act (44) U.S.C. Chapter 35).

*Type:* New Collection.

*Title:* National Fire Academy Course Monitoring System—National Fire Academy Course Evaluation.

*Abstract:* The National Fire Academy Course Evaluation form will be used to evaluate all on-campus and off-campus NMFA courses and to assess the effectiveness of the course materials and instructor performance.

*Type of Respondents:* Individuals or households.

*Estimate of Total Annual Reporting and Recordkeeping Burden:* 2,640.

*Number of Respondents:* 8,000.

*Estimated Average Burden Hours Per Response:* 33.

*Frequency of Response:* One-Time.

Copies of the above information collection request and supporting documentation can be obtained by calling or writing the FEMA Clearance Officer, Linda Shiley, (202) 646–2624, 500 C Street, SW., Washington, DC 20472.

Direct comments regarding the burden estimate or any aspect of this information collection, including suggestings for reducing this burden, to the FEMA Clearance Officer at the above address; and to Francine Picoult, (202) 395–7231, Office of Management and Budget, 3235 NEOB, Washington, DC 20503 within two weeks of this notice.

Date: February 27, 1989.

**Wesley C. Moore,**

*Director, Office of Administrative Support.*

[FEMA–821–DR]

## Major Disaster and Related Determinations; Kentucky

**AGENCY:** Federal Emergency Management Agency.

**ACTION:** Notice.

**SUMMARY:** This is a notice of the Presidential declaration of a major disaster for the Commonwealth of Kentucky (FEMA–821–DR), dated February 24, 1989, and related determinations.

**DATED:** February 24, 1989.

**FOR FURTHER INFORMATION CONTACT:** Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3614.

NOTICE: Notice is hereby given that, in a letter dated February 24, 1989, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*, Pub. L. 93–288, as amended by Pub. L. 100–707), as follows:

I have determined that the damage in certain areas of the Commonwealth of Kentucky, resulting from severe storms and flooding beginning on or about February 13, 1989, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93–288, as amended by Public Law 100–707. I, therefore, declare that such a major disaster exists in the Commonwealth of Kentucky.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and Public Assistance in the designated areas. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under PL 93–288, as amended by PL 100–707, for Public Assistance will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Paul E. Hall of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the Commonwealth of Kentucky to have been affected adversely by this declared major disaster: The counties of Anderson, Bourbon, Bullitt, Butler, Casey, Franklin, Hardin, Harrison, Henry, Jessamine, Larue, Mercer, Nelson, Owen, Pendleton, Trimble, Washington, and Woodford for Individual Assistance and Public Assistance.

**Julius W. Becton, Jr.,**

## Office of Training; Board of Visitors for the National Fire Academy; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following committee meeting:

*Name:* Board of Visitors for the National Fire Academy.

*Dates of Meeting:* April 11–12, 1989.

*Place:* National Emergency Training Center, G Bldg., 2nd Floor Conference Room, Emmitsburg, MD 21727.

*Time:* April 11—8:30 a.m. to 5:00 p.m., April 12—8:30 a.m. to Agenda Completion.

*Proposed Agenda:* Old Business, New Business; Briefing of FY90 Operating Plan.

The meeting will be open to the public with seating available on a first-come, first-serve basis. Members of the general public who plan to attend the meeting should contact the Office of the Superintendent, National Fire Academy, Office of Training, 16825 South Seton Avenue, Emmitsburg, Maryland, 21727 (telephone number, 301–447–1123) on or before April 3, 1989.

Minutes of the meeting will be prepared by the Board and will be available for public viewing in the Director's Office, Office of Training, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472. Copies of the minutes will be available upon request 30 days after the meeting.

**Dave McLoughlin,**

*Director, Office of Training.*

## FEDERAL MARITIME COMMISSION

## Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, The Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

*Agreement No.:* 203–011198–001.

*Title:* Puerto Rico/Caribbean Discussion Agreement.

*Parties:* Hapag-Lloyd Ag, Thos. & Jas. Harrison Ltd., Nedlloyd Lines, B.V., Compagnie Generale Maritime, Sea-Land Service, Inc.

*Synopsis:* The proposed modification would add Crowley Caribbean Transport and Trailer Marine Transport as parties to the Agreement.

By Order of the The Federal Maritime Commission.

**Joseph C. Polking,**

*Secretary.*

Dated: February 28, 1989.

## FEDERAL RESERVE SYSTEM

## Compagnie Financiere de Suez; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may

VOL 54 ISS 41 MR 3 1989 UMI

express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than March 24, 1989.

**A. Federal Reserve Bank of New York** (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Compagnie Financiere de Suez*, Paris, France,and Banque Indosuez, Paris, France; to acquire Daniel Breen & Co. L.P. and Breen Trust Company, and thereby engage in providing portfolio investment advice pursuant to § 225.25(b)(4); and performing trust company services pursuant to § 225.25(b)(3) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, February 27, 1989.

**Jennifer J. Johnson,**

*Associate Secretary of the Board.*

BILLING CODE 6210-01-M

**Orrstown Financial Services, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies**

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act Y (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than March 23, 1989.

**A. Federal Reserve Bank of Philadelphia** (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *Orrstown Financial Services, Inc.*, Orrstown, Pennsylvania; to acquire 18.39 percent of the voting shares of Farmers National Bank of Newville, Newville, Pennsylvania.

**B. Federal Reserve Bank of Cleveland** (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *People Banchshares of Gambier Incorporated*, Gambier, Ohio; to become a bank holding company by acquiring 100 percent of the voting shares of The People Bank Gambier, Ohio.

**C. Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *F.B.H. Corp.*, Fayette, Alabama; to become a bank holding company by acquiring 100 percent of the voting shares of The Citizens Bank of Fayette, Fayette, Alabama.

2. *Fayette County Bancshares, Inc.*, Peachtree City, Georgia; to become a bank holding company by acquiring 100 percent of the voting shares of Fayette County Bank, Peachtree City, Georgia, a *de novo* bank.

**D. Federal Reserve Bank of Minneapolis** (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *JDOB, Inc.*, Naples, Florida; to acquire 100 percent of the voting shares of First State Bank of New Germany, New Germany, Minnesota.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

**[Docket No. 88M-0447]**

**CIBA Vision Corp.; Premarket Approval of CIBA Vision Sterile Saline Solution and CIBA Vision Sterile Buffered Saline Solution**

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing its approval of the application by CIBA Vision Corp., Atlanta, GA, for premarket approval, under the Medical Device Amendments of 1976, of the CIBA Vision Saline Solution and CIBA Vision Sterile Buffered Saline Solution. The devices are to be manufactured under an agreement with Armstrong Laboratories, Inc., West Roxbury, MA, which has authorized CIBA Vision Corp. to incorporate information contained in its approved premarket approval applications for the Armstrong Sterile Saline Solution and the Armstrong Sterile Buffered Saline Solution. FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of December 23, 1988, of the approval of the application.

**DATE:** Petitions for administrative review by April 3, 1989.

**ADDRESS:** Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** David M. Whipple, Center for Devices and Radiological Health (HFZ-460), Food and Drug Administration, 6757 Georgia Ave., Silver Spring, MD 20910, 301-427-7940.

**SUPPLEMENTARY INFORMATION:** On October 27, 1988, CIBA Vision Corp., Atlanta, GA 30360, submitted to CDRH an application for premarket approval of the CIBA Vision Sterile Saline Solution and the CIBA Vision Sterile Buffered Saline Solution. The devices are sterile physiological saline solutions (0.9 percent salt in water) in pressurized containers with a nitrogen propellant and are indicated for use in the rinsing, heat disinfection, and storage of soft (hydrophilic) contact lenses. The application includes authorization from Armstrong Laboratories, Inc., West Roxbury, MA 02132, to incorporate information contained in its approved premarket approval applications for the Armstrong Sterile Saline Solution and the Armstrong Sterile Buffered Saline Solution.

On December 23, 1988, CDRH approved the application by a letter to the applicant from the Acting Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact David M. Whipple (HFZ-460), address above.

**Opportunity for Administrative Review**

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before April 3, 1989, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554-555, 571 (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: February 22, 1989.

**Walter E. Gundaker,**

*Acting Deputy Director Center for Devices and Radiological Health.*

BILLING CODE 4160-01-M

**[Docket No. 88M-0024]**

**Advanced Cardiovascular Systems, Inc.; Premarket Approval of the ACS® Stack Perfusion™ Coronary Dilatation Catheter**

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing its approval of the supplemental application by Advanced Cardiovascular Systems, Inc., Mountain View, CA, for premarket approval, under the Medical Device Amendments of 1976, of the ACS® Stack Perfusion™ Coronary Dilatation Catheter. After reviewing the recommendation of the Circulatory System Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of January 11, 1989, of the approval of the application.

**DATE:** Petitions for administrative review by April 3, 1989.

**ADDRESS:** Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Shang W. Hwang, Center for Devices and Radiological Health (HFZ-450), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7371.

**SUPPLEMENTARY INFORMATION:** On May 3, 1988, Advanced Cardiovascular Systems, Inc., Mountain View, CA 94039-7101, submitted to CDRH a supplemental application for premarket approval of the ACS® Stack Perfusion™ Coronary Dilatation Catheter. The catheter is intended for use during percutaneous transluminal coronary angioplasty (PTCA) where the physician desires distal blood perfusion during prolonged balloon inflations. The catheter is intended for use in patients with coronary artery disease, who are acceptable candidates for coronary artery bypass graft surgery, and who meet one of the following selection criteria:

1. Single vessel artherosclerotic coronary artery disease that is discrete, subtotal, noncalcified, and accessible to a dilatation catheter.

2. Multiple vessel coronary artery disease under certain circumstances.

3. Coronary artery disease of the native coronary arteries and/or coronary artery bypass grafts of some patients who have previously undergone coronary artery bypass graft surgery and who have recurrence of symptoms and (a) progression of disease or (b) stenosis and closure of the grafts.

On September 16, 1988, the Circulatory System Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On January 11, 1989, CDRH approved the application by a letter to the applicant from the Acting Director of the Office of Device Evaluation, CDRH.

## Health Resources and Services Administration

### Final Funding Priorities for Grants for Residency Training and Advanced Education in the General Practice of Dentistry

The Health Resources and Services Administration announces the final funding priorities for Fiscal Year 1989 which will be used in making grant awards for Grants for Residency Training and Advanced Education in the General Practice of Dentistry, section 786(b) of the PHS Act which has been redesignated section 785 by Pub. L. 100-607, of the Health Professions Reauthorization Act of 1988.

Section 785 of the Act authorizes the Secretary to make grants to any public or nonprofit private school of dentistry or accredited postgraduate dental training institution (e.g., hospitals and medical centers) to plan, develop, and operate an approved residency or advanced educational program in the general practice of dentistry and to provide financial assistance to participants in such a program who are in need of financial assistance and who plan to specialize in the practice of general dentistry.

To receive support, programs must meet the requirements of final regulations at 42 CFR Part 57, Subpart L.

**Review Criteria**

The review of applications will take into consideration the following criteria:

(a) The potential effectiveness of the proposed project in carrying out the training purposes of section 785 of the Act;

(b) The degree to which the proposed project adequately provides for meeting the project requirements;

(c) The administrative and managerial capability of the applicant to carry out the proposed project in a cost-effective manner;

(d) The qualifications of proposed staff and faculty;

(e) The potential of the project to continue on a self-sustaining basis after the period of grant support; and

(f) The degree to which the proposed project proposes to attract, maintain and graduate minority and disadvantaged students.

The following established preferences will be used in making grant awards in Fiscal Year 1989:

New programs (Category 1), followed by expanding programs (Category 2), and then program improvements (Category 3), and within Category 1), first funding will be for approved applications designed to establish programs in States in which no non-Federal supported residency or advanced educational programs in general dentistry are currently in operation.

There is no funding preference between residency training programs and advanced educational programs in general dentistry.

In accordance with section 785 of the Act, three distinct categories of program development can be supported. Applications must address at least one of these categories.

*Category 1: Program Initiation*

An applicant may request support for up to one year of program planning and development, followed by two years of program operation. For this purpose an applicant must show, at a minimum, preliminary provisional approval from the Commission on Dental Accreditation before the initial grant award date (grants will be effective July 1 of the current fiscal year). Before a second year grant award will be made, the grantee must show an accreditation classification of accreditation eligible.

*Category 2: Program Expansion*

An applicant may request support for an existing program which has full approval accreditation classification to fund the cost of a first-year enrollment increase in the program.

*Category 3: Program Improvement*

An applicant may request support for an existing program which has conditional approval or provisional approval accreditation to correct deficiencies or weaknesses in order to gain full approval accreditation status. Support is also available for an existing program which has full approval accreditation for changes or additions in faculty, curriculum and/or facilities to enhance the quality of the program.

Proposed funding priorities were published in the **Federal Register** of November 14, 1988 (FR 45822) for public comment. Three comments were received during the 30-day comment period. Two of the comments were in support of the proposed priorities.

A third respondent, while also supporting the proposed funding priorities, did have questions regarding the application of some of the priorities. Specifically there was concern that Category 1 applicants can not meet the underrepresented minorities enrollment funding priority since such applicants have on enrollment history, whereas Categories 2 and 3 applicants can address the requirements. That is the case. However, since approved Category 1 applicants are funded before approved Categories 2 and 3 applicants, the awarding of points to approved Categories 2 and 3 applicants will not affect the funding or order of funding of approved Category 1 applicants.

In developing the underrepresented minorities enrollment funding priority, consideration was given to awarding points to applicants who submitted plans to attempt to increase minority enrollment. However, it was determined more appropriate to award points to approved applicants who had already initiated a minority enrollment effort and could demonstrate success. As indicated under the Review Criteria section of the Program Announcement, consideration is already being given to: (f) The degree to which the proposed project proposes to attract, maintain and graduate minority and disadvantaged students.

Therefore in conducting the Fiscal Year 1989 grant cycle, the underrepresented minorities enrollment funding priority will be retained as stated, since it has been determined that the funding priority will not adversely affect the funding of approved Category 1 applicants; it will reward approved applicants who have on their own initiated and been successful with their minority enrollment efforts; and it will serve as a stimulus to other programs to initiate minority enrollment efforts.

In discussing the funding priorities regarding specific areas of curricular content, the third respondent had concern with terms as "new offerings" and "innovative approaches," and it was urged that existing and traditional materials and methods be also considered in determining whether the funding priorities are met. While terms as "new offerings" and "innovative approaches" are used in describing the curricular content funding priorities, what is new or innovative curricula in one institution may be extant, traditional or lacking in another. The curricular content funding priorities are designed to stimulate the development, expansion or implementation of curricula in specified areas in the content and manner determined by the needs of each applicant. All proposed efforts to offer or improve educational content and experiences in the funding priority areas will be considered in determining whether the funding priorities are met.

Therefore, as proposed the final funding priorities will be retained as follows:

A funding priority will be given to:

(1) Projects which satisfactorily document enrollment of underrepresented minorities in proportion or more to their numbers in the general population or can document a net increase of underrepresented minorities (i.e., Black, Hispanic and American Indian/Alaskan Native or Pacific Islanders) over average enrollment of the past three years in the project's postgraduate year (PGY) trainees.

(2) Projects in which substantial training experience is in a PHS 332 health manpower shortage area and/or PHS 329 migrant health center, PHS 330 community health center or PHS 781 funded Area Health Education Center or State designated clinic/center serving an underserved population.

(3) Applications proposing to develop, expand or implement curricula concerning ambulatory and inpatient case management of HIV/AIDS patients

(4) Applications which are innovative in their educational approaches to quality assurance/risk management activities, monitoring and evaluation of dental services and utilization of peer developed guidelines and standards.

(5) Applications proposing to provide substantial multidisciplinary geriatric training experiences in multiple ambulatory settings and inpatient and extended care facilities.

This program is listed at 13.897 in the *Catalog of Federal Domestic Assistance*. It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR Part 100).

Dated: February 28, 1989.

**John H. Kelso,**

*Acting Administrator.*

## Public Health Service

### Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Public Health Service (PHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on February 17, 1989.

(Call Reports Clearance Officer on 202-245-2100 for copies of package)

1. Secondary School Student Survey of Behaviors and Behavioral Determinants Related to AIDS/HIV Infection—NEW—The primary objectives of this study are to estimate the extent to which students in grades 9–12 engage in behaviors placing them at high risk of acquiring AIDS/HIV infection, and to survey the knowledge and beliefs among these students of high risk behaviors. Respondents: Individuals or households; Number of Respondents: 6,527; Responses Per Respondent: 1; Average Burden Per Response: .5 hours; Estimated Annual Burden: 4,264 hours.

2. Statement in Support of Application for Waiver of Excludability Under Sections 212(a)(1) and (3) of Immigration and Nationality Act—0920-0006—Aliens who are mentally retarded or who have had one or more attacks of insanity are eligible to apply for waiver of excludability under Section 212(a)(1) and (3) of the Immigration and Nationality Act. If accepted, the applicant's sponsor must locate a medical facility or specialist in the U.S. that agrees to examine the applicant on arrival in the U.S. and provide a report of the examination to the Centers for Disease Control. Respondents: Individuals or Households, Businesses or other for-profit, Small businesses or organizations; Number of Respondents: 500; Responses Per Respondent: 1; Average Burden Per Response: .166 hours; Estimated Annual Burden: 83 hours.

3. Periodic Survey of Health Status, Minnesota Colon Cancer Control Study—0925-0275—Screening for occult blood in the stool is being recommended by many health professionals as a method for early detection of colorectal cancer. The information collection requested in this study is necessary to determine whether such screening is reliable and decreases mortality for colorectal cancer. Respondents: Individuals, Small businesses or organizations, Businesses or other for-profit; Number of Respondents: 35,656; Responses Per Respondent: 1; Average Burden Per Response: .17 hours; Estimated Annual Burden: 5,992 hours.

4. Survey of Physician Practice Behaviors Related to the Treatment of People with Diabetes Mellitus—NEW—Data will be collected on a representative sample of 1,600 general and family practitioners, pediatricians and internists to provide information on their attitudes and practice behaviors

VOL 54 ISS 41 MR 3 1989 UMI

related to the treatment of people with diabetes mellitus. Information will be used to describe conventional treatment and assist in developing more effective information dissemination.
Respondents: Small businesses or organizations, Businesses or other for-profit; Number of Respondents: 2,091; Number of Responses Per Respondent: 1; Average Burden Per Response: .274 hours; Estimated Annual Burden: 574 hours.

5. National Sexually Transmitted Diseases Morbidity Program—0920-0011—This clearance allows the collection of STD morbidity data from State and local health departments. The data are used to evaluate progress relative to STD control efforts as well as assisting State/local health managers to standardize collection procedures.
Respondents: State or local governments; Number of Respondents: 60; Number of Responses Per Respondent: 1,577; Average Burden Per Response: .962 hours; Estimated Annual Burden: 1,517 hours.

6. National Sexually Transmitted Diseases Epidemiology Program—0920-0001—This information collection provides data used in the public health community to assist in the control and prevention of STD's. Through outreach programs, individuals infected with STD's are contacted and directed to treatment centers. Respondents: State or local governments; Number of Respondents: 60; Number of Responses Per Respondent: 15.7; Average Burden Per Response: 6.38 hours; Estimated Annual Burden: 5,993 hours.

*OMB Desk Officer:* Shannah Koss-McCallum

Written comments and recommendations for the proposed information collections should be sent directly to the OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503.

Date: February 27, 1989.

**Steven A. Grossman,**

*Deputy Assistant Secretary for Health (Planning and Evaluation).*

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

**[Docket No. N-89-1947]**

### Submission of Proposed Information Collection to OMB

**AGENCY:** Office of Administration, HUD.

**ACTION:** Notice.

**SUMMARY:** The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

**ADDRESS:** Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451, 7th Street, Southwest, Washington, DC 20410, telephone (202) 755-6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

**SUPPLEMENTARY INFORMATION:** The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

**Authority:** Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: February 24, 1989.

**John T. Murphy,**

*Director, Information Policy and Management Division.*

*Proposal:* Application for Funding or Refunding the Community Housing Resource Board (CHRB) program.

*Office:* Fair Housing and Equal Opportunity.

*Description of the Need for the Information and its Proposed Use:* The purpose of the narrative is to provide current information on CHRB activity to enable HUD to evaluate this information and make a determination on the equitable distribution of program funds.

*Form Number:* None.

*Respondents:* Individuals or Households and Small Businesses or Organizations.

*Frequency of Submission:* One-Time Only.

*Estimated Burden Hours:*

| | Number of Respondents | x | Frequency of Response | x | Hours per Response | = | Burden Hours |
|---|---|---|---|---|---|---|---|
| Grant application | 110 | | 1 | | 180 | | 19,800 |

*Total estimated Burden Hours:* 19,800.

*Status:* Extension

*Contact:* Florence L. Multaby, HUD, (202) 755-7007; John Allison, OMB, (202) 395-6880.

Date: February 24, 1989.

BILLING CODE 4210-01-M

### Office of Assistant Secretary for Community Planning and Development

**[Docket No. N-89-1946; FR-2617]**

### Application Submission Dates for HUD-Administered Small Cities Program for Fiscal Year 1989

**AGENCY:** Assistant Secretary for Community Planning and Development, HUD.

**ACTION:** Notice.

**SUMMARY:** This Notice advises prospective applicants of the date for submission of applications to the HUD office for the HUD-Administered Small Cities Program in New York under the Community Development Block Grant Program for Fiscal Year 1989.

**FOR FURTHER INFORMATION CONTACT:** Jeannine Jacokes, State and Small Cities Division, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410. Telephone (202) 755-6322. (This is not a toll-free number.)

**SUPPLEMENTARY INFORMATION:** In accordance with 24 CFR 570.420(h)(3), the Department of Housing and Urban Development (HUD) has established the date for submission of applications for Small Cities grants in the State of New York for Fiscal Year 1989. Applications for funding under the Single Purpose and Comprehensive Grant provisions of the HUD-Administered Small Cities Program must be postmarked no later than April 17, 1989. Applications postmarked after that date are unacceptable and will be returned.

Applications for Single Purpose grants under 24 CFR 570.430, or applications for Comprehensive Grants under 24 CFR 570.428 for the State of New York are required to be submitted no later than April 17, 1989. Applicants in New York in the Counties of Sullivan Ulster and Putnam and nonparticipating jurisdictions in the Urban Counties of Dutchess, Orange, Rockland, Westchester, Nassau, and Suffolk should submit applications to the New York Regional Office. All other nonentitled communities in the State of New York should submit their applications to the Buffalo Field Office.

The Application requirements related to this program have been approved by the Office of Management and Budget (OMB) and assigned approval number 2506-0060.

This action is exempt from the provisions of the National Environmental Policy Act under 24 CFR 50.20(k).

Dated: February 9, 1989.

**Jack R. Stokvis,**

*Assistant Secretary for Community Planning and Development.*

BILLING CODE 4210-29-M

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

**[CA-050-09-4333-12]**

### Closure Order for Off-Road Vehicle Use

**ACTION:** Closure Order for Off-Road Vehicle Use.

**SUMMARY:** Notice is hereby given related to the closure of public land to off-road vehicle (ORV) use in accordance with regulations contained in 43 CFR 8341.2. Approximately 135 acres of wetlands and 35 acres of rare plant habitat located in portions of Section 31, T. 5 N., R. 1 W. and Section 6, T. 4 N., H. M., commonly referred to as the "North Jetty," will be temporarily closed to ORV use. This closure order will remain in effect until the *Arcata Area Resource Management Plan* is formally approved and the entire 300-acre area officially designated as open, limited or closed.

**DATE:** This closure order is effective March 15, 1989.

**FOR FURTHER INFORMATION CONTACT:** John Lloyd, Arcata Resource area Manager, 1125 16th Street, Room 219, P.O. Box 1112, Arcata, California 95521 [Telephone: (707) 822-7648] or District Manager, Ukiah District Office, 555 Leslie Street, Ukiah, California 95482 [Telephone: (707) 462-3872].

**SUPPLEMENTARY INFORMATION:** The purpose of closing the affected lands to vehicle use is to protect the Menzies' Wallflower *(Erysimum menziessi)* and its habitat, listed as "endangered" by the California Department of Fish and Game (DFG), and a scarce wetland habitat area which is an important roosting and feeding ground for Shorebirds, Herons, Hawks, Kingfishers, Swallows and Wrens. According to the DFG, and "estimated" 90% of California's wetlands have been highly disturbed and no longer productive. Menzies' Wallflower habitat has undergone even more distrubance—only two other locations exist along the California coast (Monterey and Fort Bragg).

Habitat restoration plans and research studies are currently being conducted within the 35-acre rare plant area which is delineated by a perimeter fence constructed in 1986. The wetland area fence will be completed by January 31, 1989. Information and regulatory signs are posted and BLM Ranger patrols have helped to inform and educate the visting public of the resource values that require protection.

The remaining public lands (approximately 130 acres) that surround these two sensitive areas will remain available for vehicle use and recreational facilities developed to expand ORV opportunities pursuant to the prescriptions outlined in the approved *Samoa Dunes Off-Road Vehicle Activity Plan* (1982).

Maps showing these open and closed areas are on file at the Bureau of Land Management's Arcata Resource Area Office, Arcata, California.

**John Lloyd,**

*Arcata Area Manager.*

BILLING CODE 4310-40-M

**[CA-060-89-4130-12]**

### Availability of Draft Environmental Impact Statement/Environmental Impact Report; Hart Mining District, CA

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of the availability of the Draft Environmental Impact Statement/Environmental Impact Report (DEIS/EIR) prepared to assess a new mining project proposed by the Viceroy Gold Corporation for the historic Hart Mining District of the Castle Mountain region of Southern California.

**SUMMARY:** Viceroy Gold Corporation has proposed development and operation of an open pit, cyanide heap leach gold mine in the historic Hart Mining District of the Castle Mountain region of San Bernardino County, California. The region has a long history of mining and lies within the California Desert Conservation Area, near the state border between California and Nevada.

The Bureau of Land Management and the County of San Bernardino have prepared a joint Environmental Impact Statement/Environmental Impact Report

VOL 54 ISS 41 MR 3 1989 UMI

under the requirements of the National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA) to analyze any probable environmental impacts the undertaking might create. The Corporation proposes to process ore from the mine at a rate of about three million tons per year, for approximately 10 years. Primary public issues of concern, which surfaced during the public scoping process in early 1988, include water resources, wildlife, land use, vegetation, access, health, safety and visual resources. Potential adverse impacts, according to the Draft EIS/EIR now available to the public would be mitigated by implementation of measures incorporated in project planning and design, including reclamation.

Copies of the Draft EIS/EIR on the proposed Castle Mountain Mine Project are available from the Bureau of Land Management, Needles Resource Area, 101 Spike's Road, P.O. Box 888, Needles, CA 92363 or from the San Bernardino County Office of Planning, 385 North Arrowhead, 3rd Floor, San Bernardino, CA 92415-0182.

A public review and comment period had been established from March 8 through May 8, 1989. Written comments should be addressed to John Bailey, Bureau of Land management, Needles Resource Area, 101 Spike's Road, P.O. Box 888, Needles, CA 92363-0888 and must arrive prior to close of business May 8, 1989.

An Administrative Law Judge will preside at three public hearings to allow the public an opportunity to provide oral comments on the adequacy and accuracy of the Draft EIS/EIR. These formal public hearings will be attended by a court reporter who will record comments and testimony for the record. Each of the public hearings will begin at 7 p.m. on the following dates and locations:

| DATE | LOCATION |
|---|---|
| Tuesday, April 18, 1989 | SAN BERNARDINO, CALIFORNIA, San Bernardino County Government Center, 385 N. Arrowhead, 1st Floor Hearing Room. |
| Wednesday, April 19, 1989. | BARSTOW, CALIFORNIA, Barstow Station Inn 1511 E. Main Street. |
| Thursday, April 20, 1989 | LAS VEGAS, NEVADA, Clark County, Education Center 2832 Flamingo Road |

A Final EIS/EIR will be prepared in response to the comments received during the public review period and will describe any changes, deletions or additions made to the Draft document. A Record of Decision will be issued by the Bureau of Land Management and the County of San Bernardino after a 30-day public review of the Final EIS/EIR.

**FOR FURTHER INFORMATION CONTACT:** John Bailey, Bureau of Land Management Project Manager, Needless Resource Area, 101 Spike's Road, P.O. Box 888, Needles, CA 92363 (619) 326-3896.

Date: February 16, 1989.

**Gerald E. Hillier,**

*District Manager.*

## Idaho Power's Southwest Intertie 500kV Electrical transmission Line Project; Intent To Prepare an Environmental Impact Statement/Plan Amendment

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of intent to prepare an Environmental Impact Statement/Plan Amendment (EIS/PA).

**SUMMARY:** Notice is hereby given that the Bureau of Land Management in cooperation with the United States Forest Service and the Bureau of Reclamation is proposing to prepare an EIS/PA for Idaho Power's Southwest Intertie 500kV electrical transmission line project running from Midpoint, Idaho, south to near Ely, Nevada, and then east to near Delta, Utah.

**DATES:** The public, state and local governments and other Federal agencies are asked to participate in the EIS process. Written comments will be accepted until April 28, 1989.

In addition to written comments, the following public scoping meetings will be held.

Twin Falls, Idaho. Where: Holiday Inn, 1350 Blue Lakes Blvd. N., Twin Falls, Idaho.

Date: March 27, 1989.

Time: 7:00 pm to 9:00 pm.

Wells, Nevada. Where: Wells High School, 115 Lake Avenue, Wells, Nevada.

Date: March 28, 1989.

Time: 7:00 pm. to 9:00 pm.

Ely, Nevada. Where: Bristlecone Convention Center, 150 6th Street, Ely, Nevada.

Date: March 29, 1989.

Time: 7:00 pm to 9:00 pm.

Delta, Utah. Where: Delta City Council Chambers, 76 North 200 West, Delta, Utah.

Date: March 30, 1989.

Time: 7:00 pm to 9:00 pm.

**ADDRESS:** Written comments should be addressed to: Gerald Quinn, District Manager, Bureau of Land Management, Burley District Office, Route 3, Box 1, Burley, Idaho, 83318.

**FOR FURTHER INFORMATION CONTACT:** Mr. Karl Simonson, Project Manager, Burley District Office, Route 3, Box 1, Burley, Idaho, 83318; phone (208) 678-5514.

**SUPPLEMENTARY INFORMATION:** The Idaho Power Company plans to construct and operate a 500kV transmission line from its existing Midpoint substation near Shoshone, Idaho, south approximately 400 miles to a point in the vicinity of the Intermountain Power Plant near Delta, Utah. The proposed project would interconnect with facilities jointly developed and owned by Los Angeles Department of Water and Power, Nevada Power, Utah Power and Light, the Utah Associated Municipal Power System and Deseret G&T.

The additional transmission capacity provided by the project would enable Northwest Utilities to market non-firm hydroelectric power in excess of regional needs to markets not presently accessible over existing transmission lines. The project would also allow Northwest utilities to receive energy from the Southwest during periods of high demand such as severe climatic conditions, or in periods of drought, where hydro generation is reduced or interrupted. The project would also enhance the reliability of the interconnected transmission in the Western United States.

Construction is proposed to start in 1991 and end in 1993. The desired in-service date is 1994.

The Bureau of Land Management's scoping process for the EIS/PA will include: (1) Identification of significant issues; (2) identifications of sensitive or critical environmental impacts; (3) identification of reasonable alternative transmission line routes; and (4) notifying groups, individuals and agencies so that additional information concerning these issues and concerns can be obtained.

Should a proposed powerline route lay outside any existing BLM right-of-way (R/W) corridor or a designated R/W corridor, the following land use plans may be amended:

Idaho: Monument Resource Management Plan (RMP), Twin Falls Management Framework Plan (MFP).
Nevada: Wells RMP, Egan RMP, Shell RMP, Humbolt National Forest Plan.
Utah: Box Elder RMP, Warm Springs RMP, House Range RMP.

Issues that have been identified to date include, but are not limited to:

—Utilizing transmission line routes that may lay outside of BLM designated or existing corridors.
—Capacity of existing or designated corridors to handle additional power lines or other utilities.
—Powerline locations that may conflict with military aircraft uses.
—Visual impacts of transmission lines for highly sensitive visual resource management areas.
—Impacts to cultural resources lying within utility corridors.

**Martin J. Zimmer,**

*Acting State Director, Idaho.*

## Salt Lake District; Intent To Prepare Off-Highway Vehicle Plan and Conduct Scoping Meetings; Pony Express Resource Management Area

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of intent to prepare off-highway vehicle plan and conduct scoping meetings.

**SUMMARY:** The Bureau of Land Management (BLM) intends to prepare a plan to address Off-Highway Vehicle (OHV) use on 2,032,899 acres of public lands in the Pony Express Resource Management Area (Salt Lake, Tooele and Utah counties). The plan will analyze the need for a revision of current OHV designations, and once enacted, would constitute a formal redesignation of lands as either "open", "limited", or "closed" to OHV use.

The purpose of these designations is to provide for the management and protection of public land resources, persons and property using the public lands, and to minimize conflicts among the various uses of those lands. Resource considerations such as wildlife, threatened and endangered species, wildlife habitat, minerals, cultural resources, soils, watershed, forestry, range, visual resources, recreation, and others will be examined by an interdisciplinary team of BLM specialists who will prepare an environmental assessment of the OHV plan.

The Salt Lake District will conduct four public scoping meetings to receive input to be used in the preparation of the plan: March 21—State Line Hotel and Convention Center (Cobb Room), Wendover, Nevada; March 22—Department of Natural Resources auditorium, 1636 West North Temple, Salt Lake City, Utah; March 28—Payson City Council Chambers, 439 West Utah Ave., Payson, Utah; March 30—Tooele Junior High School cafeteria, 411 West Vine Street, Tooele, Utah. All four public meetings will begin at 7 p.m. Written comments should be sent to the Salt Lake District Office and received by April 14 for consideration during the preparation of the draft OHV plan. Detailed maps of the planning area are available for inspection and review at the district office.

**FOR FURTHER INFORMATION CONTACT:** Gregg Morgan, Pony Express Resource Area Outdoor Recreation Planner, BLM, 2370 South 2300 West, Salt Lake City, Utah 84119; (801) 524-5348.

**SUPPLEMENTARY INFORMATION:** General areas to be studied include the northern Deep Creek Mountains, Bonneville Salt Flats, Knolls, Puddle Valley, Cedar Mountains, Skull Valley, north Stansbury Mountains, Stansbury Island, Silver Island Mountains, Onaqui Mountains Rush Valley, Tintic Mountains, Simpson Mountains West Mountain and others.

When completed areas will be redesignated into one of three different categories:

"Open areas" where all types of vehicle use is permitted at all times, anywhere in the area, subject to applicable regulations and vehicle standards.

"Limited areas" where OHV use is restricted to meet specific resource management objectives. Examples of limitations include: numbers or types of vehicles; time or season of use; permitted or licensed use only; use on existing roads and trails; use on designated roads and trails; or other restrictions.

"Closed areas" are areas where off-road vehicles use is prohibited. Use of off-road vehicles in closed areas may be allowed for certain reasons; however, such use shall be made only with the approval of the authorized officer.

## Albuquerque, NM; District Grazing Advisory Board Meeting

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of Albuquerque District Advisory Board Meeting.

**SUMMARY:** The BLM's Albuquerque District Grazing Advisory Board will meet on Thursday, April 13, 1989, at 10:00 a.m., in the BLM District Office located at 435 Montano NE., in Albuquerque, New Mexico.

The agenda for the meeting will include:

1. Introduction and opening remarks.
2. Election of a Chairman and Vice Chairman.
3. Range improvements progress report for FY 89 (8100 funds).
4. Range Improvement proposals for review and ranking for FY 90.
5. Status of grazing in the El Malpais National Monument and Conservation Area.
6. Progress on Range Improvement Maintenance Plans.

The meeting is open to the public. Anyone interested in attending this meeting to make a presentation must notify the District Manager by April 10, 1989. Written statements may also be filed for the Board's consideration.

Summary minutes of the meeting will be on file in the Albuquerque District Office and available for public inspection during business hours within 30 days of the meeting.

For further information contact: Gary Wood, District Range Conservationist, BLM, 435 Montano NE., Albuquerque, New Mexico 87107.

**Robert T. Dale,**

## Albuquerque District, NM; Oil and Gas Management, Delegation of Authority

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of Change of Delegation of Authority for Oil and Gas Operations in Albuquerque District.

**SUMMARY:** The reservoir management function of Albuquerque District is being transferred from Albuquerque to Farmington, New Mexico. Included in the reservoir management function

VOL 54 ISS 41 MR 3 1989 UMI

transfer are the unit agreement, drainage and diligence functions. This function transfer applies to the entire Albuquerque District which includes Farmington, Rio Puerco and Taos Resource Areas. However, the office location of functions relating to applications for permit to drill, sundry well notices and reports remains at the individual Resource Area Offices. Also, the Albuquerque Office remains responsible for Natural Gas Policy Act determinations and communitization agreements for Rio Puerco and Taos Resource Areas. Communitization agreements for Farmington Resource Area will be processed at Farmington.

All lessees, operators and other parties are advised to direct all correspondence relating to the above identified reservoir management functions for Albuquerque District and communitization agreements in Farmington Resource Area, subsequent to the effective date, to the Farmington Resource Area at the following address or phone number: Bureau of Land Management, Farmington Resource Area, 1235 La Plata Highway, Farmington, New Mexico 87401. Telephone (505) 327-5340.

**EFFECTIVE DATE:** April 17, 1989.

**FOR FURTHER INFORMATION CONTACT:** Sid Vogelpohl, Albuquerque District, 435 Montano NE., Albuquerque, New Mexico 87107, (Telephone Number 505-761-4503).

**Patricia E. McLean,**

*Associate District Manager.*

## DEPARTMENT OF JUSTICE

### Lodging of Consent Decree Pursuant to the Clean Air Act; Moore Development Co., Inc.

In accordance with Department policy, 28 CFR 50.7, notice is hereby given that on February 21, 1989, a proposed consent decree in *United States of America* v. *Moore Development Company, Inc.* No. 86-C-80, was lodged with the United States District Court for the District of Colorado.

The proposed consent decree resolves a judicial enforcement action brought by the United States, on behalf of the Environmental Protection Agency ("EPA"), against defendants Moore Development Company, Inc., F.E. Murphy Construction Company, Inc., Wayne Gomez Demolition and Excavation, Inc., and Asbesco, Inc., for violations of the Clean Air Act. The complaint filed by the United States alleged that defendants violated the National Emission Standard for Hazardous Air Pollutants ("NESHAP") for asbestos, promulgated pursuant to section 112 of the Act, in connection with the demolition of a facility in Lakewood, Colorado.

The proposed consent decree enjoins defendants (except Asbesco, Inc., which has been dismissed from the case) from violating the asbestos NESHAP in the future and provides that any such violation occurring during the one-year life of the decree will result in the imposition of a stipulated penalty of $25,000 in addition to any other penalties available under applicable federal law. The proposed consent decree also requires defendants to pay a total civil penalty of $12,000 to the United States Treasury.

The Department of Justice will receive for a period of thrity (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Box 7611 Ben Franklin Station, Washington, DC 20044, and should refer to *United States of America* v. *Moore Development Company, Inc.*, D.O.J. Ref. 90-5-2-1-879.

The proposed consent decree may be examined at the Office of the United States Attorney, District of Colorado, 1200 Federal Office Building, Drawer 3615, 1961 Stout Street, Denver, Colorado 80294, and at the Region VIII office of the Environmental Protection Agency, Office of Regional Counsel, Attention: Thomas A. Speicher, 999 18th Street, Suite 500, Denver, Colorado 80202. A copy of the proposed consent decree may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division, U.S. Department of Justice, Room 1521, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land & Natural Resources Division, Department of Justice.

**Donald A. Carr,**

*Acting Assistant Attorney General, Land and Natural Resources Division, U.S. Department of Justice.*

## DEPARTMENT OF LABOR

### Office of the Assistant Secretary for Veterans' Employment and Training

### Solicitation for Grant Application: Job Training Partnership Act, Title IV, Part C, Program Year 1989

**AGENCY:** Office of the Assistant Secretary for Veterans' Employment and Training, Labor.

**ACTION:** Notice.

**SUMMARY:** On January 6, 1989 an early announcement was made in the **Federal Register** (54 FR 497) that a Solicitation For Grant Application (SGA) for JTPA Title IV, Part C (JTPA IVC) funds for Program Year 1989 would be made available on or about February 3, 1989. Additionally, this announcement enumerated many of the changes being made in the JTPA IVC program by the forthcoming SGA.

**DATE:** An application package and instructions for completion will not be made available for issuance on or about March 3, 1989. The closing date for receipt of a completed application in response to the SGA, or a letter of intent to make a subsequent application, will be no later than 4:30 pm, May 1, 1989.

**ADDRESS:** A copy of the application package and instructions will be mailed to all State entities which presently administer JTPA Title IVC grants and to the Employment Security Agency of each State.

Signed at Washington, DC, this 28th day February 1989.

**Donald E. Shasteen,**

*Assistant Secretary for Veterans' Employment and Training.*

### Employment and Training Administration

**[TA-W-21,391]**

### A.K. Guthrie Drilling, Big Spring, TX; Affirmative Determination Regarding Application for Reconsideration

By applications dated January 13, 14, and 27, 1989 the petitioners and a former company official requested administrative reconsideration of the Departmentof Labor's Notice of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance on behalf of former workers of A.K. Guthrie Drilling, Big Spring, Texas. The negative determination will soon be published in the **Federal Register.**

The petitioners claim, among other things, that they should be covered under the retroactive provisions of the 1988 amendments to the Trade Act since they were employed by an independent firm providing services to the oil and gas industry. Also, a former company official claims that A.K. Guthrie Drilling is an appropriate subdivision (Drilling Department) of the family trust which produces the oil and should be certified. It is also claimed that the workers filed under the wrong name—they should have filed their petition under Guthrie Oil and Gas Properties.

**Conclusion**

After careful review of the application, I conclude that the claims are of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 3rd day of February, 1989.

**Barbara Ann Farmer,**

*Director, Office of Program Management, UIS.*

**[TA-W-21,702]**

### Charles E. Hynek, Inc.; Dallas, TX; Negative Determination Regarding Application for Reconsideration

By an application dated January 22, 1989, the company requested administraive reconsideration of the subject petition for trade adjustment assistance. The denial notice was signed on January 12, 1989 and will be published in the **Federal Register** soon.

Pusuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) It it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If, in the opinion of the Certifying Officer, a mistake interpretation of facts or of the law justified reconsideration of the decision.

The company states that it composes and provides crude oil and natural gas prospects to attract potential investors for unaffiliated firms in the oil and gas industry. The company claims that oil and gas prospects are a visible and tangible product.

The Department of Labor has consistently determined that the performance of services does not constitute the production of an article as required by section 222 of of the Trade Act of 1974. The 1988 amendments to the Trade Act, in the Omnibus Trade and Competitiveness Act, extended coverage to workers in indpendent firms in the oil and gas industry engaged in exploration or drilling. The amended Act provides that independent firms engaged in exploration or drilling shall be considered to be producing oil and natural gas. Services involving the development of oil and gas prospects are not directly related to exploration or drilling, as provided for in section 222 (b)(2)(A) of the Act, and therefore are not covered under Act.

Further, in its initial determination, the Department addressed at length the manner in which workers of firms providing services could be certified for adjustment assistance. Those conditions have not been met.

**Conclusion**

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 22nd day of February 1989.

**Robert O. Deslongchamps,**

*Director, Office of Legislation and Actuarial Services, UIS.*

[TA-W-22,318]

**Fitkin Petroleum Corp.; Oklahoma City, OK: Termination of Investigation**

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on November 18, 1988 in response to a worker petition received on November 18, 1988 and filed on behalf of workers at Fitkin Petroleum Corporation, Oklahoma City, Oklahoma.

Fitkin Petroleum Corporation is a firm consisting of a single employee. Section 222 of the Trade Act specifies the group eligibility requirements for trade adjustment assistance benefits; the definition of "group," according to § 90.1 of the Rules and Regulations for administering the Trade Act, is three or more workers in a firm or an appropriate subdivision thereof. Since Fitkin Petroleum Corporation did not employ three workers, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 15th day of February 1989.

**General Motors Corp. Pontiac Motor Division Pontiac, MI; Affirmative Determination Regarding Application for Reconsideration**

By an application dated January 19, 1989 the United Auto Workers and the company requested administrative reconsideration of the Department of Labor's Notice of Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance on behalf of workers and former workers of General Motors Corporation's Pontiac Motor Division, Pontiac, Michigan. The notice will be published in the **Federal Register** soon.

The union claims that integrated production occurred between Pontiac Motor Division Plants whose workers are under a certification and 18 other plants in Pontiac. The company states that the Pontiac complex is made up of numerous manufacturing and support service operations at plants in Pontiac, Michigan.

**Conclusion**

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 22nd day of February 1989.

[TA-W-21.125 Harahan, LA; TA-W-21.125A Houston, TX]

**Offshore Navigation, Inc.; Negative Determination Regarding Application for Reconsideration**

By an application dated January 10, 1989, a company official requested administrative reconsideration of the subject petition for trade adjustment assistance. The denial notice was signed on November 25, 1988 and will be published in the **Federal Register** soon.

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If, in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The company official claims that its services are an inseparable component of a joint marine petroleum exploration effort for crude oil. In its search for oil in the Gulf of Mexico, ONI would direct research vessels via a radiopositioning system to predetermined interest points where geophysical data would be obtained.

Investigation findings show that geophysical companies hire ONI to direct seismic vessels in the Gulf to locations here seismic readings are taken. In addition, if the oil company decides to drill for oil in the Gulf, ONI will direct the vessels to the drilling site.

The Department's denial was based on the fact that section 1421 (a)(1)(B) of the Omnibus Trade and Competitiveness Act of 1988 does not apply to workers of the subject firm, since the preponderance of activities performed by workers of ONI consist of navigational services and not drilling or exploration.

Further, investigation findings show that off-shore producers of crude oil contract with geophysical companies to provide seismic data who in turn hire firms like ONI to provide navigational services. Independent firms providing navigational services to other firms providing services to oil producers would only be indirectly related to the exploration and drilling of crude oil. Accordingly, the causal nexus for which a basis for certification could be established is not present.

Further, in its initial denial, the Department addressed at length the only way service workers, outside the oil and gas industry, could be certified for worker adjustment assistance. Those conditions have not been met.

**Conclusion**

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 22nd day of February 1989.

[TA-W-21,328; Clodine, Texas TA-W-21,328A; Williston, ND]

**Buford Drilling Co.; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance**

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on December 16, 1988 applicable to all workers of Buford Drilling Company in Clodine, Texas.

Based on new information from the company, additional workers were separated from Buford Drilling Company, in Williston, North Dakota during the period applicable to the petition. The notice, therefore is amended by including the Williston, North Dakota location.

The amended notice applicable to TA-W-21,328 is hereby issued as follows:

"All workers of Buford Drilling Company in Clodine, Texas and Williston, North Dakota who became totally or partially separated from employment on or after October 1, 1985 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

**Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance**

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period December 1988 and January 1989.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

BEST COPY AVAILABLE

VOL 54 ISS 41 MR 3 1989 UMI

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

**Negative Determinations**

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

*TA-W-21,185; Gibson Associates, Inc., Cranford, NJ*
*TA-W-21,805; Challenger Circle F, Trenton, NJ*
*TA-W-21,863; SIA America, Inc., Alliance, OH*
*TA-W-21,339; Ethly Corp., Oil and Gas Div., Baton Rouge, LA*

In the following cases, the investigation revealed that criterion (3) has not been met for the reasons specified.

*TA-W-21,120; Milprint, Inc., Milwaukee, WI*

U.S. imports of sanitary food containers are negligible.

*TA-W-21,154; Abex, Mahwah, NJ*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-21,158; BHP Engineering, Inc., Corpus Christi, TX*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-21,242; Transwestern Mining Co., Claremore, OK*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,194; Hinkle Oil Co., Wichita, KS*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,164; Celeron Oil and Gas Englewood, CO*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,173; Diamond Tool and Horseshoe Co., Duluth, MN*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,044; Woods Petroleum Corp., Denver, CO*

Workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-21,074; Cooper Industries, Marshall, TX*

U.S. imports of oilfield machinery are negligible.

*TA-W-21,204; Merritt Trucking Co., Tye, TX*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-21,351; Gruss Petroleum Management, Midland, TX*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-21,048; Alliance Machine Co., Alliance, OH*

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

*TA-W-21,163; Caren Lynn, New York, NY*

Investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

*TA-W-21,171; Courtland Manufacturing, New York, NY*

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

*TA-W-21,197; J & C Manufacturing, New York, NY*

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

*TA-W-21,202; Manhattan Plaza, New York, NY*

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

*TA-W-21,570; KRW Energy Systems, Inc., Madison, PA*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-21,730; Kirwood Oil and Gas, Casper, WY*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-21,245; United Technologies Automotive, Inc., Dearborn, MI*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-22,156; Jennings Hellms Trucking, Inc., Indiana, PA*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-22,001; Wintershall Oil and Gas Corp., Englewood, CO*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,843; Magnum Marine Limited II, Conroe, TX*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,397; Arco Oil and Gas Co., Houston, TX*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,604; Coronado Transmission Co/Energy Gathering, Inc., Houston, TX*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-22,159; Lamb Enterprises, Lone Star, TX*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-22,107; Armco, Inc., Gainesville, TX*

U.S. imports of oilfield machinery are negligible.

*TA-W-22,232; Homco International, Williston, ND and Dickinson, ND*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-22,135; Exxon Production Research Co., Houston, TX*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-22,214; Conoco, Inc., Production Engineering and Research, Denver, CO*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-21,431; Harold Krueger Co., Natoma, KS*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,524; Manley Performance Products, Bloomfield, NJ*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,410; Dranetz Technologies, Inc., Edison, NJ*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,639; Lone Star Steel Co., Lone Star, TX*

The investigation revealed that criterion (2) has not been met. Sales of production did not decline during the relevant period as required for certification.

*TA-W-21,125; Offshore Navigation, Inc., Harahan, LA*

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

*TA-W-20,979; Offshore Exploration & Production, Houston, TX*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,049; Amerada Hess Corp., Southeast Production Region, Lafayette, LA*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,050; Amerada Hess Corp., Gulf Coast Exploration, Lafayette, LA*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,253; Amerada Hess Corp., Northern Production Region, Williston, ND*

Increased imports did not contribute importantly to workers separations at the firm.

*TA-W-21,321; Amerada Hess Corp., Onshore Exploration, Houston, TX*

The investigation revealed that criterion (2) has not been met. Sales of production did not decline during the relevant period as required for certification.

*TA-W-21,322; Amerada Hess Corp., Onshore Exploration Administration, Houston, TX*

The investigation revealed that criterion (2) has not been met. Sales of production did not decline during the relevant period as required for certification.

*TA-W-21,418; Exeter Drilling Co., Midland, TX*

Increased imports did not contribute importantly to workers separations at the firm.

I hereby certify that the aforementioned determinations were issued during the months of December 1988 and January 1989. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213 during normal business hours or will be mailed to persons who write to the above address.

**Marvin M. Fooks,**
*Director, Office of Trade Adjustment Assistance.*

Dated: February 17, 1989.

**[TA-W-21,592]**

**W.E. Myers Drilling Co., Midland, TX; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance**

In accordance with Section 223 of the Trade Act of 1974, the Department of Labor issued a Certification of Eligibility to Apply for Workers Adjustment Assistance on January 4, 1989. The

VOL 54 ISS 41 MR 3 1989 UMI

Certification will be published in the Federal Register soon.

The company provided new information to the Department which shows that Myers Drilling Company of Midland, Texas purchased the subject company on July 1, 1986. Myers Drilling Company meets the requirements for a successor-in-interest firm. Investigation findings show that additional worker separations occurred at the successor-in-interest firm.

Accordingly, the termination date of September 1, 1986 in the subject certification is deleted so as to include worker separations of Myers Drilling Company, Midland, Texas, the successor-in-interest firm.

The amended notice applicable to TA-W-21,592 is hereby issued as follows:

"All workers of W. E. Myers Drilling Company, Midland, Texas who became totally or partially separated from employment on or after October 1, 1985 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974."

Signed at Washington, DC., this 6th day of February 1989.

**Barbara Ann Farmer,**

*Director, Office of Program Management, UIS*

[SGA-DAA-89-101]

## Senior Community Service Employment Program; Solicitation for Grant Applications From American Indian and Pacific Island/Asian American National Aging Organizations

**AGENCY:** Employment and Training Administration, Labor.

**ACTION:** Notice; solicitation for grant applications.

**SUMMARY:** The Employment and Training Administration announces a Solicitation for Grant Applications from public or nonprofit national Indian aging organizations and from public or nonprofit national Pacific Island/Asian American aging organizations to provide employment services on a nationwide basis to older Indians and older Pacific Island/Asian Americans who have low incomes and are 55 years of age or older. Grant awards will be part of the Senior Community Service Employment Program, and operations will begin on July 1, 1989.

**DATES:** No exceptions to the mailing and hand-delivery conditions set forth in this Notice will be granted. *Applications not meeting the conditions set forth in this Notice will not be accepted.* To receive consideration, applications must be submitted at the address, dates and times listed below:

*Applications Mailed:* Applications submitted by mail must be certified or registered mail, return receipt requested, and must be postmarked no later than April 17, 1989. The term "postmark" means a printed, stamped or otherwise placed impression (exclusive of postage meter machine impression) that is readily identifiable without further action as having been supplied or affixed on the date of mailing by employees of the U.S. Postal Service.

*Applications Hand-Delivered:* Applications will be accepted daily between the hours of 8:15 A.M. and 4:45 P.M., Eastern Standard Time, but no later than 4:45 P.M., Eastern Standard Time on the working day after the closing date, i.e., April 18, 1989.

**ADDRESS:** Mail or hand-deliver three (3) copies of the complete application to: James C. DeLuca, Grant Officer, Division of Acquisition and Assistance, Office of Financial and Administrative Management, Employment and Training Administration, U.S. Department of Labor, Room C-4305, 200 Constitution Avenue, NW., Washington, DC 20210, Attention: Ms. Doris W. Smith. Reference: SGA-DAA-89-101.

**FOR FURTHER INFORMATION CONTACT:** Ms. Doris W. Smith, Division of Acquisition and Assistance, Telephone: (202) 535-8702.

**SUPPLEMENTARY INFORMATION:** The Older American Community Service Employment Program Act, Title V of the Older Americans Act of 1965, as amended, establishes a program of community service employment and other services for older Americans, 42 U.S.C. 3056 *et seq.* The program, the Senior Community Service Employment Program (SCSEP), is operated through grants made by the Employment and Training Administration (ETA) of the Department of Labor (DOL). The Older Americans Act Amendments of 1987 amended Section 506(a)(1)(A) of the Older Americans Act of 1965 to require the DOL to fund national aging organizations representing Indians and Pacific Island/Asian Americans. Efforts will be made to fund two organizations, one for each of the two groups, to begin operations in Program Year (PY) 1989 (July 1, 1989—June 30, 1990). This Notice makes known the laws, guidelines, specifications and schedules which define the eligibility and other requirements with which national Indian and Pacific Island/Asian American aging organizations must comply for the preparation and submission of a funding application to the DOL.

This Notice consists of: Part I—Introduction, Part II—Solicitation for Grant Application (SGA) and Part III—Submission of Funding Applications. Part II constitutes an invitation from DOL for public or nonprofit national Indian and Pacific Island/Asian American aging organizations with the demonstrated ability to provide employment services to older Indians and older Pacific Island/Asian Americans to submit applications for the PY 1989 Older Americans Act, Title V SCSEP program.

Part III provides information on the submission of applications and the notification of selection.

### Part I—Introduction

The DOL announces competitive application instructions only for public and nonprofit national Indian and Pacific Island/Asian American aging organizations having the demonstrated ability to provide employment services on a nation-wide basis to older Indians and older Pacific Island/Asian Americans. Efforts will be made to fund two such organizations, one for each group, for PY 1989 (July 1, 1989—June 30, 1990). Applicants selected for funding will be designated as grantees for a one-year period, PY 1989, if applicable statutory, regulatory and guideline requirements are met, an acceptable application in response to the SGA (Part II of this Notice) is submitted, and funds are available.

There are three considerations involved in setting the general parameters for this competitive effort. They are:

(1) *Site Selection.* The DOL considered three factors in identifying the States in which the two new sponsors selected will implement their SCSEP projects:

(a) *The amount of PY 1989 funds allocated to each State which is in excess of the 1988 level.* Section 506(a) of the Older Americans Act, in conjunction with any governing language in each fiscal year's appropriation Act, provides the formula which determines the distribution of SCSEP funds among the States. The formula determines the amount of funds allotted to each State and thereby the number of SCSEP positions available in each State. For this reason, the new projects will be in States which will receive the largest proportionate increase in PY 1989 funds over PY 1988 in order to minimize any adverse effect on the already established projects of the current SCSEP sponsors. For example, funding projects in States with small funding increases would require eliminating already established projects with the attendant enrollee disruption.

(b) *Addressing the statutory equitable distribution requirement.* Section 506(c) of the Older Americans Act requires the equitable distribution of resources among all areas in each State, including the balance between rural and urban areas. This requirement further supports the establishment of the new projects in those States having a larger proportionate increase in PY 1989 funds since new positions can be placed in under-served areas without disrupting existing projects.

(c) *Presence of the Population Groups.* The final site selection consideration was the existence within a State of adequate numbers of the target population to warrant placing a project there.

After weighing all of the above considerations, DOL has determined that the new national Indian aging organization should establish its projects in the States of Texas and Oklahoma. The new national Pacific Island/Asian American organization should establish its projects in the States of California and Oregon. These States were selected because they meet the site selection criteria. The particular State combinations were also based on geographic proximity to provide a greater opportunity for administrative efficiency.

(2) *Funding Level.* The Department has established the PY 1989 funding level for the two new aging organizations at $1 million each. This amount will provide each organization with 193 positions and will allow each to develop their programs in an orderly fashion without the administrative problems associated with establishing larger programs. Another factor considered in determining the funding level was the general incidence of the two new groups in the total eligible population.

*Background*

The SCSEP fosters and promotes useful part-time opportunities in community service activities for persons with low incomes who are fifty-five years old or older. The Employment and Training Administration (ETA) of DOL operates the program by means of grants with eligible organizations, such as governmental entities and eligible public and private nonprofit agencies and organizations. Those entities which are eligible to respond to this SGA are encouraged to study the Act.

*Summary of Eligibility Requirements*

Agencies and organizations eligible to respond to this SGA are those that are:

1. Public or nonprofit national Indian and Pacific Island/Asian American aging organizations, other than political parties, and incorporated as such, and

2. National in scope with the ability to provide employment services to the eligible clientele on a nation-wide basis. National is defined as having, either directly or through local chapters or affiliates, conducted substantial business in at least five different States. While DOL reserves the right to determine what constitutes "substantial business," the meaning of the term does include government-assisted or privately-financed programs conducted for the community welfare. The term does not mean attendance or representation at meetings, conferences, conventions, seminars or the like, and

3. Are able to meet the requirements of sections 502(b) and 506(a) of the Act.

Since the SCSEP is a part-time employment and training program for low income persons who are 55 or older, organizations which have not operated employment and training programs should consider the cost of preparing an application against the low potential for successfully competing under the provisions of this SGA. (See Part II—Solicitation for Grant Applications for the specific rating criteria against which all applications will be rated).

### Part II—Solicitation for Grant Application (SGA)

The DOL is soliciting applications for grants under the provisions of Title V of the Older Americans Act of 1965, as amended, to provide part-time employment services to eligible older individuals. The geographic areas for which the national Indian and Pacific Island/Asian American aging organizations can apply are limited under this SGA. The States and the resources available for those States are:

NATIONAL INDIAN AGING ORGANIZATIONS

| State | Funds | SCSEP positions |
|---|---|---|
| 1. Texas | $804,841 | 154 |
| 2. Oklahoma | 204,261 | 39 |
| Total | 1,009,102 | 193 |

NATIONAL PACIFIC ISLAND/ASIAN AMERICAN AGING ORGANIZATIONS

| State | Funds | SCSEP positions |
|---|---|---|
| 1. California | $867,350 | 166 |
| 2. Oregon | 139,877 | 27 |
| Total | 1,007,227 | 193 |

*Review and Funding of Applications*

Applications will be reviewed and rated by a competitive review panel, using the specific review standards cited in this Part II. Panel results are advisory in nature and are not binding on the Grant Officer. In addition, prior to the final selection of an applicant as a potential grantee, the DOL will conduct a responsibility review of the available records to establish the applicant's ability to administer Federal funds. The review will consider previous debts, evidence of fraud, if any, within the organization, previous audit findings, etc. This review is intended to establish overall responsibility to administer Federal funds and is independent of the competitive process. Applicants failing to meet this responsibility review will not be selected as potential grantees regardless of their standing in the competition.

*Specific Rating Criteria*

The rating criteria and the weights assigned to each are described below:

1. *Prior experience. 0–25 points.* The applicant's prior experience in conducting programs for older workers will be assessed.

Applicants who have demonstrated through prior experience the ability to effectively serve the older workers will be given the highest rating.

To assist the panel, applicants should describe in detail their past organizational experience. Emphasis should be placed on services to the older worker and prior experience with employment and training programs. Names, addresses and telephone numbers of individuals with other agencies who can provide factual information on the offeror's experience must be included.

2. *Administrative Capability.* (Organizational Capability) *0–20 points.* The applicant's apparent ability—based upon an assessment of the organizational structure, the resources of the applicant, and other available information, to undertake a project of the size and difficulty that the SCSEP poses.

3. *Staff Capability. 0–5 points.* The applicant should describe the qualifications of persons who will be employed should their organization be the successful applicant. Applicants are to provide job descriptions and selection criteria for all key professional positions, i.e., project director, program assistant, technical staff.

4. *Cost. 0–10 points.* This criteria will include consideration of the applicant's ability to meet program objectives

VOL 54 ISS 41 MR 3 1989 UMI

within the proposed geographic and administrative arrangement. It will also include an analysis of the budget information including the statutory 10-percent non-Federal share of the project.

5. *Potential Program Effectiveness. 0–40 points.* The narrative portion of each proposal will be assessed with regard to its consistency with the Act; the completeness and detail with which it has been prepared; the potential effectiveness; the provision of useful part-time employment for older low income persons; and the provision of training in comparison with competing grant applications. In this regard, the panel will consider such things as:

(1) Number and type of subsidized positions
(2) Enrollee wages and benefits
(3) Plans for permanent unsubsidized employment
(4) Proposed administrative structure
(5) Plans and procedures for subgranting and contracting, if any
(6) Coordination and cooperation with existing SCSEP projects within the proposed States
(7) Plans for enrollee recruitment and placement (job matching)
(8) Plans for enrollee training

*Negotiation*

At its discretion, the Department may negotiate cost, program matters and sub-State geographic locations with applicants. However, the government reserves the right to make an award without further discussion of proposals. Therefore, proposals should be submitted on the most favorable terms from both price and technical standpoints that the applicant can propose. The Department reserves the right to reject any and all proposals. Also, applicants are reminded that any proposal received will become part of the official file on the solicitation. Proposals which are accepted for consideration will not routinely be returned to the applicant. However, any unsuccessful applicant wishing to have its proposal returned may so request in writing within 30 dasys after grant award. All excess copies will be destroyed.

*Limitations on Subgrantees and Contracts*

Subgranting or contracting is permitted but: (1) Individual subgrants or contracts shall be confined to a single State, metropolitan, or rural area within a State; (2) National program administration cannot be delegated to another agency; and (3) Subsponsors must meet the requirements of the applicable administrative regulations. In addition, applicants which would use subgrants or contracts must define the standards against which possible subgrantees-contractors will be assessed prior to their selection as subsponsors.

*Areas to be Served*

Although applicants are limited in the States which they may serve, there are no limitations on the areas which they may propose to serve within the selected States. However, before a grant award is made, the DOL, ETA, reserves the right to specify which areas will be served. In preparing its proposal, applicants should identify the criteria which it will use in selecting its proposed project sites.

*Single Point of Contact Clearance Procedures*

Those organizations selected to act as national SCSEP sponsoring organizations will be required to follow Executive Order 12372 which implements the Single Point of Contact (SPOC) clearance procedures. However, those organizations submitting grant applications should not take steps to comply with these requirements until after they have been notified of their selection as a national SCSEP sponsor. In addition, selected sponsors will be required to coordinate with the State and Area Agencies on the Aging.

*Content and Format of the Application*

Exclusive of charts or graphs, letters of support, certifications, and other required papers, the application should not exceed 75 pages of unreduced double-spaced type.

A detailed budget is not required for this application. However, applicants must complete a planning budget, which consists of three cost categories; Administration, Enrollee Wages and Fringe Benefits and Other Enrollee Cost. A final budget will be negotiated later with the successful applicants selected for grant awards.

In preparing their applications and program approach, applicants must be aware of the SESEP's budgetary limits, including Administrative Cost that cannot exceed 13.5 percent, although a waiver up to a 15 percent cap is possible with an appropriate and compelling justification. See Section 502(c)(3) of the Act as amended. Enrollee Wages and Fringe Benefits can be no less than 75 percent of the Federal share, and the contribution of a non-Federal share of at least 10 percent of the total project cost is required.

Application Narrative

The application narrative format, which follows, must be utilized by the applicants. The application must contain the sections listed below. These sections relate to the rating criteria, and the review panel members will assess the proposed narrative portions of the application in making their ratings.

*Section I—Needs and Objectives.* Describe the need for the project and state its principal objectives. Supporting documentation from knowledgeable interests other than the applicant may be used to demonstrate the need. Any relevant data based on planning studies should be included or footnoted.

Generally, the project should be described in terms of the economic and employment needs of the target: low-income population (primarily Indian or Asian-Pacific Islanders), aged 55 and above. This eligible population should be further defined by the applicant. For example, the applicant should indicate what percentage of the eligible population is female, male, economically disadvantaged (below 100 percent of poverty), etc., the community service needs which enrollees can help meet, especially those which are of particularly high priority in the target group's community should be mentioned.

*Section II—Results or Benefits Expected.* Describe the results or benefits to be derived from the project, with particular regard to the benefits accruing to project enrollees. These include: (1) the enhancement of enrollees' income and employability; (2) the creation of employment opportunities for older, low-income persons; (3) the assistance to participants to become economically self-sufficient through unsubsidized employment; and (4) the provision of opportunities for participants which would not otherwise be available.

Describe the other benefits to be derived from the project. These will include: (1) the elimination of artificial barriers to employment; (2) the general economic or social betterment of the community or communities in which the project is conducted; and (3) the enhancement of public or community services.

*Section III—Approach.* Section III requires information about the operations of the proposed project and the procedures the applicant will use to implement it. This section must consist of three subsections, each of which is discussed separately below:

a. *Plan of Action.* Provide a description of each project function or activity and the manner in which it will be carried out. The description must assure adherence to the guidelines for project operations found in the regulations. Applicants must provide adequate descriptions for the DOL to clearly ascertain how the applicant will implement the project. The following functions or activities should be discussed separately:

(1) *Recruitment and selection of enrollees.* Indicate the methods and resources that will be used to recruit enrollees. Describe efforts to be used to assure priority enrollment for those most in need over 60.

(2) *Eligibility for Enrollment in SCSEP—Special Responsibilities of Project Sponsor.* All sponsors shall be required to certify the income of each enrollee. Indicate how the age and income of enrollees will be certified.

(3) *Physical examinations.* Describe the arrangements which will be made to provide initial physical examinations and periodic annual physical examinations for enrollees.

(4) *Orientation.* Describe enrollee and host agency orientation procedures, including enrollee and agency responsibilities, permissible political activities, etc.

(5) *Assessment.* Describe the procedures to be followed in assessing the job aptitudes, job readiness, and job preferences of enrollees, as well as their potential for transition into private or unsubsidized employment. Supportive service needs of enrollees should also be addressed. Such assessments should be made no less frequently than once a year.

(6) *Training in Preparation for Community Service Employment.* Describe how job-related training prior to community service employment, if any, will be provided to enrollees.

(7) *Placement into Subsidized Employment.* Describe efforts to place enrollees into subsidized employment. Include the following: (i) the types of community service activities which will be emphasized in assigning enrollees to subsidized jobs; (ii) methods used to match enrollees with subsidized jobs; (iii) the extent to which enrollees will be placed in work assignments involving the administration of the project itself; (iv) the types of host agencies to be used, if any, and the procedures and criteria for selecting work assignments; (v) average number of hours in enrollee work week; (vi) the average enrollee wage rate; (vii) enrollee fringe benefits; and (viii) the procedures for assuring enrollees are given adequate worksite supervision.

(8) *Training during community service employment and for other employment.* Describe the training for enrollees after they have been placed into subsidized jobs. (It should not exceed 260 hours of training during the grant period.) Training may be related to the SCSEP job duties or it may be developmental, i.e., the skills developed will enhance the enrollee's unsubsidized employment opportunities.

(9) *Supportive services.* Describe the supportive services to be provided enrollees.

(10) *Enrollee transportation.* Describe the arrangements which will be made to provide transportation assistance to enrollees and the reimbursement rate for transportation, if any.

(11) *Placement into private or other unsubsidized employment.* Describe in detail the steps which will be taken to move or place enrollees into unsubsidized employment and subsequent followup efforts. Include cooperative measures that will be taken with the Job Training Partnership Act (JTPA) sponsors to place enrollees.

(12) *Enrollee Complaint Resolution.* Describe fully the system of due process which will be used in cases in which an adverse action is contemplated against an enrollee, or in cases in which an applicant for enrollment wishes to dispute an unfavorable determination of eligibility.

(13) *Temporary enrollees.* Describe utilization of temporary enrollees, if any, and the anticipated number of temporary enrollees to be hired. Indicate the following:

a. How enrollees will be notified of temporary status.

b. How temporary status of enrollees will be designated in enrollee records.

(14) *Maintenance of Effort (MOE).* Describe steps to be taken to assure that program enrollees will not be used to replace other employed workers or workers on layoff. Section 502(b)(1)(G) of the Older Americans Act.

b. *Performance Goals.* Specify the following: (1) the number of authorized community service employment positions under the project; and (2) the number of enrollee unsubsidized placements to be achieved during the funding period. The goal for unsubsidized placements, 20 percent, shall be based on the number of authorized positions in the project. (3) *Indicate the projected date by which the new positions will be filled.*

c. *Coordination and Cooperation.* Describe the cooperative relationships and working linkages which have been, or will be established with other employment related programs and agencies (including other SCSEP projects, JTPA sponsors, Job Corps Centers and State Employment Security Agencies), and with agencies concerned with or experienced in the problems of the aging (including State and Area Agencies on Aging). Also, describe the plans to work with any labor organization which is necessarily connected with the project. Indicate any other cooperative or coordinative relationships that will assist program performance, and assure equitable access to the program among cities, counties or other appropriate jurisdictions.

*Section IV—Geographic Areas to be Served.* List the States, cities and counties (including rationale for selection of the sub-State locations), where the project or its subprojects will be conducted. Include the number of SCSEP authorized part-time positions to be established in each of the jurisdictions. For multi-State projects, the distribution of authorized positions should be listed for each State along with the geographic area (generally counties) served within the State. For those applicants with a project located in a city but also serving surrounding counties (or other jurisdictions), the surrounding counties (or jurisdictions) should be listed with the number of proposed positions in each. Only those States specified previously will be available for the new sponsors.

*Section V—Program Administration.*

a. *Organizational Structure:* Describe the organizational structure of the project, including a description of the mission and function of each organizational unit connected with the project. Identify and include brief and relevant job descriptions and qualifications for all administrative and professional technical staff.

b. *Subproject Management:* Identify all subprojects to be carried out under contract or subgrant, and provide justification for the use of these organizations.

Describe the administrative mechanisms of subprojects including: (1) the organizational structure and function of subproject organizations; (2) the staff assigned to work on the subprojects; and (3) the amount of time designated for the staff to work on the subproject.

c. *Training of subproject (local) staff:* Describe the training which will be used to improve the knowledge, skills, and abilities of subproject (local) staff. Include where applicable a chart describing the proposed training with dates, content, and potential participation.

d. *Project Monitoring:* Explain fully the internal procedures to be used by the sponsoring organization in monitoring and assessing project activities to determine if the project is being adminstered in accordance with federal guidelines and regulations, and if project goals and timetables are being met.

VOL 54 ISS 41 MR 3 1989 UMI

Include in this explanation: (1) *how* frequently monitoring/evaluation visits will be made to local projects; (2) *who* will be responsible for monitoring/evaluation; (3) *what* criteria will be used to monitor and evaluate project activities; (4) *what* methods will be used for prescribing remedial action when necessary; and, (5) *what* followup procedures will be used to ensure that any problem identified has been remedied. Please indicate that all *written* monitoring reports and subsequent *followup actions* will be made a part of the permanent files.

e. *Financial monitoring:* Describe how the financial management system of local subprojects will be monitored. Included in this explanation should be: (1) *who* will be responsible for monitoring subsponsor expenditures; (2) *how* frequently monitoring of expenditures will be done; (3) *what* followup procedures will be used.

Describe audit procedures, including plans to audit local projects as well as plans to audit the project headquarters.

f. *Reports:* Upon grant award, successful applicants will be required to submit quarterly program and financial reports. In general, describe how this collection of information will be achieved and what organizational units will be involved.

*Section VI—Additional Cost Considerations.* All SCSEP funds must be spent on behalf of the State for which they are obligated. However, an appropriate protion of the administrative cost may be charged for the operations of the national headquarters and staff. Such cost must benefit the individual States.

Budget Information

The applicant must prepare a proposed budget using the forms prescribed by the Office of Management and Budget Circular A–102. (A copy of the SF 424A form is attached).

Sections A and B of the Budget Information form should be completed and include budget estimates for the entire grant period. In Section A and B, *three* basic grant functional areas must be identified. They are (1) Administration; (2) Enrollee Wages and Fringe Benefits; and (3) Other Enrollee Costs. Costs attributable to these functional areas are described as follows:

*Administration:* The cost category of administration shall include, but shall not be limited to, costs of providing and costs associated with providing:

- Administration, management and direction of a project or subproject;
- Reports on evaluation, management, community benefits, and other aspects of project or subproject activity;
- Accounting and management information systems;
- Training and technical assistance for project or subproject sponsor staff;
- Bonding;
- Audits; and
- Services or other benefits accruing to a project or subproject as a result of allowable indirect cost charges.

*Enrollee wages and fringe benefits:* The cost category of enrollee wages and fringe benefits shall include wages paid to enrollees for hours of community service employment and the costs of fringe benefits actually provided.

*Other enrollee costs:* The cost category of other enrollee costs shall include the costs of providing and the costs associated with providing those functions, services, and benefits not categorized as administration or enrollee wages and fringe benefits. Other enrollee costs shall include, but shall not be limited to, the costs of providing and the costs associated with providing:

- Recruitment and selection of eligible enrollees as provided in this part;
- Physical examinations for enrollees and eligible applicants who are being selected for enrollment;
- Orientation of enrollees and host agencies;
- Assessment of enrollees for participation in community service employment, and evalution of enrollees for continued participation or transition to unsubsidized employment;
- Development of appropriate community service employment assignments;
- Supportive services for enrollees including transportation, provided that when enrollee transportation is by privately-owned vehicle, reimbursement from Title V funds shall not exceed the current mileage rate established by Federal travel regulations;
- Training for enrollees; and
- Development of unsubsidized employment opportunities for enrollees.

Applicants should ensure that the proportional distribution of the requested Federal funds among these three functional areas meet the program requirements.

*Instructions for Completing the Budget Form.* The following are specific instructions for completing Sections A and B of the budget form which is the Standard Form (SF–424–A). It is not necessary to complete the other sections of the form.

*"Budget Information Form" (SF–424–A)—"Section A—Budget Summary"—Lines 1–4, Column (a) and (b).*

Under Column (a), enter the following: Line 1–"Administration", Line 2–the letters "EW/FB" (which refers to Enrollee Wages and Fringe Benefits); Line 3–"OEC" (which refers to Other Enrollee Costs). Under Column (b) on Line 1, enter "17.235" which is the Domestic Assistance Catalogue number.

*Line 1–4, Column (c) through (g).* Leave Columns (c) and (d) blank. For each line entry under Column (a), enter in Columns (e), (f), and (g) the appropriate amount of funds needed to support the project for the grant period. Entries in Column (e) are Federal, in Column (f) show only the non-Federal share. Column (g) reflects the total of (e) and (f).

*Line 5.* Show totals for all columns used. Applicants are reminded that the non-Federal share must be no less than 10 percent of the total cost of the project.

*"Section B—Budget Categories".* In the column headings at Line 6 titled "Object Class Categories" (1) through (3), enter the titles of the grant functional areas (i.e., Administration, EW/FB, and OEC) shown on Lines 1–4, Column (a), Section A. For each functional area fill in the total requirements for funds (Federal plus non-Federal) by object class categories.

*Lines 6a through 6h.* Show the estimated amount (include the Federal and non-Federal share) for each direct object class category under each column used. All costs to be incurred under contracts or subgrants should be reflected in line 6f (Contractual). It should be noted that the costs to be incurred under individual contracts or subgrants must be properly attributed among the three basic functional areas (i.e., Administration, EW/FB, and OEC). It should be further noted that under the EW/FB column (Enrollee Wages and Fringe Benefits), entries may be made only against three object class categories: Personnel (Enrollee Wages), Fringe Benefits (Enrollee Fringe Benefits), or Contractual when funds for enrollee wages and fringe benefits are to be included in contracts or subgrants.

*Line 6i.* Show the total of entries made for lines 6a through 6h in each column.

*Line 6j.* Show the amount of indirect costs. All indirect costs must be attributed to the column headed "Administration."

*Line 6k.* Enter the totals of the amounts indicated on lines 6i and 6j. For all applications, the total amount in Column (5), Line 6k, should be the same as the total amount shown in Section A, Column (g), Line 5.

*Line 7.* Enter the estimated amount of income, if any, expected to be generated from this project. Do not add or subtract this amount from the total project amount. Under the project narrative statement identify the nature and source of such income.

*Section VI—Other Accompanying Documents.* The application should also be accompanied by the following:

(1) A certificate from a Certified Public Accounting firm attesting to the adequacy of the applicant's financial system.

(2) If available, a recent annual report.

(3) A brief description of the applicant's organizational structure including an organization chart.

(4) A brief statement (1 or 2 pages) of the applicant's own organizational resources which can be used to support the SCSEP.

(5) A brief statement describing the applicant's relationship to the minority groups which it proposes to serve.

(6) A statement from the U.S. Internal Revenue Service certifying the applicant's status as a non-profit entity.

(7) Documentation to support the requirement that the applicant is an organization with the ability to provide employment and training services. This should include identification of specific prior projects, contacts and telephone numbers which indicate the applicant's capacity to operate an employment and training program.

(8) *Qualifications Statement.* The application must be accompanied by a signed statement from the applicant indicating that it has conducted substantial business in at least five different States. This statement must identify the States and provide a brief description of the projects, programs or other activities carried out in those States. The names, titles and phone numbers of persons with direct knowledge of the applicant's activities should also be provided with the statement.

A completed application shall consist of a narrative, an estimated budget and the various certifications and documents mentioned above.

*Part III—Submission of Funding Application.* Three copies of the complete application shall be submitted either by mail or hand-delivery. As noted earlier in this announcement, mailings must be posted by registered or certified mail, return receipt requested, no later than April 17, 1989. All hand-delivered applications will be accepted daily between the hours of 8:15 a.m. and 4:45 p.m., Eastern Standard Time. A receipt will be provided bearing the time and date of delivery. No hand-deliveries will be accepted after 4:45 p.m., Eastern Standard Time on the working day after the closing date, i.e., April 18, 1989. No exceptions to these mailing and hand-delivery conditions will be granted. Applications not meeting these conditions, including the provision of attachments, will not be accepted.

Funding applications must be mailed or hand-delivered to: James C. DeLuca, Division of Acquisition and Assistance, Office of Financial and Administrative Management, Employment and Training Administration, U.S. Department of Labor, Room C–4305, 200 Constitution Avenue NW., Washington, DC 20210. Attention: Doris W. Smith, Reference: SGA–DAA–89–101.

*Notification of Selection*

The following conditions are applicable:

(a) Respondents to this SGA which are selected as potential grantees will be notified by the DOL. The notification will invite each potential grantee to negotiate the final terms and conditions of the grant. It will establish a reasonable time and place for the negotiation and will indicate the State(s) or area(s) to be covered by the grant. Grants will be awarded for the period July 1, 1989 to June 30, 1990.

(b) In the event that no grant applications are received or those received are deemed to be unacceptable, or if a grant agreement is not successfully negotiated, the DOL may: (1) designate another organization or organizations or (2) reopen the area for competitive bidding.

(c) An applicant whose grant application is not selected by the DOL to receive funds will be so notified in writing.

Signed at Washington, DC this 28th day of February 1989.

**Labor Certification Process for the Temporary Employment of Aliens in Agriculture and Logging in the United States: 1989 Agricultural Adverse Effect Wage Rates; and Allowable Charges for Agricultural and Logging Workers' Meals**

**AGENCY:** Employment and Training Administration, Labor.

**ACTION:** Notice of adverse effect wage rates (AEWRs) and allowable charges for meals for 1989.

**SUMMARY:** The Director, U.S. Employment Service, announces 1989 adverse effect wage rates (AEWRs) for employers seeking nonimmigrant alien (H–2A) workers for temporary or seasonal agricultural labor or services and the allowable charges employers seeking nonimmigrant alien workers for temporary or seasonal agricultural labor or services and logging work may levy upon their workers when they provide three meals per day. AEWRs are the minimum wage rates which the Department of Labor has determined must be offered and paid to U.S. and alien workers by employers of nonimmigrant alien agricultural workers (H–2A visaholders). AEWRs are established to prevent the employment of these aliens from adversely affecting wages of similarly employed U.S. workers.

Although the Department's justification for its methodology for computing AEWRs is presently being litigated in the U.S. Court of Appeals for the District of Columbia Circuit, the Department considers itself compelled to publish these AEWRs at the present time on the basis of the currently applicable methodology. The Director also announces the new rates which covered agricultural and logging employers may charge their workers for three daily meals.

**EFFECTIVE DATE:** March 3, 1989.

**FOR FURTHER INFORMATION CONTACT:** Mr. Thomas M. Bruening, Chief, Division of Foreign Labor Certifications, U.S. Employment Service, Employment and Training Administration, U.S. Department of Labor, Room N–4456, 200 Constitution Avenue NW., Washington, DC 20210. Telephone: 202–535–0163 (this is not a toll-free number).

**SUPPLEMENTARY INFORMATION:** The Attorney General may not approve an employer's petition for admission of temporary alien agricultural (H–2A) workers to perform agricultural labor or services of a temporary or seasonal nature in the United States, unless the petitioner has applied to the Department of Labor (Department) for an H–2A labor certification showing that: (1) There are not sufficient U.S. workers who are able, willing, and qualified and who will be available at the time and place needed to perform the labor or services involved in the petition; and (2) the employment of the alien in such labor or services will not adversely affect the wages and working conditions of workers in the United States similarly employed. 8 U.S.C. 1101(a)(15)(H)(ii)(a), 1184(c), and 1186.

On June 1, 1987, the Department published an interim final rule at 20 CFR Part 655, Subpart B, 52 FR 20496, for the H–2A program. The interim final rule requires that covered employers offer and pay their U.S. and H–2A workers no less than the applicable hourly adverse effect wage rate (AEWR). 20 CFR 655.102(b)(9) (1988). Reference should be made to the preamble to the interim final rule, which explains in great depth the purpose and history of AEWRs, the Department's discretion in setting AEWRs, and the new AEWR computation methodology at 20 CFR 655.107(a) (1988). 52 FR at 20502–20505.

The AFL–CIO subsequently sued the Department to invalidate the interim final 20 CFR 655.107(a). On December 22, 1987, in that case, the United States Court of Appeals for the District of Columbia Circuit reversed a lower court decision that had invalidated the interim final 20 CFR 655.107(a). *American Federation of Labor and Congress of Industrial Organizations* v. *Brock*, 835 F. 2d 912 (D.C. Cir. 1987), *rev'g*, 668 F. Supp. 31 (D.D.C. 1987). Also vacated was that portion of the lower court decision that had stayed implementation of the June 1, 1987, interim final AEWR methodology in 20 CFR 655.107(a). 835 F. 2d at 913 n. 2.

However, the D.C. Circuit held that the interim final rule did not contain information sufficient for the court to "discern the reasonableness of the action without further explanation" and remanded the matter "to the Department for a more adequate explanation of its actions * * *." 835 F. 2d at 913 n. 2, 919, and 920. The D.C. Circuit, therefore, remanded the rulemaking for DOL to provide a more reasoned explanation for why it chose in the June 1, 1987, methodology to discontinue what the Court of Appeals viewed as the prior practice of providing for an enhancement to correct for the past employment of legal and undocumented aliens.

Upon remand, the U.S. District Court for the District of Columbia ordered DOL's "reasoned explanation" to be issued on or before April 30, 1988, unless otherwise ordered. *AFL–CIO* v. *Brock*, Civil Action No. 87–1683 (Order, D.D.C. March 25, 1988). DOL submitted the expanded explanation to the District Court in April 1988.

Additionally, DOL published the expanded explanation in the **Federal Register** as a new Notice of Proposed Rulemaking (NPRM). 52 FR 43722 (October 28, 1988). Interested parties were invited to submit written comments on the NPRM through November 28, 1988. *Id.*

On December 20, 1988, the U.S. District Court for the District of Columbia filed an opinion and order, finding that the April 1988 submission to it from DOL was invalid and again enjoined the June 1, 1987, interim final 20 CFR 655.107. The court did not rule on the October 28, 1988, NPRM.[1]

The December 20, 1988, order of the U.S. District Court regarding the June 1, 1987, AEWR methodology and the April 1988 submission has been stayed indefinitely by the U.S. Court of Appeals for the District of Columbia Circuit. *AFL-CIO* v. *McLaughlin*, Case No. 89–5001 (D.C. Cir. January 13, 1989) (Order granting stay pending appeal).

Despite this litigation, the Department is still faced with the responsibility to continue to administer the H–2A program. Inasmuch as the U.S. Court of Appeals stayed the U.S. District Court injunction of the AEWR computation methodology in 20 CFR 655.107(a), 52 FR 20496, 20515 (June 1, 1987), that methodology remains in effect at the present time.

The Department has received H–2A labor certification requests for 1989, and some have been granted for work beginning as early as mid-March and the Department has received requests to publish 1989 AEWRs. The Department believes that the sound administration of the program requires the use of the current Department of Agriculture data as they become available. For this reason, the Department is establishing 1989 AEWRs.

Regulations require the Director of the U.S. Employment Service to publish USDA wage data as AEWRs and publish allowable charges logging employers and H–2A agricultural employers may levy upon their workers for the provision of three meals per day. 20 CFR 655.107(a); 20 CFR 655.102(b)(4);

[1] In a separate opinion, the District Court on the same date remanded to DOL the H–2A program's "piece-rate regulation", 20 CFR 655.102(b)(9)(ii). *AFL-CIO* v. *McLaughlin*, Civil Action No. 87–1683 (Opinion and Order, filed December 20, 1988). That order has been stayed indefinitely by the U.S. Court of Appeals for the District of Columbia Circuit. *AFL-CIO* v. *McLaughlin*, Case No. 89–5001 (D.C. Cir. February 6, 1989) (Order granting motion to enlarge stay pending appeal).

VOL 54 ISS 41 MR 3 1989 UMI

20 CFR 655.111(a); 20 CFR 655.202(b)(4); and 20 CFR 655.211(a). The U.S. Department of Agriculture recently announced its wage data in the publication *Farm Labor*; these data produce higher AEWRs for the majority of States. The Department recognizes that the AEWRs published in this notice may be affected by the U.S. Court of Appeals' decision on the merits of the above-referenced litigation. However, in light of the above, the Department believes that sound administration of the H–2A program requires the publication of the 1989 AEWRs at this time.

**A. Adverse Effect Wage Rates (AEWRs) for 1989**

Adverse effect wage rates (AEWRs) are the minimum wage rates which the Department has determined must be offered and paid to U.S. and alien workers by employers of non-immigrant (H–2A) agricultural workers. The Department emphasizes, however, that such employers must pay the highest of the AEWR, the applicable prevailing wage or the statutory minimum wage, as specified in the regulations. 20 CFR 655.102(b)(9). Except as otherwise provided in 20 CFR Part 655, Subpart B, the regionwide AEWR for all agricultural employment (except those occupations deemed inappropriate under the special circumstances provisions of 20 CFR 655.93) for which temporary alien agricultural labor (H–2A) certification is being sought, is equal to annual weighted average hourly wage rate for field and livestock workers (combined) for the region as published annually by the U.S. Department of Agriculture (USDA) based on the USDA quarterly wage survey (USDA does not provide data on Alaska). 20 CFR 655.107(a) (1988), 52 FR 20496, 20515 (June 1, 1987).

The regulation at 20 CFR 655.107(a) requires the Director, U.S. Employment Service, to publish USDA field and livestock worker (combined) wage data as AEWRs in a **Federal Register** notice. Accordingly, the 1989 AEWRs for work performed on or after the effective date of this notice, are set forth in the table below:

TABLE—1989 ADVERSE EFFECT WAGE RATES (AEWRs)

| State | 1989 AEWR |
|---|---|
| Alabama | $4.12 |
| Arizona | 4.61 |
| Arkansas | 3.91 |
| California | 5.57 |
| Colorado | 4.49 |

TABLE—1989 ADVERSE EFFECT WAGE RATES (AEWRs)—Continued

| State | 1989 AEWR |
|---|---|
| Connecticut | 4.73 |
| Delaware | 4.73 |
| Florida | 5.26 |
| Georgia | 4.12 |
| Hawaii | 7.37 |
| Idaho | 4.05 |
| Illinois | 4.79 |
| Indiana | 4.79 |
| Iowa | 4.50 |
| Kansas | 4.72 |

| Virginia | 4.27 |
| Washington | 5.09 |
| West Virginia | 4.22 |
| Wisconsin | 4.24 |
| Wyoming | 4.05 |

**B. Allowable Meal Charges**

Among the minimum benefits and working conditions which DOL requires employers to offer their alien and U.S. workers in their applications for temporary logging and H–2A agricultural labor certification is the provision of three meals per day or free and convenient cooking and kitchen facilities. 20 CFR 655.102(b)(4); 20 CFR 655.202(b)(4). Where the employer provides meals, the job offer must state the charge, if any, to the worker for meals.

DOL has published at 20 CFR 655.102(b)(4) and 655.111(a) (1988) the methodology for determining the maximum amounts covered H–2A agricultural employers may charge their U.S. and foreign workers for meals. The same methodology is applied at 20 CFR 655.202(b)(4) and 655.211(a) (1988) to covered H–2 logging employers. These rules provide for annual adjustments of the previous year's allowable charges based upon Consumer Price Index (CPI) data.

Each year the maximum charges allowed by 20 CFR 655.102(b)(4) and 655.202(b)(4) are changed by the same percentage as the 12-month percent change in the CPI for All Urban Consumers for Food (CPI–U for Food) between December of the year just past and December of the year prior to that. Those regulations and 20 CFR 655.111(a) and 655.211(a) provide that the appropriate Regional Administrator (RA), Employment and Training Administration, may permit an employer to charge workers no more than a higher maximum amount for providing them with three meals a day, if justified and sufficiently documented. Each year, the higher maximum amounts permitted by 20 CFR 655.111(a) and 655.211(a) are changed by the same percentage as the 12-month percent change in the CPI–U for Food between December of the year just past and December of the year prior to that.

The regulations require the Director, U.S. Employment Service, to make the annual adjustments and to cause a notice to be published in the **Federal Register** each calendar year, announcing annual adjustments in allowable charges that may be made by covered agricultural and logging employers for providing three meals daily to their U.S. and alien workers. The 1988 rates were published in a notice on March 15, 1988, at 53 FR 8517.

DOL has determined the percentage change between December of 1987 and December of 1988 for the CPI–U for Food was 5.2%. Accordingly, the maximum allowable charges under 20 CFR 655.102(b)(4), 655.202(b)(4), 655.111, and 655.211 were adjusted using this percentage change, and the new permissible charges for 1989 are as follows: (1) for 20 CFR 655.102(b)(4) and 655.202(b)(4), the charge, if any, shall be no more than $5.72 per day, unless the RA has approved a higher charge pursuant to 20 CFR 655.111 or 655.211(b); for 20 CFR 655.111 and 655.211, the RA may permit an employer to charge workers up to $7.16 per day for providing them with three meals per day, if the employer justifies the charge and submits to the RA the documentation required to support the higher charge.

Signed at Washington, DC, this 23rd day of February, 1989.

**Robert A. Schaerfl,**

*Director, U.S. Employment Service.*

BILLING CODE 4510–30–M

**Employment Standards Administration; Wage and Hour Division**

**Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions**

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S–3504, Washington, DC 20210.

**Modifications to General Wage Determination Decisions**

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

**General Wage Determination Publication**

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC., this 27th day of February 1989.

**Robert V. Setera,**

*Acting Director, Division of Wage Determinations.*

BILLING CODE 4510–27–M

**Occupational Safety and Health Administration**

**Alaska State Standards; Approval**

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to the State plan which has

VOL 54 ISS 41 MR 3 1989 UMI

been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On August 10, 1973, notice was published in the **Federal Register** (38 FR 21628) of the approval of the Alaska plan and the adoption of Subpart R to Part 1952 containing the decision.

The Alaska plan provides for the adoption of the State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the Act. Section 1953.20 provides that where any alteration in the Federal program could have an adverse impact on the at least as effective status of the State program, a program change supplement to a State plan shall be required.

In response to Federal standards changes, the State has submitted by letter dated October 26, 1987 from Jim Sampson, Commissioner, to James W. Lake, Regional Administrator, and incorporated as part of the plan, State standards amendments comparable to 29 CFR 1928.110, Field Sanitation, as published in the **Federal Register** (52 FR 16095) on May 1, 1987.

The amendment of Title 8 of the Alaska Agricultural Code 81.010(a) adds requirements for Field Sanitation wherever employees are required to perform agricultural activities or operations by hand or with hand tools; and (b) revokes a section which stated that the sanitation requirements in Alaska's occupational and industrial structures code also apply to all agricultural operations, including those where no industrial structures or employment-related housing exists.

This State standard, which is contained in Subchapter 14, was adopted on September 1, 1987, and became effective October 14, 1987. Notices of the State rulemaking were published in statewide media on July 24, 1987 and July 31, 1987. The public comment period was open for 32 days. Comments were not received.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standard, it has been determined that the State standard is substantially identical to the Federal standard. Other than minor editorial changes, the only differences is that the Alaska Code includes farms with less than 11 employees. Alaska will use "State only" monies to inspect these establishments, which are not covered Federally because of a congressional appropriations rider. OSHA therefore approves the standard.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003, Federal Office Building, 909 First Avenue, Seattle, Washington 98174; State of Alaska, Department of Labor, Office of the Commissioner, Juneau, Alaska 99802; and the Office of State Programs, Occupational Safety and Health Administration, Room N-3476, 200 Constitution Avenue NW., Washington, DC 20210.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Alaska State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards are at least as effective as the Federal standards which were promulgated in accordance with Federal law including meeting requirements for public participation.

2. The standards were adopted in accordance with the procedural requirements of State law and further public participation would be repetitious.

This decision is effective March 3, 1989. (Section 18, Pub. L. 91-596, 84 STAT. 6108 [29 U.S.C. 677])

Signed at Seattle, Washington this 24th day of November, 1987.

**James W. Lake,**

*Regional Administrator.*

BILLING CODE 4510-26-M

## Alaska State Standards; Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On August 10, 1973, notice was published in the **Federal Register** (38 FR 21628) of the approval of the Alaska plan and the adoption of Subpart R to Part 1952 containing the decision.

The Alaska plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under Section 6 of the Act. Section 1953.20 provides that where any alteration in the Federal program could have an adverse impact on the at least as effective status of the State program, a program change supplement to a State plan shall be required.

In response to Federal standards changes, the State has submitted by letter dated May 2, 1988 from Jim Sampson, Commissioner, to James W. Lake, Regional Administrator, and incorporated as part of the plan, State standards amendments comparable to 29 CFR 1910.1028, Benzene, and 1910.1000, Table Z-2, as published in the **Federal Register** (52 FR 34562) on September 11, 1987.

This State standard, which is contained in Subchapter 04, was adopted on February 16, 1988, and became effective April 21, 1988. Notices of the State Rulemaking were published in statewide media on December 30, 1987 and January 6, 1988. The public comment period was open for 30 days. Written comments were not received. Public hearings were held February 1, 2, 3, 1988.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are identical to the Federal standards. OSHA therefore approves these standards.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003, Federal Office Building, 909 First Avenue, Seattle, Washington 98174; State of Alaska, Department of Labor, Office of the Commissioner, Juneau, Alaska 99802; and the Office of State Programs, Occupational Safety and Health Administration, Room N-3476, 200 Constitution Avenue NW., Washington 20210.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good causes which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Alaska State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards are identical to the Federal standards which were promulgated in accordance with Federal law including meeting requirements for public participation.

2. The standards were adopted in accordance with the procedural requirements of State law and further public participation would be repetitious.

This decision is effective March 3, 1989. (Section 18, Pub. L. 91-596, 84 STAT. 6108 [19 U.S.C. 677])

Signed at Seattle, Washington this 31st day of May, 1988.

**Ryan E. Kushmichel,**

*Acting Regional Administrator.*

BILLING CODE 4510-26-M

## NUCLEAR REGULATORY COMMISSION

### Abnormal Occurrence Report; Section 208 Report Submitted to the Congress

Notice is hereby given that pursuant to the requirements of Section 208 of the Energy Reorganization Act of 1974, as amended, the Nuclear Regulatory Commission (NRC) has published and issued another periodic report to Congress on abnormal occurrences (NUREG-0090, Vol. 11, No. 3).

Under the Energy Reorganization Act of 1974, which created the NRC, an abnormal occurrence is defined as "an unscheduled incident or event which the Commission (NRC) determines is significant from the standpoint of public health or safety." The NRC has made a determination, based on criteria published in the **Federal Register** (42 FR 10950) on February 24, 1977, that events involving an actual loss or significant reduction in the degree of protection against radioactive properties of source, special nuclear, and byproduct material are abnormal occurrences.

The report to Congress is for the third calendar quarter of 1988. The report identifies the occurrences or events that the Commission determiend to be significant and reportable; the remedial actions that were undertaken are also described. For the reporting period, there were no abnormal occurrences at nuclear power plants licensed to operate. There were two abnormal occurrences under other NRC-issued licenses: multiple medical therapy misadministrations at a single hospital and a medical diagnostic misadministration.

There was one abnormal occurrence reported by an Agreement State (Texas) involving a medical diagnostic misadministration.

The report also contains information updating some previously reported abnormal occurrences.

A copy of the report is available for public inspection and/or copying at the NRC Public Document Room, 2120 L Street NW., (Lower Level), Washington DC 20555, or at any of the nuclear power plant Local Public Document Rooms throughout the country.

Copies of NUREG-0090, Vol. 11, No. 3 (or any of the previous reports in this series), may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, DC 20013-7082. A year's subscription to the NUREG-0090 series publication, which consists of four issues, is also available.

Copies of the report may also be purchased from the National Technical Information Service, 5825 Port Royal Road, Springfield, VA 22161.

Dated at Rockville, MD this 28th day of February 1989.

For the Nuclear Regulatory Commission.

**Samuel J. Chilk,**

*Secretary of the Commission.*

### Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget (OMB) Review

**AGENCY:** U.S. Nuclear Regulatory Commission (NRC).

**ACTION:** Notice of the Office of Management and Budget (OMB) review of information collection.

**SUMMARY:** The U.S. Nuclear Regulatory Commission has recently submitted to the OMB for review the following for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*1. Type of submission, new, revision, or extension:* Extension.

*2. The title of the information collection:* 10 CFR Part 21, "Reporting of Defects and Noncompliance."

*3. The form number if applicable:* N/A.

*4. How often the collection is required:* As necessary in order to maintain the NRC informed of defects and noncompliances that may create a substantial safety hazard at facilities or activities licensed by the NRC.

*5. Who will be required or asked to report:* All directors and responsible officers of firms and organizations building, operating, or owning NRC licensed facilities as well as directors and responsible officers of firms and organizations supplying safety-related components and safety-related design, testing, inspection, and consulting services to NRC licensed facilities or activities.

*6. An estimate of the number of responses:* 300 annually.

*7. An estimate of the average burden hours per response:* 81 hours.

*8. An estimate of the total number of hours needed to complete the requirement or request:* 27,988 hours (300 reports at an average of 81 hours per response).

*9. An indication of whether section 3504 (h), Pub. L. 9696-511 applies:* Not applicable.

*10. Abstract:* 10 CFR Part 21 implements section 206 of the Energy Reorganization Act of 1974, as amended. It requires directors and responsible officers of firms and organizations building, operating, owning, or supplying safety-related components to NRC licensed facilities or activities to report defects and noncompliances that could create a substantial safety hazard at NRC licensed facilities or activities. Organizations subject to 10 CFR Part 21 are also required to maintain such records as may be required to assure compliance with this regulation.

**ADDRESSES:** Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street NW., Washington, DC 20555.

**FOR FURTHER INFORMATION:** Comments and questions should be directed to the OMB reviewer, Nicolas B. Garcia, Paperwork Reduction Project (3150-0035), Office of Management and Budget, Washington, DC 20503. Comments can also be submitted by telephone (202) 395-3084.

NRC Clearance Officer is Brenda J. Shelton, (301) 492-8132.

Dated at Bethesda, Maryland, this 24th day of February 1989.

For the Nuclear Regulatory Commission.

**Joyce A. Amenta,**

*Designated Senior Official for Information Resources Management.*

[FR Doc. 89-4982 Filed 3-2-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-344]

### Portland General Electric Co. Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-1

VOL
54
ISS
41
MR
3
1989
UMI

issued to Portland General Electric Company (the licensee), for operation of the Trojan Nuclear Plant, located in Columbia County, Oregon. The request for amendment was submitted by letter dated September 9, 1988.

The proposed amendment would revise the pressurizer low-pressure safety injection setpoint from greater than or equal to 1765 psig to greater than or equal to 1807 psig. The licensee states that this new setpoint is necessary to accommodate a change to a different transmitter design used to measure narrow-range pressurizer pressure. The related allowable value would be changed from 1755 psig to 1799 psig. The proposed changes would modify Table 3.3–4, Engineered Safety Features Actuation System Instrumentation Trip Setpoints," of the technical specifications for Trojan.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 3, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license, and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules and Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board Panel will rule on the request and/or petition, and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene must set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. A person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555 by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call of Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to George W. Kinghton: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Leonard A. Girard, Esq., Portland General Electric Company, 121 SW. Salmon Street, Portland, Oregon 97204, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714 (a)(1)(i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555, and at the Portland State University Library, 731 SW. Harrison Street, Portland, Oregon 97207.

Dated at Rovkville, Maryland, this 22nd day of February 1989.

For the Nuclear Regulatory Commission.

**George W. Knighton,**

*Director Project Directorate V Division of Reactor Projects—III, IV, V and Special Projects Office of Nuclear Reactor Regulation.*

BILLING CODE 7590-01-M

## OFFICE OF MANAGEMENT AND BUDGET

### Federal Procurement Policy Office

### Issuance of Policy Guidance on the Buy American Act of 1988

**AGENCY:** Office of Federal Procurement Policy, OMB.

**ACTION:** Notice of Issuance of Policy Guidance on the Buy American Act of 1988.

#### Background

The Buy American Act (the Act) was enacted in 1933 to ensure that Federal agencies gave domestic products priority in purchasing decisions. Over the years the determination of what constitutes a domestic unmanufactured product has been based simply on the geographic origin of the product. Determining what constitutes a domestic manufactured product has been more difficult, however, and has ultimately come to be based on where the final manufacturing occurred and where the cost of mining, producing, or manufacturing the components of such a product was incurred. Depending on the method of acquisition and the agency involved, domestic products are given 6, 12, or 50 percent price evaluation preferences over foreign products in the award of Federal procurement contracts. Such price evaluation preferences are waived under certain conditions for signatory countries of the GATT Agreement on Government Procurement (the Agreement) and they do not apply to procurements conducted in accordance with Defense Department Memoranda of Understanding.

In 1988, the Act was amended by several sections of Title VII of Pub. L. 100–418 to include provisions prohibiting Federal agencies from purchasing products and services from individuals or organizations of (1) countries that signed but have not abided by the Agreement; (2) countries that signed and have abided by the Agreement, but which discriminate against U.S. products and services not covered by the Agreement in their government procurements (Note: The prohibition here only covers products and services not covered by the Agreement); and (3) countries that have not signed the Agreement and which discriminate against U.S. products and services in their government procurements. To fall into these latter two categories, the country's services and products must be acquired in significant amounts by the U.S. Government and it must maintain, in its government procurements, a significant and persistent pattern or practice of discrimination against U.S. products which results in identifiable harm to U.S. businesses. Identification of countries that are determined to discriminate within the meaning of the Act will be made no later than April 30, 1990. Enactment of these provisions marks the first time that the Act proscribes as well as prescribes Federal agency behavior and pertains to services as well as products.

In bringing services in the above described circumstances within the purview of the Act, the 1988 amendments also provided a rule for determining what constitutes foreign constuction services. They did not, however, define "construction services." Nor did they define "services other than construction services". The Administrator for Federal Procurement Policy was given the task of developing policy guidance on determining whether a contractor or subcontractor is a citizen or national of a foreign country or is owned or controlled directly or indirectly by citizens or nationals of a foreign country, for the purposes of the Act. The policy guidance is required to be issued not later than February 19, 1989 (i.e., 180 days after enactment of Public Law 100–418).

The Administrator therefore convened a public hearing on December 15, 1988. At this hearing, two witnesses presented views, ideas, and suggestions on the proposed policy guidance. Written statements of four others who were unable to speak at this public hearing were submitted for inclusion in the record.

Most comments focused on ways in which the illustrative list of what constitutes a "service other than a construction service" might be improved. As a result of these suggestions, several changes were made in the policy guidance. In addition, several of the commentators suggested that, as a matter of trade policy, it would be preferable to craft an exception to the proposed guidance on ownership or control where the foreign contractor or subcontractor would employ a majority of U.S. workers in the performance of the contract. It was concluded that, although the citizenship or nationality of a contractor's workers may be one of the factors considered in determining whether an exception to the statutory restrictions should be granted under sections 4(c) of 4(d) of the Act, it could not properly be used as a basis for determining that a contractor is not foreign owned or controlled and thus not subject to the Act at all.

After careful consideration of all comments duly received, the following policy guidance is hereby issued to Federal departments and agencies by the Office of Federal Procurement Policy.

#### Policy Guidance

1. *Question*—Do the amendments made to the Buy American Act of 1933 (the Act) by Section 7002 of Pub. L. 100–418 require Federal agencies to give preferences to domestic services in procurements?

*Answer*—No, the amendments made to the Act by Section 7002 of Pub. L. 100–418 do not extend the preferential purchase requirements of the Act to services. Instead, the amendments prohibit Federal agencies from procuring services as well as products from individuals or organizations of (1) countries that signed but have not abided by the Gatt Agreement on Government Procurement (the Agreement); (2) countries that signed and have abided by the Agreement, but which discriminate against U.S. products and services not covered by the Agreement in their government procurements. (Note: The prohibition here only covers products and services not covered by the Agreement); and (3) countries that have not signed the Agreement and which have been identified by the U.S. Trade Representative in the annual report on foreign discrimination pursuant to section 7003(d)(2)(C) of Pub. L. 100–418 and determined by the President to be subject to sanctions because of discrimination against U.S. products and services in their government procurements. To fall into categories 2 and 3 above, the country's services and products must be acquired in significant amounts by the U.S. Government and it must maintain, in its government procurements, a significant and persistent pattern or practice of discrimination against U.S. products which results in identifiable harm to U.S. businesses. Identification of countries within all three categories above is to be made annually no later than April 30 beginning in 1990. In summary, the Act as amended prohibits Federal agencies under certain conditions from procuring either services or products from individuals or organizations of countries subject to sanctions for discriminating against U.S. products and services in making their government procurements.

2. *Question*—Are there exceptions to the prohibitions on the procurement of services set forth in Section 7002 of Pub. L. 100–418?

*Answer*—Yes, the prohibitions do not apply to: (1) services procured and used outside the United States and its territories; and (2) services of least developed countries. Also, the President or the head of a Federal agency may exempt procurements from these prohibitions upon a determination that such action is necessary in the public interest, or to ensure adequate competition.

3. *Question*—When do the prohibitions on procurement by Federal agencies of services from individuals or organizations of specified countries go into effect?

*Answer*—The prohibitions on the procurement of services by Federal agencies from individuals or organizations of specified countries will not take effect until 60 days after the first annual report mandated by Section 7003 of Pub. L. 100–418 is submitted to Congress. This annually produced report will list the countries that discriminate against U.S. products and services in making their government procurements. For some specified countries that are signatories of the Gatt Agreement on Government Procurement, prohibitions imposed by the President would go into

VOL 54 ISS 41 MR 3 1989 UMI

effect only after dispute resolution procedures had failed to produce a settlement within one year of their initiation.

4. *Question*—Do the prohibitions on the procurement of services from individuals or organizations of specified countries apply to grants? Do the prohibitions apply to contracts awarded by grantees using grant funds?

*Answer*—No, the prohibitions pertain only to services provided by contractor and subcontractors under procurement contracts. They do not pertain to services provided by grantees, contractors, or subcontractors using grant funds.

5. *Question*—What constitute "construction services" for purposes of implementing the Act as amended by Section 7002 of Pub. L. 100-418?

*Answer*—"construction services" means construction, alteration, or repair as defined in Subpart 22.4 of the Federal Acquisition Regulation (FAR), 48 CFR 1, 22.41. "construction services" do not include services provided incidental to the supply of a product, provided that the value of the incidental services does not exceed the value of the product being delivered.

6. *Question*—What constitute "foreign" construction services under the provisions of the Act as amended by Section 7002 of Pub. L. 100-418?

*Answer*—"Foreign" construction services are those services described in the answer to Question 5 above that are provided by an individual acting as a contractor or subcontractor who is a citizen or national of a country subject to sanctions, or an organization acting as a contractor or subcontractor where—

(A) 50 percent or more of the voting stock is owned by one or more citizens or nationals of a country subject to sanctions;

(B) The title to 50 percent or more of the stock is held subject to trust or fiduciary obligations in favor of one or more citizens or nationals of a country subject to sanctions;

(C) 50 percent or more of the voting stock is vested in or exercisable on behalf of one or more citizens or nationals of a country subject to sanctions;

(D) In the case of a corporation—

(i) The number of its directors necessary to constitute a quorum are citizens or nationals of a country subject to sanctions; or

(ii) The corporation is organized under the laws of a country or any subdivision, territory, or possession thereof that is subject to sanctions; or

(E) In the case of an individual or organization who is a participant in a joint venture or a member of a partnership, any participant of the joint venture or partner meets any of the criteria in subparagraphs (A) through (D) of this paragraph.

7. *Question*—What constitute "services other than construction services" for purposes of implementing the Act as amended by section 7002 of Pub. L. 100-418?

*Answer*—"Services other than construction services" include all services other than those described in the answer to Question 5 above where work is performed by manual, clerical, technical, or professional labor whose primary purpose is to perform an identifiable task rather than to furnish an end item of supply. This includes, but is not limited to, the following:

1. Research and development (R&D) as defined in the Federal Procurement Data System Product and Service Codes, Section I, Part A;
2. Special studies and analyses—Not R&D;
3. Architect and Engineering Services;
4. Surveying and mapping services;
5. Automatic data processing and telecommunication services;
6. Brokering and appraising services;
7. Natural resources and conservation services;
8. Environmental systems protection;
9. Social services;
10. Quality control, testing, and inspection services;
11. Maintenance, repair, and rebuilding of equipment;
12. Modification of equipment;
13. Technical representative services;
14. Operation of government-owned facilities;
15. Installation of equipment;
16. Salvage service;
17. Medical service;
18. Legal service;
19. Professional, administrative, and management services;
20. Utilities and housekeeping services;
21. Photographic, printing, and publication services;
22. Education and training services;
23. Transportation, travel, and relocation services;

Further subject matter examples of "services other than construction services" also include:

24. Services covered by the Service Contract Act as determined by the U.S. Department of Labor (see 29 CFR 4.130);
25. Advisory and assistance services as defined in OMB Circular A-120; and
26. Federal information processing services and federal information processing support services as defined in the notice of proposed rulemaking that would amend Part 201-2 of the Federal Information Resources Management Regulation (see 53 FR 32085, August 23, 1988).

"Services other than construction services" do not include services provided incidental to the supply of a product, provided that the value of the incidental services does not exceed the value of the product being delivered.

8. *Question*—What constitute "foreign" services other than construction services for purposes of implementing the Act as amended by section 7002 of Pub. L. 100-418?

*Answer*—"Foreign" services other than construction services are those services described in the answer to Question 7 above that are provided by an individual acting as a contractor or subcontractor who is a citizen or national of a country subject to sanctions, or an organization acting as a contractor or subcontractor where—

(A) 50 percent or more of the voting stock is owned by one or more citizens or nationals of a country subject to sanctions;

(B) The title to 50 percent or more of the stock is held subject to trust or fiduciary obligations in favor of one or more citizens or nationals of a country subject of sanctions;

(C) 50 percent or more of the voting stock is vested in or exercisable on behalf of one or more citizens or nationals of a country subject to sanctions;

(D) In the case of a corporation—

(i) The number of its directors necessary to constitute a quorum are citizens or nationals of a country subject to sanctions; or

(ii) The corporation is organized under the laws of a country or any subdivision, territory, or possession thereof that is subject to sanctions; or

(E) In the case of an individual or organization who is a participant in a joint venture or a member of a partnership, any participant of the joint venture or partner meets any of the criteria in subparagraphs (A) through (D) of this paragraph.

9. *Question*—Are Federal agencies prohibited from procuring services from all foreign countries?

*Answer*—No, Federal agencies are only prohibited from procuring services and products from individuals or organizations of "foreign" countries that have been specifically identified by the U.S. Trade Representative in the annual report on foreign discrimination and determined by the President to be subject to sanctions (See answer to Question 1). The President may decide to modify or restrict the application of the prohibitions pursuant to section 7003(g)(2) of Pub. L. 100-418.

10. *Question*—How long are the provisions of Title VII of Pub. L. 100-418 in effect?

*Answer*—The provisions of Title VII of Pub. L. 100-418 are in effect until April 30, 1996.

**Allan V. Burman,**

*Deputy Administrator and Acting Administrator.*

## PHYSICIAN PAYMENT REVIEW COMMISSION

### Commission Meeting

**AGENCY:** Physician Payment Review Commission.

**ACTION:** Notice of public meeting.

**SUMMARY:** The Physician Payment Review Commission will hold a public meeting on Thursday, March 9, 1989, from 9:00 a.m. to 5:30 p.m. and on Friday, March 10, 1989, beginning at 8:30 a.m. The meeting will be held at the Dupont Plaza Hotel, 1500 New Hampshire Avenue NW. (at Dupont Circle), in the Embassy Hall (A). The agenda for the meeting will be devoted to developing the recommendations to be included in the Commission's upcoming report to Congress.

**ADDRESS:** The Commission office is located in Suite 510, 2120 L Street NW., Washington, DC. The telephone number is 202/653-7220.

**FOR FURTHER INFORMATION CONTACT:** Lauren LeRoy, Deputy Director, 202/653-7220.

**Paul B. Ginsburg,**

*Executive Director.*

## SECURITIES AND EXCHANGE COMMISSION

**[Release No. 34-26573; File No. SR-CBOE-87-22 Amendment No. 2]**

### Self-Regulatory Organizations; Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating to Eligibility Requirements for Participation on RAES in OEX

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on Feb. 2, 1989, the Chicago Board Options Exchange, Inc. filed with the Securities and Exchange Commission Amendment No. 2 to the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change form interested persons.

**I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change**

The following describes eligibility criteria for individuals and groups to participate as contra-brokers on RAES in options on the Standard & Poor's 100 Index ("OEX") for a six month pilot program:

RAES Eligibility [for Individuals and Groups]—OEX

*A. Individuals*

1. Any Exchange member who is registered as a market maker, who has signed the RAES Participation Agreement applicable to individuals, and who has completed the RAES instructional program is eligible to sign onto RAES, so long as the member meets the OEX/SPX market-maker requirements set forth in A(6) below.

2. The market maker must log onto the system using his own acronym and individual password. All RAES trades to which the market maker is a party will be assigned to and will clear into his market maker account.

3. Once a market maker logs onto RAES, he becomes obligated to sign-on to RAES on the next Friday prior to expiration, to the extent that he is in the OEX pit on that day. If he wishes, a market-maker may avail himself of the automatic sign-on feature that will be in place for groups. *See* B(4) and C(4) below.

4. A member's failure to meet his RAES obligations will disqualify him from signing onto RAES for such time period as the Index Floor Procedure Committee ("IFPC") determines. Prospectively, a member may apply to the IFPC to be relieved of RAES obligations. In deciding such applications, IFPC may condition the granting of relief from obligations with imposition of time periods during which the applicant is not eligible to participate in RAES.

5. An individual member who is logged onto RAES may log off the system whenever he leaves the trading crowd.

6. RAES participation in OEX is limited to OEX/SPX market makers. To qualify, a market maker must: (a) Be approved under Exchange rules as a market maker with a letter of guarantee, (b) maintain his [principle] principal business on the CBOE as a market maker, (c) execute fifty percent of his market maker contracts for the preceding quarter in OEX or SPX, and (d) execute twenty-five percent of his market maker trades for the preceding quarter in OEX or SPX in person. SPX includes NSX. In making these calculations, RAES trades will not be considered. *Members currently using OEX RAES will be given a period of at least two months but no more than three months from the effective date of the rule to meet the standards as described above. It is probable that the final implementation date will be the Monday following expiration.*

*B. Joint Accounts*

1. Exchange-approved joint accounts [1] may use RAES once all the members of the joint account have executed the RAES Participation Agreement applicable to joint accounts and have satisfactorily completed the RAES instructional program. Thereafter, the members of the joint account may use RAES only as members of such account, and not as individuals or nominees of a member organization. No member or member organization may participate directly or indirectly in more than one joint account. Members of the joint account will be jointly and severally liable for each of the joint account's trades. Members of joint accounts must all have letters of guarantee from the clearing firm in which the trades will clear. Members of joint accounts must each meet the OEX/SPX market-maker obligations set forth in A(6), above.

2. Any member of the joint account may log the other members of the joint account onto RAES, using their individual acronyms and passwords. The system already will have been programmed to recognize that all such members are trading "for the account of" [2] the joint account. The trades of each joint account member will be assigned to and will clear into the joint account.

3. Whenever any member of the joint account is logged onto RAES, all account members must be. Once the joint account has been logged onto RAES by one of the account's members, all members of the joint account will

[1] To establish a joint account, members must submit an application to the Membership Department and furnish any additional information requested by the Surveillance and/or Financial Compliance Departments. *See generally* Exchange Rule 8.9(c) and the Interpretation and Policies thereunder.

[2] The joint account will incur the usual trade match and processing fees for each RAES trade executed "for the account of" the joint account.

VOL 54 ISS 41 MR 3 1989 UMI

automatically remain on the system until the next monthly expiration.

4. Unlike members trading on RAES for their own individual accounts, members of a joint account will not be able to log off RAES at will during a trading day. The system itself will log the joint account off after the close of trading on the last business day before the next expiration.

5. To obtain relief from the obligations set forth in paragraphs 3 and 4 above, and/or to reduce the number of participants in the joint account, a representative of the joint account must make application to the IFPC. The IFPC may, in its sole discretion, condition the granting of relief from the obligations with imposition of time periods during which applicants (including all members of the joint account) for relief will be precluded from participating in the RAES system.

6. The IFPC may bar, restrict or condition a joint account's participation in RAES if any member thereof fails to meet the OEX/SPX market-maker requirements.

*7. The IFPC will determine the sign off fee which shall be at least $500.00 per member, to be paid whenever a member of the joint account has failed to adhere to the provisions of paragraphs 3 or 4 above by signing off RAES.*

*C. Member Organizations with Multiple Nominees*

1. A member organization with multiple market maker/nominees on the floor may arrange to have the RAES trades of all its nominees assigned to a single market maker account, provided that an officer of the firm and the firm's participating nominees have first executed the RAES Participation Agreement applicable to firms and have satisfactorily completed the RAES instructional program. Thereafter, each of the participating nominees will be able to trade through RAES only in the manner described below, and not as a member of a joint account or as an individual. Each eligible nominee must meet the OEX/SPX market-maker requirements. Members of a multiple nominee RAES account may only participate in that one account and may not participate directly or indirectly in any other RAES account, nor may a member organization participate directly or indirectly in more than one account in RAES in OEX.

2. Any of the organization's nominees may log all such nominees onto the RAES system, using their acronyms and passwords. As with joint accounts, the system will have been programmed to treat such nominees' RAES trades as trades "for the account of" the designated nominee.[3] Any of the nominees may log onto RAES on behalf of the other nominees. All RAES trades will clear into the account of the designated nominee.

3. Whenever any of the participating nominees is logged onto the system, all must be.

4. Like a joint account, once a group consisting of nominees of a member organization logs onto the system, it will automatically be logged onto the system until the next monthly expiration. The system will log the account off after the close of trading on the last business day before the next expiration.

5. To obtain relief from the obligations set forth in 2, 3 and 4 above, and/or to reduce the number of its participating nominees, a member organization must make application to the IFPC. The IFPC may, in its sole discretion, condition the granting of relief from the obligations with imposition of time periods during which applicants (including all nominees of the member organization) for relief will be precluded from participating in the RAES system.

6. The IFPC may bar, restrict or condition a member organization's participation in RAES if any nominee thereof on RAES in OEX fails to meet the OEX/SPX market-maker requirements.

*7. The IFPC will determine the sign off fee which shall be at least $500.00 per member, to be paid whenever a nominee has failed to adhere to the provisions of paragraphs 3 or 4 above by signing off RAES.*

*D. Authority to Disapprove*

1. No person or entity may participate directly or indirectly in RAES, or share in the profits, directly or indirectly, with more than one RAES group, which may not exceed the maximum number of RAES participants set by the IFPC from time to time. In no event may IFPC set a maximum number higher than 50 RAES participants or 25% of the average number of RAES participants for the prior quarter, whichever is smaller. The IFPC will give groups one month notice if a reduction in group size becomes necessary due to application of this size limit. The IFPC reserves the authority to establish lower limits on the size of groups eligible to use RAES. Such limits may be imposed by the Committee at any time.

2. The IFPC also retains the right to disallow any group from participating in RAES where it appears to the Committee that such group:

a. Has "purchased" RAES rights from members of the group;

b. Does not afford each group participant a reasonable participation in profits and losses (as a guideline: no RAES participant may receive a flat fee, and a minimum participation level of any group member is ¼ of equal distribution to all group members, with responsibility for losses equivalent to share of profits); [4]

c. Is managed by a person who is not a member of the group; or

d. Is managed by a person who has a financial interest in another group.

*E. Authority to Require RAES Participation*

*1. Notwithstanding the limitatins in paragraph A–6 (c) and (d), if there is inadequate RAES participation in OEX, the Exchange's IFPC may require market-makers who are members of the trading crowd, as defined in Rule 8.50 to log on to RAES absent reasonable justification or excuse for non-participation. If there continues to be inadequate RAES participation, the IFPC may request participation of all market-makers whether or not they are members of the OEX crowd.*

*2. Members who fail to abide by the foregoing eligibility provision and requirements may be subjet to disciplinary action under, among others, Rule 6.20 and Chapter XVII of the Exchange Rules. Such failure may also be the subject of remedial action by the IFPC, including, but not limited, to suspending a member's eligibility for participation on RAES and such other remedies as may be appropriate and allowed under Chapter VIII of the Exchange Rules.*

**II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections (A), (B), and (C) below.

[3] The designated nominee will incur the usual trade match and processing fees for all RAES trades executed "for the account of" such nominee.

[4] For example, if there are ten group participants, a minimum participation level would be a 2.5% share in profits and losses.

*(A) Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change*

The additions to the prior amendment reflect two additional powers given to the Exchanges' Index Floor Procedure Committee ("IFPC"). The first allows the IFPC to determine the sign off fee to be paid by members who fail to adhere to the RAES participation requirements by improperly signing off the system. The IFPC also has the power, whenever it deems participation to be inadequate, to require all members of the trading crowd to participate on RAES and, if necessary, to request that members from other trading crowds participate by signing on RAES. As such, the Exchange believes the system will be available to the public during all market conditions.

The other addition to the prior amendment provides for an implementation period of between 60 and 90 days for members currently on RAES to satisfy and become qualified to participate on RAES as detailed in paragraph A–6. The Exchange believes by enacting this gradual phase in period, no unnecessary burdens will be imposed on members or the public by drastically decreasing the number of member participants using RAES. In fact, recent statistics show that if the eligibility standards were enacted using trading data from the last quarter of 1988, only 192 out of the 449 RAES participants would be affected, thus leaving 257 members on RAES. Regarding customer usage of OEX RAES, current statistics reveal that 7% of the OEX customer volume and 25% of the OEX customer orders are transacted via RAES.

The Exchange believes that this amendment to the proposed rule change is consistent with the provisions of the Exchange Act and the rules and regulations thereunder, in particular, section 6(b)(5) thereof, in that the proposed rule change is designed to promote just and equitable principles of trade and are not designed to regulate by virtue of any authority conferred by this title matters not related to the purposes of this title or the administration of the Exchange.

*(B) Self-Regulatory Organization's Statement on Burden on Competition*

This proposed rule change will not impose a burden on competition.

*(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others*

Comments were neither solicited nor received.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and published its reasons forso finding or (ii) as to which the self-regulatory organization consents, the commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inpsection and copying the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by insert date March 24, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 24, 1989.

**Jonathan G. Katz,**

*Secretary.*

## DEPARTMENT OF STATE

**[CM–8/1268]**

### Legal Panel on International Telecommunications Law of the U.S. Organization for the International Telegraph And Telephone Consultative Committee and International Radio Consultative Committee; Meeting

The Department of State announces the fifth meeting of the Panel on International Telecommunications Law, which is under the auspices and authority of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) and International Radio Consultative Committee (CCIR). The Panel's meeting will convene on Wednesday, March 17, 1989 in Room 1205, Department of State, 2201 C. Street NW., Washington, DC.

The meeting is scheduled for 1:30 to 4 p.m. and the draft agenda is as follows:

1. Report of Panel Activities
2. Briefings on ITU Plenipotentiary Conference Issues
3. Consideration of Future Panel Activities

Members of the general public may attend the meeting and join in the discussion. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Prior to the meeting, persons who plan to attend should so advise the office of the Deputy U.S. Coordinator for International Communications and Information Policy, Mr. Parker Borg, State Department, Washington, DC; telephone (202) 647–5889. All attendees must use the C entrance to the building.

**[Delegation Order No. 97]**

### Delegation of Authority

**AGENCY:** Internal Revenue Service, Treasury.

**ACTION:** Delegation of Authority.

**SUMMARY:** Delegation Order 97 is revised to delegate to the Assistant Commissioner (International) the authority to act as the Competent Authority under the tax conventions of the United States. The text of the delegation order appears below.

**EFFECTIVE DATE:** March 2, 1989.

**FOR FURTHER INFORMATION CONTACT:** Richard Rio, Office of Tax Treaty and Technical Services, IN:T:3, P.O. Box 44374, Washington, DC 20026-4374, telephone 202-287-4752 (not a toll-free call).

**Order No. 97(Rev. 28)**

Effective date: March 2, 1989.

### Closing Agreements Concerning Internal Revenue Tax Liability

[Amended and Supplemented by Delegation Order No. 225]

Pursuant to authority granted to the Commissioner of Internal Revenue by 26 CFR 301.7121-1(a); Treasury Order No. 150-07; Treasury Order No. 150-09; and Treasury Order No. 150-17, subject to the transfer of authority covered in Treasury Order No. 120-01, as modified by Treasury Order No 150-27, as revised, this authority is hereinafter delegated.

1. The Chief Counsel is hereby authorized in cases under his/her jurisdiction to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whome he/she acts) in respect to any prospective transactions or completed transactions if the request to the Chief Counsel for determination or ruling was made before any affected returns have been filed.

2. The Associates Chief Counsel, and the Assistant Commissioners (Examination) and (International) are hereby authorized to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whom he/she acts) for a taxable period or periods ended prior to the date of agreement and related specific items affecting other taxable periods. The Assistant Commissioner (International) is also authorized to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or state for whom he/she acts) with respect to the performance of his/her functions as the competent authority under the tax conventions of the United States.

3. The Assistant Commissioner (Employee Plans and Exempt Organizations) is hereby authorized to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whom he/she acts) in cases under his/her jurisdiction, that is, in respect of any transaction concerning employee plans or exempt organizations.

4. The Assistant Commissioner (International); Regional Commissioners; Regional Counsel; Assistant Regional Commissioners (Examination); Service Center Directors; District Directors; Chiefs and Associate Chiefs of Appeals Offices; and Appeals Team Chiefs with respect to his/her team cases, are hereby authorized in cases under their jurisdiction (but excluding cases docketed before the United States Tax Court) to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whom he/she acts) for a taxable period or periods ended prior to the date of agreement and related specific items affecting other taxable periods.

5. The Associates Chief Counsel; the Assistant Commissioners (Employee Plans and Exempt Organizations) and (International); Regional Commissioners; Regional Counsel; Chiefs and Associates Chiefs of Appeals Offices; and Appeals Team Chiefs with respect to his/her team cases, are hereby authorized in cases under their jurisdiction docketed in the United States Tax Court and in other Tax Court cases upon the request of Chief Counsel or his/her delegate to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whom he/she acts) but only in respect to related specific items affecting other taxable periods.

6. The Assistant Commissioner (International) is hereby authorized to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whom he/she acts) in cases under his/her jurisdiction, and to provide for the mitigation of economic double taxation udner section 3 of Revenue Procedure 64-54, C.B. 1964-2, 1008, under Revenue Procedure 72-22, C.B. 1972-1, 747, and under Revenue Procedure 69-13, C.B. 1969-1, 402, and to enter into and approve a written agreement providing the treatment available under Revenue Procedure 65-17, C.B. 1965-1, 833.

7. The authority delegated herein does not include the authority to set aside any closing agreement.

8. Authority delegated in this Order may not be redelegated, except that the Chief Counsel may redelegate the authority contained in paragraph 1 to the Associates Chief Counsel, the Deputy Associate Chief Counsel (International), and to the technical advisors on the staff of the Associate Chief Counsel (Technical and International) for cases that do not involve precedent issues; the Assistant Commissioners (Examination) and (International) may redelegate the authority contained in paragraph 2 of this order to the Deputy Assistant Commissioners (Examination) and (International); the Deputies Chief Counsel may redelegate the authority in paragraph 2 of this Order but not lower than the Deputies Associate Chief Counsel; and the Assistant Commissioner (Employee Plans and Exempt Organizations) may redelegate the authority contained in paragraph 3 of this Order to the Deputy Assistant Commissioner (Employee Plans and Exempt Organizations) and to the Technical Advisors on the Staff of the Assistant Commissioner (Employee Plans and Exempt Organizations) for cases that do not involve precedent issues; Service Center Directors and Director, Austin Compliance Center may redelegate the authority contained in paragraph 4 of this Order but not below the Chief, Examination Support Unit with respect to agreements concerning the administrative disposition of certain tax shelter cases; and not below the Chief, Windfall Profit Tax Staff, Austin Service Center or Austin Compliance Center with respect to entering into and approving a written agreement with the Tax Matters Partner/Person (TMP) and one or more partners or shareholders with respect to whether the partnership or S corporation, acting through its TMP, is duly authorized to act on behalf of the partners or shareholders in the determination of partnership or S corporation items for purposes of the tax imposed by Chapter 45, and for purposes of assessment and collection of the windfall profit tax for such partnership or S corporation taxable year. The Assistant Commissioner (International) and District Directors may redelegate the authority contained in paragraph 4 of this Order but not below the Chief, Quality Review Staff/Section with respect to all matters, and not below the Chief, Examination Support Staff/Section, or Chief, Planning and Special Programs Branch/Section, with respect to agreements concerning the administrative disposition of certain tax shelter cases, or Chief, Special Procedures function, with respect to the waiver of right to claim refunds for those responsible officers who pay the corporate liability in lieu of a 100-percent penalty assessment under IRC 6672. To the extent that the authority previously exercised consistent with this Order may require ratification, it is hereby affirmed and ratified.

9. Delegation Order No. 97 (Rev. 27), effective October 31, 1987, is hereby superseded.

Approved:

**Charles H. Brennan,**

*Deputy Commissioner (Operations).*

Date: February 14, 1989.

# Sunshine Act Meetings

Federal Register
Vol. 54, No. 41
Friday, March 3, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

**COMMODITY FUTURES TRADING COMMISSION**

TIME AND DATE: 10:00 a.m., Tuesday, March 21, 1989.

**PLACE:** 2033 K St. NW., Washington, DC 8th Floor Hearing Room.

**STATUS:** Closed.

**MATTERS TO BE CONSIDERED:** Enforcement matters.

**CONTACT PERSON FOR MORE INFORMATION:** Jean A. Webb, 254-6314.

Jean A. Webb,
*Secretary of the Commission.*

[FR Doc. 89-5095 Filed 3-1-89 12:35 pm]

BILLING CODE 6351-01-M

**FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION**

February 27, 1989

**TIME AND DATE:** 10:00 a.m., Wednesday, March 1, 1989.

**PLACE:** Room 600, 1730 K Street, NW., Washington, DC.

**STATUS:** Open.

**MATTERS TO BE CONSIDERED:** The Commission will hear oral argument on the following:

1. *Florence Mining Company, Inc.*, Docket No. PENN 88-287-R. (Issues include whether the administrative law judge erred in concluding that the operator violated 30 CFR 75.1704, a mandatory safety standard dealing with escapeways and escape facilities.)

Any person intending to attend this hearing who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 29 CFR 2706.150(a)(3) and 2706.160(d).

**TIME AND DATE:** Immediately following oral argument.

**STATUS:** Closed (Pursuant to 5 U.S.C. 552b(c)(10))

**MATTERS TO BE CONSIDERED:** The Commission will consider the following:

1. *Florence Mining Company, Inc.*, Docket No. PENN 88-287-R. (See above)
2. *Westwood Energy properties*, Docket Nos. PENN 88-42-R, etc. (Issues include consideration of the operator's Petition for Discretionary Review.)

It was determined by a unanimous vote of Commissioners that these issues be considered in closed session and that no earlier announcement of the meeting was possible.

**CONTACT PERSON FOR MORE INFO:** Jean Ellen, (202) 653-5629/(202) 566-2673 for TDD Relay.

Jean M. Ellen,
*Agenda Clerk.*

**NATIONAL MEDIATION BOARD**

**TIME AND DATE:** 2:00 p.m., Wednesday, March 8, 1989.

**PLACE:** Board Hearing Room 8th Floor, 1425 K. Street, NW., Washington, DC.

**STATUS:** Open.

**MATTERS TO BE CONSIDERED:**

1. Ratification of the Board actions taken by notation voting during February 1989.
2. Other priority matters which may come before the Board for which notice will be given at the earliest practicable time.

**SUPPLEMENTARY INFORMATION:** Copies of the monthly report of the Board's notation voting actions will be available from the Executive Director's office following the meeting.

**CONTACT PERSON FOR MORE INFORMATION:** Mr. Charles R. Barnes, Executive Director, Tel: (202) 523-5920.

Date of Notice: February 28, 1989.

**William A. Gill,**
*Assistant Executive Director, National Mediation Board.*

[FR Doc. 89-5122 Filed 3-1-89; 3:46 pm]

BILLING CODE 7550-01-M

**NATIONAL SCIENCE BOARD**

**DATE AND TIME:** March 17, 1989—
8:30 a.m. Closed Session
9:00 a.m. Open Session

**PLACE:** National Science Foundation, 1800 G Street, NW., Room 540, Washington, DC 20550.

**STATUS:**

Most of this meeting will be open to the public.
Part of this meeting will be closed to the public.

**MATTERS TO BE CONSIDERED MARCH 17:**

*Closed Session (8:30 a.m. to 9:00 a.m.)*

1. Minutes—February 1989 Meeting
2. NSB and NSF Staff Nominees
3. Alan T. Waterman Award
4. Grants and Contracts

*Open Session (9:00 a.m. to 11:30 a.m.)*

5. Chairman's Report
6. Minutes—February 1989 Meeting
7. Director's Report: (a) Annual Report on NSF Use of Peer Review; (b) Report on National Science & Technology Week
8. Presentation by Dr. Shirley McBay: "Recruitment and Retention of Minorities, Women, and Persons with Disabilities into Science and Engineering Fields"
9. Other Business

**Thomas Ubois,**
*Executive Officer.*

# United States Sentencing Commission

**Sentencing Guidelines for United States Courts; Notice of Proposed Amendments and Additions; Hearing and Request for Public Comment**

VOL
54
ISS
41
MR
3
1989
UMI

**UNITED STATES SENTENCING COMMISSION**

**Sentencing Guidelines for United States Courts**

**AGENCY:** United States Sentencing Commission.

**ACTION:** Notice of proposed amendments and additions to sentencing guidelines, policy statements and commentary. Request for public comment. Notice of hearing.

**SUMMARY:** By vote of 6–0 on February 14, 1989, the Commission voted to promulgate and submit to the Congress as regular, permanent amendments the group of temporary amendments that took effect June 25, 1988. See 53 FR 15532–36 (April 29, 1988). The Commission is now considering a number of further amendments and additions to the sentencing guidelines, policy statements and commentary. These proposals, or a synopsis of issues to be addressed, are set forth below. The Commission may report these and other regular amendments to the Congress on or before May 1, 1989. Alternatively, or additionally, the Commission may elect to promulgate as temporary amendments certain of these proposals pertaining to changes in law enacted by the 100th Congress. Public comment is sought on all proposals, alternative proposals, and any other aspect of the sentencing guidelines, policy statements and commentary.

**DATES:** Public comment should be received by the Commission no later than April 14, 1989, in order for it to be considered by the Commission in the promulgation of the next set of regular amendments due to the Congress by May 1, 1989. The Commission plans to hold a public hearing on April 7, 1989 in the Ceremonial Courtroom of the United States Courthouse in Washington, DC, on these and any other proposed amendments.

**ADDRESS:** Comments should be sent to: United States Sentencing Commission, 1331 Pennsylvania Avenue, NW., Suite 1400, Washington, DC 20004, Attn: Public Comment.

**FOR FURTHER INFORMATION CONTACT:** Paul K. Martin, Communications Director, Telephone: (202) 662–8800.

**SUPPLEMENTARY INFORMATION:** The United States Sentencing Commission is an independent agency in the judicial branch of the U.S. Government. The Commission is empowered by 28 U.S.C. 994(a) to promulgate sentencing guidelines and policy statements for Federal sentencing courts. The statute further directs the Commission to periodically review and revise guidelines previously promulgated and authorizes it to submit guideline amendments to the Congress no later than the first day of May each year. See 28 U.S.C. 994 (o), (p).

Ordinarily, the Administrative Procedure Act rulemaking requirements are inapplicable to judicial agencies; however, 28 U.S.C. 994(x) makes the Administrative Procedure Act rulemaking provisions of 5 U.S.C. 553 applicable to the promulgation of sentencing guidelines by the Commission.

**Consideration of Promulgation of Certain Amendments as Temporary**

The Commission has limited authority under section 21(a) of the Sentencing Act of 1987 (Pub. L. 100–182, Dec. 7, 1987) to adopt temporary guidelines or amendments when the Congress creates new offenses or amends existing criminal statutes. A number of the amendments proposed below are in response to enactments of the 100th Congress, such as the Anti-Drug Abuse Act of 1988 (Pub. L. 100–690, Nov. 18, 1988). If the Commission elects to exercise its section 21(a) temporary guideline promulgation authority, it could put into effect some or all amendments implementing recently enacted legislation prior to the expiration of the 180-day period of Congressional review that applies to all regular amendments promulgated under 28 U.S.C. 994(p). If it follows that course of action, the Commission could simultaneously submit the amendments to the Congress as regular amendments. The Commission specifically invites comment on which, if any, of the proposals below should be promulgated as temporary guidelines under the authority of section 21(a) of the 1987 Sentencing Reform Act.

**Format of Proposed Amendments**

Proposed amendments are presented sequentially by section of the Guidelines Manual to which they pertain. A cross reference note is provided for amendments that affect more than one section of the Guidelines. Each amendment is followed by a statement explaining the reason for the amendment. For some proposals, additional explanatory material is provided immediately following the statement of purpose.

The proposed amendments are presented in three formats. First, the majority of the amendments are proposed as specific changes in a guideline, policy statement or commentary. Secondly, for some amendments the Commission has published alternative means of addressing an issue. Commentators are encouraged to state their preference among listed alternatives or to suggest a new alternative. Thirdly, the Commission has highlighted certain issues (generally relating to recently enacted legislation) and invites suggestions for specific amendment language. To help focus comment, one or more proposals are presented as examples for some of these issues.

**Amendments of Special Note**

The Commission has not attempted to categorize proposed amendments as substantive changes in policy or merely technical or clarifying in nature. Certain amendments, however, are in the Commission's opinion of particular significance in terms of their potential policy impact and/or because of the Commission's desire for public comment on identified issues, alternative proposals, or illustrative solutions. These amendments of special note are: 50 (Robbery), 96 (Continuing Criminal Enterprise), 119 (Fraud and Deceit), 243 (Career Offender), 247 (Chapter Five, Part A—Sentencing Table), and 260 (Home Detention).

**Availability of Supporting Data**

With respect to proposed amendment 50, pertaining to the guideline for robbery, amendment 119, pertaining to the guideline for certain fraud offenses, and amendment 243, pertaining to the "career offender" guidelines, the Commission is preparing reports summarizing and analyzing pertinent sentencing data. Prior to the April 7, 1989, public hearing, the Commission expects to have these reports available in preliminary form at its offices for review by interested persons.

**Scope of Public Comment**

While the amendments below are specifically proposed for public comment and possible submission to the Congress by May 1, 1989, the Commission emphasizes that it welcomes comment on any aspect of the sentencing guidelines, policy statements, and commentary, whether or not the subject of a proposed amendment. Pursuant to 28 U.S.C. 994(o), the Commission is directed to periodically "review and revise (the Guidelines), in consideration of comments and data coming to its attention." The same statutory provision further directs specific institutional representatives and groups within the Federal criminal justice system to submit to the Commission at least annually a written report that may suggest "changes in the guidelines that appear to be warranted." The Commission invites any of the institutional groups listed in section 994(o) who have not previously submitted a report to the Commission to make such a report in conjunction with this solicitation of public comment.

**Authority:** 28 U.S.C. 994 (a), (o), (p), (x); section 21(a) of the Sentencing Act of 1987 (Pub. L. 100–182).

**William W. Wilkins, Jr.,**
*Chairman.*

**Chapter One, Part A, Section 4(b) Departures**

1. *Proposed Amendment:* Chapter 1, Part A (4)(b) is amended in the first sentence by deleting "* * * that was" and inserting in lieu thereof "of a kind, or to a degree,".

*Reason for Amendment:* The purpose of this amendment is to conform the quotation to the statute, as amended by section 3 of the Sentencing Act of 1987.

2. *Proposed Amendment:* Chapter One, Part A, section 4(b) is amended in the second sentence of the last paragraph by deleting "Part H" and inserting in lieu thereof "Part K (Departures)", and in the third sentence of the last paragraph by deleting "Part H" and inserting in lieu thereof "Part K".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

3. *Proposed Amendment:* Chapter One, Part A, section 4(b) is amended in the first sentence of the fourth paragraph by deleting "three" and inserting in lieu thereof "two"; in the fourth paragraph by deleting: "The first kind, which will most frequently be used, is in effect an interpolation between two adjacent, numerically oriented guideline rules. A specific offense characteristic, for example, might require an increase of four levels for serious bodily injury but two levels for bodily injury. Rather than requiring a court to force middle instances into either the "serious" or the "simple" category, the guideline commentary suggests that the court may interpolate and select a midpoint increase of three levels. The Commission has decided to call such an interpolation a "departure" in light of the legal views that a guideline providing for a range of increases in offense levels may violate the statute's 25 percent rule (though other have presented contrary legal arguments). Since interpolations are technically departures, the courts will have to provide reasons for their selection, and it will be subject to review for "reasonableness" on appeal. The Commission believes, however, that a simple reference by the court to the "mid-category" nature of the facts will typically provide sufficient reason. It does not foresee serious practical problems arising out of the application of the appeal provisions to this form of departure."; in the first sentence of the fifth paragraph by deleting "second" and inserting in lieu thereof "first"; and, in the first sentence of the sixth paragraph by deleting "third" and inserting in lieu thereof "second".

*Reason for Amendment:* This amendment eliminates references to departure by interpolation from Chapter One of the Guidelines Manual. Related amendments: 17 (§ 2A2.1); 19 (§ 2A2.2); 25 (§ 2A3.1); 29 (§ 2A4.1); 51 (§ 2B3.1); 54 (§ 2B3.2); and 106 (§ 2E2.1).

*Additional Explanatory Statement:* The Commission has reviewed the discussion of interpolation in Chapter One, which has been read as describing "interpolation" as a departure from an offense level rather from the guideline range established after the determination of an offense level. The Commission concluded that it is simpler to add intermediate offense level adjustments to the guidelines in the cases where interpolation is most likely to be considered (i.e., degree of bodily injury). This amendment is not intended to preclude interpolation in other cases; where appropriate, the court will be able to achieve the same result by use of the regular departure provisions.

*§ 1B1.1 Application Instructions*

4. *Proposed Amendment:* Section 1B1.1(a) is amended by deleting "guideline section in Chapter Two most applicable to the statute of conviction" and inserting in lieu thereof "applicable offense guideline section from Chapter Two", and by deleting: "If more than one guideline is referenced for the particular statute, select the guideline most appropriate for the conduct of which the defendant was convicted.".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline and conform the language to § 1B1.2.

5. *Proposed Amendment:* Section 1B1.1(e) is amended by deleting immediately following the period at the end of the first sentence: "The resulting offense level is the total offense level.".

Section 1B1.1(g) is amended by deleting "total", and by inserting "determined above" immediately following "category".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline. The last sentence of § 1B1.1(e) and the use of "total offense level" in § 1B1.1(g) combine to produce a technically inaccurate instruction. It is not the total offense level of subsection (e), but rather that level as adjusted by any offense level adjustments from Chapter Four, Part B (see subsection (f)) that is used in subsection (g).

6. *Proposed Amendment:* The Commentary to § 1B1.1 captioned "Application Notes" is amended in Note l(c) by deleting "firearm or other dangerous weapon" and inserting in lieu thereof "dangerous weapon (including a firearm)".

The Commentary to § 1B1.1 captioned "Application Notes" is amended in Note 1(g) is amended by deleting "firearm or other dangerous weapon" wherever it appears and inserting in lieu thereof "dangerous weapon (including a firearm)".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary. Related amendment: 16 (§ 2A2.1).

7. *Proposed Amendment:* The Commentary to § 1B1.1 captioned "Application Notes" is amended by inserting as an additional note the following:

"5. In the case of a defendant subject to a sentence enhancement under 18 U.S.C. 3147 (Penalty for an Offense Committed While on Release), see § 2J1.7 (Commission of Offense While on Release).".

*Reason for Amendment:* To clarify the treatment of a specific enhancement provision.

*§ 1B1.2 Applicable Guidelines*

8. *Proposed Amendment:* Section 1B1.2(a) is amended in the first sentence by deleting "The court shall apply" and inserting in lieu thereof "Determine"; and in the second sentence by deleting "the court shall apply" and inserting in lieu thereof "determine", and by deleting "guideline in such chapter" and inserting in lieu thereof "offense guideline section in Chapter Two".

*Reason for Amendment:* The purposes of this amendment are to clarify the guideline and to make the phraseology of this subsection more consistent with that of §§ 1B1.1 and 1B1.2(b).

9. *Proposed Amendment:* Section 1B1.2(a) is amended in the first sentence by inserting immediately before the period "(i.e., the offense conduct charged in the count of the indictment or information of which the defendant was convicted)".

The Commentary to § 1B1.2 captioned "Application Notes" is amended in Note 1 by deleting the second and third sentences of the first paragraph and inserting in lieu thereof the following:

"As a general rule, the court is to use the guideline section from Chapter Two most applicable to the offense of conviction. The Statutory Index (Appendix A) provides a listing to assist in this determination. When a particular statute proscribes only a single

VOL 54 ISS 41 MR 3 1989 UMI

type of criminal conduct, the offense of conviction and the conduct proscribed by the statute will coincide, and there will be only one offense guideline referenced. When a particular statute proscribes a variety of conduct that might constitute the subject of different offense guidelines, the court will determine which guideline section applies based upon the nature of the offense conduct charged in the count of which the defendant was convicted.".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline and Commentary.

10. *Proposed Amendment:* Section 1B1.2(a) is amended by deleting:

"Similarly, stipulations to additional offenses are treated as if the defendant had been convicted of separate counts charging those offenses.",

and by inserting the following additional subsections:

"(c) A conviction by a plea of guilty or nolo contendere containing a stipulation that specifically establishes the commission of additional offense(s) shall be treated as if the defendant had been convicted of additional count(s) charging those offense(s).

"(d) A conviction on a count charging a conspiracy to commit more than one offense shall be treated as if the defendant had been convicted on a separate count of conspiracy for each offense that the defendant conspired to commit.".

The Commentary to § 1B1.2 captioned "Application Notes" is amended in the second paragraph of Note 1 by deleting:

"Similarly, if the defendant pleads guilty to one robbery but admits the elements of two additional robberies as part of a plea agreement, the guideline applicable to three robberies is to be applied.",

and by inserting as additional Notes the following:

"4. Subsections (c) and (d) address circumstances in which the provisions of Chapter Three, Part D (Multiple Counts) are to be applied although there may be only one count of conviction. Subsection (c) provides that in the case of a stipulation to the commission of additional offense(s), the guidelines are to be applied as if the defendant had been convicted of an additional count for each of the offenses stipulated. For example, if the defendant is convicted of one count of robbery but, as part of a plea agreement, admits to having committed two additional robberies, the guidelines are to be applied as if the defendant had been convicted of three counts of robbery. Subsection (d) provides that a conviction on a conspiracy count charging conspiracy to commit more than one offense is treated as if the defendant had been convicted of a separate conspiracy count for each offense that he conspired to commit. For example, where a conviction on a single count of conspiracy establishes that the defendant conspired to commit three robberies, the guidelines are to be applied as if the defendant had been convicted on one count of conspiracy to commit the first robbery, one count of conspiracy to commit the second robbery, and one count of conspiracy to commit the third robbery.

5. Particular care must be taken in applying subsection (d) because there are cases in which the jury's verdict does not establish which offense(s) was the object of the conspiracy. In such cases, subsection (d) should only be applied with respect to an object offense alleged in the conspiracy count if the court, were it sitting as a trier of fact, would convict the defendant of conspiring to commit that object offense. For example, if the defendant is convicted of a conspiracy count alleging that he conspired to commit two bank robberies, but there is insufficient evidence to support a separate conviction for conspiracy to commit one of the robberies, the court shall apply the guidelines as though the defendant had been convicted of a single count of conspiracy to commit one bank robbery. Note, however, if the object offenses specified in the conspiracy count would be grouped together under § 3D1.2(d) (e.g., a conspiracy to steal three government checks) it is not necessary to engage in the foregoing analysis, because § 1B1.3(a)(2) governs consideration of the defendant's conduct.".

*Reason for Amendment:* This amendment creates a new subsection (subsection (d)) to specify that a conviction of conspiracy to commit more than one offense is treated as if the defendant had been convicted of a separate conspiracy count for each offense that the defendant conspired to commit. The current instruction found only at Application Note 9 of § 3D1.2 is inadequate. For consistency, material now contained at § 1B1.2 (a) concerning stipulations to having committed additional offenses is moved to a new subsection (subsection (c)).

There are cases in which the jury's verdict does not specify how many or which offenses were the object of the conspiracy of which the defendant was convicted. Additional commentary (Application Note 5) is provided to address cases in which the jury's verdict does not specify how many or which offenses were the object of the conspiracy of which the defendant was convicted. Compare *U.S. v. Johnson*, 713 F.2d 633, 645–46 (11th Cir. 1983) (conviction stands if there is sufficient proof with respect to any one of the objectives), with *U.S. v. Tarnopol*, 561 F.2d 466 (3d Cir. 1977) (failure of proof with respect to any one of the objectives renders the conspiracy conviction invalid).

*Additional Explanatory Statement:* In general, the offense level for conspiracy is determined by reference to the offense that was the object of the conspiracy. See § 2D1.4; § 2X1.1. A complication arises if a single conspiracy count alleges more than one object offense.

Currently, the only guidance for this situation is found at Application Note 9 of § 3D1.2. That commentary instructs the court to "treat the conspiracy count as if it were several counts, each charging conspiracy to commit one of the substantive offenses." This amendment upgrades that instruction from commentary to a guideline and places it in a more prominent position in the guidelines. For consistency, material now contained at § 1B1.2(a) concerning stipulations is moved to new subsection (c).

In a circuit in which a multiple-objective conspiracy conviction does not constitute a finding that the defendant conspired to commit each objective, a guideline requiring courts to treat a multiple-objective conspiracy conviction as though the defendant had been convicted of separate conspiracies to commit each objective is unreasonable. In such cases, courts may choose to employ a special verdict procedure to ascertain the basis of the conviction. Alternatively, judicial fact-finding must be employed when the jury's verdict does not determine which objectives the defendant conspired to commit.

In order to maintain consistency with other § 1B1.2(a) determinations, it appears that this decision should be governed by a reasonable doubt standard. The determination that a defendant conspired to accomplish a particular criminal objective is unlike the mere enhancement of a sentence because of the presence of a sentencing factor. Rather, it is the equivalent of a jury's determination that the defendant engaged in a separate crime for which he may be punished. A higher standard of proof should govern the creation of what is, in effect, a new count of conviction.

Because the guidelines do not explicitly establish standards of proof, the proposed new application note calls upon the court to determine which offense[s] was the object of the conspiracy as if it were "sitting as a trier of fact."

*§ 1B1.3 Relevant Conduct (Factors that Determine the Guideline Range)*

11. *Proposed Amendment:* Section 1B1.3 is amended by deleting:

"The conduct that is relevant to determining the applicable guideline range includes that set forth below."

Section 1B1.3(b) is amended by deleting:

"(b) Chapter Four (Criminal History and Criminal Livelihood). To determine the criminal history category and the applicability of the career offender and criminal livelihood guidelines, the court shall consider all conduct relevant to a determination of the factors enumerated in the respective guidelines in Chapter Four.",

and inserting in lieu thereof the following:

"(b) Chapters Four (Criminal History and Criminal Livelihood) and Five (Determining the Sentence). Factors in Chapters Four and Five that establish the guideline range shall be determined on the basis of the conduct and information specified in the respective guidelines.".

The Commentary to § 1B1.3 captioned "Background" is amended in the second paragraph by deleting "Chapter Four" and inserting in lieu thereof "Chapters Four and Five", and by deleting "that Chapter" and inserting in lieu thereof "those Chapters".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline.

12. *Proposed Amendment:* The Commentary to § 1B1.3 captioned "Application Notes" is amended in Note 1 by deleting:

"If the conviction is for conspiracy, it includes conduct in furtherance of the conspiracy that was known to or was reasonably foreseeable by the defendant. If the conviction is for solicitation, misprision or accessory after the fact, it includes all conduct relevant to determining the offense level for the underlying offense that was known to or reasonably should have been known by the defendant.",

and inserting in lieu thereof:

"If the offense was undertaken in concert with others, whether or not charged as a conspiracy, it includes conduct of others in furtherance of the execution of the offense that was reasonably foreseeable by the defendant. For example, where Defendants A, B, and C engaged in a robbery, Defendant A is accountable under this guideline for an injury inflicted on a teller by Defendant B or C during the course of the robbery, even if Defendant A did not enter the bank, because such an injury is a reasonably foreseeable result of the commission of a bank robbery. A conspiracy count, however, may be broadly worded and include the conduct of many participants over a substantial period of time. In such cases, the scope of the offense, for the purposes of this guideline, is not necessarily the same for every participant. For example, where Defendants A and B engaged in an ongoing marihuana importation conspiracy in which Defendant C was hired to off-load a single shipment, Defendants A, B, and C may be included in a single count charging conspiracy to import marihuana. For the purposes of determining the offense level under this guideline, Defendant C is accountable for the shipment of marihuana he conspired to import and any acts or omissions in furtherance of the importation that were reasonably foreseeable. He is not accountable for prior or subsequent shipments of marihuana imported by Defendants A or B in which he played no part and from which he was to receive no benefit because those acts were not in furtherance of the execution of the offense that he undertook with Defendants A and B. In contrast, Defendants A and B are accountable for the marihuana imported during the entire conspiracy (which was reasonably foreseeable to them) and any other acts or omissions in furtherance of the execution of that conspiracy that were reasonably foreseeable.

"If the offense was a solicitation, misprision, or accessory after the fact, conduct 'for which the defendant would be otherwise accountable' includes all conduct relevant to determining the offense level for the underlying offense that was known to, or reasonably should have been known by, the defendant.".

*Reason for Amendment:* The purpose of this amendment is to clarify that the definition of relevant conduct excludes the conduct of other participants that was beyond the scope of (not in furtherance of) the jointly undertaken offense engaged in by the defendant. At the same time, the amendment clarifies that this definition covers conduct of others in furtherance of a jointly undertaken offense that was reasonably foreseeable, where the conviction is for the underlying offense.

*§ 1B1.5 Interpretation of References to Other Offense Guidelines*

13. *Proposed Amendment:* § 1B1.5 is amended by deleting "adjustments for", and by inserting "and cross references" immediately before the period at the end of the sentence.

The Commentary to § 1B1.5 captioned "Application Note" is amended in Note 1 by inserting "and cross references" immediately before "as well as the base offense level". Reason for Amendment: The purpose of this amendment is to clarify the guideline and Commentary.

14. *Proposed Amendment:* The Commentary to § 1B1.5 captioned "Application Note" is amended in Note 1 by deleting: "If the victim was vulnerable, the adjustment from § 3A1.1 Vulnerable Victim) also would apply.".

*Reason for Amendment:* The purpose of this amendment is to delete an unnecessary sentence. No substantive change is made.

*§ 1B1.9 Petty Offenses*

15. *Proposed Amendment:* Section 1B1.9 is amended in the title by deleting "Petty Offenses" and inserting in lieu thereof "Class B or C Misdemeanors and Infractions".

Section 1B1.9 is amended by deleting "(petty offense)".

The Commentary to § 1B1.9 captioned "Application Notes is amended in the first sentence of Note 1 by deleting "petty offense" and inserting in lieu thereof: "Class B or C misdemeanor or an infraction", in the second sentence of Note 1 by deleting "A petty offense is any offense for which the maximum sentence that may be imposed does not exceed six months' imprisonment." and inserting in lieu thereof "A Class B misdemeanor is any offense for which the maximum authorized term of imprisonment is more than thirty days but not more than six months; a Class C misdemeanor is any offense for which the maximum term of imprisonment is more than five days but not more than thirty days; an infraction is any offense for which the maximum authorized term of imprisonment is not more than five days.", in the first sentence of Note 2 by deleting "petty offenses" and inserting in lieu thereof "Class B or C misdemeanors or infractions", in the second sentence of Note 2 by deleting "petty" and inserting in lieu thereof "such", in the third sentence of Note 2 by deleting "petty offense" and inserting in lieu thereof "Class B or C misdemeanor or infraction" and, in Note 3 by deleting:

"3. All other provisions of the guidelines should be disregarded to the extent that they purport to cover petty offenses.".

The Commentary to § 1B1.9 captioned "Background" is amended by deleting:

"voted to adopt a temporary amendment to exempt all petty offenses from the coverage of the guidelines. Consequently, to the extent that some published guidelines may appear to cover petty offenses, they should be disregarded even if they appear in the Statutory Index",

and inserting in lieu thereof:

"exempted all Class B and C misdemeanors and infractions from the coverage of the guidelines".

*Reason for Amendment:* Section 7089 of the Omnibus Anti-Drug Abuse Act of 1988 revises the definition of a petty offense so that it no longer exactly corresponds with a Class B or C misdemeanor or infraction. Under the revised definition, a Class B or C misdemeanor or infraction that has an authorized fine of more than $5,000 for an individual (or more than $10,000 for an organization) will not be a petty offense. This legislative revision does not affect the maximum terms of imprisonment authorized. The maximum authorized term of imprisonment remains controlled by the grade of the offense (i.e., the maximum term of

VOL 54 ISS 41 MR 3 1989 UMI

imprisonment remains five days for an infraction, thirty days for a Class C misdemeanor, and six months for a Class B misdemeanor). Because the statutory grade of the offense (i.e., a Class B or C misdemeanor or an infraction) is the more relevant definition for guideline purposes, this amendment deletes the references in § 1B1.9 to "petty offenses" and in lieu thereof inserts references to "Class B and C misdemeanors and infractions."

In addition, this amendment converts the Commission's emergency amendment at § 1B1.9 (effective June 15, 1988) into a permanent amendment. Related amendments: 21 (§ 2A2.3); 28 (§ 2A3.4); 45 (§ 2B2.3); 22 (§ 2G3.2); 135 (§ 2J1.1); 137 (§ 2J1.2); 161 (§ 2L1.3); 172 (§ 2P1.4); 173 (§ 2Q1.3); 278 (Appendix A).

*§ 2A2.1 Assault With Intent to Commit Murder; Conspiracy or Solicitation to Commit Murder; Attempted Murder*

16. *Proposed Amendment:* Section 2A2.1 is amended in subsection (b)(2)(B) by deleting "a firearm or a dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)", and in subsection (b)(2)(C) by deleting "a firearm or other dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)".

*Reason for Amendment:* The purposes of this amendment are to clarify that a firearm is a type of dangerous weapon and to remove the inconsistency in the language between specific offense characteristic subdivisions (b)(2)(B) and (b)(2)(C).

17. *Proposed Amendment:* Section 2A2.1(b)(3) is amended by inserting at the end:

"(D) If the degree of injury is between that specified in subdivisions (A) and (B), increase by 3 levels; or

(E) If the degree of injury is between that specified in subdivisions (B) and (C), increase by 5 levels.".

The Commentary to § 2A2.1 captioned "Application Notes" is amended by deleting "Notes" from the caption and inserting in lieu thereof "Note" and by deleting the following:

"2. If the degree of bodily injury falls between two injury categories, use of the intervening level (i.e., interpolation) is appropriate."

*Reason for Amendment:* The purpose of this amendment is to provide intermediate adjustment levels for the degree of bodily injury. Related amendment: 3 [Amendment to Chapter One, Part A, section 4(b)].

*§ 2A2.2 Aggravated Assault*

18. *Proposed Amendment:* Section 2A2.2 is amended in subsection (b)(2)(B) by deleting "a firearm or a dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)", and in subsection (b)(2)(C) by deleting "a firearm or other dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)".

*Reason for Amendment:* The purposes of this amendment are to clarify that a firearm is a type of dangerous weapon and to remove the inconsistency in language between specific offense characteristic subdivisions (b)(2)(B) and (b)(2)(C). Related amendment: 16 (§ 2A2.1).

19. *Proposed Amendment:* Section 2A2.2(b)(3) is amended by inserting at the end:

"(D) If the degree of injury is between that specified in subdivisions (A) and (B), increase by 3 levels; or

(E) If the degree of injury is between that specified in subdivisions (B) and (C), increase by 5 levels.".

The Commentary to § 2A2.2 captioned "Application Notes" is amended by deleting:

"3. If the degree of bodily injury falls between two injury categories, use of the intervening level (i.e., interpolation) is appropriate.".

and by renumbering Note 4 as Note 3.

*Reason for Amendment:* The purpose of this amendment is to provide intermediate adjustment levels for the degree of bodily injury. Related amendment: 3 (Amendment to Chapter One, Part A, section 4(b)).

*§ 2A2.3 Minor Assault*

20. *Proposed Amendment:* Section 2A2.3(a)(1) is amended by deleting "striking, beating, or wounding" and inserting in lieu thereof "physical contact or if a dangerous weapon (including a firearm) was possessed and its use was threatened".

The Commentary to § 2A2.3 captioned "Application Notes" is amended by deleting:

"2. Striking, beating, or wounding" means conduct sufficient to violate 18 U.S.C. 113(d).".

and inserting in lieu thereof:

"2. Definitions of "firearm" and "dangerous weapon" are found in the Commentary to § 1B1.1 (Application Instructions)."

The Commentary to § 2A2.3 captioned "Background" is amended by deleting "The distinction for striking, beating, or wounding reflects the statutory distinction found in 18 U.S.C. 113 (d) and (e).".

*Reason for Amendment:* This amendment revises the criteria for application of subsection (a)(1). Related amendment: 23 (§ 2A2.4).

*Additional Explanatory Statement:* The amendment makes two changes in the Minor Assault guideline (§ 2A2.3) and Obstructing or Impeding Officers guideline (§ 2A2.4). First it eliminates the phrase "striking, wounding, or beating" (a statutory phrase dealing with a petty offense) in favor of "physical contact." This change clarifies the guidelines and eliminates any question concerning their applicability to a wide variety of assault statutes. Commentary language concerning the phrase "striking, wounding, or beating" is also deleted.

Second, the revision provides for a specific offense characteristic covering the case in which a weapon is possessed and its use is threatened. Note that where a weapon is used with intent to injure, § 2A2.2 (Aggravated Assault) rather than these guidelines apply.

21. *Proposed Amendment:* The Commentary to § 2A2.3 captioned "Statutory Provisions" is amended by deleting "113(d), 113(e),".

*Reason for Amendment:* The purpose of this amendment is to delete references to petty offenses. Related amendment: 15 (§ 1B1.9).

*§ 2A2.4 Obstructing or Impeding Officers*

22. *Proposed Amendment:* The Commentary to § 2A2.4 captioned "Application Notes" is amended in Note 1 by deleting: "Do not apply § 3A1.2 (Official Victim).", and by inserting as the last sentence: "Therefore, do not apply § 3A1.2 (Official Victim) unless subsection (c) requires the offense level to be determined under § 2A2.2 (Aggravated Assault).".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary.

23. *Proposed Amendment:* Section 2A2.4(b)(1) is amended by deleting "involved striking, beating, or wounding", and inserting in lieu thereof "involved physical contact or if a dangerous weapon (including a firearm) was possessed and its use was threatened".

The Commentary to § 2A2.4 is amended by deleting:

"2. Striking, beating, or wounding" is discussed in the Commentary to § 2A2.3 (Minor Assault).".

and inserting in lieu thereof:

"2. Definitions of "firearm" and "dangerous weapon," are found in the Commentary to § 1B1.1 (Application Instructions)."

*Reason for Amendment:* This amendment revises the criteria for application of subsection (b)(1). Related amendment: 20 (§ 2A2.3).

*§ 2A3.1 Criminal Sexual Abuse; Attempt or Assault with the Intent to Commit Criminal Sexual Abuse*

24. *Proposed Amendment:* Section 2A3.1(b)(1) is amended by deleting:

"criminal sexual abuse was accomplished as defined in 18 U.S.C. 2241",

and inserting in lieu thereof:

"offense was committed by the means set forth in 18 U.S.C. 2241(a) or (b)".

The Commentary to § 2A3.1 captioned "Application Notes" is amended in Note 2 by deleting:

" 'Accomplished as defined in 18 U.S.C. 2241' means accomplished by force, threat, or other means as defined in 18 U.S.C. 2241 (a) or (b) (i.e., by using force against that person; by threatening or placing that other person",

and inserting in lieu thereof the following:

" 'The means set forth in 18 U.S.C. 2241 (a) or (b)' are: (by using force against the victim; by threatening or placing the victim",

and by inserting at the end of the note the following additional sentence:

"This provision would apply, for example, where any dangerous weapon was used, brandished, or displayed to intimidate the victim.".

The Commentary to § 2A3.1 captioned "Background" is amended in the second sentence by deleting the comma immediately following "force" and inserting in lieu thereof a semicolon, and by deleting "kidnaping," and inserting in lieu thereof "or kidnaping;", and in the last sentence of the last paragraph by deleting "serious physical" and inserting in lieu thereof "permanent, life-threatening, or serious bodily".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline and Commentary.

25. *Proposed Amendment:* Section 2A3.1(b)(4) is amended by inserting immediately before the period at the end of the sentence:

"; or (C) if the degree of injury is between that specified in subdivisions (A) and (B), increase by 3 levels".

*Reason for Amendment:* The purpose of this amendment is to provide an intermediate adjustment level for degree of bodily injury. Related amendment: 3 (Amendment to Chapter One, Part A, Section 4(b)).

*§ 2A3.2 Criminal Sexual Abuse of a Minor (Statutory Rape) or Attempt to Commit Such Acts*

26. *Proposed Amendment:* The Commentary to § 2A3.2 captioned "Statutory Provision" and "Background" is amended by deleting "2243" wherever it appears and inserting in lieu thereof "2243(a)".

The Commentary to § 2A3.2 captioned "Background" is amended by deleting "statutory rape, i.e.,", and by deleting "victim's incapacity to give lawful consent" and inserting in lieu thereof "age of the victim".

*Reason for Amendment:* The purposes of this amendment are to clarify that the relevant issue is the age of the victim, and to provide a more specific reference to the underlying statute.

*§ 2A3.3 Criminal Sexual Abuse of a Ward (Statutory Rape) or Attempt to Commit Such Acts*

27. *Proposed Amendment:* Section 2A3.3 is amended in the title by deleting "(Statutory Rape)".

The Commentary to § 2A3.3 captioned "Statutory Provision" is amended by deleting "§ 2243" and inserting in lieu thereof "§ 2243(b)".

*Reason for Amendment:* The purposes of this amendment are to delete inapt language from the title, and to provide a more specific reference to the underlying statute.

*§ 2A3.4 Abusive Sexual Contact or Attempt to Commit Abusive Sexual Contact*

28. *Proposed Amendment:* Section 2A3.4 and the accompanying commentary is amended by deleting:

*"§ 2A3.4. Abusive Sexual Contact or Attempt to Commit Abusive Sexual Contact*

(a) Base Offense Level: 6

(b) Specific Offense Characteristics

(1) If the abusive sexual contact was accomplished as defined in 18 U.S.C. 2241 (including, but not limited to, the use or display of any dangerous weapon), increase by 9 levels.

(2) If the abusive sexual contact was accomplished as defined in 18 U.S.C. 2242, increase by 4 levels.

**Commentary**

*Statutory Provisions:* 18 U.S.C. 2244, 2245.

*Application Notes:*

"Accomplished as defined in 18 U.S.C. 2241" means accomplished by force, threat, or other means as defined in 18 U.S.C. 2241 (a) or (b) (i.e., by using force against that person; by threatening or placing that other person in fear that any person will be subject to death, serious bodily injury, or kidnapping; by rendering the victim unconscious; or by administering by force or threat of force, or without the knowledge or permission of the victim, a drug, intoxicant, or other similar substance and thereby substantially impairing the ability of the victim to appraise or control conduct).

2. "Accomplished as defined in 18 U.S.C. 2242" means accomplished by threatening or placing the victim in fear (other than by threatening or placing the victim in fear that any person will be subjected to death, serious bodily injury, or kidnapping); or when the victim is incapable of appraising the nature of the conduct or physically incapable of declining participation in, or communicating unwillingness to engage in, that sexual act.

*Background:* This section covers abusive sexual contact not amounting to criminal sexual abuse (criminal sexual abuse is covered under § 2A3.1–3.3). Enhancements are provided for the use of force or threats. The maximum term of imprisonment authorized by statute for offenses covered in this section is five years (if accomplished as defined in 18 U.S.C. 2241), three years (if accomplished as defined in 18 U.S.C. 2242), and six months otherwise. The base offense level applies to conduct that is consensual.", and inserting in lieu thereof:

*"§ 2A3.4 Abusive Sexual Contact or Attempt to Commit Abusive Sexual Contact*

(a) Base Offense Level:

(1) 14, if the offense was committed by the means set forth in 18 U.S.C. 2241 (a) or (b);

(2) 10, if the offense was committed by the means set forth in 18 U.S.C. 2242;

(3) 6, otherwise.

(b) Specific Offense Characteristics:

(1) If the victim had not attained the age of twelve years, increase by 4 levels; but if the resulting offense level is less than 14, increase to level 14.

(2) If the base offense level is determined under subsection (a) (1) or (2), and the victim had attained the age of twelve years but had not attained the age of sixteen years, increase by 2 levels.

**Commentary**

*Statutory Provision:* 18 U.S.C. 2244(a) (1), (2), (3).

*Application Notes:*

1. 'The means set forth in 18 U.S.C. 2241 (a) or (b)' are: By using force against the victim; by threatening or placing the victim in fear that any person will be subjected to death, serious bodily injury, or kidnapping; by rendering the victim unconscious; or by administering by force or threat of force, or without the knowledge or permission of the victim, a drug, intoxicant, or other similar substance and thereby substantially impairing the ability of the victim to appraise or control conduct.

2. 'The means set forth in 18 U.S.C. 2242' are: By threatening or placing the victim in fear (other than by threatening or placing the victim in fear that any person will be subjected to death, serious bodily injury, or kidnapping); or by victimizing an individual who is incapable of appraising the nature of the conduct or physically incapable of declining participation in, or communicating unwillingness to engage in, that sexual act.

*Background:* This section covers abusive sexual contact not amounting to criminal sexual abuse (criminal sexual abuse is covered under § 2A3.1–3.3). Alternative base

VOL 54 ISS 41 MR 3 1989 UMI

offense levels are provided to take account of the different means used to commit the offense. Enhancements are provided for victimizing children or minors. The enhancement under subsection (b)(2) does not apply, however, where the base offense level is determined under subsection (a)(3) because an element of the offense to which that offense level applies is that the victim had attained the age of twelve years but had not attained the age of sixteen years.".

*Reason for Amendment:* The purpose of this amendment is to provide enhanced punishment for the victimization of minors and children and to conform the structure of the guideline to that of § 2A3.1 (Criminal Sexual Abuse).

*Additional Explanatory Statement:* The offense levels set forth in the amended Abusive Sexual Contact guideline (§ 2A3.4) are derived from the original abusive sexual contact guideline and from analogous guidelines such as Criminal Sexual Abuse (§ 2A3.1), Criminal Sexual Abuse of a Minor (§ 2A3.2), and the Exploitation of a Minor guidelines in Part G (§§ 2G1.2, 2G2.1, 2G2.2).

As stated in the accompanying commentary, the base offense level of six in the original abusive sexual contact guideline "applied to conduct that is consensual." This refers to sexual conduct with a minor accomplished without resort to the means set forth in 18 U.S.C. 2241(a), 2241(b) and 2242. A nine level enhancement is provided for sexual contact committed by the means set forth in § 2241 (a) or (b) (generally force) and a four level enhancement is provided for sexual contact committed by the means set forth in § 2242 (generally fear). No enhancements are provided based upon the age of the victim.

The amended guideline retains the ascending order of offense levels based upon the means used to commit the crime, but adds enhancements based upon the age of the victim. There is a two level enhancement if the victim is a minor (12 to 15 years old) and a four level enhancement if the victim is a child (11 years old or younger). These enhancements parallel the enhancements for minor and children victims in § 2A3.1 (Criminal Sexual Abuse) and § 2G1.2 (Transportation of a Minor for the Purpose of Prostitution). In addition, § 2G2.1 (Sexually Exploiting a Minor by Production of Sexually Explicit Visual or Printed Material) and § 2G2.2 (Transporting, Receiving, or Trafficking in Material Involving the Sexual Exploitation of a Minor) provide a two level enhancement for child victims. In those two guidelines, the base offense level already encompasses victimization of a minor.

After incorporating ascending offense levels based upon the means used to commit the crime and enhancements based upon the age of the victim, the offense levels set forth in the amended Abusive Sexual Contact guideline have been adjusted to insure that the same offense level (14) will result in each of the following cases: Sexual contact with an adult committed by force, sexual contact with a child committed by fear and sexual contact with a child committed without force or fear. In the parallel sexual abuse guideline (§ 2A3.1), the Commission has already determined that these three cases are of equal severity and therefore has assigned the same offense level (31) to each.

Recent legislation increased the maximum penalty for a violation of 18 U.S.C. 2244 (a)(1) and (a)(3). [cite]. The Commission solicits public comment on whether the offense levels in § 2A3.4 should be increased because the authorized maximum sentences for certain conduct covered by this guideline have been raised.

*§ 2A4.1 Kidnapping, Abduction, Unlawful Restraint*

*29. Proposed Amendment:* Section 2A4.1(b)(2) is amended by inserting immediately before the period at the end of the sentence: "; or (C) if the degree of injury is between that specified in subdivisions (A) and (B), increase by 3 levels".

*Reason for Amendment:* The purpose of this amendment is to provide intermediate adjustment level for degree of bodily injury. Related amendment: 3 (Amendment to Chapter One, Part A, section 4(b)).

*§ 2A5.2 Interference with Flight Crew Member or Flight Attendant*

*30. Proposed Amendment:* The Commentary to § 2A5.2 captioned "Application Note" is amended by deleting:

"*Application Note:*
If an assault occurred, apply the most analogous guideline from Part A, Subpart 2 (Assault) if the offense level under that guideline is greater.".

*Reason for Amendment:* The purpose of this amendment is to simplify the guideline by deleting redundant material.

*§ 2A5.3 Committing Certain Crimes Aboard Aircraft*

*31. Proposed Amendment:* The Commentary to § 2A5.3 captioned "Application Notes" is amended in Note 1 by deleting "that the defendant is convicted of violating" and inserting in lieu thereof "of which the defendant is convicted".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary.

*§ 2B1.1 Larceny, Embezzlement, and Other Forms of Theft*

32. *Proposed Amendment:* Section 2B1.1(b)(1) is amended by deleting:

| | "Loss | Increase in level |
|---|---|---|
| (A) | $100 or less | No increase. |
| (B) | $101 to $1,000 | Add 1. |
| (C) | $1,001 to $2,000 | Add 2. |
| (D) | $2,001 to $5,000 | Add 3. |
| (E) | $5,001 to $10,000 | Add 4. |
| (F) | $10,001 to $20,000 | Add 5. |
| (G) | $20,001 to $50,000 | Add 6. |
| (H) | $50,001 to $100,000 | Add 7. |
| (I) | $100,001 to $200,000 | Add 8. |
| (J) | $200,001 to $500,000 | Add 9. |
| (K) | $500,001 to $1,000,000 | Add 10. |
| (L) | $1,000,001 to $2,000,000 | Add 11. |
| (M) | $2,000,001 to $5,000,000 | Add 12. |
| (N) | Over $5,000,000 | Add 13", |

And inserting in lieu thereof:

| | "Loss (apply the greatest) | Increase in level |
|---|---|---|
| (A) | $100 or less | No increase. |
| (B) | More than $100 | Add 1. |
| (C) | More than $1,000 | Add 2. |
| (D) | More than $2,000 | Add 3. |
| (E) | More than $5,000 | Add 4. |
| (F) | More than $10,000 | Add 5. |
| (G) | More than $20,000 | Add 6. |
| (H) | More than $40,000 | Add 7. |
| (I) | More than $80,000 | Add 8. |
| (J) | More than $150,000 | Add 9. |
| (K) | More than $300,000 | Add 10. |
| (L) | More than $500,000 | Add 11. |
| (M) | More than $1,000,000 | Add 12. |
| (N) | More than $2,000,000 | Add 13. |
| (O) | More than $5,000,000 | Add 14". |

*Reason for Amendment:* The purpose of this amendment is to conform the theft and fraud loss table to the tax loss table in order to remove an unintended inconsistency between these tables in cases where the loss is greater than $40,000. Both tables increase the offense level when the loss exceeds $2,000, but the Tax Loss Table provides a maximum 12 level difference while the Fraud Loss Table has a maximum 11 level difference. Up to $40,000 the tables are identical. Above $40,000 there are minor differences (e.g., from $40,001–$50,000 the Tax Loss Table provides a 1 level higher offense level; from $50,001–$80,000 the offense levels are identical; from $80,001–$100,000 the Tax Loss Table again provides a 1 level higher offense level; from $100,001–$150,000 the offense levels are again identical; from $150,001–$200,000 Tax Loss Table again provides a 1 level higher offense level). Because the tax loss table contains one additional level, this amendment will increase the offense level by one level in cases involving large losses.

*Related amendment:* 115 (§ 2F1.1). This amendment also eliminates minor gaps in the loss table. Related amendments: 39 (§ 2B2.1); 47 (§ 2B3.1); 180 (§ 2R1.1); 181 (§ 2S1.1); 209 (§ 2T4.1).

33. *Proposed Amendment:* Section 2B1.1(b)(1), as amended by proposed Amendment 32, is further amended by deleting:

| | | |
|---|---|---|
| "(I) | More than $80,000 | Add 8. |
| (J) | More than $150,000 | Add 9. |
| (K) | More than $300,000 | Add 10. |
| (L) | More than $500,000 | Add 11. |
| (M) | More than $1,000,000 | Add 12. |
| (N) | More than $2,000,000 | Add 13. |
| (O) | More than $5,000,000 | Add 14". |

And inserting in lieu thereof:

| | | |
|---|---|---|
| "(I) | More than $70,000 | Add 8. |
| (J) | More than $120,000 | Add 9. |
| (K) | More than $200,000 | Add 10. |
| (L) | More than $350,000 | Add 11. |
| (M) | More than $500,000 | Add 12. |
| (N) | More than $800,000 | Add 13. |
| (O) | More than $1,500,000 | Add 14. |
| (P) | More than $2,500,000 | Add 15. |
| (Q) | More than $5,000,000 | Add 16". |

*Reason for Amendment:* The purpose of this amendment is to increase the offense levels for offenses with larger loss values to better reflect the seriousness of the conduct. Related amendments: 116 (§ 2F1.1); 210 (§ 2T4.1); 39 (§ 2B2.1); 48 (§ 2B3.1).

34. *Proposed Amendment:* Section 2B1.1(b)(6) is amended by deleting "organized criminal activity" and inserting in lieu thereof "an organized scheme to steal vehicles or vehicle parts".

The commentary accompanying § 2B1.1 is amended by deleting:

"6. 'Organized criminal activity' refers to operations such as car theft rings or 'chop shops,' where the scope of the activity is clearly significant.",

And inserting in lieu thereof the following:

"6. Subsection (b)(6) referring to an 'organized scheme to steal vehicles or vehicle parts' provides an alternative minimum measure of loss in the case of an ongoing, sophisticated operation such as an auto theft ring or 'chop shop'. 'Vehicles' refers to all forms of vehicles, including aircraft and watercraft."

The commentary accompanying § 2B1.1 is further amended by deleting:

"A minimum offense level of 14 is provided for organized criminal activity, i.e., operations such as car theft rings or 'chop shops,' where the scope of the activity is clearly significant but difficult to estimate. The guideline is structured so that if reliable information enables the court to estimate a volume of property loss that would result in a higher offense level, the higher offense level would govern.",

and inserting in lieu thereof the following:

"A minimum offense level of 14 is provided for offenses involving an organized scheme to steal vehicles or vehicle parts. Typically, the scope of such activity is substantial (i.e., the value of the stolen property, combined with an enhancement for 'more than minimal planning' would itself result in an offense level of at least 14), but the value of the property is particularly difficult to ascertain in individual cases because the stolen property is rapidly resold or otherwise disposed of in the course of the offense. Therefore, the specific offense characteristic of 'organized scheme' is used as an alternative to 'loss' in setting the offense level.".

*Reason for Amendment:* The purpose of this amendment is to clarify the coverage of a specific offense characteristic. Related amendments: 38 (§ 2B1.2); 59 (§ 2B6.1).

35. *Proposed Amendment:* The Commentary to § 2B1.1 captioned "Background" is amended in the first paragraph by deleting "§ 5A1.1" and inserting in lieu thereof "Chapter Five, Part A".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

*§ 2B1.2 Receiving Stolen Property*

36. *Proposed Amendment:* Section 2B1.2 is amended in the title by inserting ", Transporting, Transferring, Transmitting, or Possessing" immediately after "Receiving".

Section 2B1.2(b)(3)(A) is amended by inserting "receiving and" immediately before "selling".

The Commentary to § 2B1.2 captioned "Application Notes" is amended by deleting Note 1 as follows:

"1. If the defendant is convicted of transporting stolen property, either § 2B1.1 or this guideline would apply, depending upon whether the defendant stole the property.",

and by renumbering Notes 2 and 3 as Notes 1 and 2 respectively.

*Reason for Amendment:* The purpose of this amendment is to clarify the nature of the cases to which this guideline applies.

37. *Proposed Amendment:* Section 2B1.2 is amended by renumbering subsection (b)(4) as (b)(5), and by inserting a new subsection (b)(4) as follows:

"(4) If the property included undelivered United States mail and the offense level as determined above is less than level 6, increase to level 6.".

The Commentary to § 2B1.2 captioned "Application Notes" is amended by inserting the following additional application note:

"3. 'Undelivered United States mail' means mail that has not actually been received by the addressee or his agent (e.g., it includes mail that is in the addressee's mail box).".

*Reason for Amendment:* The purpose of this amendment is to add a specific offense characteristic where stolen property involved "undelivered mail" to conform to § 2B1.1.

Note.—The current Applicaton Note 3 to § 2B1.2 is renumbered as Note 2 by amendment 36.

38. *Proposed Amendment:* Section 2B1.2(b)(4) is amended by deleting "organized criminal activity" and inserting in lieu thereof "an organized scheme to receive stolen vehicles or vehicle parts".

The Commentary accompanying § 2B1.2 is amended by inserting the following new Application Note:

"4. Subsection (b)(4) referring to an 'organized scheme to receive stolen vehicles or vehicle parts' provides an alternative minimum measure of loss in the case of an ongoing, sophisticated operation such as an auto theft ring or 'chop shop.' 'Vehicles' refers to all forms of vehicles, including aircraft and watercraft. See Commentary to § 2B1.1 (Larceny, Embezzlement, and other Forms of Theft).".

*Reason for Amendment:* The purpose of this amendment is to clarify the coverage of a specific offense characteristic. Related amendments: 34 (§ 2B1.1); 59 (§ 2B6.1).

* * * * *

*§ 2B2.1 Burglary of Residence*

39. *Proposed Amendment:* Section 2B2.1(b)(2) is amended in the first column of the table by deleting:

"Loss
(A) $2,500 or less
(B) $2,501–$10,000
(C) $10,001–$50,000
(D) $50,001–$250,000
(E) $250,001–$1,000,000
(F) $1,000,001–$5,000,000
(G) more than $5,000,000",

And inserting in lieu thereof:

"Loss (apply the greatest)
(A) $2,500 or less
(B) More than $2,500
(C) More than $10,000

VOL 54 ISS 41 MR 3 1989 UMI

(D) More than $50,000
(E) More than $250,000
(F) More than $1,000,000
(G) More than $5,000,000".

*Reason for Amendment:* The purpose of this amendment is to eliminate minor gaps in the loss table. Related amendments: 32 (§ 2B1.1); 47 (§ 2B3.1); 115 (§ 2F1.1); 180 (§ 2R1.1); 181 (§ 2S1.1); 209 (§ 2T4.1).

* * * * *

40. *Proposed Amendment:* Section 2B2.1(b)(1), as amended by proposed amendment 39, is further amended by deleting:

"(F) ..... More than $1,000,000..... Add 5.
(G)..... More than $5,000,000..... Add 6".

and inserting in lieu thereof:

"(F) ..... More than $800,000..... Add 5.
(G)..... More than $1,500,000..... Add 6.
(H)..... More than $2,500,000..... Add 7.
(I) ..... More than $5,000,000..... Add 8".

*Reason for Amendment:* The purpose of this amendment is to conform this loss table to the proposed amendment to § 2B1.1 (Amendment 33).

41. *Proposed Amendment:* Section 2B2.1(b)(4) is amended by deleting "a firearm or other dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)".

The Commentary to § 2B2.1 captioned "Application Notes" is amended in Note 4 by deleting "with respect to a firearm or other dangerous weapon" and inserting in lieu thereof "to possession of any dangerous weapon (including a firearm) that was".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline and Commentary. Related amendment: 18 (§ 2A2.1).

*§ 2B2.2 Burglary of Other Structures*

42. *Proposed Amendment:* Section 2B2.2(b)(4) is amended by deleting "a firearm or other dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)".

The Commentary to § 2B2.2 captioned "Application Notes" is amended in Note 4 by deleting "with respect to a firearm", and inserting in lieu thereof "to possession of any dangerous weapon (including a firearm) that was".

*Reason for Amendment:* The purposes of this amendment are to clarify the guideline and Commentary and to correct a clerical error. Related amendment: 18 (§ 2A2.1).

*§ 2B2.3 Trespass*

43. *Proposed Amendment:* Section 2B2.3(b) is amended by deleting "Characteristic" and inserting in lieu thereof "Characteristics".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

44. *Proposed Amendment:* Section 2B2.3(b)(2) is amended by deleting "a firearm or other dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline. Related amendment: 16 (§ 2A2.1).

45. *Proposed Amendment:* The Commentary to § 2B2.3 captioned "Statutory Provisions" is amended by deleting "Provisions" and inserting in lieu thereof "Provision", and by deleting "§ 1382,".

*Reason for Amendment:* The purpose of this amendment is to delete a reference to a petty offense. Related amendment: 15 (§ 1B1.9).

46. *Proposed Amendment:* The Commentary to § 2B2.3 captioned "Statutory Provisions" is further amended by deleting "18 U.S.C. 1854" and inserting in lieu thereof "42 U.S.C. 7202b".

*Reason for Amendment:* The purpose of this amendment is to delete an incorrect statutory reference and to add a correct one.

*§ 2B3.1 Robbery*

47. *Proposed Amendment:* Section 2B3.1(b)(1) is amended in the first column of the table by deleting:

"Loss
(A) $2,500 or less
(B) $2,501–$10,000
(C) $10,001–$50,000
(D) $50,001–$250,000
(E) $250,001–$1,000,000
(F) $1,000,001–$5,000,000
(G) more than $5,000,000",

And inserting in lieu thereof:

"Loss (Apply the Greatest)
(A) $2,500 or less
(B) More than $2,500
(C) More than $10,000
(D) More than $50,000
(E) More than $250,000
(F) More than $1,000,000
(G) More than $5,000,000".

*Reason for Amendment:* The purpose of this amendment is to eliminate minor gaps in the loss table. Related amendments: 32 (§ 2B1.1); 39 (§ 2B2.1); 115 (§ 2F1.1); 180 (§ 2R1.1); 181 (§ 2S1.1); 209 (§ 2T4.1).

48. *Proposed Amendment:* Section 2B3.1(b)(1), as amended by proposed Amendment 47, is further amended by deleting:

"(F) ..... More than $1,000,000..... Add 5.
(G)..... More than $5,000,000..... Add 6".

and inserting in lieu thereof:

"(F) ..... More than $800,000..... Add 5.
(G)..... More than $1,500,000..... Add 6.
(H)..... More than $2,500,000..... Add 7.
(I) ..... More than $5,000,000..... Add 8".

*Reason for Amendment:* The purpose of this amendment is to conform this loss table to the proposed amendments to § 2B1.1 (Amendment 33).

49. *Proposed Amendment:* Section 2B3.1 is amended in subsection (b)(2)(B) by deleting "a firearm or a dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)", and in subsection (b)(2)(C) by deleting "a firearm or other dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)".

*Reason for Amendment:* The purposes of this amendment are to clarify that a firearm is a type of dangerous weapon and to remove the inconsistency in language between specific offense characteristic subdivisions (b)(2)(B) and (b)(2)(C). Related amendment: 16 (§ 2A2.1).

50. *The Offense Level for Robbery:* The Commission has received comments from several sources, primarily Assistant United States Attorneys and certain District Judges, to the effect that the guideline for robbery, § 2B3.1, results in sentences that are too low, especially for first offenders.[1]

The guideline was drafted in the expectation that it would result in sentences that, on average, would approximate past sentencing practices for bank robbery,[2] in terms of average time served.[3] It was recognized, however, that for certain offenders with very serious criminal records, the guideline sentences would greatly exceed those served under past practice, because of the manner in which the Commission implemented the directive contained in 28 U.S.C. 994(h). See § 4B1.1 (Career Offender). Revision of § 4B1.1, discussed below (Amendment 243) is a related issue as to which the Commission expressly solicits comment.

Data collected by the Commission suggest that, under the guidelines, the average sentences for bank robbery may in fact be lower than in past practice, at least for certain classes of offenders. However, because the guidelines have been in effect only since November 1, 1987 (for crimes committed on or after that date), and because a number of judges did not begin applying them until after the Supreme Court's decision in Mistretta, the Commission's data on practice under the guidelines are very preliminary, and do not yet provide a reliable basis for evaluating the workings of the current guideline. The Commission is continuing to collect and analyze pertinent data. The Commission will make reports summarizing and analyzing the data available at the Commission's offices to those who are interested.

Regardless of whether the current guideline accurately reflects past practice, it may be appropriate to raise (or lower) the guideline for other reasons. For example, sentences under the current guideline may not adequately reflect the seriousness of the offense. Or it might be appropriate to incarcerate the offender for a longer period of time in order to protect the public from offenses that he might otherwise commit.

The typical bank robbery encountered in the federal system, whether armed or unarmed, involves the theft of less than $10,000, and no injuries or unlawful restraint. For such offenses, the guideline sentences (in months) are as follows:

CRIMINAL HISTORY CATEGORY

| | I | II | III | IV | V | VI | Career offender |
|---|---|---|---|---|---|---|---|
| Unarmed | 30–37 | 33–41 | 37–46 | 46–57 | 57–71 | 63–78 | 210–262 |
| Armed | 41–51 | 46–57 | 51–63 | 63–78 | 77–96 | 84–105 | 262–327 |

Actual time served usually will be approximately 15% lower because of "good time" credits. Aggravating factors, such as discharge of a weapon, injury to or restraint of a victim, or the theft of a larger sum of money, result in longer sentences, except for career offenders. These sentences may be reduced by a guilty plea, in which event, except for career offenders, there usually is a decrease of 2 levels (approximately 20%). On the other hand, these sentences could be increased by 2 levels (approximately 25%) if § 3C1.1 (Obstruction of Justice) applies, or by 2 or more levels if the defendant is also convicted of other offenses (see Chapter 3, Part D). Lower or higher sentences also may result though departure from the guidelines.

As one possible response to the comments that the sentences under the current guideline are too low, it has been proposed that the base offense level in § 2B3.1 be increased by six levels (from level 18 to level 24). This would result in the following guideline sentences for the typical bank robbery:

CRIMINAL HISTORY CATEGORY

| | I | II | III | IV | V | VI | Career offender |
|---|---|---|---|---|---|---|---|
| Unarmed | 57–71 | 63–78 | 70–87 | 84–105 | 100–125 | 110–137 | 210–262 |
| Armed | 78–97 | 87–108 | 97–121 | 110–137 | 130–162 | 140–175 | 262–327 |

The Commission solicits comment on whether the sentences produced by the robbery guideline are appropriate, and if not, in what respects the guideline should be changed.[4] Comments need not be limited to the approach described above.

Concern also has been expressed that the guideline sentence may be unduly limited by the number of counts of conviction. (See Chapter 3, Part D, for guidelines dealing with multiple counts of conviction.) Under the guidelines, the offense level is not increased by offenses that are uncharged or counts that are dismissed; the sentencing judge may consider them only within the guideline range or as a basis for departure. Under past practice, the sentencing judge was unconstrained in his consideration of offenses. The parole guidelines took them into account regardless of whether there was a conviction.

This facet of the guidelines may result in lower sentences than under past practice if the prosecutor accepts a plea to one count of robbery when the defendant in fact has committed several robberies. It has been proposed that the Commission amend the robbery guideline to explicitly take into account other robberies of which the defendant has been not convicted. The following two amendments have been proposed as ways to accomplish this.

[Option 1: Insert as an additional specific offense characteristic at § 2B3.1(b):

"(6) If, as part of the same course of conduct or common scheme or plan as the offense of conviction, the defendant committed one or more additional robberies, increase by 2 levels. Do not, however, apply this adjustment if the application defendant is convicted of multiple counts of robbery.".]

[Option 2: Insert as an additional specific offense characteristic at § 2B3.1(b):

[1] Although § 2B3.1 relates to robbery in general, the comments received so far have been confined to bank robbery. The vast majority of all federal robbery prosecutions are for bank robbery.

[2] Past practice showed that the average sentence for non-bank robbery was substantially less than that for bank robbery (up to 5 offense levels less, but the number of cases was quite small). The guidelines reduced that difference to 0 or 1 level by raising the offense level for non-bank robbery cases. Comment is solicited on whether there is a sufficient distinction between bank robberies and other robberies to warrant a greater difference in offense level.

[3] As a result of the Sentencing Reform Act, parole was abolished and "good time" credits were reduced to 54 days per year (15%). Thus, to produce the same time served, a sentence under the guidelines necessarily would be much shorter than the sentence pronounced under the old law.

[4] A change in the sentences could be effected through changes in other guidelines, such as criminal livelihood or career offender. Comment may be addressed to these or other issues.

VOL 54 ISS 41 MR 3 1989 UMI

"(6) If, as part of the same course of conduct or common scheme or plan as the offense of conviction, the defendant committed (A) one additional robbery, increase by 2 levels; (B) two additional robberies, increase by 3 levels; (C) three or four additional robberies, increase by 4 levels; or (D) five or more additional robberies, increase by 5 levels.".

The following additional Application Note would be inserted as Note 9:

"9. Multiple robberies are not grouped under § 3D1.2(d). Where specific offense characteristic (b)(6) applies, multiple counts will be grouped under § 3D1.2(c).".]

The Commission solicits comment on whether either of these approaches should be followed.

51. *Proposed Amendment:* Section 2B3.1(b)(3) is amended by inserting at the end:

"(D) If the degree of injury is between that specified in subdivisions (A) and (B), increase by 3 levels; or

(E) If the degree of injury is between that specified in subdivisions (B) and (C), increase by 5 levels.".

The Commentary to § 2B3.1 captioned "Application Notes" is amended by deleting:

"4. If the degree of bodily injury falls between two injury categories, use of the intervening level (i.e., interpolation) is appropriate.";

and by renumbering Notes 5–8 as 4–7 respectively.

*Reason for Amendment:* The purpose of this amendment is to provide intermediate adjustment levels for the degree of bodily injury specific offense characteristic. Related amendment: 3 (Amendment to Chapter One, Part A, section 4(b)).

52. *Proposed Amendment:* Section 2B3.1(b)(1) is amended by deleting "Treat the loss for a financial institution or post office as at least $5,000." and inserting in lieu thereof

"(H) If the offense involved the robbery of a financial institution or post office, and no increase from subdivisions (B–G) above applies, increase by 1 level.".

The Commentary to § 2B3.1 captioned "Application Notes" is amended in Note 2 by deleting "robbery or attempted robbery of a bank or post office results in a minimum one-level enhancement. There is no special enhancement for banks and post offices if the loss exceeds $10,000, however" and inserting in lieu thereof "there is a one level enhancement if the offense involved robbery or attempted robbery of a financial institution or post office and there was no loss or the loss did not exceed $2,500. If the loss exceeded $2,500, the applicable enhancement from subsection (b)(1)(B)–(G) is used instead".

*Reasons for Amendment:* The purpose of this amendment is to clarify the application of the guideline. No substantive change is made.

*§ 2B3.2 Extortion by Force or Threat of Injury or Serious Damages*

53. *Proposed Amendment:* Section 2B3.2 is amended in subsection (b)(2)(B) by deleting "a firearm or a dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)", and in subsection (b)(2)(C) by deleting "a firearm or other dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)".

*Reason for Amendment:* The purposes of this amendment are to clarify that a firearm is a type of dangerous weapon and to remove the inconsistency in language between specific offense characteristic subdivisions (b)(2)(B) and (b)(2)(C). Related amendment: 16 (§ 2A2.1).

54. *Proposed Amendment:* Section 2B3.2(b)(3) is amended by inserting at the end:

"(D) If the degree of injury is between that specified in subdivisions (A) and (B), increase by 3 levels; or

(E) If the degree of injury is between that specified in subdivisions (B) and (C), increase by 5 levels.".

The Commentary to § 2B3.2 captioned "Application Notes"is amended by deleting:

"4. If the degree of bodily injury falls between two injury categories, use of the intervening level (i.e., interpolation) is appropriate.";

and by renumbering Notes 5 and 6 as 4 and 5 respectively.

*Reason for Amendment:* The purpose of this amendment is to provide intermediate adjustment levels for the degree of bodily injury. Related amendment: 3 (Amendment to Chapter One, Part A, Section 4(b)).

*§ 2B3.3 Blackmail and Similar Forms of Extortion*

55. *Proposed Amendment:* Section 2B3.3(b) is amended by deleting "Characteristics" and inserting in lieu thereof "Characteristic".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

*§ 2B5.1 Offenses Involving Counterfeit Obligations of the United States*

56. *Proposed Amendments:* Section 2B5.1 is amended in the title by inserting "Bearer" immediately before "Obligations".

The Commentary to § 2B5.1 captioned "Application Notes" is amended by renumbering Note 2 as Note 3, and by inserting the following as Note 2:

"2. 'Counterfeit', as used in this section, means an instrument that purports to be genuine but is not, because it has been falsely made or manufactured in its entirety. Offenses involving genuine instruments that have been altered are covered under § 2B5.2.".

The Commentary to § 2B5.1 captioned "Application Notes" is amended in the renumbered Note 3 by deleting ", paste corners of notes on notes of a different denomination,".

The Commentary to § 2B5.1 captioned "Application Notes" is amended by inserting the following additional Note:

"4. For the purposes of subsection (b)(1), do not count items that obviously were not intended for circulation (e.g., discarded defective items).".

*Reason for Amendment:* The purpose of this amendment is to clarify the coverage and operation of this guideline. Related Amendment: 57 (§ 2B5.2).

*Additional Explanatory Statement:* The proposed amendment revises the titles of §§ 2B5.1 and 2B5.2 to make the coverage of each guideline clear from the title. Presently, the coverage of § 2B5.1 is specified in Application Note 1 of the Commentary to this guideline. For § 2B5.1, the proposed amendment adopts the definition of "counterfeit" used in 18 U.S.C. 513. "Altered" obligations (e.g., the corner of a note of one denomination pasted on a note of a different denomination) are covered under § 2B5.2. The proposed amendment also adds an application note providing that items obviously not intended for circulation (e.g. discarded defective items) are not to be counted under subsection (b)(1).

*§ 2B5.2 Forgery; Offenses Involving Counterfeit Instruments Other than Obligations of the United States*

57. *Proposed Amendment:* Section 2B5.2 is amended in the title by inserting "Altered or" immediately following "Involving" and by inserting "Counterfeit Bearer" immediately following "Other than".

*Reason for Amendment:* The purpose of this amendment is to clarify the coverage of this guideline. Related amendment: 56 (§ 2B5.1).

*§ 2B6.1 Altering or Removing Motor Vehicle Identification Numbers, or Trafficking in Motor Vehicles or Parts with Altered or Obliterated Identification Numbers*

58. *Proposed Amendment:* Section 2B6.1(b) is amended by renumbering subsection (b)(2) as (b)(3) and inserting the following as subsection (b)(2):

"(2) If the defendant was in the business of receiving and selling stolen property, increase by 2 levels.".

*Reason for Amendment:* The purpose of this amendment is to resolve an inconsistency between this section and § 2B1.2 created by the lack of an enhancement in this section for a person in the business of selling stolen property. Currently, a defendant convicted under the statutes covered by this section, which are expressly designed to cover trafficking in motor vehicles or parts with altered or obliterated identification numbers, could receive a lower offense level than if convicted of transportation or receipt of stolen property. This amendment eliminates this inconsistency by adding a 2 level increase if the defendant was in the business of selling stolen property. Two levels rather than four levels is the applicable increase to conform to § 2B1.2 because the base offense level of § 2B6.1 already incorporates the adjustment for more than minimal planning.

59. *Proposed Amendment:* Section 2B6.1(b)(2) is amended by deleting "organized criminal activity" and inserting in lieu thereof "an organized scheme to steal vehicles or vehicle parts, or to receive stolen vehicles or vehicle parts".

The Commentary accompanying § 2B6.1 is amended by deleting:

"1. See Commentary to § 2B1.1 (Larceny, Embezzlement, and other Forms of Theft) regarding the adjustment in subsection (b)(2) for organized criminal activity, such as car theft rings and 'chop shop' operations.",

and inserting in lieu thereof the following:

"1. Subsection (b)(2) referring to an 'organized scheme to steal vehicles or vehicle parts, or to receive stolen vehicles or vehicle parts' provides an alternative minimum measure of loss in the case of an ongoing, sophisticated operation such as an auto theft ring or 'chop shop.' 'Vehicles' refers to all forms of vehicles, including aircraft and watercraft. See Commentary to § 2B1.1 (Larceny, Embezzlement, and Other Forms of Theft).".

*Reason for Amendment:* The purpose of this amendment is to clarify the coverage of a specific offense characteristic. Related amendments: 34 (§ 2B1.1); 38 (§ 2B1.2).

60. *Proposed Amendment:* The Commentary to § 2B6.1 captioned "Statutory Provisions" and "Background" is amended by deleting "2320" wherever it appears and inserting in lieu thereof in each instance "2321".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

61. *Proposed Amendment:* Section 2B6.1(b) is amended by deleting "Characteristic" and inserting in lieu thereof "Characteristics".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

*§ 2C1.1 Offering, Giving, Soliciting, or Receiving a Bribe; Extortion Under Color of Official Right*

62. *Proposed Amendment:* Section 2C1.1(b) is amended by deleting "Apply" and inserting in lieu thereof "If more than one applies, use".

*Reason for Amendment:* The purpose of this amendment is to standardize the terminology used in the guidelines.

63. *Proposed Amendment:* Section 2C1.1(b)(1) is amended by deleting "action received" and inserting in lieu thereof "benefit received, or to be received,".

The Commentary to § 2C1.1 captioned "Application Notes" is amended in Note 2 in the first sentence by deleting "action received" and inserting in lieu thereof "benefit received, or to be received,", and by deleting "action (i.e., benefit or favor)" and inserting in lieu thereof "benefit"; in the second sentence by deleting "action received in return" and inserting in lieu thereof "benefit received or to be received,", and by deleting "such action" and inserting in lieu thereof "such benefit"; and in the third sentence by deleting "action" and inserting in lieu thereof "benefit".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline and commentary.

64. *Proposed Amendment:* The Commentary to § 2C1.1 captioned "Application Notes" is amended in Note 6 by deleting:

"When multiple counts are involved, each bribe is to be treated as a separate, unrelated offense not subject to § 3D1.2(d) or § 3D1.3(b). Instead, apply § 3D1.4. However, if a defendant makes several payments as part of a single bribe, that is to be treated as a single bribery offense involving the total amount of the bribe.",

and inserting in lieu thereof:

"In the case of multiple counts, treat each bribe as a separate, unrelated offense not subject to § 3D1.2(d); except, if the counts involved several related payments as part of a single bribe, treat the conduct as a single offense involving the total amount of the bribe (i.e., the counts are to be grouped under § 3D1.2(d)).".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary.

65. *Proposed Amendment:* The Commentary to § 2C1.1 captioned "Background" is amended in the eighth paragraph by deleting "extortions, conspiracies, and attempts" and inserting in lieu thereof "extortion, or attempted extortion,".

*Reason for Amendment:* This amendment corrects a minor technical error. This section expressly covers extortion and attempted extortion; conspiracy is covered through the operation of § 2X1.1. The present phraseology could be misread as overriding the application of § 2X1.1 in conspiracy cases.

66. *Issues concerning § 2C1.1 (Offering, Giving, Soliciting, or Receiving a Bribe; Extortion Under Color of Official Right) and § 2C1.2 (Offering, Giving, Soliciting, or Receiving a Gratuity):* For the purposes of this analysis, examples from § 2C1.1 (Bribery) are used. However, the analysis is equally applicable to § 2C1.2 (Gratuity).

Under the current bribery guideline, there is no enhancement for repeated instances of bribery if the conduct involves the same course of conduct or common scheme or plan and the same victim (as frequently is the case where the government is the victim) because such cases are grouped under § 3D1.2(b). In contrast, the fraud and theft guidelines provide a 2-level increase in cases of repeated instances under the second prong of the "more than minimal planning" definition.

Unlike the theft and fraud guidelines, it is arguable that the value of any bribe that was part of the same course of conduct or a common scheme or plan as the offense of conviction, but not included in the count of conviction, is excluded from consideration. This is because § 1B1.3(a)(2), which authorizes consideration of conduct not expressly included in the offense of conviction but part of the same course of conduct or common scheme or plan, applies only to offenses grouped under § 3D1.2(d). Thus, if the defendant pleads to one count of a bribery offense involving one $10,000 bribe in satisfaction of a 15 count indictment involving an additional $80,000 in separate bribes that were part of the same course of conduct, the current bribery guideline, unlike the theft and fraud guidelines, would not take into account the additional $80,000, and there would be no increase for repeated instances.

VOL 54 ISS 41 MR 3 1989 UMI

The current guideline may also create various anomalies because the multiple count rule (which applies only where the offenses are not grouped under § 3D1.2(b)) increases the offense level much faster than the monetary table. For example, an elected public official who takes three unrelated $200 bribes has an offense level of 21; the same defendant who took two unrelated $500,000 bribes would have an offense level of 20.

The Commission seeks comment and suggestions on whether and how the guidelines should be amended to address these issues. One possible way to address these issues is presented below, but the Commission seeks recommendations as to any other appropriate solutions. In the example shown below, an enhancement of 2 levels is added for repeated instances (similar to the second prong of "more than minimal planning" in the theft and fraud guidelines) and § 2D1.2(d) is amended to include bribery offenses.

An illustration of one possible way of addressing these issues follows:

Section 2C1.1(b) is amended by deleting "(1)" and "(2)" and inserting in lieu thereof "(A)" and "(B)" respectively; and by deleting "Apply the greater" and inserting in lieu thereof:

"(1) If the offense involved more than one bribe, increase by 2 levels.

(2) If more than one of the following applies, use the greater:".

The Commentary to § 2C1.1 captioned "Application Notes" is amended by deleting the text of Note 6 and inserting in lieu thereof:

"Related payments that, in essence, constitute a single bribe (e.g., a number of installment payments for a single action) are to be treated as a single bribe, even if charged in separate counts.".

Section 2C1.2(b) is amended by deleting "(1)" and "(2)" and inserting in lieu thereof "(A)" and "(B)" respectively; and by deleting "Apply the greater" and inserting in lieu thereof:

"(1) If the offense involved more than one gratuity, increase by 2 levels.

(2) If more than one of the following applies, use the greater:".

The Commentary to § 2C1.2 captioned "Application Notes" is amended by deleting the text of Note 4 and inserting in lieu thereof:

"Related payments that, in essence, constitute a single gratuity (e.g., separate payments for airfare and hotel for a single vacation trip) are to be treated as a single gratuity, even if charged in separate counts.".

Section 3D1.2(d) is amended in the listing of offense sections in the third paragraph by deleting "§ 2C1.1", and in the listing of offense sections in the second paragraph by inserting in order by section number "§§ 2C1.1, 2C1.2,".

Section 3D1.5 is amended in the Illustrations following the Commentary by deleting Illustration 2 and renumbering Illustrations 3, 4, and 5 as 2, 3 and 4 respectively.

*§ 2C1.2 Offering, Giving, Soliciting, or Receiving a Gratuity*

67. *Proposed Amendment:* Section 2C1.2(b) is amended by deleting "Apply" and inserting in lieu thereof "If more than one applies, use".

*Reason for Amendment:* The purpose of this amendment is to standardize the terminology used in the guidelines.

68. *Proposed Amendment:* The Commentary to § 2C1.2 captioned "Application Notes" is amended in Note 4 by deleting:

"When multiple counts of receiving a gratuity are involved, each count is to be treated as a separate, unrelated offense not subject to § 3D1.2(d) or § 3D1.3(b). Instead, apply § 3D1.4.".

and inserting in lieu thereof the following:

"In the case of multiple counts, treat each gratuity as a separate, unrelated offense not subject to § 3D1.2(d); except, if the counts involved several related payments as part of a single gratuity, treat the conduct as a single offense involving the total amount of the gratuity (i.e., the counts are to be grouped under § 3D1.2(d)).".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary and to specify how multiple counts that involve several related payments as part of a single gratuity are to be treated.

*§ 2D1.1 Unlawful Manufacturing, Importing, Exporting, or Trafficking (Including Possession With Intent To Commit These Offenses)*

69. *Proposed Amendment:* Section 2D1.1(a) is amended by deleting:

"(a) Base Offense Level:

(1) 43, for an offense that results in death or serious bodily injury with a prior conviction for a similar drug offense; or

(2) 38, for an offense that results in death or serious bodily injury and involved controlled substances (except Schedule III, IV, and V controlled substances and less than: (A) Fifty kilograms of marihuana, (B) ten kilograms of hashish, and (C) one kilogram of hashish oil); or

(3) For any other offense, the base offense level is the level specified in the Drug Quantity Table below.",

and inserting in lieu thereof:

"(a) Base Offense Level:

(1) 43, if the defendant is convicted under 21 U.S.C. 841 (b)(1)(A), (b)(1)(B), or (b)(1)(C), or 21 U.S.C. 960 (b)(1), (b)(2), or (b)(3), and the offense of conviction establishes that death or serious bodily injury resulted from the use of the substance and that the defendant committed the offense after one or more prior convictions for a similar offense; or

(2) 38, if the defendant is convicted under 21 U.S.C. 841(b)(1)(A), (b)(1)(B), or (b)(1)(C), or 21 U.S.C. 960 (b)(1), (b)(2), or (b)(3), and the offense of conviction establishes that death or serious bodily injury resulted from use of the substance; or

(3) The offense level specified in the Drug Quantity Table set forth in subsection (c) below.".

Section 2D1.1 captioned "DRUG QUANTITY TABLE" is amended by deleting "DRUG QUANTITY TABLE" and inserting in lieu thereof "(c) DRUG QUANTITY TABLE".

*Reason for Amendment:* The purpose of this amendment is to provide that subsections (a) and (b) apply only in the case of a conviction under circumstances specified in the statutes cited.

70. *Proposed Amendment:* Section 2D1.1(b) is amended by deleting "a firearm or other dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)".

*Reason for Amendment:* The purpose of the amendment is to clarify the guideline. Related amendment: 16 (§ 2A2.1).

71. *Proposed Amendment:* Section 2D1.1(b) is amended by adding the following new Specific Offense Characteristic:

"(2) If the defendant is convicted of violating 21 U.S.C. 960(a) under circumstances in which (A) an aircraft other than a regularly scheduled commercial air carrier was used to import the controlled substance, or (B) the defendant acted as a pilot, copilot, captain, navigator, flight officer, or any other operation officer aboard any craft or vessel carrying a controlled substance, increase by 2 levels, but if the resulting offense level is less than level 26, increase to level 26.";

The Commentary to § 2D1.1 captioned "Application Notes" is amended by inserting the following new Application Note:

"(14) If subsection (b)(2)(B) applies, do not apply § 3B1.3 (Abuse of Position of Trust or Use of Special Skill).";

The Commentary to § 2D1.1 captioned "Background" is amended by inserting the following new paragraph between the third and fourth paragraphs:

"Specific Offense Characteristic (b)(2) is mandated by section 6453 of the Omnibus Anti-Drug Abuse Act of 1988 (Pub. L. 100-690).".

*Reason for Amendment:* The purpose of this amendment is to implement the directive to the Commission in section 6453 of the Omnibus Anti-Drug Abuse Act of 1988 (Pub L. 100-690).

72. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 by adding in the appropriate place (by alphabetical order) the following new subdivisions—

(1) In the listing captioned "Schedule III Substances":

"1 gm of Benzphetamine = 4 mg of heroin/4 gm of marihuana",

(2) In the listing captioned "Cocaine and Other Schedule I and II Stimulants":

"1 gm of 4-Methyl-aminorex ('Euphoria') = 0.5 gm of cocaine/0.1 gm of heroin".

*Reason for Amendment:* The purpose of this amendment is to make the Drug Equivalency Table more comprehensive.

73. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 immediately following the caption "Cocaine and Other Schedule I and II Stimulants" and the caption "LSD, PCP, and Other Hallucinogens" by inserting in each instance "(and their immediate precursors)".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary.

74. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 by deleting:

"1 gm of Phenylacetone/$P_2P$ (amphetamine precursor) = 0.375 gm of cocaine/0.075 gm of heroin

1 gm of Phenylacetone/$P_2P$ (methamphetamine precursor) = 0.833 gm of cocaine/0.167 gm of heroin"

and inserting in lieu thereof:

"1 gm Phenylacetone/$P_2P$ (when possessed for the purpose of manufacturing methamphetamine) = 0.833 gm of cocaine/0.167 gm of heroin

1 gm Phenylacetone/$P_2P$ (in any other case) = 0.375 gm of cocaine/0.075 gm of heroin".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary and correct a typographical error.

75. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 by deleting: "The following dosage equivalents for certain common drugs are provided by the Drug Enforcement Administration to facilitate the application of § 2D1.1 of the guidelines in cases where the number of doses, but not the weight of the controlled substances are known. The dosage equivalents provided in these tables reflect the amount of the pure drug contained in an average dose. Dosage Equivalency Table",

and inserting in lieu thereof the following:

"11. If the number of doses, pills, or capsules but not the weight of the controlled substance is known, multiply the number of doses, pills, or capsules by the typical weight per dose to estimate the total weight of the controlled substance (e.g., 100 doses of Bufotenine at 1 mg per dose = 100 mg of Bufotenine). The Typical Weight Per Unit Table, prepared from information provided by the Drug Enforcement Administration, displays the typical weight per dose, pill, or capsule for common controlled substances.—Typical Weight Per Unit (Dose, Pill, or Capsule) Table".

The Commentary to § 2D1.1 captioned "Application Notes" is amended by renumbering the current Note 11 as Note 12.

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary.

76. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 by adding the following section immediately after the section captioned "Depressants":

"Marihuana

1 marihuana cigarette = 0.5 gm".

*Reason for Amendment:* The purpose of this amendment is to make the listing more comprehensive.

77. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended by inserting the following as an additional note:

"13. If the quantity of drugs substantially exceeds that required for level 36, an upward departure may be warranted.".

*Reason for Amendment:* The purpose of this amendment is to add an Application Note to the Commentary of § 2D1.1 concerning possible departure in the case of an extremely large quantity of drugs.

78. *Proposed Amendment:* The Drug Quantity Table to § 2D1.1 is amended by inserting "Methamphetamine," immediately following "PCP or" wherever it appears and by inserting "or Pure Methamphetamine" following "Pure PCP" wherever it appears.

The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 9 by inserting "and methamphetamine" immediately following "phencyclidine (PCP)", by inserting ", pure methamphetamine" immediately following "amounts of pure PCP" wherever it appears, and by inserting "or methamphetamine" following "appropriate for PCP".

The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10, in the Drug Equivalency Table, Cocaine and Other Schedule I and II Stimulants by deleting "2.0 gm of cocaine/0.4 gm of heroin" immediately following "1 gm of Methamphetamine =" and inserting in lieu thereof "5.0 gm of cocaine/1.0 gm of heroin" and by deleting "0.833 gm of cocaine/0.167 gm of heroin" immediately following "(methamphetamine precursor)" and inserting in lieu thereof "2.08 gm of cocaine/0.418 gm of heroin".

The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 by inserting "methamphetamine, fentanyl," immediately following "i.e., heroin, cocaine, PCP," and by deleting:

"one gram of a substance containing methamphetamine, a Schedule I stimulant, is to be treated as the equivalent of two grams of a substance containing cocaine in applying the Drug Quantity Table.",

and inserting in lieu thereof:

"one gram of a substance containing oxymorphone, a Schedule I opiate, is to be treated as the equivalent of five grams of a substance containing heroin in applying the Drug Quantity Table.".

*Reason for Amendment:* The purpose of this amendment is to reflect statutory changes with respect to the drug methamphetamine.

79. *Proposed Amendment:* The Drug Quantity Table in § 2D1.1 is amended by deleting, "or other Schedule I or II controlled" wherever it appears and inserting "Schedule I or II Depressants or" immediately before "Schedule III", wherever it appears, and by inserting "substances" immediately after "Schedule IV" and immediately after "Schedule V" wherever they appear.

The Drug Quantity Table in § 2D1.1 is amended by deleting "equivalent" wherever it appears and inserting in lieu thereof "the equivalent amount of other".

The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10, in the tables captioned Drug Equivalency Tables, by deleting "Other Schedule I or II Substances" and inserting in lieu thereof "Schedule I and II Depressants".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline and Commentary.

80. *Elimination of Minor Gaps in the Drug Quantity Table:* There are minor

VOL 54 ISS 41 MR 3 1989 UMI

gaps in the drug quantity table (e.g., Level 24 applies to 80–99 kg of Marihuana; Level 26 applies to 100–399 kg of Marihuana). Questions have repeatedly been raised as to what is proper offense level for a quantity falling between the stated levels (e.g., 99.4 kg of Marihuana). Because the "base offense levels in § 2D1.1 are either provided directly by the Anti-Drug Abuse Act of 1986 or are proportional to the levels established by statute" (Guidelines Manual p. 2.46), the correct interpretation is that at least 100 kg is required for Level 26.

The Commission seeks comment on eliminating these gaps by revising the second through the fifteenth paragraph of the Table to read "At least—but less than—" for each controlled substance (e.g., Level 24 would include "At least 80 kg but less than 100 kg of Marihuana"; Level 26 would include "At least 100 kg but less than 400 kg of Marihuana").

81. *Proposed Amendment:* Section 2D1.1 is amended in the table captioned "Drug Quantity Table" by deleting "**" immediately following "Level 32" and immediately following "Level 26", and by deleting "** Statute specifies a mandatory minimum sentence.".

The footnote marked "*" to the Drug Equivalency Table in § 2D1.1 is amended by deleting the text of the footnote in its entirety as follows:

"The scale amounts for all controlled substances refer to the total weight of the controlled substance. Consistent with the provisions of the Anti-Drug Abuse Act, if any mixture of a compound contains any detectable amount of a controlled substance, the entire amount of the mixture or compound shall be considered in measuring the quantity. If a mixture or compound contains a detectable amount of more than one controlled substance, the most serious controlled substance shall determine the categorization of the entire quantity.",

and inserting in lieu thereof:

"Unless otherwise specified, the weight of a controlled substance set forth in the table refers to the entire weight of any compound or mixture containing a detectable amount of the controlled substance. If a mixture or compound contains more than one controlled substance, the weight of the entire mixture or compound is assigned to the controlled substance that results in the greater offense level. In the case of a mixture or compound containing PCP or methamphetamine, use the offense level determined by the entire weight of the mixture or compound, or the offense level determined by the weight of the pure PCP or methamphetamine, whichever is greater.".

The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 9 by inserting immediately before the period at the end of the first sentence:

", except in the case of PCP or methamphetamine for which the guideline itself provides for the consideration of purity (see the footnote to the Drug Quantity Table)".

and by deleting:

"Congress provided an exception to purity considerations in the case of phencyclidine (PCP). 21 U.S.C. 841(b)(1)(A). The legislation designates amounts of pure PCP and mixtures in establishing mandatory sentences. The first row of the table illustrates this distinction as one kilogram of PCP or 100 grams of pure PCP. Allowance for higher sentences based on purity is not appropriate for PCP.".

The Commentary to 2D1.1 captioned "Background" is amended in the third paragraph by deleting "with two asterisks represent mandatory minimum sentences established by the Anti-Drug Abuse Act of 1986. These levels reflect sentences" and inserting in lieu thereof "at levels 32 and 36 establish guideline ranges", and by deleting "requirement" and inserting in lieu thereof "minimum".

*Reason for Amendment:* The purposes of this amendment are to clarify the operation of the guideline, and to delete an unecessary footnote.

82. *Calculation of the Weight of LSD for Guideline Purposes:* The question has repeatedly arisen as to whether the carrier on which D-lysergic acid diethylamide (LSD) is placed should be considered as part of the mixture and therefore weighed.

LSD may be sold on various carriers such as a sugar cube or on blotter paper. A sugar cube weighs approximately 2,270 mg., a piece of blotter paper the size used to hold one dose weighs about 14 mg., and a dose of LSD weighs about .05 mg. Therefore, if the carrier was weighed as part of the mixture, a person selling 100 doses of LSD would have an offense level of 32, or 26, or 12 depending on whether the LSD was on a sugar cube, blotter paper, or in a liquid form.

The Commission seeks comment on the most appropriate response to this situation (i.e., should or should not the Commission amend the guidelines or Commentary to exclude the weight of the "carrier" in LSD cases for guideline purposes?).

83. *Relationship of Marihuana Plants to Marihuana:* Section 6479 of the Omnibus Anti-Drug Abuse Act of 1988 alters the manner in which the offense level for marihuana plants is calculated under 21 U.S.C. 841. Under 21 U.S.C. 841, as amended, an offense involving 100 marihuana plants is treated as equivalent to an offense involving 100 kilograms of marihuana, and an offense involving 1,000 marihuana plants is treated as equivalent to an offense involving 1,000 kilograms of marihuana. From the legislative history, it appears that this change was directed primarily towards large scale marihuana growers. The statutory authorized maximum for an offense involving fewer than 50 plants (five years) remains unchanged.

This statutory revision requires revision of the relationship of marihuana plants to marihuana in the guidelines for offense levels 26 and above (currently 100 marihuana plants is treated as the equivalent of 10 kilograms of marihuana; 1000 marihuana plants is treated as the equivalent of 100 kilograms of marihuana).

A more difficult question is how to treat this relationship when there are fewer than 100 marihuana plants. Information from the Drug Enforcement Administration indicates that the yield from a marihuana plant varies but the average yield is about 0.4 kilogram. A plant could be expected to yield 1 kilogram only with sophisticated growing methods.

The Commission seeks comment on how this statutory revision should be addressed. Specifically, should or should not the Commission use a lower ratio of marihuana plants to marihuana if there are fewer than 100 plants; and, if so, at which point or points should a lower ratio be used?

84. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 in the section of the "Drug Equivalency Tables" captioned "Schedule I or II Opiates" on the line beginning "(piperidinyl] Propanamide) =" by deleting "31.25 gm" and inserting in lieu thereof "2.5 gm".

*Reason for Amendment:* The purpose of this amendment is to conform the equivalency for fentanyl to that set forth in the Drug Quantity Table and statute.

85. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 in the section of "Dosage Equivalency Table" captioned "Hallucinogens" by deleting "STP (DOM) Dimethoxyamphetamine" and inserting in lieu thereof "2, 5-Dimethoxy-4-methylamphetamine (STP, DOM)".

The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 in the section of the "Dosage Equivalency Table" in the section captioned "Stimulants" by deleting

"Preludin 25 mg" and inserting in lieu thereof "Phenmetrazine (Preludin) 75 mg".

*Reason for Amendment:* The purpose of this amendment is to substitute generic names for the two substances and to conform the dosage of Phenmetrazine currently being manufactured.

*Additional Explanatory Statement:* This amendment was recommended by the Drug Control Section of the Drug Enforcement Administration.

86. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 in the "Drug Equivalency Tables" in the section captioned "Schedule III Substances" by deleting:

"1 gm of Thiohexethal = 2 mg of heroin/2 gm of marihuana",

in the "Dosage Equivalency Table" in the section captioned "Hallucinogens" by deleting:

"Anhalamine—300 mg",
"Anhalonide—300 mg",
"Anhalonine—300 mg",
"Lophophorine—300 mg",
"Pellotine—300 mg",

and in the Dosage Equivalency Table in the section captioned "Depressants" by deleting:

"Bralloberbital—30 mg",
"Eldoral—100 mg",
"Eunarcon—100 mg",
"Hexethel—100 mg",
"Thiohexethal—60 mg".

*Reason for Amendment:* The purpose of this amendment is to delete substances that either are not controlled substances or are no longer manufactured.

*Additional Explanatory Statement:* This amendment was recommended by the Drug Control Section of the Drug Enforcement Administration.

87. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 in the "Drug Equivalency Tables" in the section captioned "Cocaine and Other Schedule I and II Stimulants" by inserting in the appropriate place in alphabetical order:

"1 gm of Methylphenidate (Ritalin) = 0.5gm of cocaine/0.1 gm of heroin",

and in the section captioned "LSD, PCP, and Other Schedule I and II Hallucinogens" by inserting in the appropriate place in alphabetical order:

"1 gm of 3, 4-Methylenedioxy-N-ethylamphetamine/MDEA = .03 gm of heroin or PCP",

and in the Dosage Equivalency Table in the section captioned "Depressants" by inserting in the appropriate place in alphabetical order:

"Glutethimide (Doriden) = 500 mg".

*Reason for Amendment:* The purpose of this amendment is to make the Drug Equivalency Tables and Dosage Equivalency Table more comprehensive.

*Additional Explanatory Statement:* This amendment was recommended by the Drug Control Section of the Drug Enforcement Administration.

88. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 in the "Dosage Equivalency Table" in the section captioned "Hallucinogens" by deleting ".1 mg" in the line beginning "LSD (Lysergic acid diethylamide)" and inserting in lieu thereof ".05 mg", by deleting "LSD tartrate .05 mg", by deleting "Peyote 12 mg", and by inserting in the appropriate place in alphabetical order:

"Peyote (dry)—12 gm",
"Peyote (wet)—120 gm",
"Psilocybe mushrooms (dry)—5 gm",
"Psilocybe mushrooms (wet)—50 gm".

The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 in the "Dosage Equivalency Table" in the section captioned "Stimulants" by deleting "Ethylamphetamine HCL 12 mg" and "Ethylamphetamine $SO_4$ 12 mg", by deleting "Amphetamines" and inserting in lieu thereof "Amphetamine", by deleting "Methamphetamines" and inserting in lieu thereof "Methamphetamine", and by deleting "Methamphetamine combinations 5 mg".

*Reason for Amendment:* The purposes of this amendment are to provide more accurate approximations of the dosage for certain controlled substances, and to eliminate unnecessary references.

*Additional Explanatory Statement:* This amendment was recommended by the Drug Control Section of the Drug Enforcement Administration.

89. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 in "Drug Equivalency Tables" in the section captioned "Schedule III Substances" by deleting "2 mg of heroin/2 gm of marihuana" immediately following "1 gm of Glutethimide =" and inserting in lieu thereof "0.4 mg of heroin/0.4 gm of marihuana",

and by deleting:

"1 gm of Paregoric = 2 mg of heroin/2 gm of marihuana.

1 gm of Hydrocodone Cough Syrups = 2 mg of heroin/2 gm marihuana",

and inserting in lieu thereof:

"1 ml of Paregoric = 0.25 mg of heroin/0.25 gm of marihuana.

1 ml of Hydrocodone Cough Syrup = 1 mg of heroin/1 gm of marihuana".

*Reason for Amendment:* The purpose of this amendment is to provide more accurate approximations of the equivalencies for certain controlled substances.

*Additional Explanatory Statement:* This amendment was recommended by the Drug Control Section of the Drug Enforcement Administration.

90. *Proposed Amendment:* The Commentary to § 2D1.1 captioned "Application Notes" is amended in Note 10 in the section of the "Drug Equivalency Tables" captioned "LSD, PCP, and Other Schedule I and II Hallucinogens" by deleting:

"1 gm of Liquid phencyclidine = 0.1 gm of heroin or PCP".

*Reason for Amendment:* The purpose of this amendment is to delete an incorrect equivalency.

*§ 2D1.2 Involving Juveniles in the Trafficking of Controlled Substances*

91. *Proposed Amendment:* The Commentary to § 2D1.2 captioned "Application Notes" is amended in Note 1 by deleting "amount from the first and second offense" and inserting in lieu thereof "amounts from the two offenses not involving juveniles".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

92. *Sections 6454, 6458, and 6459 of the Omnibus Anti-Drug Abuse Act of 1988:* Section 6458 expands the coverage of 21 U.S.C. 845(a) to include playgrounds, youth centers, swimming pools, and video arcades. Section 6459 amends 21 U.S.C. 845(a) to include "receiving a controlled substance from a person under 18 years of age, other than an immediate family member, in violation of this title or title III." Section 6454 contains the following direction to the Sentencing Commission:

"(a) In General–Pursuant to its authority under section 994(p) of title 28, United States Code, and section 21 of the Sentencing Act of 1987, the United States Sentencing Commission shall promulgate guidelines, or shall amend existing guidelines to provide that a defendant convicted of violating section 405, 405A, or 405B of the Controlled Substances Act (21 U.S.C. 845, 845a or 845b) involving a person under 18 years of age shall be assigned an offense level under chapter 2 of the sentencing guidelines that is—

(1) Two levels greater than the level that would have been assigned for the underlying controlled substance offense; and

BEST COPY AVAILABLE

VOL 54 ISS 41 MR 3 1989 UMI

(2) In no event less than level 26.

(b) Effects of Amendment—If the sentencing guidelines are amended after the effective date of this section, the Sentencing Commission shall implement the instruction set forth in subsection (a) so as to achieve a comparable result.

(c) Multiple Enhancements—The guidelines referred to in subsection (a), as promulgated or amended under such subsection, shall provide that an offense that could be subject to multiple enhancements pursuant to such subsection is subject to not more than one such enhancement."

The Commission seeks comment on the most appropriate method of responding to these statutory provisions. One possible approach follows, but suggestions for alternative approaches are also invited. For example, §§ 2D1.2 and 2D1.3 could be amended by deleting the guidelines and accompanying Commentary in their entirety and inserting in lieu thereof:

*"§ 2D1.2 Drug Offenses Occurring Near Protected Locations or Involving Underage or Pregnant Individuals*

(a) Base offense level:

(1) 2 plus the offense level from § 2D1.1, but in no event less than level 26, if the offense involved a person less than 18 years of age; or

(2) 1 plus the offense level from § 2D1.1, but in no event less than level 13, in any other case.

**Commentary**

*Statutory Provisions:* 18 U.S.C. 845, 845a, 845b.

*Background:* This section implements the direction to the Commission in section 6454 of the Omnibus Anti-Drug Abuse Act of 1988.".

This approach would implement the directive in section 6454, expand the coverage of the guideline to include the provision of sections 6458 and 6459, and provide an intermediate enhancement for the portions of 21 U.S.C. 845, 845a, and 845b not included in the statutory direction to the Commission.

*§ 2D1.4 Attempts and Conspiracies*

93. *Proposed Amendment:* The Commentary to § 2D1.4 captioned "Application Notes" is amended in Note 1 by deleting:

"Where the defendant was not reasonably capable of producing the negotiated amount, the court may depart and impose a sentence lower than the sentence that would otherwise result",

and inserting in lieu thereof:

"However, where the court finds that the defendant did not intend to produce and was not reasonably capable of producing the negotiated amount, the court shall exclude from the guideline calculation the amount that it finds the defendant did not intend to produce and was not reasonably capable of producing.".

*Reason for Amendment:* Application Note 1 currently provides that the "weight under negotiation in an uncompleted distribution shall be used to calculate the applicable amount." The instruction then provides "Where the defendant was not reasonably capable of producing the negotiated amount the court may depart and impose a sentence lower than the sentence that would otherwise result." This provision may result in inflated offense levels in uncompleted offenses where a defendant is merely "puffing," even though the court is then authorized to address the situation by a downward departure. This amendment provides a more direct procedure for calculating the offense level where the court finds that the defendant did not intend to produce and was not reasonably capable of producing the negotiated amount.

94. *Proposed Amendment:* The Commentary to § 2D1.4 captioned "Application Notes" is amended in Note 1 by deleting "the sentence should be imposed only on the basis of the defendant's conduct or the conduct of co-conspirators in furtherance of the conspiracy that was known to the defendant or was reasonably foreseeable" and inserting in lieu thereof "see Application Note 1 to § 1B1.3 (Relevant Conduct).".

*Reason for Amendment:* The purpose of this amendment is to conform this Commentary to the revision of § 1B1.3 (amendment 12).

95. *Proposed Amendment:* Section 2D1.4(a) is amended by deleting "participating in an incomplete" and inserting in lieu thereof "a".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline.

*§ 2D1.5 Continuing Criminal Enterprise*

96. *Proposed Amendment:* Section 2D1.5 is amended by deleting: "(a) Base Offense Level: 36" and inserting in lieu thereof the following:

"(a) Base Offense Level (Apply the greater):

(1) 4 plus the offense level from § 2D1.1 applicable to the underlying offense; or

(2) [37][38].".

The Commentary to § 2D1.5 captioned "Background" is amended in the first paragraph by deleting "base offense level of 36" and inserting in lieu thereof "minimum base offense level of [37][38]", and in the second paragraph by deleting "for second convictions" and inserting in lieu thereof "for the first conviction, a 30 year mandatory minimum penalty for a second conviction,".

*Reason for Amendment:* The purpose of this amendment is to reflect the increased mandatory minimum penalty for this offense pursuant to section 6461 of the Omnibus Anti-Drug Abuse Act of 1988 (Pub. L. 100-690).

*Additional Explanatory Statement:* The Omnibus Anti-Drug Abuse Act of 1988 (Pub. L. 100-690) creates an increased mandatory minimum penalty for violations of 21 U.S.C. 848. The Commission seeks public comment on the general question of how the guidelines should incorporate mandatory minimum penalties. Specifically, if the Commission chooses to reflect the minimum penalty in the base offense level, what principles should govern the selection of the offense level? In this instance, the mandatory minimum penalty (240 months) is approximately the midpoint of the sentencing range for a defendant in Criminal History Category I if level 37 is chosen, but it is close to the low end of the range if level 38 is chosen. Which of these approaches, or what other approach, is most appropriate?

*§ 2D1.6 (Use of a Communications Facility in Committing Drug Offense)*

97. *Proposed Amendment:* Section 2D1.6 is amended by deleting "12" and inserting in lieu thereof: "(Apply the greater):

(1) [3 levels less than the][The] offense level from § 2D1.1 applicable to the controlled substance offense committed, caused, or facilitated; or

(2) 12.".

The Commentary to § 2D1.6 is amended by inserting immediately before "Background" the following:

"*Application Note:*

1. It is expected that, in the vast majority of cases, the offense level for the underlying offense (the controlled substance offense committed, caused, or facilitated) will be level 12 or greater. An alternative base offense level of 12 is provided under subsection (a)(2) because it may not always be possible to determine the offense level for the underlying offense. In the rare case in which it can be determined that the offense level for the underlying offense is less than level 12, a downward departure may be warranted.".

*Reason for Amendment:* The purpose of this amendment is to reduce unwarranted disparity by requiring consideration of the amount of the controlled substance involved in the offense, thus conforming this guideline to analogous guidelines.

[S2] COPY AVAILABLE

*Additional Explanatory Statement:* The statute to which this guideline applies (21 U.S.C. 843(b)) prohibits the use of a communications facility to commit, cause, or facilitate a felony drug offense. Frequently, a conviction under this statute is the result of a plea bargain because the statute has a low maximum (four years with no prior felony drug conviction; eight years with a prior felony drug conviction) and no mandatory minimum.

The current guideline has base offense level of 12 and no specific offense characteristics. Therefore, the scale of the underlying drug offense does not affect the guideline. This results in a departure being warranted in the vast majority of cases if the scale of the underlying drug offense is a permissible grounds for departure. A recent Second Circuit decision (U.S. v. Correa-Vargas, CA 2, No. 88-1167, 10/18/88), for example, upheld a lower court decision for a substantial departure based upon the quantity of the controlled substance involved in the underlying offense.

Without guidance as to whether how far to depart, the potential for unwarranted disparity is substantial. Under the proposed amendment, the guideline would take into account the scale of the underlying offense.

The Commission seeks comment on whether the base offense level in subsection (a)(1) should be set at the offense level from § 2D1.1 for the underlying offense; or whether it should be set at 3-levels less than that for the underlying offense, which would be comparable to the treatment of certain uncompleted conspiracies and attempts under § 2X1.1

*§ 2D1.10 Endangering Human Life While Illegally Manufacturing a Controlled Substance*

98. *Proposed Amendment:* Chapter Two, Part D is amended by inserting as an additional guideline the following:

*"§ 2D1.10 Endangering Human Life While Illegally Manufacturing a Controlled Substance*

(a) Base Offense Level: 3 plus the offense level from the Drug Quantity Table in § 2D1.1, but in no event less than 20.

**Commentary**

*Statutory Provision:* 21 U.S.C. _____".

*Reason for Amendment:* The purpose of this amendment is to create a new guideline covering the new offense in section 6301 of the Omnibus Anti-Drug Abuse Act of 1988.

*Additional Explanatory Statement:* Under the proposed guideline, the offense level would vary with the type and quantity of drug manufactured plus a 3 level enhancement for the risk created, with a minimum offense level of 20.

**Chapter Two Part D, Subpart I**

99. *Chapter Two Part D, Subpart I:* Sections 6053, 6055, and 6057 of the Omnibus Anti-Drug Abuse Act of 1988: Sections 6053, 6055, and 6057 of the Omnibus Anti-Drug Abuse Act of 1988 concern the chemicals and equipment used to manufacture controlled substances. Section 6053 creates recordkeeping requirements for "listed precursor chemicals" and "listed essential chemicals." Section 6055 makes it unlawful to (1) possess a listed chemical with intent to manufacture a controlled substance, (2) possess or distribute a listed chemical knowing or having reasonable cause to believe it will be used to manufacture a controlled substance, and (3) import or export such chemicals. Section 6057 makes it unlawful to possess, manufacture, distribute, or import certain laboratory equipment and supplies with intent to manufacture a controlled substance. The Commission intends to promulgate guidelines to cover these statutes based upon the type and quantity of the listed substance and equipment, and the potential amount of the controlled substance that could be produced. The Commission seeks public comment on how to structure a guideline that will best accomplish this result.

100. *Section 6254 (h) of the Omnibus Anti-Drug Abuse Act of 1988:* Section 6254(h) of the Omnibus Anti-Drug Abuse Act of 1988 creates a new offense of polluting Federal lands in the course of committing a substantive violation of 21 U.S.C. § 841(a) (knowing and intentional manufacture, distribution, or dispensing, or possession with intent to manufacture, distribute, or dispense a controlled or counterfeit substance). The statute provides a maximum of 5 years imprisonment for any person "who violates [21 U.S.C. 841](a)" and:

knowingly or intentionally uses a poison, chemical, or other hazardous substance on Federal land and by such use—

(A) Creates a serious hazard to humans, wildlife, or domestic animal,

(B) Degrades or harms the environment or natural resources or

(C) Pollutes an aquifer, spring, stream, river, or body of water[.]

The Commission intends to add a guideline to cover this offense. The Commission seeks comment as to the appropriate base offense level and specific offense characteristics for this guideline, and whether this guideline should be incorporated in Part D or in Part Q of this Chapter.

*§ 2D2.1 Unlawful Possession*

101. *Proposed Amendment:* Section 2D2.1 is amended by inserting the following as a new subsection:

"(b) Cross Reference

(1) If the defendant is subject to the penalties pertaining to possession of cocaine base set forth in the third sentence of 18 U.S.C. 844(a), apply § 2D1.1 as though the defendant had been convicted of possession with intent to distribute the cocaine base.";

The Commentary to § 2D2.1 captioned "Background" is amended by deleting:

*"Background:* Absent a prior drug related conviction, the maximum term of imprisonment authorized by statute is one year. With a single prior drug related conviction, a mandatory minimum term of imprisonment of fifteen days is required by statute and the maximum term of imprisonment authorized is increased to two years. With two or more prior drug related convictions, a mandatory minimum term of imprisonment of ninety days is required by statute and the maximum term of imprisonment authorized is increased to three years.",

and inserting in lieu thereof the following:

"*Background:* 21 U.S.C. 844(a) sets forth mandatory minimum penalties for several categories of simple possession cases. When a mandatory minimum penalty is higher than the guideline sentence, the statutory minimum becomes the guideline sentence. § 5G1.1(b). The cross-reference to § 2D1.1 accommodates the mandatory minimum penalty for possession of cocaine base.".

*Reason for Amendment:* The purpose of this amendment is to reflect the mandatory minimum penalty created by section 6371 of the Omnibus Anti-Drug Abuse Act of 1988.

*§ 2D2.3 Operating or Directing the Operation of a Common Carrier Under the Influence of Alcohol or Drugs*

102. *Proposed Amendment:* Section 2D2.3 is amended by deleting: "(a) Base Offense Level: 6", and inserting in lieu thereof the following:

"(a) Base Offense Level:

(1) [26][28], if death resulted; or

(2) 21, if serious bodily injury resulted; or

(3) 8, otherwise.

[(b) Note:

If the defendant is convicted of a single count involving the death or serious bodily injury of more than one person, apply Chapter Three, Part D (Multiple Counts) as if the defendant had been convicted of a separate count for each such victim.]".

VOL 54 ISS 41 MR 3 1989 UMI

The Commentary to § 2D2.3 is amended by adding, as an additional section:

"Background: This guideline implements the specific directions to the Commission in section 6482 of the Omnibus Anti-Drug Abuse Act of 1988 (Pub. L. 100-690).".

*Reason for Amendment:* The purpose of this amendment is to implement the directive to the Commission in section 6482 of the Omnibus Anti-Drug Abuse Act of 1988 (Pub. L. 100-690).

*Additional Explanatory Statement:* Section 6482 of the Omnibus Anti-Drug Abuse Act of 1988 directs the Commission to set an offense level "that is not less than level 26" if death results from a violation of 18 U.S.C. 342 and "not less than level 21" if serious bodily injury results. The Commission seeks public comment on the appropriate means of implementing with this directive. Specifically, should the Commission choose offense level 26 or a higher offense level, such as level 28, when Congress directs the use of a level "not less than" level 26. If a level 26 is chosen, is the note in proposed subsection (b) a suitable device to take account of multiple deaths or injury resulting from this offense.

*§ 2E1.1 Unlawful Conduct Relating to Racketeer Influenced and Corrupt Organizations*

103. *Proposed Amendment:* The Commentary to § 2E1.1 captioned "Application Notes" is amended by inserting the following note:

"4. Certain conduct may be charged in the count of conviction as part of a "pattern of racketeering activity" even though the defendant has previously been sentenced for that conduct. Where such previously imposed sentence resulted from a conviction sustained prior to the last overt act of the instant offense, treat as a prior sentence under § 4A1.2(a)(1) and not as part of the instant offense. This treatment is designed to produce a result consistent with the distinction between the instant offense and criminal history found throughout the guidelines. If this treatment produces an anomalous result in a particular case, a guideline departure may be warranted.".

*Reason for Amendment:* This amendment adds an application note to clarify the treatment of certain conduct for which the defendant previously has been sentenced as either part of the instant offense or prior criminal record. The amendment treats such conduct consistently with the treatment of similar conduct in § 2D1.5 (Continuing Criminal Enterprise) as amended effective 10/15/88.

*§ 2E1.3 Violent Crimes in Aid of Racketeering Activity*

104. *Proposed Amendment:* The Commentary to § 2E1.3 captioned "Statutory Provision" is amended by deleting "1952B" and inserting in lieu thereof "1959 (formerly 18 U.S.C. 1952B)".

*Reason for Amendment:* The purpose of this amendment is to reflect the redesignation of this statute.

* * * * *

*§ 2E1.4 Use of Interstate Commerce Facilities in the Commission of Murder-For-Hire*

105. *Proposed Amendment:* The Commentary to § 2E1.4 captioned "Statutory Provision" is amended by deleting "1952A" and inserting in lieu thereof "1958 (formerly 18 U.S.C. 1952A)".

*Reason for Amendment:* The purpose of this amendment is to reflect redesignation of this statute.

* * * * *

*§ 2E1.5 Hobbs Act Extortion or Robbery*

106. *Proposed Amendment:* Section 2E1.5 is amended by deleting "the guideline provision for extortion or robbery" and inserting in lieu thereof "§ 2B3.1 (Robbery), § 2B3.2 (Extortion by Force or Threat of Injury or Serious Damage), § 2B3.3 (Blackmail and Similar Forms of Extortion), or § 2C1.1 (Offering, Giving, Soliciting, or Receiving a Bribe; Extortion Under Color of Official Right)".

The Commentary to § 2E1.5 captioned "Application Notes" is amended by deleting the entire text thereof, including the caption "Application Note:".

*Reason for Amendment:* The purpose of this amendment is to move material from the commentary to the guideline where it more appropriately belongs.

*§ 2E2.1 Making, Financing, or Collecting an Extortionate Extension of Credit*

107. *Proposed Amendment:* Section 2E2.1 is amended in subsection (b)(1)(B) by deleting "a firearm or a dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)", and in subsection (b)(1)(C) by deleting "a firearm or other dangerous weapon" and inserting in lieu thereof "any dangerous weapon (including a firearm)".

*Reason for Amendment:* The purposes of this amendment are to clarify that a firearm is a type of dangerous weapon and to remove the inconsistency in language between specific offense characteristic subdivisions (b)(1)(B) and (b)(1)(C). Related amendment: 16 (§ 2A2.1).

108. *Proposed Amendment:* Section 2E2.1(b)(2) is amended by inserting at the end:

"(D) If the degree of injury is between that specified in subdivisions (A) and (B), increase by 3 levels; or

(E) If the degree of injury is between that specified in subdivisions (B) and (C), increase by 5 levels.".

*Reason for Amendment:* The purpose of this amendment is to provide intermediate adjustment levels for the degree of bodily injury. Related amendment: 3 (Amendment to Chapter One, Part A, Section 4(b)).

109. *Proposed Amendment:* Section 2E2.1(b)(3)(A) is amended by inserting "or" immediately following "4 levels;".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

*§ 2E5.1 Bribery or Gratuity Affecting the Operation of an Employee Welfare or Pension Benefit Plan*

110. *Proposed Amendment:* Section 2E5.1 is amended in the title by deleting "Bribery or Gratuity" and inserting in lieu thereof "Offering, Accepting, or Soliciting a Bribe or Gratuity".

*Reason for Amendment:* The purpose of amending the title of this section is to ensure that attempts and solicitations are expressly covered for purposes of 2X1.1.

*§ 2E5.2 Theft or Embezzlement From Employee Pension and Welfare Benefit Plans*

111. *Proposed Amendment:* Section 2E5.2 is amended by deleting:

"(a) Base Offense Level: 4

(b) Specific Offense Characteristics

(1) If the offense involved more than minimal planning, increase by 2 levels.

(2) If the defendant had a fiduciary obligation under the Employee Retirement Income Security Act, increase by 2 levels.

(3) Increase by corresponding number of levels from the table in § 2B1.1 (Larceny, Embezzlement, and Other Forms of Theft) according to the loss.",

and inserting in lieu thereof the following:

"Apply § 2B1.1.".

The Commentary to § 2E5.2 captioned "Application Notes" is amended by deleting:

"1. 'More than minimal planning' is defined in the Commentary to § 1B1.1 (Application Instructions). Valuation of loss is discussed in the Commentary to § 2B1.1 (Larceny, Embezzlement, and Other Forms of Theft)." and

"3. If the adjustment for a fiduciary obligation at § 2E5.2(b)(2) is applied, do not apply the adjustment at § 3B1.3 (Abuse of a Position of Trust or Use of a Special Skill).",

and inserting in lieu of Note 1 the following:

"1. In the case of a defendant who had a fiduciary obligation under the Employee Retirement Income Security Act, an adjustment under § 3B1.3 (Abuse of Position of Trust or Use of Special Skill) would apply.".

The Commentary to § 2E5.2 captioned "Background" is amended by deleting:

"The base offense level corresponds to the base offense level for other forms of theft. Specific offense characteristics address whether a defendant has a fiduciary relationship to the benefit plan, the sophistication of the offense, and the scale of the offense.".

*Reason for Amendment:* The purpose of this amendment is to simplify application of the guidelines. Related amendment: 113 (§ 2E5.4).

Additional Explanatory Statement: The offense guideline at § 2E5.2 covers theft and embezzlement from employee pension and welfare benefit plans. Basically, the guideline copies the theft guideline. However, it contains its own enhancement for an abuse of trust (§ 2E5.2(b)(2)) that is written more narrowly than the general abuse of trust provision in § 3B1.3. Commentary indicates that when this specific offense characteristic applies, § 3B1.3 is not to be applied. However, applying § 2E5.2(b)(2) for one type of abuse of trust (and then not applying § 3B1.3) and applying § 3B1.3 for all other abuse of trust appears an unnecessary complication when § 3B1.3 already includes the abuse of trust covered in § 2E5.2(b)(2). This situation may have come about simply because the guidelines in Chapter Two, Part E were written before the abuse of trust provision in § 3B1.3 was added. The same issue occurs in § 2E5.4 which covers theft and embezzlement from labor unions in the private sector.

*§ 2E5.3 False Statements and Concealment of Facts in Relation to Documents Required by the Employee Retirement Income Security Act*

112. *Proposed Amendment:* § 2E5.3(a)(2) is amended by deleting "false records were used for criminal conversion of funds or a scheme" and inserting in lieu thereof "the offense was committed to facilitate or conceal a theft or embezzlement, or an offense".

The Commentary to § 2E5.3 captioned "Application Note" is amended by deleting:

"Application Note:

1. 'Criminal conversion' means embezzlement.".

*Reason for Amendment:* The purpose of this amendment is to ensure that subsection (b)(2) covers any conduct engaged in for the purpose of facilitating or concealing a theft or embezzlement, or an offense involving a bribe or gratuity.

*§ 2E5.4 Embezzlement of Theft From Labor Unions in the Private Sector*

113. *Proposed Amendment:* Section 2E5.4 is amended by deleting:

"(a) Base Offense Level: 4

(b) Specific Offense Characteristics

(1) If the offense involved more than minimal planning, increase by 2 levels.

(2) If the defendant was a union officer or occupied a position of trust in the union, as set forth in 29 U.S.C. 501(a), increase by 2 levels.

(3) Increase by the number of levels from the table in § 2B1.1 (Larceny, Embezzlement, and Other Forms of Theft) corresponding to the loss.",

and inserting in lieu thereof the following:

"Apply § 2B1.1.".

The Commentary to § 2E5.4 captioned "Application Notes" is amended by deleting

"1. 'More than minimal planning' is defined in the Commentary to § 1B1.1 (Applicable Instructions). Valuation of loss is discussed in the Commentary to § 2B1.1 (Larceny, Embezzlement, and Other Forms of Theft).

2. If the adjustment for being a union officer or occupying a position of trust in a union at § 2E5.4(b)(2) is applied, do not apply the adjustment at § 3B1.3 (Abuse of a Position of Trust or Use of a Special Skill).",

and inserting in lieu thereof the following:

"1. In the case of a defendant was a union officer or occupied a position of trust in the union, as set forth in 29 U.S.C. 501(a), an adjustment under § 3B1.3 (Abuse of Position of Trust or Use of Special Skill) would apply.";

and by deleting in the caption "Notes" and inserting in lieu thereof "Note".

The Commentary to § 2E5.4 captioned "Background" is amended by deleting:

"The seriousness of this offense is determined by the amount of money taken, the sophistication of the offense, and the nature of the defendant's position in the union.".

*Reason for Amendment:* The purpose of this amendment is to simplify application of the guidelines. Related amendment: 111 (§ 2E5.2).

*Additional Explanatory Statement:* See the discussion at the related amendment to § 2E5.2 (amendment 111).

*§ 2E5.5 Failure to Maintain and Falsification of Records Required by the Labor Management Reporting and Disclosure Act*

114. *Proposed Amendment:* § 2E5.5(a)(2) is amended by deleting "false records were used for criminal conversion of funds or a scheme" and inserting in lieu thereof "the offense was committed to facilitate or conceal a theft or embezzlement, or an offense".

*Reason for Amendment:* The purpose of this amendment is to ensure that subsection (b)(2) covers any conduct engaged in for the purpose of facilitating or concealing a theft or embezzlement, or an offense involving a bribe or gratuity.

*§ 2F1.1 Fraud and Deceit*

115. *Proposed Amendment:* Section 2F1.1(b)(1) is amended by deleting:

| | "Loss | Increase in level |
|---|---|---|
| (A) | $2,000 or less | No increase. |
| (B) | $2,001–$5,000 | Add 1. |
| (C) | $5,001–$10,000 | Add 2. |
| (D) | $10,001–$20,000 | Add 3. |
| (E) | $20,001–$50,000 | Add 4. |
| (F) | $50,001–$100,000 | Add 5. |
| (G) | $100,001–$200,000 | Add 6. |
| (H) | $200,001–$500,000 | Add 7. |
| (I) | $500,001–$1,000,000 | Add 8. |
| (J) | $1,000,001–$2,000,000 | Add 9. |
| (K) | $2,000,001–$5,000,000 | Add 10. |
| (L) | Over $5,000,000 | Add 11". |

And inserting in lieu thereof:

| | "Loss (Apply the greatest) | Increase in level |
|---|---|---|
| (A) | $2,000 or less | No increase |
| (B) | More than $2,000 | Add 1. |
| (C) | More than $5,000 | Add 2. |
| (D) | More than $10,000 | Add 3. |
| (E) | More than $20,000 | Add 4. |
| (F) | More than $40,000 | Add 5. |
| (G) | More than $80,000 | Add 6. |
| (H) | More than $150,000 | Add 7. |
| (I) | More than $300,000 | Add 8. |
| (J) | More than $500,000 | Add 9. |
| (K) | More than $1,000,000 | Add 10. |
| (L) | More than $2,000,000 | Add 11. |
| (M) | More than $5,000,000 | Add 12". |

*Reason for Amendment:* The purpose of this amendment is to conform the theft and fraud loss table to the tax loss table in order to remove an unintended inconsistency between these tables in cases where the loss is greater than $40,000. Both tables increase the offense level when the loss exceeds $2,000, but the Tax Loss Table provides a maximum 12 level difference while the Fraud Loss Table has a maximum 11 level difference. Up to $40,000 the tables are identical. Above $40,000 there are minor differences (e.g., from $40,001–$50,000

VOL 54 ISS 41 MR 3 1989 UMI

the Tax Loss Table provides a 1 level higher offense level; from $50,001–$80,000 the offense levels are identical; from $80,001 $100,000 the Tax Loss Table again provides a 1 level higher offense level; from $100,001–$150,000 the offense levels are again identical; from $150,001–$200,000 Tax Loss Table again provides a 1 level higher offense level). Because the tax loss table contains one additional level, this amendment will increase the offense level by one level in some cases. Related amendment: 32 (§ 2B1.1). This amendment also eliminates minor gaps in the loss table. Related amendments: 39 (§ 2B2.1); 47 (§ 2B3.1); 180 (§ 2R1.1); 181 (§ 2S1.1); 209 (§ 2T6.1).

116. *Proposed Amendment:* Section 2F1.1(b)(1), as amended by proposed amendment 115, is further amended by deleting:

| | | |
|---|---|---|
| "(G) | More than $80,000 | Add 6. |
| (H) | More than $150,000 | Add 7 |
| (I) | More than $300,000 | Add 8. |
| (J) | More than $500,000 | Add 9 |
| (K) | More than $1,000,000 | Add 10. |
| (L) | More than $2,000,000 | Add 11. |
| (M) | More than $5,000,000 | Add 12" |

And inserting in lieu thereof:

| | | |
|---|---|---|
| "(G) | More than $70,000 | Add 6. |
| (H) | More than $120,000 | Add 7. |
| (I) | More than $200,000 | Add 8. |
| (J) | More than $350,000 | Add 9. |
| (K) | More than $500,000 | Add 10. |
| (L) | More than $800,000 | Add 11. |
| (M) | More than $1,500,000 | Add 12. |
| (N) | More than $2,500,000 | Add 13. |
| (O) | More than $5,000,000 | Add 14" |

*Reason for Amendment:* The purpose of this amendment is to increase the offense levels for offenses with larger loss values to better reflect the seriousness of the conduct. Related amendments: 33 (§ 2B1.1); 210 (§ 2T4.1); 39 (§ 2B2.1); 48 (§ 2B3.1).

117. *Proposed Amendment:* Section 2F1.1(b)(2) is amended by inserting "subdivision (C) or (D) applies and" immediately before "the result".

The Commentary to § 2F1.1 captioned "Background" is amended in the fourth sentence of the third paragraph by deleting "not only", and by deleting ", but also specifies that the minimum offense level in such cases shall be 10."

*Reason for Amendment:* The purpose of this amendment is to limit the applicability of the minimum offense level of 10 in specific offense characteristic (b)(2) to cases under subdivision (c) or (d).

*Additional Explanatory Statement:* Under § 2F1.1 there is a two level adjustment for more than minimal planning (§ 2F1.1(b)(2)(A)) or a scheme to defraud more than one victim (§ 2F1.1(b)(2)(B)), but if the resulting offense level is less than 10, the offense level is increased to 10. The comparable adjustment from § 2B1.1 is also 2 levels but no minimum level of 10 is specified. Because there is substantial overlap in the conduct covered by the forgery/fraud guideline (§ 2F1.1) on the one hand and the theft/embezzlement guideline (§ 2B1.1) on the other (e.g., mail theft generally involves the theft of checks which are then forged), this difference may result in significant anomalies due to charging decisions unrelated to the conduct or culpability of the offender. Furthermore, this offense level produces a result that is anomalous with the counterfeiting guidelines (§§ 2B5.1 and 5.2) in that passing less than $2,000 in counterfeit bills over a period of time results in an offense level of 9 under § 2B5.1, but passing several forged checks of less than $2,000 over the same period of time produces an offense level of 10 under § 2B5.2 because of the reference to § 2F1.1. The original reason for inserting the minimum level of 10 in 2F1.1 was that FPSSIS data showed an increased level for cases with more than minimal planning but no specified loss. This, however, has been addressed by the Commission's having adopted a definition of loss that includes intended loss (FPSSIS data included only actual loss). The proposed amendment conforms the "more than minimal planning" adjustment in fraud (§ 2F1.1) and theft (§ 2B1.1).

118. *Proposed Amendment:* The Commentary to § 2F1.1 captioned "Application Notes" is amended beginning in Note 14 by deleting:

"In such instances, although § 2F1.1 applies, a departure may be warranted.

15. In certain other cases, the mail or wire fraud statutes, or other relatively broad statutes, are used primarily as jurisdictional bases for the prosecution of other offenses. For example, a state law arson where a fraudulent insurance claim was mailed might be prosecuted as mail fraud. In such cases the most analogous guideline (in the above case, § 2K1.4) is to be applied.",

and by inserting at the end of Note 14:

"In certain other cases, the mail or wire fraud statutes, or other relatively broad statutes, are used primarily as jurisdictional bases for the prosecution of other offenses. For example, a state law arson where a fraudulent insurance claim was mailed might be prosecuted as mail fraud. Where the indictment or information setting forth the count of conviction (or a stipulation as described in § 1B1.2(a)) establishes an offense more aptly covered by another guideline, apply that guideline rather than § 2F1.1. Otherwise, in such cases, § 2F1.1 is to be applied, but a departure from the guidelines may be considered.".

*Reason for Amendment:* The purpose of this amendment is to ensure that this guideline is interpreted in a manner consistent with § 1B1.2.

119. *Issues Related to Specific Forms of Fraud:* Congress has recently passed the Major Fraud Act of 1988 and the Insider Trading and Securities Fraud Enforcement Act of 1988. Section 2(b) of the Major Fraud Act of 1988 (pertaining to certain large scale procurement frauds against the government) requires that the Commission promulgate a new guideline or amend an existing guideline to provide an enhanced penalty "where conscious or reckless risk of serious personal injury resulting from the fraud has occurred" and that the Commission consider the appropriateness of assigning a 2-level enhancement in such cases. The Commission seeks comment on the most appropriate way of responding to this instruction. For example, should the Commission provide an enhancement only for the cases covered by the Major Fraud Act or should the Commission provide such an enhancement for all types of fraud? Should a specific offense characteristic also provide a minimum offense level (i.e., an offense level of not less than) to address cases in which a risk of serious injury was created but there was no monetary loss or little monetary loss.

Both the Major Fraud Act of 1988 and the Insider Trading and Securities Fraud Enforcement Act of 1988 provide a maximum penalty of ten years' imprisonment. The Commission seeks comment on whether these should be a higher offense level for insider trading or procurement fraud than for other frauds. Similarly, should there be a higher offense level for fraud involving a federally chartered or insured financial institution? Or, should additional levels for monetary loss be added instead to the loss table for such offenses to take into account the greater losses that are associated with such offenses? If so, what additional distinctions are appropriate? Presently, losses substantially in excess of $5 million are addressed as a departure consideration in Application Note 10 of the Commentary to § 2F1.1. Another way to respond, for example, would be to add additional levels to the loss table in § 2F1.1 (as amended by proposed amendments 115 and 116). For example, under the mathematical progression used in the guidelines, the guidelines could be amended to add 15 levels for frauds of more than $10 million, and 16 levels for frauds of more than $20 million.

A related issue is whether the loss table in § 2F1.1 (as amended by proposed amendments 115 and 116) provides the appropriate adjustment for monetary loss or whether it should be revised in some other way (upward or downward).

The Commission also seeks comment on whether the specific offense characteristic at § 2F1.1(b)(3) (pertaining to the use of foreign bank accounts or transactions to conceal the nature or extent of the offense) should also be applied to § 2F1.2 (Insider Trading), and on whether additional modifications to the guidelines are appropriate to respond to the above noted legislation.

*§ 2G1.1 Transportation for the Purpose of Prostitution or Prohibited Sexual Conduct.*

120. *Proposed Amendment:* Section 2G1.1(b)(1) is amended by deleting "defendant used" and inserting in lieu thereof "offense involved the use of", and by deleting "drugs or otherwise" and inserting in lieu thereof "threats or drugs or in any manner".

The Commentary to § 2G1.1 captioned "Application Notes" is amended in Note 2 by deleting "by drugs or otherwise," immediately following "coercion".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline and commentary.

121. Proposed Amendment: Section 2G1.1 is amended by inserting the following additional subsection:

"(c) Special Instruction.

(1) If the offense involves the transportation of more than one person, Chapter Three, Part D (Multiple Counts) shall be applied as if the transportation of each person had been contained in a separate count of conviction.".

*Reason for Amendment:* The purpose of this amendment is to provide a special instruction for the application of the multiple count rule in cases involving the transportation of more than one person. Related amendment: 123 (§ 2G1.2).

*§ 2G1.2 Transportation of a Minor for the Purpose of Prostitution or Prohibited Sexual Conduct.*

122. *Proposed Amendment:* Section 2G1.2(b)(1) is amended by deleting "drugs or otherwise" and inserting in lieu thereof "threats or drugs or in any manner".

Section 2G1.2(b)(2) and (3) is amended by deleting "conduct" whenever it appears and inserting in lieu thereof in each instance "offense".

The Commentary to § 2G1.2 captioned "Application Notes" is amended in Note 2 by deleting "by drugs or otherwise" immediately following "coercion".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline and Commentary.

123. *Proposed Amendment:* Section 2G1.2 is amended by inserting the following additional subsection:

"(c) Special Instruction.

(1) If the offense involves the transportation of more than one person, Chapter Three, Part D (Multiple Counts) shall be applied as if the transportation of each person had been contained in a separate count of conviction.".

*Reason for Amendment:* The purpose of this amendment is to provide a special instruction for the application of the multiple count rule in cases involving the transportation of more than one person. Related amendment: 121 (§ 2G1.1).

*§ 2G2.1 Sexually Exploiting a Minor by Production of Sexually Explicit Visual or Printed Material.*

124. *Proposed Amendment:* The Commentary to § 2G2.1 captioned "Application Notes" is amended in Note 1 by deleting ", distinct offense, even if several are exploited simultaneously" and inserting in lieu thereof "victim. Consequently, multiple counts involving the exploitation of different minors are not to be grouped together under § 3D1.2 (Groups of Closely-Related Counts).".

*Reason for Amendment:* The purpose of this amendment is to clarify that multiple counts involving different minors are not grouped under § 3D1.2.

*§ 2G2.3 Selling or Buying of Children for Use in the Production of Pornography*

125. *Proposed Amendment:* Chapter Two, Part G, is amended by inserting as an additional guideline:

*"§ 2G2.3. Selling or Buying of Children for Use in the Production of Pornography*

(a) Base Offense Level: [37][38]

**Commentary**

*Statutory Provision:* 18 U.S.C. 2251A.

*Background:* The statutory minimum sentence for a defendant convicted under 18 U.S.C. 2251A is twenty years imprisonment.".

*Reason for Amendment:* The purpose of this amendment is to create a guideline covering the new offense in section 7512 of the Omnibus Anti-Drug Abuse Act of 1988. Additional Explanatory Statement: The Commission seeks public comment on whether the offense level for this new guideline should be 37 or 38.

*§ 2G3.1 Importing, Mailing, or Transporting Obscene Matter*

126. *Proposed Amendment:* Section 2G3.1 is amended by deleting:

*"§ 2G3.1. Importing, Mailing, or Transporting Obscene Matter*

(a) Base Offense Level: 6.

(b) Specific Offense Characteristics.

(1) If the offense involved an act related to distribution for pecuniary gain, increase by the number of levels from the table in § 2F1.1 corresponding to the retail value of the material, but in no event by less than 5 levels.

(2) If the offense involved material that portrays sadomasochistic conduct or other depictions of violence, increase by 4 levels.

(c) Cross Reference.

(1) If the offense involved a criminal enterprise, apply the appropriate guideline from Chapter Two, Part E (Offenses Involving Criminal Enterprises and Racketeering) if the resulting offense level is greater than that determined above.

**Commentary**

*Statutory Provisions:* 18 U.S.C. 1461–1465.

*Application Note:* 1. "Act related to distribution" as used in this guideline is to be construed broadly and includes production, transportation, and possession with intent to distribute.",

and inserting in lieu thereof:

"§ 2G3.1 Importing, Transporting, Mailing, or Distributing (Including Possessing With Intent to Distribute) Obscene Matter.

Base Offense Level: 6.

*Specific Offense Characteristics:* (1) If the defendant was engaged in the business of selling or distributing obscene matter, increase by the number of levels from the table in § 2F1.1 corresponding to the retail value of the material, but in no event by less than 5 levels.

(2) If the defendant distributed or possessed with intent to distribute material that portrays sadomasochistic or other violent conduct, increase by 4 levels.

**Commentary**

*Statutory Provisions:* 18 U.S.C. 1460–1463, 1465–1466.

*Application Note:* 1. "Engaged in the business of selling or distributing obscene matter" means that the person who sells or distributes or offers to sell or distribute obscene matter devotes time, attention, or labor to such activities, as a regular course of trade or business, with the objective of earning a profit, although it is not necessary that the person make a profit or that the selling or distributing or offering to sell or distribute such material be the person's sole or principal business or source of income. See 18 U.S.C. 1466.".

*Reason for Amendment:* The purpose of this amendment is to incorporate the new offenses created by sections 7521 and 7526 of the Omnibus Anti-Drug Abuse Act of 1988, to delete an inapt cross reference, and to make clarifying changes.

VOL 54 ISS 41 MR 3 1989 UMI

*§ 2G3.2 Obscene or Indecent Telephone Communications*

127. *Proposed Amendment:* Section 2G3.2 and the Commentary thereto are amended by deleting the entire text thereof, including the title, as follows:

"*§ 2G3.2. Obscene or Indecent Telephone Communications*

(a) Base Offense Level: 6.

**Commentary**

*Statutory Provision:* 47 U.S.C. 223.

*Background:* This offense is a misdemeanor for which the maximum term of imprisonment authorized by statute is six months.".

and inserting in lieu thereof:

"*§ 2G3.2 Obscene Telephone Communications for a Commercial Purpose*

(a) Base Offense Level: 6.

(b) Specific Offense Characteristics.

(1) If the offense involved material that describes sadomasochistic or other violent conduct, increase by 4 levels.

(2) If a person who received the communication was less than 18 years of age, increase by 2 levels unless the defendant took reasonable action to prevent access by persons less than 18 years of age or relied on such action by a telephone company.

**Commentary**

*Statutory Provision:* 47 U.S.C. 223(b)(1)(A).

*Application Note:* 1. 'Reasonable action to prevent access by persons less than 18 years of age' would include, for example, requiring payment by credit card before transmission of the message, requiring use of an access code before transmission of the message, or scrambling the messages so that they can be received intelligibly only by using a descrambling device. See Carlin Communications, Inc. v. Federal Communications Commission, 837 F.2d 546 (2d Cir. 1988).

*Background:* This offense is a felony for which the maximum term of imprisonment authorized by statute is two years.".

*Reason for Amendment:* The purpose of this amendment is to delete a petty offense no longer covered by the guidelines (Related amendment: 15 (§ 1B1.9)), and to insert a guideline for a felony created by section 7524 of the Omnibus Anti-Drug Abuse Act of 1988.

* * * * *

*§ 2G3.3 Broadcasting Obscene Material.*

128. *Proposed Amendment:* Chapter Two, Part G is amended by inserting as an additional guideline:

"*§ 2G3.3 Broadcasting Obscene Material*

(a) Base Offense Level: 6

(b) Specific Offense Characteristic:

(1) If the offense involved the broadcast of material that portrays sadomasochistic or other violent conduct, increase by 4 levels.

**Commentary**

*Statutory Provisions:* 18 U.S.C. 1464, 1468.".

*Reason for Amendment:* The purpose of this amendment is to create a guideline corresponding to the new offense in section 7523 of the Omnibus Anti-Drug Abuse Act of 1988.

*§ 2H1.3 Use of Force or Threat of Force to Deny Benefits or Rights in Furtherance of Discrimination.*

129. *Proposed Amendment:* The title to § 2H1.3 is amended by adding at the end "; Damage to Religious Real Property".

The Commentary to § 2H1.3 is amended by deleting "18 U.S.C. 245" and inserting in lieu thereof "18 U.S.C. 245, 247".

*Reason for Amendment:* The purpose of this amendment is to include a recently enacted offense (18 U.S.C. 247) expressly in the title of this guideline.

*Additional Explanatory Statement:* This amendment revises the title of § 2H1.3 and the statutory provisions to include a new offense (18 U.S.C. 247) prohibiting the obstruction, by force or threat of force, of an individual's right to the free exercise of religion; and prohibiting the destruction of religious real property. The offense and statutory penalties are comparable to those offenses covered by the current § 2H1.3.

*§ 2H1.4 Interference With Civil Rights Under Color of Law*

130. *Proposed Amendment:* Section 2H1.4(a)(2) is amended by deleting "2 plus" and inserting in lieu thereof "8 plus".

The Commentary to § 2H1.4 captioned "Application Notes" is amended in Note 1 by deleting "2 plus" and inserting in lieu thereof "8 plus", and by deleting "is defined" and inserting in lieu thereof "means 8 levels above the offense level for any underlying criminal conduct. See the discussion".

The Commentary to § 2H1.4 captioned "Background" is amended by deleting ", except where death results, in which case the maximum term of imprisonment authorized is life imprisonment" and inserting in lieu there of "if no bodily injury results, ten years if bodily injury results, and life imprisonment if death results", by deleting "Given this one-year statutory maximum" and inserting in lieu thereof "A", by inserting "one year" immediately following "near the", and by inserting "or bodily" immediately following "resulting in death".

The Commentary to § 2H1.4 captioned "Background" is amended by inserting at the end of the first paragraph:

"The 8-level increase under subsection (a)(2) reflects the 2-level increase that is applied to other offenses covered in this Part plus a 6-level increase for the commission of the offense under actual or purported legal authority. This 6-level increase is inherent in the base offense level of 10 under subsection (a)(1).".

*Reason for Amendment:* The proposed amendment corrects an anomaly between the offense level under this section and § 2H1.5 when the offense level is determined under subsection (a)(2).

*Additional Explanatory Statement:* Section 2H1.4 is similar to § 2H1.5 in that it may or may not involve the use of force. Under § 2H1.4, however, the offense must involve the abuse of actual or purported legal authority. The base offense level of 10 used in § 2H1.4(a)(1) has a built-in 6-level enhancement (which corresponds to the base offense level of 8 under § 2H1.5(a)(1) plus the 4-level increase for a public official). There is an anomaly, however, when the base offense level from (a)(2) is used. In such cases, § 2H1.4 results in an offense level that is 4 levels less than § 2H1.5 when the offense is committed by a public official. The proposed amendment recommended addresses this issue. The proposed amendment also amends the Commentary to § 2H1.4 to reflect the recent increase in the maximum authorized sentence from one to ten years when bodily injury results.

*§ 2H1.5 Other Deprivations of Rights or Benefits in Furtherance of Discrimination*

131. *Proposed Amendment:* The Commentary to § 2H1.5 captioned "Application Notes" is amended in Note 2 by deleting "§ 2H1.4(b)(1)" and inserting in lieu thereof "§ 2H1.5(b)(1)". Reason for Amendment: The purpose of this amendment is to correct a clerical error.

*§ 2H2.1 Obstructing an Election or Registration*

132. *Proposed Amendment:* Section 2H2.1(a)(1) is amended by deleting "persons" and inserting in lieu thereof "person(s)".

The Commentary to § 2H2.1 captioned "Background" is amended by deleting "Specific offense characteristics" and inserting in lieu thereof "Alternative base offense levels".

*Reason for Amendment:* The purpose of this amendment is to correct two clerical errors. First, the use of the plural "persons" in current subsection (a)(1) could be read to mean this subsection does not apply if the force or threat was applied only to one person, a result that was not intended. Second, the reference to "Specific offense characteristics" in the current Background is inaccurate; it should read "Alternative base offense levels".

*§ 2H3.1 Interception of Communications or Eavesdropping*

133. *Proposed Amendment:* Section 2H3.1 is amended by deleting:

"(a) Base Offense Level (Apply the greater):

(1) 9; or

(2) If the purpose of the conduct was to facilitate another offense, apply the guideline applicable to an attempt to commit that offense.

(b) Specific Offense Characteristic.

(1) If the purpose of the conduct was to obtain direct or indirect commercial advantage or economic gain not covered by § 2H3.1(a)(2) above, increase by 3 levels.",

and inserting in lieu thereof:

"(a) Base Offense Level: 9.

(b) Specific Offense Characteristic.

(1) If the purpose of the conduct was to obtain direct or indirect commercial advantage or economic gain, increase by 3 levels.

(c) Cross Reference.

(1) If the purpose of the conduct was to facilitate another offense, apply the guideline applicable to an attempt to commit that offense, if the resulting offense level is greater than that determined above.".

*Reason for Amendment:* This amendment corrects an anomaly in § 2H3.1. Currently, specific offense characteristic (b)(1) applies only to base offense level (a)(1). Consequently, conduct facilitating an offense for economic gain of level 8 or 9 would result in a greater offense level (11 or 12) than conduct facilitating a more serious (level 10 or 11) offense.

*§ 2J1.1 Contempt*

134. *Proposed Amendment:* Section 2J1.1 is amended by deleting: "If the defendant was adjudged guilty of contempt, the court shall impose a sentence based on stated reasons and the purposes of sentencing set forth in 18 U.S.C. 3553(a)(2).",

and inserting in lieu thereof:

"Apply § 2X5.1 (Other Offenses).".

The Commentary to § 2J1.1 captioned "Application Note" is amended in Note 1 by deleting "See, however, § 2X5.1 (Other Offenses)." and inserting in lieu thereof "In certain cases, the offense conduct will be sufficiently analogous to § 2J1.2 (Obstruction of Justice) for that guideline to apply.".

*Reason for Amendment:* This section is designated as a guideline, but it is not a guideline contemplated by the Sentencing Reform Act. This amendment clarifies the Commission's original intent by referencing this section to § 2X5.1 (Other Offenses).

135. *Proposed Amendment:* The Commentary to § 2J1.1 captioned "Statutory Provisions" is amended by deleting "Provisions" and inserting in lieu thereof "Provision", and by deleting "§" and ", 402".

*Reason for Amendment:* The purpose of this amendment is to delete a reference to a petty offense. Related amendment: 15 (§ 1B1.9).

*§ 2J1.2 Obstruction of Justice*

136. *Proposed Amendment:* Section 2J1.2(b)(1) is amended by deleting "defendant obstructed or attempted to obstruct the administration of justice by" and inserting in lieu thereof "offense involved", and by deleting "or property," and inserting in lieu thereof ", or property damage, in order to obstruct the administration of justice".

Section 2J1.2(b)(2) is amended by deleting "defendant substantially interfered" and inserting in lieu thereof "offense resulted in substantial interference".

Section 2J1.2(c)(1) is amended by deleting "conduct was" and inserting in lieu thereof "offense involved", and by deleting "such" and inserting in lieu thereof "that".

The Commentary to § 2J1.2 captioned "Application Notes" is amended in Note 1 by deleting " 'Substantially interfered" and inserting in lieu thereof " 'Substantial interference", and by deleting "offense conduct resulting in".

*Reason for Amendment:* The purpose of this amendment is to conform the language of the subsections and insure that an attempted obstruction is not excluded from subsection (c) because of the non-parallel language between (b)(1) and (c)(1).

137. *Proposed Amendment:* The Commentary to § 2J1.2 captioned "Statutory Provisions" is amended by inserting ", 1505" immediately following "1503".

*Reason for Amendment:* The purpose of this amendment is to delete a reference to a petty offense. Related amendment: 15 (§ 1B1.9).

138. *Proposed Amendment:* The Commentary to § 2J1.2 captioned "Statutory Provisions" is amended by inserting ", 1516" immediately following "1513".

*Reason for Amendment:* The purpose of this amendment is to expand the coverage of an existing guideline to include a new offense (Obstruction of a Federal Audit) created by section 7078 of the Omnibus Anti-Drug Abuse Act of 1988.

*§ 2J1.3 Perjury*

139. *Proposed Amendment:* Section 2J1.3 is amended in the caption by inserting "or Subornation of Perjury" immediately following "Perjury".

Section 2J1.3(b)(1) is amended by deleting "defendant suborned perjury by" and inserting in lieu thereof "offense involved", and by deleting "or property" and inserting in lieu thereof ", or property damage, in order to suborn perjury".

Section 2J1.3(b)(2) is amended by deleting "defendant's", and by deleting "substantially interfered" and inserting in lieu thereof "resulted in substantial interference".

Section 2J1.3(c)(1) is amended by deleting "conduct was perjury" and inserting in lieu thereof "offense involved perjury or subornation of perjury", and by deleting "such" and inserting in lieu thereof "that".

The Commentary to § 2J1.3 captioned "Application Notes" is amended in Note 1 by deleting " 'Substantially interfered" and inserting in lieu thereof " 'Substantial interference", and by deleting "offense conduct resulting in".

*Reason for Amendment:* The purposes of this amendment are to clarify the guideline, and to ensure that subornation of perjury is not excluded from subsection (c) due to a lack of parallel wording in the subsections.

*§ 2J1.4 Impersonation.*

140. *Proposed Amendment:* Section 2J1.4(b)(1) is amended by deleting:

"If the defendant falsely represented himself as a federal officer, agent or employee to demand or obtain any money, paper, document, or other thing of value or to conduct an unlawful arrest or search, increase by 6 levels.",

and inserting in lieu thereof:

"If the impersonation was committed for the purpose of conducting an unlawful arrest, detention, or search, increase by 6 levels.".

Section 2J1.4 is amended by inserting the following additional subsection:

(c) Cross Reference. (1) If the impersonation was to facilitate another offense, apply the guideline for an attempt to commit that offense, if the resulting offense level is greater than the offense level determined above.".

*Reason for Amendment:* The purpose of this amendment is to relate the offense levels more directly to the underlying offense where the impersonation is committed for the purpose of facilitating another offense.

VOL 54 ISS 41 MR 3 1989 UMI

*Additional Explanatory Statement:* The statutes covered by § 2J1.4 are sometimes used as jurisdictional statutes to prosecute fraud or forgery cases where the defendant pretends to be a federal employee (showing false or stolen federal identification) to cash a check. The current guideline will produce a result lower than the fraud/forgery guideline if the amount is extremely large and higher than that guideline if the amount is small. This result seems anomalous, particularly as the statutory maximum for the offenses covered by § 2J1.4 is only 3 years, lower than that generally provided in fraud/forgery statutes.

In addition, the proposed amendment deletes unnecessary and technically inaccurate language.

*§ 2J1.5 Failure to Appear by Material Witness.*

141. *Proposed Amendment:* Section 2J1.5(b)(1) is amended by deleting "substantially interfered" and inserting in lieu thereof "resulted in substantial interference".

The Commentary to § 2J1.5 captioned "Application Notes" is amended in Note 1 by deleting "'Substantially interfered" and inserting in lieu thereof "'Substantial interference", and by deleting "offense conduct resulting in".

*Reason for Amendment:* The purpose of this amendment is to clarify the intent of the guideline.

*§ 2J1.7 Commission of Offense While on Release.*

142. *Proposed Amendment:* Section 2J1.7 is amended by deleting:

*"§ 2J1.7. Commission of Offense While on Release*

(a) Base Offense Level: 6.

(b) Specific Offense Characteristics.

(1) If the offense committed while on release is punishable by death or imprisonment for a term of fifteen years or more, increase by 6 levels.

(2) If the offense committed while on release is punishable by a term of imprisonment of five or more years, but less than fifteen years, increase by 4 levels.

(3) If the offense committed while on release is a felony punishable by a maximum term of less than five years, increase by 2 levels.

**Commentary**

*Statutory Provision:* 18 U.S.C. 3147. *Application Notes:* 1. This guideline applies whenever a sentence pursuant to 18 U.S.C. 3147 is imposed.

2. By statute, a term of imprisonment imposed for a violation of 18 U.S.C. 3147 runs consecutively to any other term of imprisonment. Consequently, a sentence for such a violation is exempt from grouping under the multiple count rules. See § 3D1.2.

*Background:* Because defendants convicted under this section will generally have a prior criminal history, the guideline sentences provided are greater than they otherwise might appear.",

and inserting in lieu thereof:

*"§ 2J1.7 Commission of Offense While on Release.*

If an enhancement under 18 U.S.C. 3147 applies, add [2][3][4] levels to the offense level for the offense committed while on release as if this section were a specific offense characteristic contained in the offense guideline for the offense committed while on release.

**Commentary**

*Statutory Provision:* 18 U.S.C. 3147.

*Application Notes:* 1. Because 18 U.S.C. 3147 is an enhancement provision, rather than an offense, this section provides a specific offense characteristic to increase the offense level for the offense committed while on release.

2. Under 18 U.S.C. 3147, a sentence of imprisonment must be imposed in addition to the sentence for the underlying offense, and the sentence of imprisonment imposed under 18 U.S.C. 3147 must run consecutively to any other sentence of imprisonment. In order to avoid 'double counting', the court will have to ensure that the 'total punishment' (i.e., the sentence for the offense committed while on release plus the sentence enhancement under 18 U.S.C. 3147) is in accord with the guideline range for the offense committed while on release, as adjusted by the enhancement in this section, e.g., if the applicable guideline range is 30–37 months and the court determines 'total punishment' of 36 months is appropriate, a sentence of 30 months for the underlying offense plus 6 months under 18 U.S.C. 3147 would satisfy this requirement.

*Background:* An enhancement under 18 U.S.C. 3147 may be imposed only upon application of the government; it cannot be imposed on the court's own motion. In this respect, it is similar to a separate count of conviction and, for this reason, is placed in Chapter Two of the guidelines.

Legislative history indicates that, the mandatory nature of the penalties required by 18 U.S.C. 3147 was to be eliminated upon the implementation of the sentencing guidelines. 'Section 213(h) [renumbered as section 200(g) in the Crime Control Act of 1984] amends the new provision in title I of this Act relating to consecutive enhanced penalties for committing an offense on release (new 18 U.S.C. 3147) by eliminating the mandatory nature of the penalties in favor of utilizing sentencing guidelines.' (Senate Report 98–225 at 186). Not all of the phraseology relating to the requirement of a mandatory sentence, however, was actually deleted from the statute. Consequently, it appears the court is required to impose a consecutive sentence of imprisonment under this provision, but there is no requirement as to any minimum term. This guideline is drafted to enable the court to determine and implement a combined 'total punishment' consistent with the overall structure of the guidelines, while at the same time complying with the statutory requirement. Guideline provisions that prohibit the grouping of counts of conviction requiring consecutive sentences (e.g., the introductory paragraph of § 3D1.2; § 5G1.2(a)) do not apply to this section because 18 U.S.C. 3147 is an enhancement, not a count of conviction.".

*Reason for Amendment:* The purpose of this amendment is to reflect the fact that 18 U.S.C. 3147 is an enhancement provision, not a distinct offense.

*Additional Explanatory Statement:* During the development of the original set of guidelines, there was some confusion as to whether 18 U.S.C. 3147 was a criminal offense or an enhancement provision. It turns out it is an enhancement provision. To complicate matters, the statute and legislative history do not match exactly. Created in 1984 as part of the Comprehensive Crime Control Act, the statute contained interim provisions (mandatory consecutive sentences that were subject to the parole and good time provisions of prior law) that were to be in effect until the sentencing guidelines took effect. The Senate Report to S.1762 indicates that the mandatory nature of the interim provisions was to be eliminated when the sentencing guidelines took effect ("Section 213(h) [section 220(g) of the CCCA of 1984] amends the new provision in title I of this Act relating to consecutive enhanced penalties for committing an offense while on release (new 18 U.S.C. 3147)) by eliminating the mandatory nature of the penalties in favor of utilizing sentencing guidelines" (Senate Report 98–225 at 186). The statute, as amended, however, did not actually eliminate all language referring to mandatory penalties. A mandatory consecutive term of imprisonment is required but, unlike other mandatory provisions, there is no minimum required. Consequently, no real restriction is placed on the court; i.e., a consecutive sentence of 1 day's imprisonment is not prohibited.

The Commission attempted to deal with the mandatory consecutive requirement of this provision by treating it as if it constituted a separate offense, but this treatment has caused several problems.

Treating this provision as if it were a separate offense engenders a variety of questions, including whether and how victim adjustments, obstruction, and acceptance of responsibility apply to this provision, whether a term of supervised release can be imposed if no term of imprisonment is imposed on the underlying offense, whether a fine can be imposed; and how the cost of supervision on the consecutive part of

the term is to be considered. Moreover, while other enhancements vary with the offense level for the underlying offense, this enhancement varies with the much cruder measure of the statutory maximum penalty for the underlying offense (e.g., under the current guideline, possessing a counterfeit ten dollar bill would result in a greater enhancement than interstate or foreign travel or transportation in aid of racketeering activity).

The amendment recommended below converts this section into an offense level adjustment for the offense committed while on release, a treatment that is considerably more consistent with the treatment of other offense/offender characteristics.

The Commission seeks public comment as to whether 2, 3, or 4 level enhancement is appropriate.

*§ 2J1.8 Bribery of a Witness*

143. *Proposed Amendment:* Section 2J1.8(b)(1) is amended by deleting "substantially interfered" and inserting in lieu thereof "resulted in substantial interference".

Section 2J1.8(c)(1) is amended by deleting "conduct was" and inserting in lieu thereof "offense involved", and by deleting "such" and inserting in lieu thereof "that".

The Commentary to § 2J1.8 captioned "Application Notes" is amended in Note 1 by deleting "Substantially interfered" and inserting in lieu thereof "Substantial interference", and by deleting "offense conduct resulting in".

The Commentary to § 2J1.8 captioned "Application Notes" is amended in Note 2 by deleting "This section applies only in the case of a conviction under the above referenced (or equivalent) statute." immediately before "For offenses".

*Reason for Amendment:* The purposes of this amendment are to clarify the guideline and to delete surplus language in the Commentary. Retention of this surplus language could create the impression that a different result was intended in other similar guidelines not containing such language.

*§ 2J1.9 Payment to Witness*

144. *Proposed Amendment:* Section 2J1.9(b)(1) is amended by deleting "for refusing to testify" and inserting in lieu thereof "made or offered for refusing to testify or for the witness absenting himself to avoid testifying".

The Commentary to § 2J1.9 captioned "Application Notes" is amended by deleting:

"1. 'Refusing to testify' includes absenting oneself for the purpose of avoiding testifying.",

and by renumbering Notes 2 and 3 as 1 and 2 respectively.

*Reason for Amendment:* The purpose of this amendment is to move material from the Commentary to the guideline itself where it more properly belongs.

145. *Proposed Amendment:* The Commentary to § 2J1.9 captioned Application Notes is amended in the renumbered Note 1 by deleting "This section applies only in the case of a conviction under the above referenced (or equivalent) statute." immediately before "For offenses".

*Reason for Amendment:* The purpose of this amendment is to delete surplus language from the Commentary. Retention of this surplus language could create the impression that a different result was intended in other similar guidelines not containing this language.

**Chapter Two, Part K, Offenses Involving Public Safety**

146. *Proposed Amendment:* Sections 2K1.4(c), 2K1.5(c), 2K2.1(c), 2K2.2(c), and 2K2.3(c) are amended by deleting "higher" whenever it appears and inserting in lieu thereof "greater".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

*§ 2K1.3 Unlawfully Trafficking In, Receiving, or Transporting Explosives*

147. *Proposed Amendment:* Section 2K1.3(b) is amended by deleting "any of the following" and inserting in lieu thereof "more than one".

Section 2K1.3(b)(5) is amended by deleting "firearm offense" and inserting in lieu thereof "offense involving explosives".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline.

*§ 2K1.4 Arson; Property Damage By Use of Explosives*

148. *Proposed Amendment:* Section 2K1.4(b) is amended by deleting "any of the following" and inserting in lieu thereof "more than one".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline.

149. *Proposed Amendment:* Section 2K1.4 is amended by inserting as an additional subsection the following:

"(d) Note: The specific offense characteristic in subsection (b)(4) applies only in the case of an offense committed prior to November 18, 1988.";

The Commentary to § 2K1.4 captioned "Statutory Provisions" is amended by inserting "(only in the case of an offense committed prior to November 18, 1988)" immediately following "(h)";

The Commentary to § 2K1.4 captioned "Background", is amended by deleting "used fire or an explosive in the commission of a felony," and by inserting at the end of the paragraph the following new sentence: "As amended by section 6474(b) of the Omnibus Anti-Drug Abuse Act of 1988 (effective November 18, 1988), 18 U.S.C. 844(h) sets forth a mandatory sentencing enhancement of five years for the first offense and ten years for subsequent offenses if the defendant was convicted of using fire or an explosive to commit a felony or of carrying an explosive during the commission of a felony. See § 2K1.7.

*Reason for Amendment:* The purpose of this amendment is to conform the guidelines to a statutory revision to 18 U.S.C. 844(h). Related amendments: 152 (§ 2K1.7); 286 (Appendix A).

*§ 2K1.5 Possessing Dangerous Weapons or Materials While Boarding or Aboard an Aircraft*

150. *Proposed Amendment:* Section 2K1.5(b) is amended by deleting "any of the following" and inserting in lieu thereof "more than one".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline.

151. *Proposed Amendment:* Section 2K1.5(b)(1) is amended by deleting "(i.e., the defendant is convicted under 49 U.S.C. 1472(1)(2)", and by inserting "is convicted under 49 U.S.C. 1472(1)(2) (i.e., the defendant" immediately before "acted".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline.

152. *Proposed Amendment:* Chapter Two, Part K is amended by inserting as an additional guideline the following:

*"§ 2K1.7 Use of Fire or Explosive to Commit a Federal Felony*

If the defendant, whether or not convicted of another crime, was convicted under 18 U.S.C. 844(h), the term of imprisonment is that required by statute.

**Commentary**

*Statutory Provision:* 18 U.S.C. 844(h).

*Application Notes:*

1. The statute requires a term of imprisonment imposed under this section to run consecutively to any other term of imprisonment.

2. Imposition of a term of supervised release is governed by the provisions of § 5D1.1 (Imposition of a Team of Supervised Release).".

*Reason for Amendment:* The purpose of this amendment is to conform the guidelines to a statutory revision of the meaning of 18 U.S.C. 844(h). Related

VOL 54 ISS 41 MR 3 1989 UMI

amendments: 149 (§ 2K1.4); 186 (Appendix A).

**Chapter Two, Part K, Subpart 1**

153. Section 6474(a) of the Omnibus Anti-Drug Abuse Act of 1988: Section 6474(a) of the Omnibus Anti-Drug Abuse Act of 1988 increases the statutory maximum sentence for possession of an explosive in a federal building (18 U.S.C. 844(g)) from one to five years and expands coverage of the offense to include an airport that is subject to the regulatory authority of the Federal Aviation Administration. Currently, there is no guideline for 18 U.S.C. 844(g). The Commission intends to promulgate a guideline to cover this offense and seeks comment on the appropriate base offense level and specific offense characteristics for this guideline.

**Chapter Two Part K, Subpart 2**

154. *Revision of Chapter Two, Part K, Subpart 2:* The Commission seeks comment on a revision of Chapter Two, Part K, Subpart 2, to address a number of diverse substantive and technical issues, as well as the creation of several new offenses, and increased statutory maximum penalties for certain other offenses. Various issues concerning the current guidelines are discussed and an example of an approach to address these issues is shown in amendment form. The Commission seeks comment on this approach as well as any recommendations for alternative approaches to address these issues.

A significant problem with the present guideline is that there are a large number of overlapping statutory provisions so that the three basic guidelines, § 2K2.1 (Possession by a prohibited person), § 2K2.2 (Possession of certain types of weapons), and § 2K2.3 (Unlawful trafficking), are not closely tied to the actual conduct. For example, possession of a machine gun might be prosecuted under 18 U.S.C. 922(o) or 26 U.S.C. 5861(a). Prosecution under the first listed statute results in an offense level of 6; prosecution under the second results in an offense level of 12. In other cases, offenses involving trafficking in multiple firearms are referenced by the offense of conviction to § 2K2.1 or § 2K2.2 where there is no table to take into account multiple firearms. The amendment shown below addresses this issue by consolidating the current three guidelines into two guidelines: (1) Unlawful possession, receipt, or transportation, and (2) unlawful trafficking; and by more carefully drawing the distinctions between the base offense levels provided. The third guideline shown in this amendment is a new guideline to address transfer of a weapon with intent or knowledge that it will be used to commit another offense (formerly covered in a cross reference) and a new offense added by the Omnibus Anti-Drug Abuse Act of 1988 (section 6211) (interstate travel to acquire a firearm for a criminal purpose).

In addition, it is not clear that "used" in the cross-reference in § 2K2.1 will be consistently read as including "possessed in connection with". The amendment shown below addresses this issue. Other cross-references are provided to ensure that if both the amended §§ 2K2.1 and 2K2.2 are applicable, the guideline having the greater offense level will apply.

The current guideline uses the term "Firearms or Other Weapons" because the term "firearm" used in the underlying statutes is broader than the usual definition of firearm found in § 1B1.1. However, the undefined term "other weapons" is confusing, and ammunition, which is covered by the statute, is omitted from the guideline title. The amendment shown below uses the term "Firearms or Ammunition" in § 2K2.1 and provides an Application Note in both § 2K2.1 and § 2K2.2 to indicate that the definition of firearm is different from that used in the general definitions in § 1B1.1.

The base offense level for conduct covered by the current § 2K2.1 is increased in the amendment shown below from 9 to 12 (the same base offense level as the current § 2K2.2). The statutorily authorized maximum sentence for the conduct covered under § 2K2.1 was increased from five to ten years by the Omnibus Anti-Drug Abuse Act of 1988 (section 6462). Note, however, that the most aggravated conduct under § 2K2.1 (possession of a weapon during commission of another offense) is handled by the cross-reference at subsection (c) and is based upon the offense level for an attempt to commit the underlying offense. See Background Commentary to current § 2K2.1. In addition, the amendment shown below raises the enhancement for stolen weapons or obliterated serial numbers from 1 to 2 levels to better reflect the seriousness of this conduct. The numbers currently used in the table for the distribution of multiple weapons in § 2K2.2 are shown [Option 1] as well as an option that would increase the offense level increases somewhat more rapidly for sale of multiple weapons [Option 2]. The example shown below retains the offense level of 12 for unlawful possession of a machine gun, sawed off shotgun, or destructive device; and level 16 for a firearm silencer or muffler. All of these weapons are prohibited under 18 U.S.C. 5861. Comment is sought as to whether the Commission should provide the same offense level for all such weapons, and if so, a recommendation as to the appropriate offense level.

Section 2K2.1 and accompanying Commentary, except for Commentary captioned "Background", are deleted and the following inserted in lieu thereof:

*"§ 2K2.1 Unlawful Receipt, Possession, or Transportation of Firearms or Ammunition*

(a) Base Offense Level (Apply the Greater): (1) 12, if the defendant is convicted under 18 U.S.C. 922 (g), (h), (n), or (o), or 26 U.S.C. 5861; or if the defendant, at the time of the offense, had been convicted in any court of an offense punishable by imprisonment for a term exceeding one year; or

(2) 6, otherwise.

(b) Specific Offense Characteristics.

(1) If the defendant obtained or possessed the firearm or ammunition solely for lawful sporting purposes or collection, reduce the offense level determined above to level 6;

(2) If the firearm was stolen or had an altered or obliterated serial number, increase by 2 levels;

(3) If the offense involved a firearm silencer or firearm muffler, increase by 4 levels.

(c) Cross References.

(1) If the offense involved the distribution of a firearm or possession with intent to distribute, apply § 2K2.2 (Unlawful Trafficking and Other Prohibited Transactions Involving a Firearm) if the resulting offense level is greater than that determined above;

(2) If the defendant used or possessed the firearm in connection with commission or attempted commission of another offense, apply § 2X1.1 (Attempt, Solicitation, or Conspiracy) in respect to that other offense, if the resulting offense level is greater than that determined above.

*Statutory Provisions:* 18 U.S.C. 922 (a)(1), (a)(3), (a)(4), (a)(6), (e), (f), (g), (h), (i), (j), (k), (l), (n), and (o); 26 U.S.C. 5861 (b), (c), (d), (h), (i), (j), and (k).

*Application Notes:*

1. The definition of 'firearm' used in this section is that set forth in 18 U.S.C. 921(a)(3) (if the defendant is convicted under 18 U.S.C. 922) and 26 U.S.C. 5845(a) (if the defendant is convicted under 26 U.S.C. 5861). These definitions are somewhat broader than that used in Application Note 1(e) of the Commentary to § 1B1.1 (Application Instructions). Under 18 U.S.C. 921(a)(3), the term 'firearm' means (A) any weapon (including a starter gun) which will or is designed to or may readily be converted to expel a projectile by the action of an explosive; (B) the frame or receiver of any such weapon; (C) any firearm muffler or firearm silencer; or (D) any destructive device. Under 26 U.S.C. 5845(a), the term 'firearm' includes a shotgun, or a weapon made from a shotgun, with a barrel or barrels of less than 18 inches in length; a weapon made from a shotgun or rifle with an overall length of less than 26 inches; a rifle, or weapon from a rifle, with a barrel or barrels less than 16 inches in length; a machine gun; a muffler or silencer for a firearm; a destructive device; and certain other large bore weapons.

2. Under § 2K2.1(b)(1), intended lawful use, as determined by the surrounding circumstances, provides a decrease in offense level. Relevant circumstances include, among others, the number and type of firearms (sawed-off shotguns, for example, have few legitimate uses) and ammunition, the location and circumstances of possession, the nature of the defendant's criminal history (e.g., whether involving firearms), and the extent to which possession was restricted by local law.".

Sections 2K2.2 and 2K2.3, including titles and accompanying Commentary, are deleted in their entirety and the following substituted in lieu thereof:

*"§ 2K2.2 Unlawful Trafficking and Other Prohibited Transactions Involving Firearms*

(a) Base Offense Level (1) 12, if the defendant is convicted under 18 U.S.C. 922(o) or 26 U.S.C. 5861;

(2) 6, otherwise.

(b) Specific Offense Characteristics

(1) If the offense involved distribution of a firearm, or possession with intent to distribute, and the number of firearms unlawfully distributed, or to be distributed, exceeded [two][five], increase as follows:

| | Number of firearms | Increase in level |
|---|---|---|
| | **Option 1** | |
| (A) | 6 to 10 | Add 1. |
| (B) | 11 to 20 | Add 2. |
| (C) | 21 to 50 | Add 3. |
| (D) | 51 to 100 | Add 4. |
| (E) | 101 to 200 | Add 5. |
| (F) | More than 200 | Add 6. |
| | **Option 2** | |
| (A) | 3 to 5 | Add 2. |
| (B) | 6 to 11 | Add 3. |
| (C) | 12 to 24 | Add 4. |
| (D) | 25 to 49 | Add 5. |
| (E) | 50 or more | Add 6. |

(2) If any of the firearms was stolen or had an altered or obliterated serial number, increase by 2 levels

(3) If the offense involved a firearm silencer or firearm muffler, increase by 4 levels.

(4) If more than one of the following applies, use the greater:

(A) If the defendant is convicted under 18 U.S.C. 922(d), increase by 2 levels; or

(B) If the defendant is convicted under 18 U.S.C. 922 (b)(1) or (b)(2), increase by 1 level.

(C) Cross Reference

(1) If the defendant, at the time of the offense, had been convicted in any court of a crime punishable by imprisonment for a term exceeding one year, apply § 2K2.1 (Unlawful Possession, Receipt, or Transportation of a Firearm or Ammunition) if the resulting offense level is greater than that determined above.

**Commentary**

*Statutory Provisions:* 18 U.S.C. 922 (a)(1), (a)(2), (a)(5), (b), (c), (d), (e), (f), (i), (j), (k), (l), (m), (o); 26 U.S.C. 5861 (a), (e), (f), (g), (j), and (l).

*Application Notes:*

1. The definition of firearm used in this section is that set forth in 18 U.S.C. 921(a)(3) (if the defendant is convicted under 18 U.S.C. 922) and 26 U.S.C. 5845(a) (if the defendant is convicted under 26 U.S.C. 5861). These definitions are somewhat broader than that used in Application Note 1(e) of the Commentary to § 1B1.1 (Application Instructions). Under 18 U.S.C. 921(a)(3), the term 'firearm' means (A) any weapon (including a starter gun) which will or is designed to or may readily be converted to expel a projectile by the action of an explosive; (B) the frame or receiver of any such weapon; (C) any firearm muffler or firearm silencer; or (D) any destructive device. Under 26 U.S.C. 5845(a), the term 'firearm' includes a shotgun, or a weapon made from a shotgun, with a barrel or barrels of less than 18 inches in length; a weapon made from a shotgun or rifle with an overall length of less than 26 inches; a rifle, or weapon from a rifle, with a barrel or barrels less than 16 inches in length; a machine gun; a muffler or silencer for a firearm; a destructive device; and certain other large bore weapons.

2. If the number of weapons involved substantially exceeded [fifty][two hundred], an upward departure may be warranted.

*Background:* This guideline applies to a variety of offenses involving firearms, ranging from unlawful distribution of silencers, machine guns, sawed-off shotguns, and destructive devices, to essentially technical violations.".

*"§ 2K2.3 Receiving, Transporting, Shipping or Transferring a Firearm or Ammunition With Intent to Commit Another Offense, or With Knowledge that It Will Be Used in Committing Another Offense*

(a) Base Offense Level (Apply the Greater) (1) The offense level from § 2X1.1 (Attempt, Solicitation, or Conspiracy) in respect to the offense that the defendant intended or knew was to be committed with the firearm.

(2) The offense level from § 2K2.1 (Unlawful Receipt, Possession, or Transportation of a Firearm), or § 2K2.2 (Unlawful Trafficking and Other Prohibited Transactions Involving a Firearm), as applicable.

**Commentary**

*Statutory Provisions:* 18 U.S.C. 924 (b), (f), (g).".

*§ 2K2.3 Prohibited Transactions in or Shipment of Firearms and Other Weapons*

155. *Proposed Amendment:* Section 2K2.3(b) is amended by deleting "dealt in" and inserting in lieu thereof "involved in the offense", and by deleting "purchaser" wherever it appears and inserting in lieu thereof "recipient".

*Reason for Amendment:* The purpose of this amendment is to replace the awkward term "dealt in" with clearer terminology, and to clarify that application of subsection (b)(2) (A) and (B) includes "distribution" rather than only "sale".

156. *Proposed Amendment:* Section 2K2.3(b)(2) is amended by deleting "any of the following" and inserting in lieu thereof "more than one".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline.

*§ 2K2.4 Use of Firearms or Armor-Piercing Ammunition During or in Relation to Certain Crimes*

157. *Proposed Amendment:* Section 2K2.4 is amended by deleting "penalties are those" and inserting in lieu thereof "term of imprisonment is that".

The Commentary to § 2K2.4 captioned "Application Notes" is amended by inserting the following additional Note:

"3. Imposition of a term of supervised release is governed by the provisions of § 5D1.1 (Imposition of a Term of Supervised Release).".

Section 2K2.4 is amended by inserting "(a)" immediately before "If", and by inserting as an additional subsection the following:

"(b) Special Instructions for Fines:

(1) Where there is a federal conviction for the underlying offense, the fine guideline shall be the fine guideline that would have been applicable had there only been a conviction for the underlying offense. This guideline shall be used as a consolidated fine guideline for both the underlying offense and the conviction underlying this section.".

The Commentary to § 2K2.4 captioned "Application Notes" is amended by inserting the following as an additional Note:

VOL 54 ISS 41 MR 3 1989 UMI

"4. Subsection (b) sets forth special provisions concerning the imposition of fines. Where there is also a conviction for the underlying offense, a consolidated fine guideline is determined by the offense level that would have applied to the underlying offense absent a conviction under 18 U.S.C. 924(c) or 929(a). This is because the offense level for the underlying offense may be reduced when there is also a conviction under 18 U.S.C. 924(c) or 929(a) in that any specific offense characteristic for possession, use, or discharge of a firearm is not applied (see Application Note 2). The Commission has not established a fine guideline range for the unusual case in which there is no conviction for the underlying offense.".

*Reason for Amendment:* The purpose of this amendment is to address the imposition of a fine or term of supervised release when this guideline applies.

158. *Proposed Amendment:* Chapter Two, Part K is amended by adding the following new guideline and accompanying commentary:

*"§ 2K2.5 Possession of Firearms and Dangerous Weapons in Federal Facilities*

(a) Base Offense Level: 6

(b) Cross Reference

(1) If the defendant possessed the firearm or other dangerous weapon with intent to use it in the commission of another offense, apply § 2X1.1 (Attempt, Solicitation or Conspiracy) in respect to that other offense if the resulting offense level is greater than that determined above.

Commentary

Statutory Provision: 18 U.S.C. 930.".

*Reason for Amendment:* This amendment adds a guideline to cover a new offense enacted by section 6215 of the Omnibus Anti-Drug Abuse Act of 1988.

*Additional Explanatory Statement:* Section 6215 of the Omnibus Anti-Drug Abuse Act of 1988 creates a new offense: "Possession of firearms and dangerous weapons in Federal facilities." The offense carries a maximum penalty of one year for simple possession and five years for possession with intent to use the weapon in the commission of a crime. A federal facility is defined as a building where federal employees are regularly present for the purpose of performing their official duties.

A base offense level of 6 is provided for the misdemeanor portion of this statute. The felony portion of this statute (possession with intent to commit another offense) is treated as if an attempt to commit that other offense.

*§ 2L1.1 Smuggling, Transporting, or Harboring an Unlawful Alien*

159. *Proposed Amendment:* Section 2L1.1(b) is amended by inserting as a new subsection the following:

"(3) In the case of a defendant who is an unlawful alien and has been deported (voluntarily or involuntarily) on one or more occasions prior to the instant offense, if the offense level determined above is less than level 8, increase to level 8.".

The Commentary to § 2L1.1 captioned "Application Notes" is amended in Note 6 by deleting "enhancement at § 2L1.1(b)(1) does not apply" and inserting in lieu thereof "reduction at § 2L1.1(b)(1) applies".

*Reason for Amendment:* The purposes of this amendment are to provide an offense level that is no less than that provided under § 2L1.2 in the case of a defendant who is a previously deported alien, and to conform Application Note 6 of the Commentary to § 2L1.1 to the January 1988 revision of § 2L1.1.

*§ 2L1.2 Unlawfully Entering or Remaining in the United States*

160. *Aliens Previously Deported After Conviction of a Felony:* Section 7345 of the Omnibus Anti-Drug Abuse Act of 1988 provides a maximum penalty of five years' imprisonment if the defendant was deported after conviction of a felony, and a maximum term of fifteen years' imprisonment if the defendant was deported after conviction of an aggravated felony (defined as murder, any drug trafficking crime, or any illicit trafficking in firearms or destructive devices, or any attempt or conspiracy to commit any such act, committed within the United States). Otherwise, the maximum penalty is two years' imprisonment.

The Commission seeks public comment on whether and how § 2L1.2 should be amended to address the distinctions added by this statute. One way might be to add a specific offense characteristic to provide an increase in the case of an alien previously deported after conviction of a felony other than an immigration law violation, and to allow an upward departure in the case of an "aggravated felony" due to the wide range of conduct within the definition of an aggravated felony (e.g., from first degree murder to sale of a small quantity of a controlled substance). This specific offense characteristic would be in addition to, and not in lieu of, criminal history points added for the prior sentence. The issue of the appropriate enhancement for an aggravated felony would be deferred until the Commission can analyze current practice data through its case monitoring system.

For example, § 2L1.2 might be amended by inserting the following additional specific offense characteristic:

"(b) Specific Offense Characteristic

(1) If the defendant previously was deported after sustaining a conviction for a felony, other than a felony involving violation of the immigration laws, increase by [2][3][4] levels.",

and the Commentary to § 2L1.2 captioned "Application Notes" might be amended by adding the following additional Note:

"3. A [2][3][4] level increase is provided when the defendant was previously deported after sustaining a conviction for a felony, other than a felony involving a violation of the immigration laws. In the case of a defendant previously deported after sustaining conviction for an aggravated felony as defined in 8 U.S.C. 1101(a), or an offense of comparable seriousness, an upward departure should be considered.".

The Commission seeks comment on the appropriateness of an amendment such as shown above, and welcomes other proposals for addressing this issue.

*§ 2L1.3 Engaging in a Pattern of Unlawful Employment of Aliens*

161. *Proposed Amendment:* Section 2L1.3 and the Commentary thereto are amended by deleting the entire text thereof, including the title, as follows:

*"§ 2L1.3. Engaging in a Pattern of Unlawful Employment of Aliens*

(a) Base Offense Level: 6

Commentary

*Statutory Provision:* 8 U.S.C. 1324a(f)(1).

Background: The offense covered under this section is a misdemeanor for which the maximum term of imprisonment authorized by statute is six months.".

*Reason for Amendment:* The purpose of this amendment is to delete a guideline applying only to a petty offense. Petty offenses were deleted from coverage of the guidelines by the adoption of § 1B1.9 (effective June 15, 1988). Related amendment: 15 (§ 1B1.9).

*§ 2L2.1 Trafficking in Evidence of Citizenship or Documents Authorizing Entry*

162. *Proposed Amendment:* Section 2L2.1(a) is amended by deleting "6" and inserting in lieu thereof "9".

Section 2L2.1(b)(1) is amended by deleting "for profit, increase by 3 levels" and inserting in lieu thereof "other than for profit, decrease by 3 levels".

*Reason for Amendment:* The purpose of this amendment is to conform the structure of this guideline to that of § 2L1.1.

Related amendment: 164 (§ 2L2.3).

*§ 2L2.2 Fraudulently Acquiring Evidence of Citizenship or Documents Authorizing Entry for Own Use*

163. Section 2L2.2 is amended by inserting as a new subsection the following:

"(b) Specific Offense Characteristic

(1) If the defendant is an unlawful alien who has been deported (voluntarily or involuntarily) on one or more occasions prior to the instant offense, increase by 2 levels.".

The Commentary to § 2L2.2 captioned "Application Notes" is amended by deleting:

"1. In the case of a defendant who is an unlawful alien and has been deported (voluntarily or involuntarily) on one or more occasions prior to the instant offense, the Commission recommends an upward departure of 2 levels in order to provide a result equivalent to § 2L1.2.",

by renumbering Note 2 as Note 1, and by deleting "Notes" and inserting in lieu thereof "Note".

*Reason for Amendment:* The purpose of this amendment is to convert a departure recommendation into a specific offense characteristic. Related amendment: 165 (§ 2L2.4).

*§ 2L2.3 Trafficking in a United States Passport*

164. *Proposed Amendment:* Section 2L2.3(a) is amended by deleting "6" and inserting in lieu thereof "9".

Section 2L2.3(b)(1) is amended by deleting "for profit, increase by 3 levels" and inserting in lieu thereof "other than for profit, decrease by 3 levels".

*Reason for Amendment:* The purpose of this amendment is to conform the structure of this guideline to that of § 2L1.1. Related amendment: 162 (§ 2L2.1).

*§ 2L2.4 Fraudulently Acquiring or Improperly Using a United States Passport*

165. Section 2L2.4 is amended by inserting as a new subsection the following:

"(b) Specific Offense Characteristic

(1) If the defendant is an unlawful alien who has been deported (voluntarily or involuntarily) on one or more occasions prior to the instant offense, increase by 2 levels.".

The Commentary to § 2L2.4 captioned "Application Notes" is amended by deleting:

"1. In the case of a defendant who is an unlawful alien and has been deported (voluntarily or involuntarily) on one or more occasions prior to the instant offense, the Commission recommends an upward departure of 2 levels in order to provide a result equivalent to § 2L1.2.",

by renumbering Note 2 as Note 1, and by deleting "Notes" and inserting in lieu thereof "Note".

*Reason for this Amendment:* The purpose of this amendment is to convert a departure recommendation into a specific offense characteristic. Related amendment: 163 (§ 2L2.2).

*§ 2N3.1 Odometer Laws and Regulations*

166. *Proposed Amendment:* Section 2N3.1(b) is amended by deleting:

"If more than one vehicle was involved, apply § 2F1.1 (Offenses Involving Fraud or Deceit).", and inserting in lieu thereof:

"(b) Cross Reference

(1) If the offense involved more than one vehicle, apply § 2F1.1 (Fraud and Deceit)."

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error, and to conform the phraseology of this subsection to that used elsewhere in the guidelines. The caption "Cross reference" and "(1)" are added, and the cross reference to "Offenses Involving Fraud or Deceit" is corrected to read "Fraud and Deceit".

*§ 2P1.1 Escape, Instigating or Assisting Escape*

167. *Proposed Amendment:* Section 2P1.1(a) is amended by deleting:

"(1) 13, if from lawful custody resulting from a conviction or as a result of a lawful arrest for a felony;

(2) 8, if from lawful custody awaiting extradition, pursuant to designation as a recalcitrant witness or as a result of a lawful arrest for a misdemeanor.",

and inserting in lieu thereof:

"(1) 13, if the custody or confinement is by virtue of an arrest on a charge of felony, or conviction of any offense;

(2) 8, otherwise.".

*Reason for Amendment:* The purpose of this amendment is to clarify the language of the guideline by making it conform more closely to that used in 18 U.S.C. 751, the statute from which it was derived.

168. *Proposed Amendment:* Section 2P1.1(b)(3) is amended by deleting:

"If the defendant committed the offense while a correctional officer or other employee of the Department of Justice, increase by 2 levels.",

and inserting in lieu thereof:

"If the defendant was a law enforcement or correctional officer or employee, or an employee of the Department of Justice, at the time of the offense, increase by 2 levels.".

*Reason for Amendment:* The current specific offense characteristic (b)(3) applies only to correctional officers or Justice Department employees, and not to local or state law enforcement officers who might have custody of a federal prisoner, or even to federal law enforcement officers who are not employed by the Department of Justice (e.g., Secret Service agents are employed by the Treasury Department). It also does not appear to apply to law enforcement or correctional employees who are not sworn officers unless they are Justice Department employees. The purpose of this amendment is to correct this error.

169. *Offense Levels for Certain Escapes:* Under the current guidelines, an escape from custody resulting from a conviction or a lawful arrest for a felony has a base offense level of 13. If, however, the escape is from non-secure custody and the defendant returns voluntarily within 96 hours, the base offense level is reduced by 7 levels to level 6. If the defendant does not return voluntarily within 96 hours, there is no difference in offense level between an escape from secure or non-secure custody.

The Commission seeks comment on whether an additional distinction should be made between escape from secure and non-secure custody for cases not covered by the 7 level reduction for voluntary return from an escape from non-secure secure custody within 96 hours. Some practitioners have reported that the guidelines have drastically increased the sanctions for escapes from non-secure custody not eligible for the 7-level reduction as contrasted to past practice. Most such defendants will have a criminal history score of at least five (at least 2 points from § 4A1.1(b); 2 points from § 4A1.1(d); and 1 point from § 4A1.1(e)). The Bureau of Prisons has recommended an offense level of 10 (3-levels less than base offense level 13) for an escape from non-secure custody not qualifying for the reduction for voluntary return within 96 hours).

The Commission also seeks comment on whether there should be any reduction for voluntary return and, if such a reduction is appropriate, whether the 96 hours distinction currently used is appropriate. Comment is also sought on whether any distinction between escape from secure and non-secure custody should take into account the nature of the offense for which he is confined, or the security level of the institution in which the defendant is confined. If a distinction between escape from secure

VOL 54 ISS 41 MR 3 1989 UMI

and non-secure custody is appropriate, should or should not this distinction apply in the case of all offenders or should such a distinction not apply to certain offenders such as drug traffickers or violent offenders? Should a failure to return from a furlough from a secure institution be treated differently than a failure to return from a furlough from a non-secure institution? Where a defendant is returned to custody following an arrest for a new crime while on escape status, such return does not constitute a voluntary return for guideline purposes. Should the guidelines, however, provide an additional distinction to cover cases in which the defendant returns voluntarily from an escape and is later discovered to have committed a new offense while on escape status? If additional distinctions to the guidelines are believed warranted, comments are sought as to the most appropriate structure to accommodate such distinctions.

*§ 2P1.2 Providing or Possessing Contraband in Prison*

170. *Proposed Amendment:* Section 2P1.2(b)(1) is amended by deleting:

"If the defendant committed the offense while a correctional officer or other employee of the Department of Justice, increase by 2 levels.",

and inserting in lieu thereof:

"If the defendant was a law enforcement or correctional officer or employee, or an employee of the Department of Justice, at the time of the offense, increase by 2 levels.".

*Reason for Amendment:* The current specific offense characteristic (b)(3) applies only to correctional officers or Justice Department employees, and not to local or state law enforcement officers who might have custody of a federal prisoner, or even to federal law enforcement officers who are not employed by the Department of Justice (e.g., Secret Service agents are employed by the Treasury Department). It also does not appear to apply to law enforcement or correctional employees who are not sworn officers unless they are Justice Department employees. The purpose of this amendment is to correct this anomaly.

171. *Proposed Amendment:* Section 2P1.2 is amended by inserting the following cross reference:

"(c) Cross Reference

(1) If the defendant is convicted under 18 U.S.C. 1791(a)(1) and is punishable under 18 U.S.C. 1791(b)(1), the offense level is 2 plus the offense level from § 2D1.1, but in no event less than level 26.".

The Commentary to § 2P1.2 captioned "Application Note" is amended by deleting the "Note" and inserting in lieu thereof "Notes", and inserting the following additional Note:

"2. Pursuant to 18 U.S.C. 1791(c), a sentence imposed upon an inmate for a violation of 18 U.S.C. 1791 shall be consecutive to the sentence being served at the time of the violation.".

*Reason for Amendment:* This amendment implements the direction to the Commission in Section 6466 of the Omnibus Anti-Drug Abuse Act of 1988.

*Additional Explanatory Statement:* Section 6466 of the Omnibus Anti-Drug Abuse Act of 1988 contains a direction to the Commission to establish an offense level for the offense of providing certain controlled substances to an inmate that is 2 levels greater than the offense level for the underlying offense, but in no event less than level 26. The proposed amendment implements this direction to the Commission.

*§ 2P1.4 Trespass on Bureau of Prisons Facilities*

172. *Proposed Amendment:* Section 2P1.4 and the Commentary thereto are amended by deleting the entire text, including the title, as follows:

*"§ 2P1.4. Trespass on Bureau of Prisons Facilities*

(a) Base Offense Level: 6

Commentary

*Statutory Provision:* 18 U.S.C. 1793.".

*Reason for Amendment:* The purpose of this amendment is to delete a guideline applying only to a petty offense. Petty offenses were deleted from coverage of the guidelines by the adoption of § 1B1.9 (effective June 15, 1988). Related amendment: 15 (§ 1B1.9).

*§ 2Q1.3 Mishandling of Other Environmental Pollutants; Recordkeeping, Tampering and Falsification*

173. *Proposed Amendment:* The Commentary to § 2Q1.3 captioned "Statutory provisions" is amended by deleting "§ 4912,".

*Reason for Amendment:* The purpose of this amendment is to delete a reference to a petty offense. Related amendment: 15 (§ 1B1.9).

*§ 2Q1.4 Tampering or Attempted Tampering With Public Water System*

174. *Proposed Amendment:* Section 2Q1.4(b)(1) is amended by inserting "bodily" immediately preceding "injury".

The Commentary to § 2Q1.4 captioned "Application Note" is amended by deleting Note 1 and inserting in lieu thereof:

"1. 'Serious bodily injury' is defined in the Commentary to § 1B1.1 (Application Instructions).".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

*§ 2Q1.5 Threatened Tampering With Public Water System*

175. *Proposed Amendment:* Section 2Q1.5(b) is amended by deleting:

"(2) If the purpose of the offense was to influence government action or to extort money, increase by 8 levels.";

and by inserting as a new subsection:

"(c) Cross Reference

(1) If the purpose of the offense was to influence government action or to extort money, apply § 2B3.2 (Extortion by Force or Threat of Injury or Serious Damage).".

Section 2Q1.5(b) is amended by deleting "Characteristics" and inserting in lieu thereof "Characteristic".

*Reason for Amendment:* The purposes of this amendment are to convert a specific offense characteristic to a cross-reference and make the guidelines internally more consistent.

*§ 2Q1.6 Hazardous or Injurious Devices on Federal Lands*

176. *Proposed Amendment:* Chapter Two, Part Q, Subpart 1, is amended by inserting the following additional guideline and accompanying Commentary:

*"§ 2Q1.6 Hazardous or Injurious Devices on Federal Lands*

(a) Base Offense Level (Apply the Greatest)

(1) If the intent was to violate the Controlled Substance Act, apply § 2D1.9 (Placing or Maintaining Dangerous Devices on Federal Property to Protect the Unlawful Production of Controlled Substances);

(2) If the intent was to obstruct the harvesting of timber, and property destruction resulted, apply § 2B1.3 (Property Damage or Destruction (Other Than by Arson or Explosives));

(3) If the offense involved reckless disregard to the risk that another person would be placed in danger of death or serious bodily injury under circumstances manifesting extreme indifference to such risk, [2 levels less than the offense level] [1 level less than the offense level] [the offense level] from § 2A2.2 (Aggravated Assault);

(4) Otherwise, 6.

*Statutory Provision:* 16 U.S.C. 1864.

*Background:* The statute covered by this guideline proscribes a wide variety of conduct, ranging from placing nails in trees to interfere with harvesting equipment to placing anti-personnel devices capable of causing death or serious bodily injury to protect the unlawful production of a controlled substance. Subsections (a)(1)–(a)(3) cover the more serious forms of this offense. Subsection (a)(4) provides a minimum offense level of 6 where the intent was to obstruct the harvesting of timber and little or no property damage resulted.".

*Reason for Amendment:* The proposed amendment adds a guideline to cover an offense created by section 6254(f) of the Omnibus Anti-Drug Abuse Act of 1988.

*Additional Explanatory Statement:* Section 6254(f) of the Omnibus Anti-Drug Abuse Act of 1988 prohibits the placing of hazardous or injurious devices on federal land with intent (1) to violate the Controlled Substance Act, (2) to obstruct or harass the harvesting of timber, or (3) with reckless disregard to the risk that another person will be placed in danger of death or bodily injury and under circumstances manifesting extreme indifference to such risk.

The alternative base offense levels cover the various forms of conduct covered by this statute. Three options for subsection (a)(3) are shown. The Commission seeks comment on whether an offense level less than that provided under § 2A2.2 (Aggravated Assault) should be used because the offense covered by this guideline does not require a specific intent to injure.

*§ 2Q2.1 Specially Protected Fish, Wildlife, and Plants*

177. *Proposed Amendment:* Section 2Q2.1(b)(3) is amended by deleting "Apply" and inserting in lieu thereof "If more than one applies, use".

*Reason for Amendment:* The purpose of this amendment is to conform to the style of other guidelines.

178. *Proposed Amendment:* Section 2Q2.1 is amended in the title by inserting at the end "; Smuggling and Otherwise Unlawfully Dealing in Fish, Wildlife, and Plants"

The Commentary to § 2Q2.1 captioned "Statutory Provisions" is amended by inserting immediately before the period at the end", 3373(d); 18 U.S.C. 545".

The Commentary to § 2Q2.1 captioned "Background" is amended in the first sentence by deleting "and the Fur Seal Act. These statutes provide special protection to particular species of fish, wildlife and plants." and inserting in lieu thereof "the Fur Seal Act, the Lacey Act, and to violations of 18 U.S.C. 545 where the smuggling activity involved fish, wildlife, or plants.".

*Reasons for Amendment:* The purpose of this amendment is to consolidate two guidelines that cover similar offenses.

*Additional Explanatory Statement:* §§ 2Q2.1 and 2Q2.2 are virtually identical. Accordingly, the amendment would combine them into a single guideline by deleting § 2Q2.2 and incorporating the material it covers into § 2Q2.1. The base offense level for the combined guidelines is level 6. Throughout the guidelines generally a base offense level of 6 is assigned to misdemeanors and, specifically, a base offense level of 6 is provided for misdemeanors under § 2Q1.1. Thus, the alternate base offense level of 4 from § 2Q2.2 is eliminated as anomalous.

*§ 2Q2.2 Lacey Act: Smuggling and Otherwise Unlawfully Dealing in Fish, Wildlife, and Plants*

179. *Proposed Amendment:* Section § 2Q2.2 is amended by deleting the guideline and the Commentary thereto, including the title, in its entirety, as follows:

*"§ 2Q2.2. Lacey Act; Smuggling and Otherwise Unlawfully Dealing in Fish, Wildlife, and Plants*

(a) Base Offense Level:

(1) 6, if the defendant knowingly imported or exported fish, wildlife, or plants, or knowingly engaged in conduct involving the sale or purchase of fish, wildlife, or plants with a market value greater than $350; or

(2) 4.

(b) Specific Offense Characteristics

(1) If the offense involved a commercial purpose, increase by 2 levels.

(2) If the offense involved fish, wildlife, or plants that were not quarantined as required by law, increase by 2 levels.

(3) Apply the greater:

(A) If the market value of the fish, wildlife, or plants exceeded $2,000, increase the offense level by the corresponding number of levels from the table in § 2F1.1 (Fraud and Deceit); or

(B) If the offense involved a quantity of fish, wildlife, or plants that was substantial in relation either to the overall population of the species or to a discrete subpopulation, increase by 4 levels.

Commentary

*Statutory Provisions:* 16 U.S.C. 3372(d); 18 U.S.C. 545.

*Application Note:*

1. This section applies to violations of 18 U.S.C. 545 where the smuggling activity involved fish, wildlife, or plants. In other cases, see §§ 2T3.1 and 2T3.2.

*Background:* This section applies to violations of the Lacey Act Amendments of 1981, 16 U.S.C. 3373(d), and to violations of 18 U.S.C. 545 where the smuggling activity involved fish, wildlife, or plants. These are the principal enforcement statutes utilized to combat interstate and foreign commerce in unlawfully taken fish, wildlife, and plants. The adjustments for specific offense characteristics are identical to those in § 2Q2.1.".

*Reason for Amendment:* The purpose of this amendment is to consolidate this guideline with § 2Q2.1. See explanation at Amendment 178.

*§ 2R1.1 Bid-Rigging, Price-Fixing or Market-Allocation Agreements Among Competitors*

180. *Proposed Amendment:* Section 2R1.1(b)(2) is amended in the first column of the table by deleting:

"Volume of Commerce

(A) Less than $1,000,000.
(B) $1,000,000–$4,000,000.
(C) $4,000,001–$15,000,000.
(D) $15,000,001–$50,000,000.
(E) over $50,000,000".

and inserting in lieu thereof:

"Volume of Commerce (Apply the Greatest)

(A) Less than $1,000,000.
(B) $1,000,000–$4,000,000.
(C) More than $4,000,000.
(D) More than $15,000,000.
(E) More than $50,000,000".

*Reason for Amendment:* The purpose of this amendment is to eliminate minor gaps in the loss table. Related amendments: 32 (§ 2B1.1); 39 (§ 2B2.1); 47 (§ 2B3.1); 115 (§ 2F1.1); 181 (§ 2S1.1); 209 (§ 2T4.1).

* * * * *

*§ 2S1.1 Laundering of Monetary Instruments*

181. *Proposed Amendment:* Section 2S1.1(b)(2) is amended in the first column of the table by deleting:

"Value

(A) $100,000 or less.
(B) $100,001–$200,000.
(C) $200,001–$350,000.
(D) $350,001–$800,000.
(E) $800,001–$1,000,000.
(F) $1,000,001–$2,000,000.
(G) $2,000,001–$3,500,000.
(H) $3,500,001–$6,000,000.
(I) $6,000,001–$10,000,000.
(J) $10,000,001–$20,000,000.
(K) $20,000,001–$35,000,000.
(L) $35,000,001–$60,000,000.
(M) $60,000,001–$100,000,000.
(N) more than $100,000,000".

and inserting in lieu thereof:

"Value (Apply the Greatest)

(A) $100,000 or less.
(B) More than $100,000.
(C) More than $200,000.
(D) More than $350,000.
(E) More than $800,000.
(F) More than $1,000,000.
(G) More than $2,000,000.
(H) More than $3,500,000.
(I) More than $6,000,000.
(J) More than $10,000,000.
(K) More than $20,000,000.
(L) More than $35,000,000.
(M) More than $60,000,000.

VOL 54 ISS 41 MR 3 1989 UMI

(N) More than $100,000,000".

*Reason for Amendment:* The purpose of this amendment is to eliminate minor gaps in the value table. Related amendments: 32 (§ 2B1.1); 39 (§ 2B2.1); 47 (§ 2B3.1); 115 (§ 2F1.1); 180 (§ 2R1.1); 209 (§ 2T4.1).

182. *Proposed Amendment:*

[OPTION 1: The Commentary to § 2S1.1 captioned "Background" is amended in the third paragraph by adding the following new sentence at the end thereof: "Effective November 18, 1988, 18 U.S.C. 1956(a)(1)(A) contains two subsections. The base offense level of 23 applies to § 1956(a)(1)(A) (i) and (ii).".]

[OPTION 2: Section 2S1.1 is amended by inserting the following new subsection:

"(c) Cross Reference:

If the defendant is convicted of violating 18 U.S.C. 1956(a)(1)(A)(ii), apply § 2T1.1 (Tax Evasion) as if the defendant had been convicted of violating 26 U.S.C. 7201.

(d) Note:

In the case of an offense committed prior to November 18, 1988, the base offense level from subsection (a)(1) applies to any conviction under 18 U.S.C. 1956(a)(1)(A).".

The Commentary to § 2S1.1 captioned "Background" is amended in the third paragraph by deleting "(a)(1)(A)", and inserting in lieu thereof "(a)(1)(A)(i)".]

*Reason for Amendment:* The purpose of this amendment is to reflect a newly created means of violating 18 U.S.C. 1956. Additional Explanatory Statement: Section 6471 of the Omnibus Anti-Drug Abuse Act of 1988 creates a new subsection in 18 U.S.C. 1956(a)(1)(A) proscribing money laundering for the purpose of evading taxes. Two options for incorporating this statutory amendment in the guidelines appear above. First, the Commission could treat a conviction under section 1956(a)(1)(A)(ii) the same as a conviction under section 1956(a)(1)(A)(i). Second, the Commission could treat a violation of section 1956(a)(1)(A)(ii) the same as a conviction for tax evasion. The Commission seeks public comment with respect to these options.

183. *Proposed Amendment:* The Commentary to § 2S1.1 captioned "Background" is amended in the fourth paragraph by deleting "involvement" and inserting in lieu thereof "support thereof".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary.

*§ 2S1.2 Engaging in Monetary Transactions in Property Derived From Specified Unlawful Activity*

184. *Proposed Amendment:* Section 2S1.2(b)(1)(A) is amended by adding at the end "or".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

*§ 2S1.3 Failure to Report Monetary Transactions; Structuring Transactions to Evade Reporting Requirements*

185. *Proposed Amendment:* Section 2S1.3(a)(1)(C) is amended by deleting "the proceeds of criminal activity" and inserting in lieu thereof "criminally derived property", and in subsection (b)(1) by inserting "property" immediately following "criminally derived".

The Commentary to § 2S1.3 captioned "Application Note" is amended by deleting:

"1. As used in this guideline, funds or other property are the 'proceeds of criminal activity' or 'criminally derived' if they are 'criminally derived property,' within the meaning of 18 U.S.C. 1957.".

and inserting in lieu thereof:

"1. 'Criminally derived property' means any property constituting, or derived from, proceeds obtained from a criminal offense. See 18 U.S.C. 1957(f)(2).".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline.

186. *Proposed Amendment:* The Commentary to § 2S1.3 captioned "Statutory Provisions" is amended by inserting immediately before "31 U.S.C." "26 U.S.C. 7203 (if a willful violation of 26 U.S.C. 6050I);".

*Reason for Amendment:* The purpose of this amendment is to conform the guideline to a revision of the relevant statute. Related amendment: 194 (§ 2T1.2); 287 (Appendix A).

187. *Proposed Amendment:* The Commentary to § 2S1.3 captioned "Application Note" is amended in the captioned by deleting "Note" and inserting in lieu thereof "Notes", and by inserting the following additional Note:

"2. Subsection (a)(1)(C) applies in circumstances that would have led a reasonable person to believe that the funds were criminally derived property. Subsection (b)(1) applies if the defendant knew or believed the funds were criminally derived property. Subsection (b)(1) applies in addition to, and not in lieu of, subsection (a)(1)(C). It is possible that a defendant 'believed' or 'reasonably should have believed' that the funds were criminally derived property even if, in fact, the funds were not so derived (e.g., in a 'sting' operation where the defendant is told the funds were derived from the unlawful sale of controlled substances).".

The Commentary to § 2S1.3 captioned "Background" is amended by deleting:

"The base offense level is set at 13 for the great majority of cases. However, the base offense level is set at 5 for those cases in which these offenses may be committed with innocent motives and the defendant reasonably believed that the funds were from legitimate sources. The higher base offense level applies in all other cases. The offense level is increased by 5 levels if the defendant knew that the funds were criminally derived.".

and inserting in lieu thereof the following:

"A base offense level of 13 is provided for those offenses where the defendant either structured the transaction to evade reporting requirements, made false statements to conceal or disguise the activity, or reasonably should have believed that the funds were the proceeds of criminal activity. A lower alternative base offense level of 5 is provided in all other cases. The Commission anticipates that such cases will involve simple recordkeeping or other more minor technical violations of the regulatory scheme governing certain monetary transactions committed by defendants who reasonably believe that the funds at issue emanated from legitimate sources. Where the defendant actually knew or believed that the funds were criminally derived, subsection (b)(1) provides for a 5 level increase in the offense level.".

The Commentary to § 2S1.3 captioned "Statutory Provisions" is amended by inserting "18 U.S.C. 1005;" immediately following "Provisions". Section 2S1.3(a)(1)(A) is amended by adding "or" immediately following "requirements;"

*Reason for Amendment:* The purposes of this amendment are to clarify the Commentary, to provide more complete statutory references, and to conform the format of the guideline to that used in other guidelines.

* * * * *

*§ 2T1.1 Tax Evasion*

188. *Proposed Amendment:* Section 2T1.1(a) is amended by deleting "When more than one year is involved, the tax losses are to be added.".

The Commentary to § 2T1.1 captioned "Application Notes" is amended in Note 2 by deleting "The court is to determine this amount as it would any other guideline factor." and inserting in lieu thereof "Although the definition of tax loss corresponds to what is commonly called the 'criminal deficiency,' its amount is to be determined by the same rules applicable in determining any other sentencing factor.".

The Commentary to § 2T1.1 captioned "Application Notes" is amended in Note 3 by deleting:

"Although the definition of tax loss corresponds to what is commonly called the 'criminal deficiency,' its amount is to be determined by the same rules applicable in determining any other sentencing factor. In accordance with the 'relevant conduct' approach adopted by the guidelines, tax losses resulting from more than one year are to be added whether or not the defendant is convicted of multiple counts.",

and by inserting in lieu thereof:

"In determining the total tax loss attributable to the offense (see § 1B1.3(a)(2)), all conduct violating the tax laws should be considered as part of the same course of conduct or common scheme or plan unless the evidence demonstrates that the conduct is clearly unrelated.".

*Reason for Amendment:* The purpose of this amendment is to clarify the determination of tax loss and to make this instruction consistent among §§ 2T1.1–2T1.3. Related amendments: 196 (§ 2T1.2); 199 (§ 2T1.3).

* * * * *

189. *Proposed Amendment:* Section 2T1.1(a) is amended by deleting ", including interest to the date of filing an indictment or information". The Commentary to § 2T1.1 captioned "Application Notes" is amended in Note 2 by deleting ", plus interest to the date of the filing of an indictment or information" and by inserting "interest or" immediately before "penalties.".

*Reason for Amendment:* The purpose of this amendment is to delete interest from the calculation of tax loss.

*Additional Explanatory Statement:* Inclusion of interest in determining total "tax loss" or criminal deficiency increases the complexity of guideline calculations, especially if the amount evaded is in dispute and thus must be determined at the sentencing hearing. Because interest accumulates, the amount of tax evaded would have to be determined year by year, frequently at different interest rates. The interest also accrues until the date of filing of an indictment or information. Thus, another complicating factor is that charges are sometimes withdrawn and refiled; in such cases it is not clear which cut-off date controls. Where multiple years of evasion are involved (which is normally the case), these calculations must be done separately for each year that taxes were evaded. This complexity is inconsistent with the spirit of the Commentary in § 2T1.1 which describes how the overlapping guideline ranges are designed to minimize the significance of disputes about tax loss. In addition, the inclusion of interest appears inconsistent with all other property offense guidelines and even some tax offense guidelines. When the individual is a victim in a theft or fraud case, lost interest does not increase the penalty for the defendant. Adoption of the proposed amendment should not result in significant changes in sentences; in most cases the deletion of interest will not affect the offense level by more than one level, if at all. It is also to be noted that the Commission is proposing an increase in the offense levels for various portions of the Tax Loss Table (Amendment 210). Related amendment: 202 (§ 2T1.6).

190. *Proposed Amendment:* Section 2T1.1(b)(1) is amended by deleting "(A)" and ", or (B) the offense concealed or furthered criminal activity from which the defendant derived a substantial portion of his income", by inserting "or to correctly identify the source of" immediately after "report", and by deleting "per" and inserting in lieu thereof "in any".

*Reason for Amendment:* The purposes of this amendment are to provide a more objective test for application of this enhancement, and to make clear that this enhancement applies if the defendant fails to report or disguises income exceeding $10,000 from criminal activity in any year. Related amendments: 193 (§ 2T1.2); 197 (§ 2T1.3).

191. *Proposed Amendment:* The Commentary to § 2T1.1 captioned "Application Notes" is amended in Note 6 by deleting "Whether 'sophisticated means' were employed (§ 2T1.1(b)(2)) requires a subjective determination similar to that in § 2F1.1(b)(2)." and inserting in lieu thereof:

" 'Sophisticated means,' as used in § 2T1.1(b)(2), includes conduct that is more complex or demonstrates greater intricacy or planning than a routine tax-evasion case.".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary. Related amendments: 195 (§ 2T1.2); 198 (§ 2T1.3); 201 (§ 2T1.4).

* * * * *

192. *Proposed Amendment:* The Commentary to § 2T1.1 captioned "Background" is amended in the second paragraph by deleting "Tax Table" wherever it appears and inserting in lieu thereof in each instance "Sentencing Table".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

* * * * *

*§ 2T1.2 Willful Failure to File Return, Supply Information, or Pay Tax*

193. *Proposed Amendment:* Section 2T1.2(b)(1) is amended by deleting "(A)" and ", or (B) the offense concealed or furthered criminal activity from which the defendant derived a substantial portion of his income", by inserting "or to correctly identify the source of" immediately after "report", and by deleting "per" and inserting in lieu thereof "in any".

*Reason for Amendment:* The purposes of this amendment are to provide a more objective test for application of enhancement, and to make clear that this enhancement applies if the defendant fails to report or disguises income exceeding $10,000 from criminal activity in any year. Related amendments: 190 (§ 2T1.1); 197 (§ 2T1.3).

194. *Proposed Amendment:* Section 2T1.2 is amended by adding the following additional subsection:

"(c) Cross Reference

(1) If the defendant is convicted of a willful violation of 26 U.S.C. 6050I, apply § 2S1.3 (Failure to Report Monetary Transactions) in lieu of this guideline."

The Commentary to § 2T1.2 captioned "Statutory Provision" is amended by inserting immediately before the period at the end of the sentence "(other than a willful violation of 26 U.S.C. 6050I)".

*Reason for Amendment:* The purpose of this amendment is to conform the guideline to a revision of the relevant statute. Related amendments: 186 (§ 2S1.3); 287 (Appendix A).

*Additional Explanatory Statement:* Section 7601 of the Omnibus Anti-Drug Abuse Act of 1988 revises 26 U.S.C. 6050I so that willful violations of that tax law are now analogous to money laundering statutes. As a result, § 2S1.3 should now cover willful violations of § 6050I.

195. *Proposed Amendment:* The Commentary to § 2T1.2 captioned "Application Notes" is amended in Note 2 by deleting "Whether 'sophisticated means' were employed (§ 2T1.2(b)(2)) requires a determination similar to that in § 2F1.1(b)(2)." and inserting in lieu thereof: " 'Sophisticated means,' as used in § 2T1.2(b)(2), includes conduct that is more complex or demonstrates greater intricacy or planning than a routine tax-evasion case.".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary. Related amendments: 191 (§ 2T1.1); 198 (§ 2T1.3); 201 (§ 2T1.4).

196. *Proposed Amendment:* The Commentary to § 2T1.2 captioned "Application Note" is amended in the caption by deleting "Note" and inserting in lieu thereof "Notes", and by inserting the following additional Note:

"3. In determining the total tax loss attributable to the offense (see § 1B1.3(a)(2)), all conduct violating the tax laws should be considered as part of the same course of conduct or common scheme or plan unless the evidence demonstrates that the conduct is clearly unrelated.".

VOL 54 ISS 41 MR 3 1989 UMI

*Reason for Amendment:* The purpose of this amendment is to clarify the determination of tax loss. Related amendments: 188 (§ 2T1.1); 199 (§ 2T1.3).

*§ 2T1.3 Fraud and False Statements Under Penalty of Perjury*

197. *Proposed Amendment:* Section 2T1.3(b)(1) is amended by deleting "(A)" and ", or (B) the offense concealed or furthered criminal activity from which the defendant derived a substantial portion of his income", by inserting "or to correctly identify the source of" immediately after "report", and by deleting "per" and inserting in lieu thereof "in any".

*Reason for Amendment:* The purposes of this amendment are to provide a more objective test for application of enhancement, and to make clear that this enhancement applies if the defendant fails to report or disguises income exceeding $10,000 from criminal activity in any year. Related amendments: 190 (§ 2T1.1); 193 (§ 2T1.2).

* * * * *

198. *Proposed Amendment:* The Commentary to § 2T1.3 captioned "Application Notes" is amended in Note 2 by deleting "Whether 'sophisticated means' were employed (§ 2T1.3(b)(2)) requires a determination similar to that in § 2F1.1(b)(2)." and inserting in lieu thereof: " 'Sophisticated means,' as used in § 2T1.3(b)(2), includes conduct that is more complex or demonstrates greater intricacy or planning than a routine tax-evasion case.".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary. Related amendments: 191 (§ 2T1.1); 195 (§ 2T1.2); 201 (§ 2T1.4).

199. *Proposed Amendment:* The Commentary to § 2T1.3 captioned "Application Notes" is amended by inserting the following additional Note:

"3. In determining the total tax loss attributable to the offense (see § 1B1.3(a)(2)), all conduct violating the tax laws should be considered as part of the same course of conduct or common scheme or plan unless the evidence demonstrates that the conduct is clearly unrelated.".

*Reason for Amendment:* The purpose of this amendment is to clarify the determination of tax loss. Related amendments: 190 (§ 2T1.1); 196 (§ 2T1.2).

*§ 2T1.4 Aiding, Assisting, Procuring, Counseling, or Advising Tax Fraud*

200. *Proposed Amendment:* The Commentary to § 2T1.4 captioned "Application Notes" is amended in Note 2 by deleting "§ 2T1.1(b)(2)" and inserting in lieu thereof "§ 2T1.4(b)(2)".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error. If proposed amendment 199 is adopted, this proposed amendment is withdrawn as unnecessary.

201. *Proposed Amendment:* The Commentary to § 2T1.4 captioned "Application Notes" is amended in Note 2 by deleting "Whether 'sophisticated means' were employed (§ 2T1.1(b)(2)) requires a determination similar to that in § 2F1.1(b)(2)." and inserting in lieu thereof: " 'Sophisticated means,' as used in § 2T1.4(b)(2), includes conduct that is more complex or demonstrates greater intricacy or planning than a routine tax-evasion case.".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary. Related amendments: 195 (§ 2T1.2); 198 (§ 2T1.3).

*§ 2T1.6 Failing to Collect or Truthfully Account for and Pay Over Tax*

202. *Proposed Amendment:* Section 2T1.6(a) is amended by deleting ", plus interest".

*Reason for Amendment:* The purpose of this amendment is to delete interest from the calculation of tax loss. Related amendment: 189 (§ 2T1.1).

*§ 2T1.9 Conspiracy to Impair, Impede or Defeat Tax*

203. *Proposed Amendment:* Section 2T1.9(b) is amended by deleting "either of the following adjustments" and inserting in lieu thereof "more than one".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

204. *Proposed Amendment:* The Commentary to section 2T1.9 captioned "Application Notes" is amended by deleting:

"2. The minimum base offense level is 10. If a tax loss from the conspiracy can be established under either §§ 2T1.1 or 2T1.3 (whichever applies to the underlying conduct), and that tax loss corresponds to a higher offense level in the Tax Table (§ 2T4.1), use that higher base offense level.

3. The specific offense characteristics are in addition to those specified in § 2T1.1 and § 2T1.3.

4. Because the offense is a conspiracy, adjustments from Chapter Three, Part B (Role in the Offense) usually will apply.",

and inserting in lieu thereof:

"2. The base offense level is the offense level (base offense level plus any applicable specific offense characteristics) from §§ 2T1.1 or 2T1.3 (whichever is applicable to the underlying conduct) if that offense level is greater than 10. Otherwise, the base offense level is 10.

3. Specific offense characteristics from § 2T1.9(b) are to be applied to the base offense level determined under § 2T1.9(a)(1) or (2).".

*Reason for Amendment:* The purpose of this amendment is to clarify Application Notes 2 and 3. Application Note 4 (the content of which does not appear in any of the other guidelines covering conspiracy) is deleted as unnecessary.

**Chapter Two, Part T, Subpart I**

205. If the calculation of interest is deleted from § 2T1.1 (amendment 189), the offense levels for §§ 2T1.1, 2T1.3, and 2T1.4 will be similar and will all depend upon the level of the "tax loss." The Commission seeks comment on whether the term "tax loss" should be standarized and, if so, on how this might best be accomplished. The Commission also seeks comment on how this term might be clarified. In addition, the Commission seeks comment on whether the offense level for § 2T1.2 should be more similar to, or the same as, § 2T1.1.

*§ 2T3.1 Evading Import Duties or Restrictions (Smuggling)*

206. *Proposed Amendment:* The Commentary to § 2T3.1 captioned "Application Notes" is amended in Note 2 by inserting "if the increase in market value due to importation is not readily ascertainable" immediately following "United States".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary. Related amendment: 207 (§ 2T3.2).

*§ 2T3.2 Receiving or Trafficking in Smuggled Property*

207. *Proposed Amendment:* The Commentary to § 2T3.2 is amended by inserting, at the end, the following caption and note:

"Application Note:

1. Particular attention should be given to those items for which entry is prohibited, limited, or restricted. Especially when such items are harmful or protective quotas are in effect, the duties evaded on such items may not adequately reflect the harm to society or protected industries resulting from their importation. In such instances, the court should impose a sentence above the guideline. A sentence based upon an alternative measure of the "duty" evaded, such as the increase in market value due to importation, or 25 percent of the items' fair market value in the United States, might be considered.".

*Reason for Amendment:* The purpose of this amendment is to clarify the application of the guideline by adding the text from Application Note 2 of the Commentary to § 2T3.1, which applies equally to this guideline section.

208. *Proposed Amendment:* The Commentary to § 2T3.2 captioned "Application Notes" (added by Amendment 206) is amended in Note 1 by inserting "if the increase in market value due to importation is not readily ascertainable" immediately following "United States".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary. Related amendment: 206 (§ 2T3.1).

*§ 2T4.1 Tax Table*

209. *Proposed Amendment:* Section 2T4.1 is amended in the first column of the tax table by deleting:

"Tax Loss

(A) less than $2,000.
(B) $2,000–$5,000.
(C) $5,001–$10,000.
(D) $10,001–$20,000.
(E) $20,001–$40,000.
(F) $40,001–$80,000.
(G) $80,001–$150,000.
(H) $150,001–$300,000.
(I) $300,001–$500,000.
(J) $500,001–$1,000,000.
(K) $1,000,001–$2,000,000.
(L) $2,000,001–$5,000,000.
(M) more than $5,000,000".

and inserting in lieu thereof:

"Tax Loss (Apply the Greatest)

(A) $2,000 or less.
(B) More than $2,000.
(C) More than $5,000.
(D) More than $10,000.
(E) More than $20,000.
(F) More than $40,000.
(G) More than $80,000.
(H) More than $150,000.
(I) More than $300,000.
(J) More than $500,000.
(K) More than $1,000,000.
(L) More than $2,000,000.
(M) More than $5,000,000".

*Reason for Amendment:* The purpose of this amendment is to eliminate minor gaps in the tax table. Related amendments: 32 (§ 2B1.1); 39 (§ 2B2.1); 47 (§ 2B3.1); 115 (§ 2F1.1); 180 (§ 2R1.1); 1B1 (§ 2S1.1).

210. *Proposed Amendment:* Section 2T4.1, as amended by proposed amendment 209, is further amended by deleting:

| | | |
|---|---|---|
| "(G) | More than $80,000 | 12 |
| (H) | More than $150,000 | 13 |
| (I) | More than $300,000 | 14 |
| (J) | More than $500,000 | 15 |
| (K) | More than $1,000,000 | 16 |
| (L) | More than $2,000,000 | 17 |
| (M) | More than $5,000,000 | 18" |

and inserting in lieu thereof:

| | | |
|---|---|---|
| "(G) | More than $70,000 | 12 |
| (H) | More than $120,000 | 13 |
| (I) | More than $200,000 | 14 |
| (J) | More than $350,000 | 15 |
| (K) | More than $500,000 | 16 |
| (L) | More than $800,000 | 17 |
| (M) | More than $1,500,000 | 18 |
| (N) | More than $2,500,000 | 19 |
| (O) | More than $5,000,000 | 20". |

*Reason for Amendment:* The purpose of this amendment is to increase the offense levels for offenses with larger loss values to better reflect the seriousness of the conduct. Related amendments: 33 (§ 2B1.1); 116 (§ 2F1.1); 40 (§ 2B2.1); 48 (§ 2B3.1).

*§ 2X1.1 Attempt, Solicitation, or Conspiracy Not Covered by a Specific Guideline*

211. *Proposed Amendment:* Section 2X1.1(b)(1) is amended by deleting "or solicitation".

Section 2X1.1(b) is amended by deleting:

"(3) If a solicitation, and the statute treats solicitation identically with the object of the offense, do not apply § 2X1.1(b)(1); i.e., the offense level for solicitation is the same as that for the object offense.",

and inserting in lieu thereof:

"(3)(A) If a solicitation, decrease by 3 levels unless the person solicited to commit the offense completed all the acts he believed necessary for successful completion of the object offense or the circumstances demonstrate that the person was about to complete all such acts but for apprehension or interruption by some similar event beyond such person's control.

(B) If the statute treats solicitation of the offense identically with the object offense, do not apply subdivision (A) above; i.e., the offense level for solicitation is the same as that for the object offense.".

*Reason for Amendment:* The current subsection (b)(1) does not clearly address how a solicitation is to be treated where the person solicited to commit the offense completes all the acts necessary for the successful completion of the offense. The purpose of this amendment is to clarify the treatment of such cases in a manner consistent with the treatment of attempts and conspiracies.

212. *Proposed Amendment:* Section 2X1.1 is amended in the title by deleting "Not Covered by a Specific Guideline" and inserting in lieu thereof "(Not Covered by a Specific Offense Guideline)". Section 2X1.1 is amended by inserting the following additional subsection:

"(c) Cross Reference.

(1) When an attempt, solicitation, or conspiracy is expressly covered by another offense guideline section, apply that guideline section.".

The Commentary to § 2X1.1 captioned Application Notes is amended by deleting Note 1 as follows:

"1. Certain attempts, conspiracies, and solicitations are covered by specific guidelines (e.g., § 2A2.1 includes attempt, conspiracy, or solicitation to commit murder; § 2A3.1 includes attempted criminal sexual abuse; and § 2D1.4 includes attempts and conspiracies to commit controlled substance offenses). Section 2X1.1 applies only in the absence of a more specific guideline.",

and inserting in lieu thereof:

"1. Certain attempts, conspiracies, and solicitations are expressly covered by other offense guidelines.

Offense guidelines that expressly cover attempts include: § 2A2.1 (Assault With Intent to Commit Murder; Conspiracy or Solicitation to Commit Murder; Attempted Murder); § 2A3.1 (Criminal Sexual Abuse; Attempt or Assault with the Intent to Commit Criminal Sexual Abuse); § 2A3.2 (Criminal Sexual Abuse of a Minor (Statutory Rape) or Attempt to Commit Such Acts); § 2A3.3 (Criminal Sexual Abuse of a Ward (Statutory Rape) or Attempt to Commit Such Acts); § 2A3.4 (Abusive Sexual Contact or Attempt to Commit Abusive Sexual Contact); § 2A4.2 (Demanding or Receiving Ransom Money); § 2A5.1 (Aircraft Piracy or Attempted Aircraft Piracy); § 2C1.1 (Offering, Giving, Soliciting, or Receiving a Bribe; Extortion Under Color of Official Right); § 2C1.2 (Offering, Giving, Soliciting, or Receiving a Gratuity); § 2D1.4 (Attempts and Conspiracies (in drug offenses)); § 2E5.1 (Bribery or Gratuity Affecting the Operation of an Employee Welfare or Pension Benefit Plan); § 2N1.1 (Tampering or Attempting to Tamper Involving Risk of Death or Serious Injury (consumer products)); § 2Q1.4 (Tampering or Attempted Tampering with Public Water System).". Offense guidelines that expressly cover conspiracies include: § 2A2.1 (Assault With Intent to Commit Murder;

BEST COPY AVAILABLE

VOL 54 ISS 41 MR 3 1989 UMI

Conspiracy or Solicitation to Commit Murder; Attempted Murder); § 2D1.4 (Attempts and Conspiracies (in drug offenses)); § 2T1.9 (Conspiracy to Impair, Impede or Defeat Tax). Offense guidelines that expressly cover solicitations include: § 2A2.1 (Assault with Intent to Commit Murder; Conspiracy or Solicitation to Commit Murder; Attempted Murder); § 2C1.1 (Offering, Giving, Soliciting, or Receiving a Bribe; Extortion Under Color of Official Right); § 2C1.2 (Offering, Giving, Soliciting, or Receiving a Gratuity); § 2E5.1 (Bribery or Gratuity Affecting the Operation of an Employee Welfare or Pension Benefit Plan); § 2H1.2 (Conspiracy to Interfere with Civil Rights); § 2T1.9 (Conspiracy to Impair, Impede or Defeat Tax).".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline.

213. *Proposed Amendment:* The Commentary to § 2X1.1 captioned "Application Notes" is amended by deleting:

"4. If the defendant was convicted of conspiracy or solicitation and also for the completed offense, the conviction for the conspiracy or solicitation shall be imposed to run concurrently with the sentence for the object offense, except in cases where it is otherwise specifically provided for by the guidelines or by law. 28 U.S.C. 994(1)(2).".

*Reason for Amendment:* The purpose of this amendment is to delete an Application Note that does not apply to any determination under this section. The material in this application note is already covered under Chapter Three, Part D and Chapter Five, Part G.

214. *Proposed Amendment:* The Commentary to § 2X1.1 is amended by inserting the following additional application note:

"4. In certain cases, the participants may have completed (or have been about to complete but for apprehension or interruption) all of the acts necessary for the successful completion of part, but not all, of the intended offense. In such cases, the offense level for the count (or group of closely-related multiple counts) is the offense level for the intended offense less 3 levels (under § 2X1.1(b)(1) or (2)) or the offense level for the part of the offense for which the necessary acts were completed (or about to be completed but for apprehension or interruption), whichever is greater. For example, where the intended offense was the theft of $800,000 but the participants completed (or were about to complete) only the acts necessary to steal $30,000, the offense level is the offense level for the theft of $800,000 less 3 levels, or the offense level for the theft of $80,000, whichever is greater. In the case of multiple counts that are not closely-related, whether the 3-level reduction under § 2X1.1(b)(1) or (2) applies is determined separately for each count.".

*Reason for Amendment:* The purpose of this amendment is to clarify how the guidelines are to be applied to partially completed offenses.

215. *Proposed Amendment:* The Commentary to § 2X1.1 captioned "Application Notes" is amended in the last sentence of Note 2 by deleting "intended" and inserting in lieu thereof "attempted".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary.

*§ 2X3.1 Accessory After the Fact*

216. *Proposed Amendment:* The Commentary to § 2X3.1 captioned "Application Notes" is amended in Note 1 by deleting:

" 'Underlying offense' means the offense as to which the defendant was an accessory.";

and inserting in lieu thereof:

" 'Underlying offense' means the offense as to which the defendant is convicted of being an accessory. Apply the base offense level plus any applicable specific offense characteristics that were known or should have been known by the defendant; see Application Note 1 of the Commentary to § 1B1.3 (Relevant Conduct).".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary.

*§ 2X4.1 Misprision of Felony*

217. *Proposed Amendment:* The Commentary to § 2X4.1 captioned "Application Notes" is amended in Note 1 by deleting:

" 'Underlying offense' means the offense as to which the misprision was committed.",

and inserting in lieu thereof:

" 'Underlying offense' means the offense as to which the defendant is convicted of committing the misprision. Apply the base offense level plus any applicable specific offense characteristics that were known or should have been known by the defendant; see Application Note 1 of the Commentary to § 1B1.3 (Relevant Conduct).".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary.

*§ 3A1.1 Vulnerable Victim*

218. *Proposed Amendment:* Section 3A1.1 is amended by deleting "the victim" wherever it appears and inserting in lieu thereof in each instance "a victim", and by inserting "otherwise" immediately before "particularly".

The Commentary to § 3A1.1 captioned Application Notes is amended in Note 1 by deleting:

"any offense where the victim's vulnerability played any part in the defendant's decision to commit the offense",

and inserting in lieu thereof the following:

"offenses where an unusually vulnerable victim is made a target of criminal activity by the defendant",

and by deleting:

"sold fraudulent securities to the general public and one of the purchasers",

and inserting in lieu thereof:

"engaged in a fraudulent mail-order scheme and one of the respondents from the general public".

*Reason for Amendment:* The purpose of the amendment is to clarify the guideline and Commentary.

*§ 3A1.2 Official Victim*

219. *Proposed Amendment:* Section 3A1.2 is amended by deleting "official as defined" and inserting in lieu thereof "person included".

*Reason for Amendment:* The purpose of this amendment is to clarify that this guideline applies to all persons listed in the referenced statute, 18 U.S.C. 1114.

220. *Proposed Amendment:* Section 3A1.2 (as amended by amendment 219) is further amended by deleting "If the victim" and inserting in lieu thereof:

"If—

(a) the victim",

and by deleting "crime was motivated by such status, increase by 3 levels." and inserting in lieu thereof: "offense of conviction was motivated by such status; or

(b) during the course of the offense or immediate flight therefrom, the defendant or a person for whose conduct the defendant is otherwise accountable, knowing or having reasonable cause to believe that a person was a law enforcement or corrections officer, assaulted such officer in a manner creating a substantial risk of serious bodily injury, increase by 3 levels.".

The Commentary to § 3A1.2 captioned "Application Notes" is amended by adding at the end the following:

"4. 'Motivated by such status' in subdivision (a) means that the offense of conviction was motivated by the fact that the victim was a law enforcement or corrections officer or other person covered under 18 U.S.C. 1114, or a member of the immediate family thereof. This adjustment would not apply, for example, where both the defendant and victim were employed by the same government agency and the offense was motivated by a personal dispute.

5. Subdivison (b) applies in circumstances tantamount to aggravated assault against a law enforcement or corrections officer, committed in the course of, or in immediate flight following, another offense, such as bank robbery. While this subsection may

apply in connection with a variety of offenses that are not by nature targeted against official victims, its applicability is limited to assaultive conduct against law enforcement or corrections officers that is sufficiently serious to create at least a 'substantial risk of serious bodily injury' and that is proximate in time to the commission of the offense. Thus, the adjustment in subsection (b) would not apply to a convicted bank robber who knocked down a police officer in a minor scuffle while attempting to escape from the bank, nor would it apply to an assault against a police officer attempting an arrest several months following a bank robbery.

6. The phrase 'substantial risk of serious bodily injury' in subsection (b) is a threshold level of harm that includes any more serious injury that was risked, as well as actual serious bodily injury (or more serious harm) if it occurs.".

*Reason for Amendment:* The purpose of the amendment is to set forth more clearly the categories of cases to which this adjustment is intended to apply.

221. *Proposed Amendment:* The Commentary to § 3A1.2 captioned "Application Notes" is amended in Note 3 by inserting the following as an additional sentence:

"In most cases, the offenses to which subdivision (a) will apply will be from Chapter Two, Part A (Offenses Against the Person). The only offense guideline in Chapter Two, Part A that specifically incorporates this factor is § 2A2.4 (Obstructing or Impeding Officers).".

*Reason for Amendment:* The purpose of this amendment is to clarify the application of the guideline.

222. *Proposed Amendment:* The Commentary to section 3A1.2 captioned "Application Notes" is amended by inserting, as an additional application note, the following:

"4. 'Motivated by such status' means motivated by the fact that the victim was a law enforcement or corrections officer or other person covered under 18 U.S.C. 1114, or a member of the immediate family thereof. This adjustment would not apply, for example, where both the defendant and victim were employed by the same government agency and the offense was motivated by a personal dispute.".

*Reason for Amendment:* The purpose of this amendment is to clarify the application of the guideline. If amendment 220 is adopted, this amendment is withdrawn as unnecessary.

223. *Proposed Amendment:* Section 3A1.2 is amended by deleting "the victim was any law-enforcement or corrections officer, any other official as defined in 18 U.S.C. 1114, or a member of the immediate family thereof, and" and inserting in lieu thereof "(A) the victim was a law-enforcement or corrections officer; a former law-enforcement or corrections officer; an officer or employee included in 18 U.S.C. 1114; a former officer or employee included in 18 U.S.C. 1114; or a member of the immediate family of any of the above, and (B)".

*Reason for Amendment:* The purpose of this amendment is to expand the coverage of this provision to reflect a statutory revision effected by section 6487 of the Omnibus Anti-Drug Abuse Act of 1988.

*§ 3A1.3 Restraint of Victim*

224. *Proposed Amendment:* Section 3A1.3 is amended by deleting "the victim of a crime" and inserting in lieu thereof "a victim".

The Commentary to § 3A1.3 captioned "Application Notes" is amended in Note 2 by deleting "the victim" and inserting in lieu thereof "a victim".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline.

225. *Proposed Amendment:* The Commentary to § 3A1.3 captioned "Application Notes" is amended by inserting the following additional Note:

"3. If the restraint was sufficiently egregious, an upward departure may be warranted. See § 5K2.4 (Abduction or Unlawful Restraint).".

*Reason for Amendment:* The purpose of this amendment is to clarify the relationship between §§ 3A1.3 and 5K2.4.

*§ 3C1.1 Willfully Obstructing or Impeding Proceedings*

226. *Proposed Amendment:* Section 3C1.1 is amended by deleting "from Chapter Two".

*Reason for Amendment:* The purpose of this amendment is to delete an incorrect reference.

227. *Proposed Amendment:* The Commentary to § 3C1.1 captioned "Application Notes" is amended in Note 4 by deleting:

", except in determining the combined offense level as specified in Chapter Three, Part D (Multiple Counts). Under § 3D1.2(e), a count for obstruction will be grouped with the count for the underlying offense. Ordinarily, the offense level for that Group of Closely Related Counts will be the offense level for the underlying offense, as increased by the 2-level adjustment specified by this section. In some instances, however, the offense level for the obstruction offense may be higher, in which case that will be the offense level for the Group. See § 3D1.3(a). In cases in which a significant further obstruction occurred during the investigation or prosecution of an obstruction offense itself (one of the above listed offenses), an upward departure may be warranted (e.g., where a witness to an obstruction offense is threatened during the course of the prosecution for the obstruction offense).".

and inserting in lieu thereof:

"To the offense level for that offense except where a significant further obstruction occurred during the investigation or prosecution of the obstruction offense itself (e.g., where the defendant threatened a witness during the course of the prosecution for the obstruction offense). Where the defendant is convicted both of the obstruction offense and the underlying offense, the count for the obstruction offense will be grouped with the count for the underlying offense under subsection (c) of § 3D1.2 (Groups of Closely-Related Counts). The offense level for that Group of Closely-Related Counts will be the offense level for the underlying offense increased by the 2-level adjustment specified by this section, or the offense level for the obstruction offense, whichever is greater.".

*Reason for Amendment:* The purpose of this amendment is to resolve an inconsistency between the Commentary in this section and the Commentaries in Chapter Two, Part J.

*§ 3D1.2 Groups of Closely Related Counts*

228. *Proposed Amendment:* Section 3D1.2(b)(3) is amended by deleting "§ 994(u)" and inserting in lieu thereof "§ 994(v)".

*Reason for Amendment:* This amendment corrects an erroneous reference.

229. *Proposed Amendment:* The Commentary to § 3D1.2 captioned "Application Notes" is amended in Note 3 by deleting "(6)", "(7)", and "(8)" and inserting in lieu thereof "(5)", "(6)", and "(7)" respectively.

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

230. *Proposed Amendment:* The Commentary to § 3D1.2 captioned "Application Notes" is amended in Note 9 by inserting after the second sentence:

"See § 1B1.2(d) and accompanying commentary.".

*Reason for Amendment:* The purpose of this amendment is to cross reference the newly created guideline subsection dealing with a multiple object conspiracy. Related amendment: 10 (§ 1B1.2).

231. *Proposed Amendment:* The Commentary to § 3D1.2 captioned "Background" is amended by deleting:

"In general, counts are grouped together only when they involve both the same victim (or societal harm in "victimless" offenses) and the same or contemporaneous transactions, except as provided in § 3D1.2 (c) or (d).",

and inserting in lieu thereof:

VOL 54 ISS 41 MR 3 1989 UMI

"Counts involving different victims (or societal harms in the case of "victimless" crimes) are grouped together only as provided in subsection (c) or (d).".

*Reason for Amendment:* The last sentence of the second paragraph of Background commentary fails to indicate that cases grouped under § 3D1.2(b) involve the same victim but do not require contemporaneous transactions. This amendment restates this sentence to clarify its meaning.

*§ 3D1.3 Offense Level Applicable to Each Group of Closely-Related Counts*

232. *Proposed Amendment:* Section 3D1.3(b) is amended in the second sentence by deleting "varying", and by inserting "of the same general type to which different guidelines apply (e.g., theft and fraud)" immediately following "offenses".

*Reason for Amendment:* The purpose of this amendment is to enhance the clarity of the guideline.

*§ 3D1.5 Determining the Total Punishment*

233. *Proposed Amendment:* The Commentary captioned "Illustrations of the Operation of the Multiple-Count Rules" following § 3D1.5 is amended in the last 2 sentences of example 3 by deleting "10" wherever it appears and inserting in lieu thereof in each instance "8".

*Reason for Amendment:* The amendment conforms to proposed amendment 117 to § 2F1.1.

*§ 3E1.1 Acceptance of Responsibility*

234. *Proposed Amendment:* The Commentary to § 3E1.1 captioned "Application Notes" is amended by deleting:

"4. An adjustment under this section is not warranted where a defendant perjures himself, suborns perjury, or otherwise obstructs the trial or the administration of justice (see § 3C1.1), regardless of other factors.",

and inserting in lieu thereof:

"4. Conduct resulting in an enhancement under § 3C1.1 (Willfully Obstructing or Impeding Proceedings) ordinarily indicates that the defendant has not accepted responsibility for his criminal conduct. There may, however, be extraordinary cases in which adjustments under both §§ 3C1.1 and 3E1.1 may apply.".

*Reason for Amendment:* The purposes of this amendment are to provide for extraordinary cases in which adjustments under both § 3C1.1 and § 3E1.1 are appropriate, and to clarify the reference to obstructive conduct under § 3C1.1.

*§ 4A1.1 Criminal History Category*

235. *Proposed Amendment:* Section 4A1.1(e) is amended by inserting "or while in imprisonment or escape status on such a sentence" immediately before the period at the end of the first sentence.

The Commentary to § 4A1.1 captioned "Application Notes" is amended in the second sentence of Note 5 by deleting "still in confinement" and inserting in lieu thereof "in imprisonment or escape status".

*Reason for Amendment:* The purpose of this amendment is to clarify that subsection (e) applies to defendants who are still in confinement status at the time of the instant offense (e.g., a defendant who commits the instant offense while in prison or on escape status).

236. *Proposed Amendment:* The Commentary to § 4A1.1 captioned "Application Notes" is amended in Note 4 by inserting at the end the following additional sentence: "For the purposes of this item, a 'criminal justice sentence' means a sentence countable under § 4A1.2 (Definitions and Instructions for Computing Criminal History).".

*Reason for Amendment:* The purpose of this amendment is to clarify the application of the guideline.

237. *Proposed Amendment:* The Commentary to § 4A1.1 captioned "Background" is amended in the third paragraph by inserting "a" immediately before "criminal", and by deleting "control" and inserting in lieu thereof "sentence".

*Reason for Amendment:* The purpose of this amendment is to conform the commentary to the guideline.

*§ 4A1.2 Definitions and Instructions for Computing Criminal History*

238. *Proposed Amendment:* Section 4A1.2(e)(1) is amended by inserting ", whenever imposed," immediately preceding "that resulted", and deleting "defendant's incarceration" and inserting in lieu thereof "defendant being incarcerated".

*Reason for Amendment:* The purpose of this amendment is to make clear that "resulted in the defendant's incarceration" applies to any part of the defendant's imprisonment and not only to the commencement of the defendant's imprisonment.

239. *Proposed Amendment:* Section 4A1.2(e) is amended by inserting, as an additional subsection, the following:

"(4) The applicable time period for certain sentences resulting from offenses committed prior to age eighteen is governed by § 4A1.2(d)(2).".

*Reason for Amendment:* The purpose of this amendment is to clarify the relationship between § 4A1.2 (d)(2) and (e).

240. Proposed Amendment: Section 4A1.2(f) is amended by inserting ", or a plea of nolo contendere," immediately following "admission of guilt".

*Reason for Amendment:* The purpose of this amendment is to clarify that a plea of nolo contendere is equivalent to finding of guilt for the purpose of § 4A1.2(f).

241. Proposed Amendment: The Commentary to § 4A1.2 captioned "Application Notes" is amended in Note 8 by deleting "4A1.2(e)" and inserting in lieu thereof "4A1.2 (d)(2) and (e)" and by inserting the following new sentence immediately after the first sentence:

"As used in § 4A1.2 (d) and (e), the term 'commencement of the instant offense' includes any relevant conduct. See § 1B1.3 (Relevant Conduct).".

*Reason for Amendment:* The purposes of this amendment are to correct a clerical error by inserting a reference to § 4A1.2(d)(2), and to clarify that "commencement of the instant offense" includes any relevant conduct.

242. Clarification of Definitions: The Commission has received feedback from probation officers and others that certain definitions in this section (particularly the definition of "Sentence of Imprisonment" in Application Note 2 and "Related Offenses" in Application Note 3) are difficult to apply in certain cases. The Commission seeks comment on how these definitions, or any other of the other definitions or instructions in this section can be improved.

*§ 4B1.1 Career Offender*

243. *The Career Offender Guideline:* In 28 U.S.C. 994(h), the Commission was directed to "assure that the guidelines specify a sentence to a term of imprisonment at or near the maximum term authorized for categories of defendants" if the defendant is convicted of a felony that is a "crime of violence" or a drug trafficking offense and has two such prior convictions. In the initial guidelines, the Commission interpreted this directive literally. Section 4B1.1 (Career Offender) currently specifies in essence that a defendant who is a career offender (as defined in 28 U.S.C. 994(h)) be sentenced to a term of imprisonment of from about 12% below the statutory maximum to about 10% above the statutory maximum[5] for the "crime of violence" or

[5] The term of imprisonment could exceed the statutory maximum for a single count in the event of convictions on multiple counts.

drug trafficking offense of which he is convicted. For example, for an armed robbery conviction, the defendant would be sentenced to approximately 22 to 27 years in prison; for unarmed robbery, 17.5 to 22 years; and, for selling ten grams of heroin, approximately 22 to 27 years. If the defendant is convicted of more than one count of a crime of violence or drug trafficking offense, the count having the highest maximum is used to determine the sentence.

This guideline has been criticized on a number of grounds, including: (1) Sentences based only on the statutory maximum ignore significant variations in the seriousness of the actual offense conduct and therefore (a) are unjust and (b) provide no marginal deterrence; (2) the sentence is frequently excessive in relation to the seriousness of the actual offense conduct; (3) the sentence is too heavily dependent on the charge of conviction for the instant offense and prior offenses (e.g., a prior robbery offense resulting in a state robbery conviction pursuant to a plea agreement for a sentence of probation counts as a prior conviction of a crime of violence, but a prior robbery offense resulting in negotiated plea to a grand larceny charge and imposition of a ten year prison term does not count as a prior conviction of a crime of violence. Thus, differences in plea negotiation practices among state courts can affect whether the career offender provision applies and result in a very large difference in the guideline range); (4) the distinction between the criminal records of offenders with a criminal history Category VI and those who are career offenders is insufficient to warrant such large differences in the resulting sentence; (5) the sentences are longer than are needed for incapacitation, and therefore waste prison space, which is in short supply and could be better used for other offenders; (6) prisons are not equipped to house the aged offenders who will be incarcerated as a result of this guideline; and (7) acceptance of responsibility has no impact on the guideline range, thus discouraging guilty pleas.

Critics assert that the flaw in the current guideline is that it embodies an overly literal reading of 28 U.S.C. 994(h). Senator Kennedy, the original author of this statutory directive, has recently observed that specific directions to the Commission must be read in conjunction with the general instructions to the Commission in the Sentencing Reform Act in order to avoid unjust results. The Senator singled out 28 U.S.C. 994(h) as one provision susceptible to producing inadvertently unjust or anomalous results.

The Commission is considering whether and, if so, how to revise the Career Offender guideline. Three options have been preliminarily proposed. The first two would create a new criminal history category, Category VII, for career offenders; the sentence would be tied to the offense level for the underlying offense. The third is similar to the current approach, but would eliminate all judicial discretion.

Under option 1, the sentences would start out 5 levels higher than for Criminal History Category VI, and generally would be about 2 to 4 years longer than for Category VI. However, at high offense levels, where sentences exceed 10 years, category VII would gradually merge with Category VI. In addition, Category VII would not apply if Category VI would suffice to incarcerate the defendant beyond the age of 50, because (1) criminal careers generally do not extend beyond the age of 50, but if they do, the offenses committed tend to be less serious than those committed by younger offenders; and (2) criminality is not a good predictor of future criminality beyond 10–15 years. This proposal represents a first attempt to make more efficient use of the career offender provision for incapacitation, while giving considerable weight to the seriousness of the crime(s) committed.

Under option 2, the sentences would simply be approximately double those for criminal history Category VI. Thus, the sentences for career offenders would depend only on the seriousness of the underlying offense conduct. At high offense levels, the sentences quickly reach 30 years to life. The sentencing ranges for options 1 and 2 would be as follows:

Category VII

| | Option 1 | Option 2 |
|---|---|---|
| 1 | 9–15 | 15–21. |
| 2 | 12–18 | 18–24. |
| 3 | 15–22 | 21–27. |
| 4 | 20–26 | 24–30. |
| 5 | 24–30 | 27–33. |
| 6 | 28–35 | 30–37. |
| 7 | 32–40 | 33–41. |
| 8 | 36–45 | 37–46. |
| 9 | 40–50 | 41–51. |
| 10 | 44–55 | 46–57. |
| 11 | 48–60 | 51–63. |
| 12 | 52–65 | 57–71. |
| 13 | 56–70 | 63–78. |
| 14 | 61–76 | 70–87. |
| 15 | 66–82 | 77–96. |
| 16 | 72–90 | 84–105. |
| 17 | 80–100 | 92–115. |
| 18 | 88–110 | 105–125. |
| 19 | 98–120 | 110–127. |
| 20 | 104–130 | 120–150. |
| 21 | 112–140 | 130–162. |
| 22 | 120–150 | 140–175. |
| 23 | 130–162 | 151–188. |
| 24 | 140–175 | 165–205. |
| 25 | 150–187 | 180–220. |
| 26 | 160–200 | 195–245. |
| 27 | 170–212 | 210–262. |
| 28 | 180–225 | 235–293. |
| 29 | 190–237 | 262–327. |
| 30 | 200–250 | 292–365. |
| 31 | 212–265 | 324–405. |
| 32 | 224–280 | 360–life. |
| 33 | 240–300 | 360–life. |
| 34 | 262–327 | 360–life. |
| 35 | 292–365 | 360–life. |
| 36 | 324–405 | 360–life. |
| 37 | 360–life | 360–life. |
| 38 | 360–life | 360–life. |
| 39 | 360–life | 360–life. |
| 40 | 360–life | 360–life. |
| 41 | 360–life | 360–life. |
| 42 | 360–life | 360–life. |
| 43 | life | life. |

Option 3 would be like the current guideline, except that the sentence would always be set at the statutory maximum.

Illustrations of the effect of the current guideline and of these three options follow:

| | Current career offender | Current category VI | Option 1 | Option 2 | Option 3 |
|---|---|---|---|---|---|
| One unarmed bank robbery | [1] 210–262 | 63–78 | 95–120 | 110–127 | 240. |
| Two unarmed bank robberies | 210–262 | 77–96 | 112–140 | 130–162 | 240. |
| One unarmed bank robbery, with serious injury | 210–262 | 92–115 | 130–162 | 151–188 | 240. |
| One armed bank robbery | [1] 262–327 | 84–105 | 120–150 | 140–175 | 300. |
| Two armed bank robberies | 262–327 | 100–125 | 140–175 | 165–205 | 300. |
| One armed bank robbery, with serious injury | [1] 262–327 | 130–162 | 160–200 | 195–245 | 300. |
| Assault fed ofcr (wpn, no inj) | [1] 100–125 | 77–96 | [1] 112–140 | [1] 130–162 | 120. |
| Robbery, U.S. Prop. (armed) | [1] 151–188 | 77–96 | 112–140 | 130–162 | 180. |
| Sale of heroin [2] (10 grams) | 262–327 | 46–57 | 72–90 | 80–104 | 360. |
| Sale of heroin [2] (100 grams) | 360–life | 120–150 | 160–200 | 195–245 | life. |

VOL 54 ISS 41 MR 3 1989 UMI

| | Current career offender | Current category VI | Option 1 | Option 2 | Option 3 |
|---|---|---|---|---|---|
| Sale of heroin [2] (1 kilogram) | 360-life | 210–262 | 224–280 | 360-life | life. |
| Sale of heroin [2] (100 kilograms) | 360-life | 324–405 | 324–405 | 360-life | life. |

[1] Indicates sentences that exceed the statutory maximum.
[2] Assumes at least one prior drug trafficking conviction; otherwise statutory maximums (and hence first and last columns) are lower.

These options merely illustrate possible approaches that could be employed, and are published to help focus comment. The Commission solicits comment addressing the purposes underlying 28 U.S.C. 994(h), the extent of the Commission's authority in implementing it, whether this guideline should be revised at this time, and how best to do so.

244. *Proposed Amendment:* The Commentary to § 4B1.1 captioned "Application Note" is amended by inserting as a new Note:

"2. 'Offense Statutory Maximum' refers to the maximum term of imprisonment authorized for the offense of conviction that is a crime of violence or serious drug offense. If more than one count of conviction is of a crime of violence or controlled substance offense, use the maximum authorized term of imprisonment for the count that authorizes the greatest maximum term of imprisonment.",

and in the caption by deleting "Note" and inserting in lieu thereof "Notes".

The Commentary to § 4B1.1 captioned "Background" is amended by deleting "128 Cong. Rec. 12792, 97th Cong., 2d Sess. (1982) ('Career Criminals' amendment No. 13 by Senator Kennedy), 12798 (explanation of amendment), and 129798 (remarks by Senator Kennedy)" and inserting in lieu thereof: "128 Cong. Rec. 26, 511–12 (1982) (text of 'Career Criminals' amendment by Senator Kennedy), 26, 515 (brief summary of amendment), 26, 517–18 (statement of Senator Kennedy)".

*Reason for Amendment:* The purposes of this amendment are to clarify the operation of the guideline, and to provide a citation to the more readily available edition of the Congressional Record.

*§ 4B1.2 Definitions.*

245. *Proposed Amendment:* Section 4B1.2 is amended by deleting "is defined under 18 U.S.C. 16" and inserting in lieu thereof:

"means any offense under federal or state law punishable by imprisonment for a term exceeding one year that—

(i) has as an element the use, attempted use, or threatened use of physical force against the person of another, or

(ii) is burglary of a dwelling, arson, or extortion, involves use of explosives, or otherwise involves conduct that presents a serious potential risk of physical injury to another.".

Section 4B1.2 is amended by deleting "identified in 21 U.S.C. 841, 845(b), 856, 952(a), 955, 955(a), 956; and similar offenses" and inserting in lieu thereof:

"under a federal or state law prohibiting the manufacture, import, export, or distribution of a controlled substance (or a counterfeit substance) or the possession of a controlled substance (or a counterfeit substance) with intent to manufacture, import, export, or distribute.".

The Commentary to § 4B1.2 captioned "Application Notes" is amended by deleting:

"1. 'Crime of violence' is defined in 18 U.S.C. 16 to mean an offense that has as an element the use, attempted use, or threatened use of physical force against the person or property of another, or any other offense that is a felony and that by its nature involves a substantial risk that physical force against the person or property of another may be used in committing the offense. The Commission interprets this as follows: murder, manslaughter, kidnapping, aggravated assault, extortionate extension of credit, forcible sex offenses, arson, or robbery are covered by this provision. Other offenses are covered only if the conduct for which the defendant was specifically convicted meets the above definition. For example, conviction for an escape accomplished by force or threat of injury would be covered; conviction for an escape by stealth would not be covered. Conviction for burglary of a dwelling would be covered; conviction for burglary of other structures would not be covered.

2. 'Controlled substance offense' includes any federal or state offense that is substantially similar to any of those listed in subsection (2) of the guideline. These offenses include manufacturing, importing, distributing, dispensing, or possessing with intent to manufacture, import, distribute, or dispense, a controlled substance (or a counterfeit substance). This definition also includes aiding and abetting, conspiring, or attempting to commit such offenses, and other offenses that are substantially equivalent to the offenses listed.",

and inserting in lieu thereof the following:

"1. The terms 'crime of violence' and 'controlled substance offense' include aiding and abetting, conspiring, and attempting to commit such offenses.

2. 'Crime of violence' includes murder, manslaughter, kidnapping, aggravated assault, forcible sex offenses, robbery, arson, extortion, extortionate extension of credit, and burglary of a dwelling. Other offenses are included where (A) that offense has as an element the use, attempted use, or threatened use, of physical force against the person of another, or (B) the conduct set forth in the count of which the defendant was convicted included use of explosives or, by its nature, presented a serious potential risk of physical injury to another.".

The Commentary to § 4B1.2 captioned "Application Notes" is amended in Note 4 by deleting "§ 4A1.2(e) (Applicable Time Period), § 4A1.2(h) (Foreign Sentences), and § 4A1.2(j) (Expunged Convictions)" and inserting in lieu thereof "§ 4A1.2 (Definitions and Instructions for Computing Criminal History)", and by deleting "Also applicable is the Commentary to § 4A1.2 pertaining to invalid convictions.".

*Reason for Amendment:* The purpose of this amendment is to clarify the coverage of this guideline.

*Additional Explanatory Statement:* Experience has demonstrated a need to clarify the definitions of a crime of violence and controlled substance offense used in this guideline. The proposed amendment substitutes comparable but clearer definitions of crime of violence and controlled substance offense. The definition of crime of violence is derived from 18 U.S.C. 924(e). In addition, the proposed amendment clarifies that all pertinent definitions and instructions in § 4B1.2 apply to this section.

* * * * *

*§ 4B1.3 Criminal Livelihood*

246. *Proposed Amendment:* Section 4B1.3 is amended by deleting "from which he derived a substantial portion of his income" and inserting in lieu thereof "engaged in as a livelihood".

The Commentary to § 4B1.3 captioned "Application Note" is amended by deleting "Note" and inserting in lieu thereof "Notes", and by inserting as an additional Note:

"2. 'Engaged in as a livelihood' means that (1) the defendant derived income from the pattern of criminal conduct that in any twelve-month period exceeded 2,000 times the hourly minimum wage under federal law (currently 2,000 × the hourly minimum wage under Federal law is $6,700); and (2) the totality of circumstances shows that such criminal conduct was the defendant's primary occupation in that twelve-month period (e.g., the defendant engaged in criminal conduct rather than regular, legitimate employment; or the defendant's legitimate employment was merely a front for his criminal conduct).".

The Commentary to § 4B1.3 captioned "Application Notes" is amended in Note 1 by deleting "This guideline is not intended to apply to minor offenses.".

The Commentary to § 4B1.3 captioned "Background" is amended by deleting "proportion" and inserting in lieu thereof "portion".

*Reason for Amendment:* The purpose of this amendment is to provide a better definition of the intended scope of this enhancement.

*Additional Explanatory Statement:* Feedback from probation officers and others has pointed out that the current guideline is subject to varying interpretation. Compare, for example, U.S. v. Kerr, 686 F. Supp. 1174 (W.D. Penn. 1988) with U.S. v. Rivera, 694 F. Supp. 1105 (S.D. NY 1988). The first prong of the proposed definition in application Note 2 above is derived from former 18 U.S.C. 3575, the provision from which the statutory instruction underlying this guideline [28 U.S.C. 994(i)(2)] was itself derived.

**Chapter Five, Part A—Sentencing Table**

247. *Proposed Amendment:* Chapter 5, Part A is amended in the Sentencing Table by deleting "0–1, 0–2, 0–3, 0–4, and 0–5" wherever it appears, and inserting in each instance "0–6".

*Reason for Amendment:* This amendment provides that the maximum of the guideline range is six months wherever the minimum of the guideline range is zero months. Related amendment: 257 (§ 5E4.2).

*Additional Explanatory Statement:* The court has discretion to impose a sentence of up to 6 months or a $5,000 fine for a Class B misdemeanor (Class B or C misdemeanors and infractions are not covered by the guidelines; see § 1B1.9). It appears anomalous that the Commission guidelines allow less discretion for certain felonies and Class A misdemeanors. In fact, in certain cases, a plea to a reduced charge of a Class B misdemeanor could result in a higher potential sentence because the sentence for the felony or Class A misdemeanor might be restricted to less than 6 months by the guidelines. This can happen when the Sentencing Table provides a guideline range of 0–1 month, 0–2 months, 0–3, 0–4, or 0–5 months. These very narrow ranges are not required by statute, which allows a 6 month guideline range in such cases.

The Commission proposes to remove this anomaly by amending the guideline table to provide that whenever the lower limit of the guideline range is 0 months, the upper limit of the guideline range is six months.

There is a similar anomaly in the Fine Table at § 5E4.2, in that the maximum of the fine table is, in certain cases, less than the $5,000 authorized for petty offenses. Providing a fine range of $100–$5,000 for an offense level of 3 or less, and $250–$5,000 for an offense level of 4 or 5, would remove this anomaly. Moreover, because the guidelines now cover only Class A misdemeanors and felonies, an increase in the minimum fine guideline to $100 is proposed.

*§ 5B1.3 Conditions of Probation*

248. *Proposed Amendment:* Section 5B1.3(c) is amended by inserting immediately before the period at the end of the first sentence the following:

", unless the court finds on the record that extraordinary circumstances exist that would make such a condition plainly unreasonable, in which event the court shall impose one or more of the other conditions set forth under 18 U.S.C. 3563(b)".

*Reason for Amendment:* The purpose of this amendment is to conform the guideline to a statutory revision.

249. *Proposed Amendment:* Section 5B1.3(a) is amended by inserting at the end "The court shall also impose a condition that the defendant not possess illegal controlled substances. 18 U.S.C. 3563(a)(3).".

Section 5B1.3 is amended by inserting the following as Commentary:

"Commentary

A broader form of the condition required under 18 U.S.C. 3563(a)(3) (pertaining to possession of controlled substances is set forth as recommended condition (7) at Section 5B1.4 (Recommended Conditions of Probation and Supervised Release).".

*Reason for Amendment:* This amendment references a mandatory condition of probation added by section 7307 of the Omnibus Anti-Drug Abuse Act. Related amendment: 253 (§ 5D3.3).

*§ 5C2.1 Imposition of a Term of Imprisonment*

250. *Proposed Amendment:* Section 5C2.1(e) is amended by deleting "Thirty days" and inserting in lieu thereof "One day", by deleting "one month" wherever it appears and inserting in lieu thereof in each instance "one day", and by deleting "One month" and inserting in lieu thereof "One day".

*Reason for Amendment:* The purpose of this amendment is to enhance the internal consistency of the guidelines.

**Chapter Five, Parts C, D, E, and F**

251. *Proposed Amendment:* Sections 5C2.1, 5D3.1, 5D3.2, 5D3.3, 5E4.1, 5E4.2, 5E4.3, 5E4.4, 5F5.1, 5F5.2, 5F5.3, 5F5.4, and 5F5.5 are amended by deleting the number immediately following each letter in the section and inserting in lieu thereof "1" in each instance.

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

*§ 5D3.3 Conditions of Supervised Release*

252. *Proposed Amendment:* Section 5D3.3 is amended by deleting subsection (b) and inserting in lieu thereof the following:

"(b) The court may impose other conditions of supervised release, to the extent that such conditions are reasonably related to (1) the nature and circumstances of the offense and the history and characteristics of the defendant, and (2) the need for the sentence imposed to afford adequate deterrence to criminal conduct; to protect the public from further crimes of the defendant; and to provide the defendant with needed educational or vocational training, medical care, or other correctional treatment in the most effective manner. 18 U.S.C. 3553(a)(2) and 3563(d).".

*Reason for Amendment:* The purposes of this amendment are to clarify the guideline and conform it to the statute as amended by Section 7106 of the Omnibus Anti-Drug Abuse Act of 1988.

253. *Proposed Amendment:* Section 5D3.3(a) is amended by inserting at the end "The court shall also impose a condition that the defendant not possess illegal controlled substances. 18 U.S.C. 3563(a)(3).".

The Commentary to 5D3.3 captioned "Background" is amended by inserting as the last sentence: "A broader form of the condition required under 18 U.S.C. 3563(a)(3) (pertaining to possession of controlled substances) is set forth as recommended condition (7) at Section 5B1.4 (Recommended Conditions of Probation and Supervised Release).".

*Reason for Amendment:* This amendment references a mandatory condition of supervised release added by section 7307 of the Omnibus Anti-Drug Abuse Act of 1988. Related amendment: 249 (§ 5B1.3).

VOL 54 ISS 41 MR 3 1989 UMI

*§ 5E4.1 Restitution*

254. *Proposed Amendment:* Section 5E4.1 is amended by inserting the following as an additional subsection:

"(c) With the consent of the victim of the offense, the court may order a defendant to perform services for the benefit of the victim in lieu of monetary restitution. 18 U.S.C. 3663(b)(4).".

*Reason for Amendment:* The purpose of this amendment is to insert language previously contained in § 5F5.3(b) where it had been erroneously placed. Related amendment: 261 (§ 5F5.3).

255. *Proposed Amendment:* Section 5E4.1 is amended in the Commentary entitled "Background" by deleting:

"See S. Rep. No. 225, 98th Cong., 1st Sess. 95–96.", and inserting in lieu thereof:

"See 18 U.S.C. 3563(b)(3) as amended by Section 7110 of Pub. L. No. 100–690 (1988).".

*Reason for Amendment:* This amendment replaces a reference to legislative history with a citation to a revised statute. Section 7110 of the Omnibus Anti-Drug Abuse Act of 1988 confirms the authority of a sentencing court to impose restitution as a condition of probation. Previously, such authority was inferred from 18 U.S.C. 3563(b)(20) (defendant may be ordered to "satisfy such other conditions as the court may impose") and from legislative history.

*§ 5E4.2 Fines for Individual Defendants*

256. *Proposed Amendment:* Section 5E4.2(a) is amended by deleting:

"If the guideline for the offense in Chapter Two prescribes a different rule for imposing fines, that rule takes precedence over this subsection.".

Section 5E4.2(b) is amended by inserting at the end the following additional sentence:

"If, however, the guideline for the offense in Chapter Two provides a specific rule for imposing a fine, that rule takes precedence over subsection (c) of this section.".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline. The last sentence of current § 5E4.2(a) is in the wrong place. This amendment moves the content of this sentence to subsection (b) where it belongs.

257. *Proposed Amendment:* Section 5E4.2(c)(3) is amended by deleting:

| | | |
|---|---|---|
| "1 | $25 | $250 |
| 2–3 | $100 | $1,000 |
| 4–5 | $250 | $2,500." |

and inserting in lieu thereof:

"3 and below ..... $100–$5,000
4–5 ..... $250–$5,000".

*Reason for Amendment:* This amendment revises the fine table for offense levels 5 and below. Related amendment: 247 (Chapter Five, Part A).

*Additional Explanatory Statement:* See additional explanatory statement at the proposed amendment to Chapter Five, Part A (amendment 247).

258. *Fines and Cost of Imprisonment:* The guidelines require the court to impose a fine on every defendant who possesses the ability to pay or is likely to become able to pay. The court is required to impose an additional fine sufficient to reimburse the government for the cost of imprisonment, probation or supervised release. The Commission solicits public comment concerning the appropriateness of these provisions. Of particular interest is the manner in which the fine guidelines have been applied during the year that the guidelines have been in effect. Public comment on these subjects will also assist the Commission to fulfill its statutory mandate to study the feasibility of requiring defendants to pay for the cost of punishment. (Section 7301 of the Omnibus Anti-Drug Abuse Act of 1988).

*§ 5E4.3 Special Assessments*

259. *Proposed Amendment:* The Commentary to Section 5E4.3 captioned "Background" is amended in the first paragraph by inserting at the end:

"Under the Victims of Crime Act, as amended by section 7085 of the Omnibus Anti-Drug Abuse Act of 1988, the court is required to impose assessments in the following amounts with respect to offenses committed on or after November 18, 1988.

Individuals:

$5, if the defendant is an individual convicted of an infraction or a Class C misdemeanor;

$10, if the defendant is an individual convicted of a Class B misdemeanor;

$25, if the defendant is an individual convicted of a Class A misdemeanor;

$50, if the defendant is an individual convicted of a felony.

Organizations:

$50, if the defendant is an organization convicted of a Class B misdemeanor;

$125, if the defendant is an organization convicted of a Class A misdemeanor; and

$200, if the defendant is an organization convicted of a felony. 18 U.S.C. 3013.",

and in the second paragraph by deleting "The Act requires the court" and inserting in lieu thereof "With respect to offenses committed prior to November 18, 1988, the court is required".

*Reason for Amendment:* The purpose of this amendment is to conform the commentary to the statute as amended by Section 7085 of the Omnibus Anti-Drug Abuse Act of 1988.

*§ 5F5.2 Home Detention*

260. *Use of Home Dentention as an Alternative to Imprisonment:* Section 7305 of the Omnibus Anti-Drug Abuse Act of 1988 provides that home detention may be imposed as a condition of probation, parole and supervised release, but only as an alternative to incarceration. The guidelines do not permit home detention to be imposed as a substitute for imprisonment (see § 5C2.1(e) and Application Note 5 of the Commentary to § 5C2.1). The Commission seeks public comment on the question of whether the policy reflected in the existing guidelines should or should not be revised to accomodate the provision in § 7305 in light of the existing guideline distinction between home detention, community or intermittent confinement, and imprisonment. Comment would also be welcomed on the question of whether home detention, if substituted for imprisonment, should be done so as an exact equivalent (i.e., one day for one day), or if some different ratio is appropriate, and whether electronic monitoring should be required to supplement probation officer enforcement of this condition. Finally, comment is invited on the question of whether home confinement should be limited to certain categories of offenses and offenders.

*§ 5F5.3 Community Service*

261. *Proposed Amendment:* Section 5F5.3(a) is amended by deleting "(a)", and by inserting "and sentenced to probation" immediately following "felony".

Section 5F5.3(b) is amended by deleting:

"(b) With the consent of the victim of the offense, the court may order a defendant to perform services for the benefit of the victim in lieu of monetary restitution. 18 U.S.C. 3663(b)(4).".

*Reason for Amendment:* The purpose of this amendment is to correct an erroneous statement in § 5F5.3(a) and to remove § 5F5.3(b) which deals with restitution and not community service and, thus, should appear at § 5E4.1. A related amendment inserts the deleted language at § 5E4.1 (Restitution). Related amendment: 254 (§ 5E4.1).

*§ 5F5.4 Order of Notice to Victims*

262. *Proposed Amendment:* The Commentary to § 5F5.4 captioned "Background" is amended by deleting:

"The legislative history indicates that, although the sanction was designed to provide actual notice to victims, a court might properly limit notice to only those victims who could be most readily identified, if to do otherwise would unduly prolong or complicate the sentencing process.".

*Reason for Amendment:* The purpose of this amendment is to delete an unnecessary statement that could be subject to misinterpretation.

*§ 5F5.5 Occupational Restrictions*

263. *Proposed Amendment:* Section 5F5.5(a) is amended by deleting:

"(2) there is a risk that, absent such restriction, the defendant will continue to engage in unlawful conduct similar to that for which the defendant was convicted; and

(3) imposition of such a restriction is reasonably necessary to protect the public.",

and inserting in lieu thereof:

"(2) imposition of such a restriction is reasonably necessary to protect the public because there is reason to believe that, absent such restriction, the defendant will continue to engage in unlawful conduct similar to that for which the defendant was convicted.",

and by inserting "and" at the end of subsection (a)(1).

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline.

*§ 5G1.1 Sentencing on a Single Count of Conviction*

264. *Proposed Amendment:* Section 5G1. 1 and the accompanying Commentary are amended by deleting:

"(a) If application of the guidelines results in a sentence above the maximum authorized by statute for the offense of conviction, the statutory maximum shall be the guideline sentence.

(b) If application of the guidelines results in a sentence below the minimum sentence required by statute, the statutory minimum shall be the guideline sentence.

(c) In any other case, the sentence imposed shall be the sentence as determined from application of the guidelines.

**Commentary**

If the statute requires imposition of a sentence other than that required by the guidelines, the statute shall control. The sentence imposed should be consistent with the statute but as close as possible to the guidelines.", and inserting in lieu thereof:

"(a) Where the statutorily authorized maximum sentence is less than the minimum of the applicable guideline range, the statutorily authorized maximum sentence shall be the guideline sentence.

(b) Where a statutorily required minimum sentence is greater than the maximum of the applicable guideline range, the statutorily required minimum sentence shall be the guideline sentence.

(c) In any other case, the sentence may be imposed at any point within the applicable guideline range, provided that the sentence—

(1) is not greater than the statutorily authorized maximum sentence, and

(2) is not less than any statutorily required minimum sentence.

**Commentary**

This section describes how the statutorily authorized maximum sentence, or a statutorily required minimum sentence, may affect the determination of a sentence under the guidelines. For example, if the applicable guideline range is 51–63 months and the maximum sentence authorized by statute for the offense of conviction is 48 months, the sentence required by the guidelines under subsection (a) is 48 months; a sentence of less than 48 months would be a guideline departure. If the applicable guideline range is 41–51 months and there is a statutorily required minimum sentence of 60 months, the sentence required by the guidelines under subsection (b) is 60 months; a sentence of more than 60 months would be a guideline departure. If the applicable guideline range is 51–63 months and the maximum sentence authorized by statute for the offense of conviction is 60 months, the guideline range is restricted to 51–60 months under subsection (c).".

*Reason for Amendment:* The purpose of this amendment is to clarify the guideline.

*§ 5G1.2 Sentencing on Multiple Counts of Conviction*

265. *Proposed Amendment:* The Commentary to § 5G1.2 is amended by inserting the following as an additional paragraph immediately following the first paragraph:

"This section applies to multiple counts of conviction (1) contained in the same indictment or information, or (2) contained in different indictments or informations for which sentences are to be imposed at the same time or in a consolidated proceeding.".

*Reason for Amendment:* The purpose of this amendment is to clarify that this guideline applies in the case of separate indictments that are consolidated for purposes of sentencing.

266. *Proposed Amendment:* The Commentary to § 5G1.2 is amended in the second paragraph by deleting "any combination of concurrent and consecutive sentences that produces the total punishment may be imposed" and inserting in lieu thereof "consecutive sentences are to be imposed to the extent necessary to achieve the total punishment.".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary.

*§ 5G1.3 Convictions on Counts Related to Unexpired Sentences*

267. *Proposed Amendment:* Section 5G1.3, and the Commentary thereto, is deleted in its entirety as follows:

*"§ 5G1.3 Convictions on Counts Related to Unexpired Sentences*

If at the time of sentencing, the defendant is already serving one or more unexpired sentences, then the sentences for the instant offense(s) shall run consecutively to such unexpired sentences, unless one or more of the instant offenses(s) arose out of the same transactions or occurrences as the unexpired sentences. In the latter case, such instant sentences and the unexpired sentences shall run concurrently, except to the extent otherwise required by law.

**Commentary**

This section reflects the statutory presumption that sentences imposed at different times ordinarily run consecutively. See 18 U.S.C. 3584(a). This presumption does not apply when the new counts arise out of the same transaction or occurrence as a prior conviction.

Departure would be warranted when independent prosecutions produce anomalous results that circumvent or defeat the intent of the guidelines.",

and the following inserted in lieu thereof:

*"§ 5G1.3 Imposition of a Sentence on a Defendant Serving an Unexpired Term of Imprisonment*

If the instant offense was committed while the defendant was serving a term of imprisonment (including work release, furlough, or escape status), the sentence for the instant offense shall be imposed to run consecutively to the unexpired term of imprisonment.

**Commentary**

Under this guideline, the court shall impose a consecutive sentence where the instant offense (or any part thereof) was committed while the defendant was serving an unexpired term of imprisonment.".

*Reason for Amendment:* This amendment provides a requirement for a consecutive sentence for the instant offense when the instant offense was committed while the defendant was serving a term of imprisonment.

*Additional Explanatory Statement:* This amendment specifies circumstances in which a consecutive sentence is required. Erroneous language in the Commentary to this guideline concerning 18 U.S.C. 3584(a) is deleted. The Commission seeks comment as to what approach should be taken concerning sentences imposed at different times not covered by the revised provision.

VOL 54 ISS 41 MR 3 1989 UMI

*§ 5K1.1 Substantial Assistance to Authorities (Policy Statement)*

268. *Proposed Amendment:* Section 5K1.1 is amended by deleting "made a good faith effort to provide" and inserting in lieu thereof "provided".

*Reason for Amendment:* The purpose of this amendment is to clarify this policy statement.

*Additional Explanatory Statement:* The purpose of this amendment is to clarify the Commission's intent that departures under this policy statement be based upon the provision substantial assistance. The existing policy statement could be interpreted requiring only a willingness to provide such assistance.

269. *Proposed Amendment:* Section 5K1.1(a) is amended in the first sentence by deleting "conduct".

*Reason for Amendment:* The purpose of this amendment is to make an editorial correction.

*§ 5K1.2 Refusal to Assist (Policy Statement)*

270. *Proposed Amendment:* The Commentary to § 5K1.2 captioned "Background" is amended by deleting "Refusal to assist authorities based upon continued involvement in criminal activities and association with accomplices" and inserting in lieu thereof "A defendant's motives for refusing to assist authorities".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary.

**Chapter Five, Part K, Subpart 2 (General Provisions)**

271. *Proposed Amendment:* Chapter Five, Part K is amended by adding at the end:

*"§ 5K2.15 Terrorism (Policy Statement)*

If the defendant committed the offense in furtherance of a terroristic action, the court may increase the sentence above the authorized guideline range.".

*Reason for Amendment:* This amendment adds a specific policy statement concerning consideration of an upward departure when the offense is committed for a terroristic purpose. This amendment does not make a substantive change. Such conduct is currently included in the broader policy statement at § 2K2.9 (Criminal Purpose).

*§ 6A1.1. Presentence Report*

272. *Proposed Amendment:* Section 6A1.1 is amended in the title by inserting at the end "(Policy Statement)".

*Reason for Amendment:* The purpose of this amendment is to designate § 6A1.1 as a policy statement.

*Additional Explanatory Statement:* Designation of this section as a policy statement is more consistent with the nature of the subject matter. Related amendment: 274 (§ 6A1.3).

*§ 6B1.2 Standards for Acceptance of Plea Agreements (Policy Statement)*

273. *Proposed Amendment:* The Commentary to § 6B1.2 is amended in the second paragraph by deleting "and does not undermine the basic purposes of sentencing.", and inserting in lieu thereof "(i.e., that such departure is authorized by 18 U.S.C. 3553(b)). See generally Chapter 1, Part A (4)(b) (Departures).".

*Reason for Amendment:* The purpose of this amendment is to clarify the Commentary.

*§ 6A1.3 Resolution of Disputed Factors*

274. *Proposed Amendment:* Section 6A1.3 is amended in the title by inserting at the end "(Policy Statement)".

*Reason for Amendment:* The purpose of this amendment is to designate § 6A1.3 as a policy statement.

*Additional Explanatory Statement:* Designation of this section as a policy statement is more consistent with the nature of the subject matter. Related amendment: 272 (§ 6A1.1).

**Appendix A—Statutory Index**

275. *Proposed Amendment:* Appendix A (Statutory Index) is amended in the second sentence of the "Introduction" by deleting "conduct" and inserting in lieu thereof "nature of the offense conduct charged in the count", and by deleting "select" and inserting in lieu thereof "use"; and in the third sentence of the "Introduction" by deleting "the court is to apply" and inserting in lieu thereof "use", by deleting "which is", and by deleting "conduct for" and inserting in lieu thereof "nature of the offense conduct charged in the count of".

*Reason for Amendment:* The purpose of this amendment is to clarify the operation of the Statutory Index in relation to §§ 1B1.1 and 1B1.2(a).

276. *Proposed Amendment:* Appendix A is amended on the line beginning "18 U.S.C. 371" by inserting "2A2.1, 2D1.4," immediately before "2T1.9".

*Reason for Amendment:* The purpose of this amendment is to make the Statutory Index more comprehensive.

277. *Proposed Amendment:* Appendix A is amended by deleting ", 2A3.1" from the line beginning with "18 U.S.C. 113(a)".

*Reason for Amendment:* The purpose of this amendment is to correct a clerical error.

278. *Proposed Amendment:* Appendix A is amended by inserting as an additional paragraph at the end of the Introduction:

"The guidelines do not apply to any count of conviction that is a Class B or C misdemeanor or an infraction. (See § 1B1.9.)".

Appendix A is amended by deleting:
